Sirs,

The Welsh Government's plans for the destruction of huge swathes of Mid Wales landscape can not be allowed to happen in order to build more wind farms.

Surely it is down to local councils to deal with planning issues such as this. They know how local residents feel about wind farms...despoiling the very thing that visitors come to our area to enjoy, namely its unspoilt beauty.

We have several turbines sited near us.....they have never worked, they never turn, unless powered by a generator. There needs to be a good deal more investigation into this topic, at local level.

A very worrying situation.

Peter and Sarah Dolder
