Subject: Ref: Objection to Large scale wind & Solar Development
Date: 01 November 2019 15:25:09

Dear Sirs, I live at [REDACTED] in Powys.

I want to object to any large scale wind an solar development. We live in a particularly beautiful valley and I, as many others do, rely on the beauty of the landscape surrounding to enhance the tourist industry as I let my house out as a holiday let while I live in the annexe of the house. I do this to make ends meet enabling me to live in this area that I love.

Every body who visits here is stunned by the beautiful views and peacefulness, they love the rugged areas and unspoilt mountains of which they all roam.

Any development will have a detrimental effect of me, my family and my business. I feel that other more acceptable options to tackle an energy deficiency should be provided. Simply give grants to householders to install domestic solar panels with a reasonable pay back scheme. In recent years the electric pay back scheme has gone from 30p in the pound to 4pence in the pound making it not viable to install them.

The proposal for the wind and solar development will have a massive impact in this area, spoiling a perfect landscape and it is wrong that the residents in this area have not been consulted about this proposal.

There is also insufficient roadways for any works to be carried out and will cause massive disruption.

The Welsh countryside and landscapes should be protected not changed and this is unacceptable.

Please lodge my objection to The Large scale wind & Solar Development as soon as possible.

Yours faithfully,
Ms Caroline Harris.
