W G Roberts

Llanfachraeth Community Council

1. Renewable Energy and District Heat Networks (policies 10-15)

- To what extent do you agree or disagree with the NDF's policies to lower carbon emissions in Wales using...

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	<i>Don't know</i>	<i>No opinion</i>
Large scale wind and solar developments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
District heat networks	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- If you disagree with the NDF's approaches to green infrastructure, renewable energy or district heat networks, what alternative approaches should we consider to help Wales to enhance its biodiversity and transition to a low carbon economy?

Llanfachraeth CC disagree and are concerned about Policies 10, 11, 12 and 13. On Anglesey, the selection of the area to be designated as Priority Area 1, which covers the central backbone of the island, will seriously impact on the landscape. A landscape already designated by the report as high environmental and landscape value. The impact on the landscape will be dramatic, turning a low undulating agricultural landscape into a large wind turbine farm. The impact on tourism, agriculture, local economy and property values will be devastating. The scale and type of generating technology – 250m high turbines over a quarter of the island's surface is inappropriate and will be the death of tourism on which the island largely depends. Who wants a holiday on a wind farm?

We would ask you to re-visit these proposals, carry out a proper consultation, involving the residents of Anglesey.

This CC does not agree with more onshore wind farms of this size on the island when there are off-shore and other options available.
