

Draft National Development Framework

1. NDF Outcomes (chapter 3)

Q1. The NDF has proposed 11 Outcomes as an ambition of where we want to be in 20 years' time. Overall, to what extent do you agree or disagree the 11 Outcomes are a realistic vision for the NDF?

Neither agree nor disagree

Q2. To what extent do you agree with the 11 Outcomes as ambitions for the NDF?

Agree with some of them

2. Spatial Strategy (policies 1 - 4)

Q3. The NDF spatial strategy is a guiding framework for where large-scale change and nationally important developments will be focused over the next 20 years. To what extent do you agree or disagree with the spatial strategy and key principles for development in...

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	Don't know	No opinion
Urban areas (Policies 1, 2 & 3)							X
Rural areas (Policy 4)					X		

Q4. If you have any comments on the spatial strategy or key principles for development in urban and rural areas, please tell us:

No Response

3. Affordable Housing (policy 5)

Q5. The NDF sets out the approach for providing affordable housing, encouraging local authorities, social landlords, and small and medium-sized construction and building enterprises to build more homes. To what extent do you agree or disagree with the approach to increasing affordable housing?

No opinion

Q6. If you disagree, in what other ways can the NDF approach the delivery of affordable housing?

No Response

4. Mobile Action Zones (policy 6)

Q7. To what extent do you agree or disagree the identification of mobile action zones will be effective in encouraging better mobile coverage?

No opinion

Q8. If you disagree, in what other ways can the NDF improve mobile phone coverage in the areas which currently have limited access?

No Response

5. Low Emission Vehicles (policy 7)

Q9. To what extent do you agree or disagree that policy 7 will enable and encourage the roll-out of charging infrastructure for ultra-low emission vehicles?

No opinion

Q10. If you disagree, in what other ways can the NDF enable and encourage the roll-out of charging infrastructure for ultra-low emission vehicles?

No Response

6. Green Infrastructure (policies 8 & 9)

Q11. To what extent do you agree or disagree with the approach to maintaining and enhancing biodiversity and ecological networks?

No opinion

7. Renewable Energy and District Heat Networks (policies 10-15)

Q12. To what extent do you agree or disagree with the NDF's policies to lower carbon emissions in Wales using...

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	Don't know	No opinion
Large scale wind and solar developments					X		
District heat networks							X

Q13. If you disagree with the NDF's approaches to green infrastructure, renewable energy or district heat networks, what alternative approaches should we consider to help Wales to enhance its biodiversity and transition to a low carbon economy?

It's completely unacceptable for central government to dictate to people living in certain areas that it has, on their behalf, "accepted landscape change". No. We do not accept "change" in our area which actually translates to "complete eradication of the hills as a recreational, regenerative, iconic place to be and to see". You will permanently destroy large areas of important upland habitat, unavoidably and permanently increasing flood risk by installation of huge areas of concrete, and for the life of the turbines the hill landscape in our area will be utterly obliterated. We do NOT accept this. Taken in the round, nothing about this proposal is sustainable, nothing about it is acceptable. I completely agree that the world as a whole must, fast, move to sustainable forms of energy, and that wind turbines may have a part to play in this despite the huge environmental costs associated with the energy, concrete and steel involved in their manufacture; but it's now accepted that offshore wind is far preferable to onshore in a great number of ways, including (but not limited to) the impact of them on the natural landscapes which make our island so precious.

If onshore wind is felt to be unavoidable, then I would invite you to consider installing the turbines in areas 1) where there is already suitable infrastructure, 2) close to areas of highest demand, and 3) where the turbines will not be catastrophically destroying crucial natural landscapes: I invite you to change your policy to install any onshore turbines you feel are essential close to Cardiff and other large population centres. Leave the hills to continue their important roles in flood prevention and the uplifting and refreshment of the bodies and souls of all of us.

On a completely separate point: there was only the most fleeting mention of tidal or wave energy generation in your strategy, compared with the concentration on wind and solar and even nuclear energy. This seems a gigantic and extraordinary omission.

8. The Regions (policy 16)

Q14. To what extent do you agree or disagree with the principle of developing Strategic Development Plans prepared at a regional scale?The NDF identifies three overall regions of Wales, each with their own distinct opportunities and challenges. These are North Wales, Mid and South West Wales, and South East Wales.

Strongly disagree

9. North Wales (policies 17-22)

Q15. We have identified Wrexham and Deeside as the main focus of development in North Wales. A new green belt will be created to manage the form of growth. A number of coastal towns are identified as having key regional roles, while we support growth and development at Holyhead Port. We will support improved transport infrastructure in the region, including a North Wales Metro, and support better connectivity with England. North West Wales is recognised as having potential to supply low-carbon energy on a strategic scale. To what extent do you agree or disagree with the proposed policies and approach for the North Region?

No opinion

10. Mid and South West Wales (policies 23-26)

Q16. Swansea Bay and Llanelli is the main urban area within the region and is our preferred location for growth. We also identify a number of rural and market towns, and the four Haven Towns in Pembrokeshire, as being regionally important. The haven Waterway is nationally important and its development is supported. We support proposals for a Swansea Bay Metro. To what extent do you agree or disagree with the proposed policies and approach for the Mid and South West Region?

Strongly disagree

11. South East Wales (policies 27-33)

Q17. In South East Wales we are proposing to enhance Cardiff's role as the capital and secure more sustainable growth in Newport and the Valleys. A green belt around Newport and eastern parts of the region will support the spatial strategy and focus development on existing cities and towns. Transport Orientated Development, using locations benefitting from mainline railway and Metro stations, will shape the approach to development across the region. There is support for the growth and development of Cardiff Airport. To what extent do you agree or disagree with the proposed policies and approach for the South East Region?

No opinion

Q18. If you have any comments about the NDF's approach or policies to the three regions, please tell us. If you have any alternatives, please explain them and tell us why you think they would be better.

Why is the heavily populated Swansea area lumped in with the otherwise rural areas in the already disproportionately enormous "region" you define as "Mid and South West Wales"? Would it not be more suitable for it to be added to the other heavily populated areas in your "South East Wales" region? Surely the threats and opportunities are more similar. Mid Wales has very specific needs and views, which are not the same of those of the inhabitants of the urban areas in the south.

12. Integrated Sustainability Appraisal

Q19. As part of the consultation process, an Integrated Sustainability Appraisal (ISA) was conducted to assess the social, economic and environmental impacts of a plan. The report identified a number of monitoring indicators, including health, equalities, Welsh language, the impact on rural communities, children's rights, climate change and economic development. Do you have any comments on the findings of the Integrated Sustainability Appraisal Report? Please outline any further alternative monitoring indicators you consider would strengthen the ISA.

Rural. The key word you blithely skip over in your document is "rural". Areas will no longer be rural if they are developed, nor if they are covered with wind turbines. Think carefully before you act (or allow action). Once our exquisite rural areas are spoiled they will be lost, for ever.

13. Habitats Regulations Assessment

Q20. As part of the development of the NDF, a Habitats Regulations Assessment (HRA) was undertaken. The purpose of the HRA process is to identify, assess and address any 'significant effects' of the plan on sites such as Special Areas of Conservation and Special Protection Areas for birds. Do you have any comments on the Habitats Regulations Assessment report?

No Response

14. Welsh Language

Q21. We would like to know your views on the effects that the NDF would have on the Welsh language, specifically on opportunities for people to use Welsh and on treating the Welsh language no less favourably than English. What effects do you think there would be? How could positive effects be increased, or negative effects be mitigated?

No Response

Q22. Please also explain how you believe the proposed NDF could be formulated or changed so as to have: positive effects or increased positive effects on opportunities for people to use the Welsh language and on treating the Welsh language no less favourably than the English language, and no adverse effects on opportunities for people to use the Welsh language and on treating the Welsh language no less favourably than the English language.

No Response

15. Further comments

Q23. Are there any further comments that you would like to make on the NDF, or any alternative proposals you feel we should consider?

Your consultation is pathetically limited by the very small number of live events held, and by the limited access to these events. Our local AM has pointed this out and requested that more events be held in our area, to no avail.

16. Are you...?

Q24. Are you:

Providing your own personal response

Submit your response

Q25. You are about to submit your response. Please ensure you are satisfied with the answers you have provided before sending.
