I am disappointed that once again the Welsh Government is trying to impose top down planning decisions on the Mid Wales community without consultation with local authorities and proper understanding of the adverse affect the erection of large scale wind and solar farms, together with the infrastructure necessary to connect to the National Grid, will have on the local landscape and community.

The incomes of thousands of local people are dependent on the scenic Mid Wales landscape, the hills, green fields and quiet country roads. Clog the hills and fields with wind and solar farms and disrupt our quiet country roads with machinery and large trucks carrying long and wide loads, and thousands of people's livelihoods are in jeopardy. Please think again.

Regards

Patricia Ashcroft (Mrs).
