'To Whom it May Concern:

I'm writing in response to the consultation on the National Development Framework. As a farmer, I am concerned about the growing impacts of climate change and I support the ambition of the NDF to tackle this issue.

However, I am concerned about the way that renewable energy is tackled, particularly in Policy 10 and 11. As a resident of Mid Wales, I have seen the failure of TAN8, with its preferred areas, to deliver onshore wind projects- the SSAs were too restrictive. The NDF takes a similar approach to designating areas and I am concerned that, again, these areas are unsuitable, and some of the best wind farm sites are outside of preferred areas.

I suggest that the preferred area approach is scrapped, which will allow the very best projects to come forward.'
