Ref the above consultation, I wish on behalf of my family to object very strongly to these proposals. Similar proposals were put forward a few years ago, and it caused many problems in our village of Trefeglwys. Scottish Power wanted to put a transportation line thorough our village from the Llandrindod Wells region where they wanted to build wind turbines to Carno, where the main hub was going to be built. All our community strongly object to these proposals and do not want to see any more turbines or pylons in Mid Wales.
Please log our objects as part of this consultancy.
Yours Sincerely.

Michael & Brenda Breese-Davies.
