Dear Sir / Madam

Re: Draft NDF Consultation response

The draft does not reflect the wishes of the majority of the people living, visiting and using the Mid-Wales area, all of whom value the beauty, relative 'wildness' of the landscape. I feel that communities here are realising that their aspirations for the future of their localities are not being listened to and that Welsh Government is bent on continuing its course of inappropriate, short-sighted industrialising through solar and wind developments purely for the sake of raising money.

The arguments against the spread of wind farms in Wales have been well versed in the past and demonstrations held to show the Welsh Government the depth of people's feelings. Yet, proposals for Wind farm plans continuously reappear, presumably due to heavy lobbying from vested interests, and government's continuing desire for more money.

It's not surprising that communities feel the 'developments' are imposed on them, while their views are ignored, and decisions are made by people who do not represent them

I urge you to abandon these plans which identify and propose energy priority areas that presume in favour of these developments in our treasured country.

Yours sincerely

Gareth Davies
