Subject: Wind farms in Mid Wales
Date: 16 November 2019 00:00:21

In response to the decision of the Assembly to increase the number of Windfarms I Mid Wales I feel it is totally the wrong decision. The area has already got more than enough. Putting them on so many more hilltops will destroy natural habitats, tourism in the area, cause increased flooding and will not answer the nations needs regarding energy requirements.

The plan is short sighted and lacking in any consideration of the results of this policy.

Please consider the local economy.
