Subject: National Grid Capacity

Dear Team NDF

As a follow up on the seminar you presented to Pembrokeshire County Council in which I raised the point that there have been a number of situations when , despite the necessary planning consents being granted, the projects to generate electricity have not gone ahead due to the lack of capacity in the grid. The map showing areas with the potential to develop non fossil fuel generated electricity In north Pembrokeshire could be seen to be misleading unless National Government ensures that the grid capacity is increased so I ask that this be lobbied for please.

Cllr Myles Pepper, Fishguard North-East Ward
