---

Dear Sir,

"Environmentalism is the new Communism"

"Man made global warming is a hoax that threatens the future of our children"

Vadav Klaus, President of the Czech Republic from 2003 - 2013.

This is my opinion also and will therefore not be responding to the consultation process for the Draft NDF.

If you believe in Agenda 2030 for sustainable development and zero carbon emissions by 2050 then the Welsh Assembly is right to cover our whole landscape with wind farms and solar panels.

This will all fail to supply a reliable source of power and we will then have power cuts.

All on the basis of a hoax.

Yours Sincerely,

Milton Ellis.
