Subject: Objection to Wind turbines Anglesey.
Date: 13 November 2019 16:20:55

The proposals to install wind turbines of this magnitude will totally decimate the tourist industry in an area desperate to keep what little we have.

Any employment generated will all be transient with minimal benefit to the local community. But with all negative effects of noise and visual intrusion.

Anglesey is desperate for jobs to enhance the area both economically and aesthetically.

These proposals provide neither.

The island is geographically flat so the effects of these monstrous towers will be seen, not only across the island but in many areas on the mainland. It appears that planning issues are totally ignored to attain targets which can be achieved by other means.

The residents of Anglesey will be seriously and adversely affected if this proposal goes ahead and the future of what employment the tourist industry provides will be another nail in coffin of an already highly deprived area. Television programs are constantly extolling the scenic beauty of the island whilst others have filmed whole or part series here.

Please look to redress and improve our economy , but NOT with this proposal.

Glenda, Gavin and Glyn Davies.
