

Dear Team,

Re: Wind Energy Plans

My husband and I wish to register our strong objections at what you are proposing to do to our beautiful land of Wales. Do you not care what will happen to our environment as you industrialise our hillsides. A large part of the economy of Wales is tourism dependent and we need to protect our scenic landscapes.

There is no mention in these plans as to how any electricity is to be connected to the National Grid - drip feeding information (the proposals were brought out during the recess).

Here in Montgomeryshire we have had this fight on our door once before and following a public inquiry they were told to stop. Now you come back with even bigger plans.

What has happened to democracy. In England local councils have to have the backing of the communities to be approved. You have taken control, without obviously that we have poor road and highway access in Powys and haven't got the infrastructure for this decimation of our hillsides. These proposals are completely unacceptable.
