

Annex B

Consultation Response Form

Your name: **INIO-0 URIBEE CHEVARRIA**

Organisation (if applicable): **A+ EPC**

[REDACTED]

[REDACTED]

[REDACTED]

(i) Are the views expressed on this consultation an official response from the organisation you represent or your own personal views?

Organisational Personal Views

(ii) Are your views expressed on this consultation in connection with your membership or support of any group? If yes please state name of group:

Yes No

Name of group:

(iii) Please tick the one box that best describes your organisation:

Builders/Developers:	Property Management:
Builder / Main contractor: <input type="checkbox"/>	Housing association (registered social landlord) <input type="checkbox"/>
Builder/ Small builder: (extensions/repairs/maintenance, etc) <input type="checkbox"/>	Residential landlord, private sector <input type="checkbox"/>
Installer/ special sub-contractor <input type="checkbox"/>	Commercial <input type="checkbox"/>
Commercial developer <input type="checkbox"/>	Public sector <input type="checkbox"/>
House builder <input type="checkbox"/>	

Building occupier: Home owner <input type="checkbox"/> Tenant (residential) <input type="checkbox"/> Commercial Building <input type="checkbox"/>	Building Control Bodies: Local authority building control <input type="checkbox"/> Approved Inspector <input type="checkbox"/>
Energy Sector <input checked="" type="checkbox"/>	Fire and Rescue Authority <input type="checkbox"/>
Designers/Engineers/Surveyors: Architect <input type="checkbox"/> Civil/Structural engineer <input type="checkbox"/> Building services engineer <input type="checkbox"/> Surveyor <input checked="" type="checkbox"/> COMMERCIAL ENERGY ASSESSOR PART L2A ASSESSOR	Specific Interest: Competent person scheme operator <input type="checkbox"/> National representative or trade body <input type="checkbox"/> Professional body or institution <input type="checkbox"/> Research/ academic organisation <input type="checkbox"/>
Manufacturer/ Supply Chain <input type="checkbox"/>	Other (please specify) <input type="text"/>

(iv) Please tick the *one* box which best describes the size of your or your organisation's business?

- Micro – typically 0 to 9 full-time or equivalent employees (incl. sole traders)
- Small – typically 10 to 49 full-time or equivalent employees
- Medium – typically 50 to 249 full-time or equivalent employees
- Large – typically 250+ full-time or equivalent employees
- None of the above (please specify)

(vi) Are you or your organisation a member of a competent person scheme?

Yes No

Name of scheme:

STROMA, NHER

(vii) Would you be happy for us to contact you again in relation to this consultation?

Yes No

WG will process any personal information that you provide us with in accordance with the data protection principles in the Data Protection Act 1998. In particular, we shall protect all responses containing personal information by means of all appropriate technical security measures and ensure that they are only accessible to those with an operational need to see them. You should, however, be aware that as a public body, the Welsh Government is subject to the requirements of the Freedom of Information Act 2000, and may receive requests for all responses to this consultation. If such requests are received we shall take all steps to anonymise responses that we disclose, by stripping them of the specifically personal data – name and e-mail address – you supply in responding to this consultation. If, however, you consider that any of the responses that you provide to this survey would be likely to identify you irrespective of the removal of your overt personal data, then we should be grateful if you would indicate that, and the likely reasons, in your response, for example in the relevant comments box.

Questions:

New homes

1. Do you agree with the Government's preference for a CO₂ saving of 40% reduction in carbon dioxide emissions compared to Part L 2010.

No change to 2010

40% CO₂ saving

25% CO₂ saving

Something else (please explain below)

Don't know

Comments

2. Do you agree with the proposal for an 'aggregate' approach to CO₂ target setting for new homes in 2015? The CO₂ target for any individual dwelling varies depending on the ease with which the building can achieve the target, with the overall required CO₂ saving achieved when aggregated over the build mix.

Yes No Don't know

Comments

3. Do you agree with the proposal for a compliant option based on a consistent recipe of elemental specifications for fabric, services plus an additional CO₂ saving equivalent to an amount of photovoltaic (PV). Please justify your choice.

Yes No Don't know

Comments

4. The main difference between the recipes is the required system efficiency for each fuel, which is appropriate for the heating system type. By adopting this approach to different fuel types, there is no need for a separate fuel factor. Do you agree with the proposed approach?

Yes No Don't know

Comments

5. For the CO₂ savings proposed, are the recipe specifications a sensible way of achieving them? Please justify your choice.

Yes No Don't know

Comments

6. In approaching the selection of the amount of PV to be installed on dwellings, do you prefer?

Fixed percentage of building foundation area

Proportion of gross internal floor area with a practical cap

Don't know

Comments

7. Do you agree that the limits on design flexibility 'backstop' values for fabric elements in new homes should be changed from the current reasonable provision in the technical guidance to become mandatory?

Yes

No

Don't know

Comments

8. Do you agree with the changes to the 'backstop' values proposed? Please explain your decision.

Yes

No

Don't know

Comments

9. Do you have any other comments on the proposed changes to Approved Document L1A or the domestic National Calculation Methodology? Please make it clear which issue each comment relates to by identifying the relevant paragraph number.

Comments

10. The Impact Assessment makes a number of assumptions on fabric/services/ renewables costs, new build rates, phase-in rates, learning rates, etc for new homes. Do you think these assumptions are fair and reasonable? Please justify your views.

Yes No Don't know

Comments

11. Overall, do you think the impact assessment is a fair and reasonable assessment of the potential costs and benefits of the proposed options for new homes? Please justify your view and provide alternative evidence if necessary.

Yes No Don't know

Comments

New non-domestic buildings

12. Do you agree with the proposal for 2013 for non-domestic buildings to explicitly regulate energy efficiency separately from low carbon technologies through the assessment of primary energy consumption (PEC)? Does PEC seem like a reasonable basis for standard setting?

Yes No Don't know

Comments

If s-its better He reduce demand approach

13. Which package of fabric and services should be selected: 7% or 10%? Please give reasons for your choice.

7%

10%

Don't know

Comments

Adapts better to different building needs.

14. Do you foresee any particular issues for certain categories of building to meet the TPEC or TER?

Yes

No

Don't know

Comments

It may create big differences in TER-TPEC results for buildings sensitive to be defined as different "building types" in SBEM i.e. office vs warehouse

15. Which approach should be utilized to incorporate the contribution of low carbon technologies into the setting of the Target Emission Rate (TER), for non domestic buildings?

Fixed carbon reduction (in kg.CO₂/m²/year)

Percentage of roof area of PV

Other

Don't know

Please give reasons for your choice

Most straightforward approach

16. The proposals explain the Government's preference for a 20% aggregate improvement in CO₂ performance standards for new non-domestic buildings from October 2013. Which option do you prefer and why?

No change

Target A: 10% aggregate improvement (1% PV)

Target B: 11% aggregate improvement (No PV)

Target C: 20% aggregate improvement (5% PV)

Don't know

Please give reasons for your choice

Best approach to meet 2020 Zero Carbon Non-Domestic New Build Target

17. Do the proposed 2013 notional buildings as set out in the changes to the National Calculation Methodology seem like a reasonable basis for standards setting? Please provide comments on the method used to develop the notional buildings and particular elements of one or more of the notional buildings, if relevant.

Yes No Don't know

Comments

Different approach for small sized buildings (<250m²) needed.

18. Do you think that a further recipe should be created for buildings under 250m² and aligned with the proposed domestic recipe? Are there particular reasons why smaller buildings find compliance with the non-domestic recipes difficult? Please justify your views.

Yes No Don't know

Comments

Should be kept within PLZA, SBEM. No for SAP.

adopt different calculation for <250m²

keep it Commercial as they are serviced quite differently (aircon, display lighting, restaurant kitchen, freezer...)

19. Although we recognise that some buildings may need to be serviced in a particular way for legitimate functional or environmental reasons, should Part L incentivise a lower carbon servicing strategy (as with the current Energy Performance Certificate methodology), by basing the notional building on mixed-mode ventilation?

Yes No Don't know

Comments

Buildings should be designed to use less ducting and energy consuming systems.

20. Do you have any other comments on the proposed changes to Approved Document L2A or the non-domestic National Calculation Methodology? Please make it clear which issue each comment relates to by identifying the relevant paragraph number.

Comments

Improve Heating & Hot Water Bi-valent systems
make it more clear and flexible.

21. The Impact Assessment makes a number of assumptions on the costs of fabric/services/renewables, new build rates, etc for new non-domestic buildings. Do you think these assumptions are fair and reasonable? Please justify your views.

Yes No Don't know

Comments

22. Overall, do you think the impact assessment is a fair and reasonable assessment of the potential costs and benefits of the proposed options for new non-domestic buildings?

Please justify your view and provide alternative evidence if necessary.

Yes No Don't know

Comments

Cumulative impact of policies

23. Overall, do you think the assessment of the impact on development is broadly fair and reasonable? Please justify your view and provide alternative evidence if necessary.

Yes No Don't know

Comments

National Planning Policy Review

24. What role should planning play in facilitating higher carbon standards? Should it focus on facilitating site wide energy opportunities that will be needed as we move towards zero or near zero carbon buildings?

Views

Yes. Planning Authority should be more open minded about new LCC systems being seeable from public view

25. What are the implications from future (and regular) changes to the Code for Sustainable Homes and BREEAM on the implementation of the policy?

Views

0.

26. Are the costs of assessment and certification now disproportionate to the costs and benefits of achieving a minimum sustainable buildings standard level?

Yes No Don't know

Comments

27. What should be the role of local planning authorities in setting local standards above and beyond Building Regulations? How can we ensure there is a level playing field of standards across Wales?

Views

See 24

28. What do you see as the positive/negative impacts of removing Part B of the policy expecting buildings to be certified against Code/BREEAM?

Views

Don't know

29. Is there a better, alternative, way to rewards and secure sustainable buildings (above the regulatory minimum) other than using national planning policy? What opportunities are there for future changes to Building Regulations?

Views

Taxation. Tax for CO₂/m²/year emitted. Create different tax band

30. To what extent are duplication of standard and approval systems an issue? Would the removal of the PfSB policy assist in reducing duplication?

Views

Don't know

31. What opportunities are there for higher standards to be delivered on strategic sites identified as part of the Local Development Plan?

Views

Demand higher standards.

Existing buildings

32. Do you agree with the proposal to raise performance standards for domestic replacement windows? Please explain your answer.

Yes No Don't know

Comments

To meet Zero Carbon Dwelling deadline

33. Do you agree with the proposal to raise performance standards for domestic extensions? Please explain your answer.

Yes No Don't know

Comments

Yes Ensure refurbishment's reduced CO₂ emissions

34. Do you agree with the proposal to raise performance standards for non-domestic extensions? Please explain your answer.

Yes No Don't know

Comments

As 33

35. Do you agree that the exemption for conservatories or porches should be removed where an individual room heat or air conditioning unit is installed? How effective would this change be in limiting energy use/emissions, or are there other ways by which energy performance might be improved where conservatories or porches are installed?

Yes No Don't know

Comments

Do not know about effectivity
Conservatories are part of the building

36. Do you agree with the proposal to require consequential improvements upon extensions or increases in habitable space in existing homes below 1000m²? Please explain your view.

Yes No Don't know

Comments

As B J

37. The consultation explains that the regulatory requirement for consequential improvements upon domestic extensions or increases in habitable space would be limited to a list of measures comprising a minimum standard of loft insulation, hot water cylinder insulation and the installation of cavity wall insulation.

Do you agree with this list of measures?

Should this list be different (please explain below)?

Another approach (please explain below)

Don't know

Comments

More improvements: - Heating & control
- Draught proofing
- Others..

38. What effect do you think the requirements for consequential improvements may have on the demand for repair, maintenance and improvement activity? Please use evidence to explain your answer.

Increase demand

Reduce demand

No effect

Don't know

Comments

More work will be needed

39. Do you agree with the proposal to introduce consequential improvements upon extensions or increases in habitable space in non-domestic buildings under 1000m²? Please explain your view.

Yes No Don't know

Comments

As 33

40. The consultation proposes that for non-domestic buildings, any measure from list which is used to generate Green Deal assessments, the list in SBEM used to generate Energy Performance Certificate recommendations and the existing list of typical consequential improvement measures from Approved Document L2B should be eligible to be a consequential improvement. Do you agree?

Yes
 No
 Prefer a different list (please specify)
 Don't know

Comments

A Good way to start improvement

41. Do you agree that there should not be major problems in extending the requirement for consequential improvements for the building control process? If you do foresee issues, what are they and how might these be addressed?

Yes No Don't know

Comments

Issues: planning authorities should pay more attention (be more demanding) with energy efficiency and less with building's external aspect.

42. Do you have any other comments on the proposed changes to Approved Document L1B? Please make it clear which issue each comment relates to by identifying the relevant paragraph number.

Comments

No Comments

43. Do you have any other comments on the proposed changes to Approved Document L2B? Please make it clear which issue each comment relates to by identifying the relevant paragraph number.

Comments

No Comments

44. Do you think that the Impact Assessment is a fair and reasonable assessment of the potential costs and benefits of raising the performance standards for replacement domestic windows and domestic/non-domestic extensions? Please justify your view and provide alternative evidence if necessary.

Yes No Don't know

Comments

45. Overall, do you think the impact assessment is a fair and reasonable assessment of the potential costs and benefits of the proposed options for consequential improvements in existing homes? Please justify your view and provide alternative evidence if necessary.

Yes No Don't know

Comments

46. Overall, do you think the impact assessment is a fair and reasonable assessment of the potential costs and benefits of the proposed options for consequential improvements in existing non-domestic buildings? Please justify your view and provide alternative evidence if necessary.

Yes No Don't know

Comments

Compliance and Performance

47. For new dwellings, Welsh Government is proposing to develop a compliance checklist. Do you think such a checklist would be used sufficiently to warrant its development?

Yes No Don't know

Comments

48. If such a checklist was developed, what should it cover?

Comments

Minimum values for U values, efficiency...
similar to CZA BREK doc.

49. If the checklist was taken forward, who should be involved in its development?

Comments

RIBA, DECC, BRE, ESC

53. Is the newly formatted ADL1B easier to understand and use?

Yes No Don't know

Comments

54. Are there any further amendments to the newly formatted ADL1B that you would recommend? If so, please provide details.

Yes No Don't know

Comments

55. How do the consultation proposals impact on the work of Local Authorities and Approved Inspectors? Please give positive and negative impacts.

Comments

Unknown

56. We have asked a number of specific questions. If you have any related issues which we have not specifically addressed, please use this space to report them:

Please enter here:

Compliance !! I have seen PLZA Assessments issued by non-competent persons (they were not LU CEA Assessors). The Building Control Officer could not spot the report was not valid.

Responses to consultations may be made public – on the internet or in a report. If you would prefer your response to be kept confidential, please tick here:

- Better awareness / knowledge for BCOs and Local Planning Authorities.
- maybe PLZA assessment should be lodged as EPCs?

50. Would any other approach be likely to prove more effective instead (such as a PAS³⁰ type approach).

Yes No Don't know

Comments

- 51a. Would it be preferable for buildings of a domestic nature to be able to achieve compliance through applying the recipe in AD L1A, in acknowledgement of the domestic nature of such buildings, rather than demonstrating compliance with AD L2A?

Yes No Don't know

Comments

Domestic buildings should look at AD L1A

- 51b. What are the arguments for and against this approach?

Comments

AD L2A is more demanding

52. Additional views and suggestions for addressing compliance and performance issues in new non domestic buildings would be welcome.

Comments

Favour naturally ventilated narrow plan buildings.

³⁰ A PAS is a Publicly Available Specification, and the PAS would set out a quality assurance approach.
