Subject: Resonse to NDF draft documents

We would be pleased if you would forward our concerns to the relevant people regarding the area known as Hirddywel on the Radnorshire/Montgomery border. This land was previously in the Tan area, but now appears to be just out of the new area 6 designated for solar and windpower. It is as if the new plan has slipped away from the sparsely populated and very suitable areas to include lower lying ground. The Hirddywel site has tremendous potential with the land owners having formed a group for a number of years in the hope of this site being developed. We would be pleased if you would reconsider the positioning of the new boundary by very little movement to include this area. Kind regards, Vern and Sarah Hamer
