## 1. NDF Outcomes (chapter 3)

The NDF has proposed 11 Outcomes as an ambition of where we want to be in 20 years' time.

- Overall, to what extent do you agree or disagree the 11 Outcomes are a realistic vision for the NDF?

Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	<i>Don't know</i>	<i>No opinion</i>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- To what extent do you agree with the 11 Outcomes as ambitions for the NDF?

Agree with all of them	Agree with most of them	Agree with some of them	Agree with none of them	<i>Don't know</i>	<i>No opinion</i>
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- If you disagree with any of the 11 Outcomes, please tell us why:

Tourists to Wales spend 8 million pounds a day which equates to around 3 billion pounds a year. 100,000 people are employed in Wales in the Tourism industry which is around 10% of our employment. Some of the top tourist things are walking and visiting visitor attractions. Yet this plan suggests that we could cover up to 20 % of the countryside in wind/solar farms. The countryside is seen as one of the major attractions for tourists. Over 1 million tourists come to Wales every year. I can understand some small-scale projects (even though turbines are so inefficient), but the extent suggested in this plan, is unacceptable, to one of our major industries in Wales.

And the public cannot even object to the landscape change?? This cannot be correct – the plan is FOR Wales??

## Spatial Strategy (policies 1 - 4)

The NDF **spatial strategy** is a guiding framework for where large-scale change and nationally important developments will be focused over the next 20 years.

- To what extent do you agree or disagree with the spatial strategy and key principles for development in...

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	<i>Don't know</i>	<i>No opinion</i>
Urban areas (Policies 1, 2 & 3)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Rural areas (Policy 4)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- If you have any comments on the spatial strategy or key principles for development in urban and rural areas, please tell us:

Policy – 4 - Tourists to Wales spend 8 million pounds a day which equates to around 3 billion pounds a year. 100,000 people are employed in Wales in the Tourism industry which is around 10% of our employment. Some of the top tourist things are walking and visiting visitor attractions. Yet this plan suggests that we could cover up to 20 % of the countryside in wind/solar farms. The countryside is seen as one of the major attractions for tourists. Over 1 million tourists come to Wales every year. I can understand some small-scale projects (even though they are so inefficient), but the extent suggested in this plan, is totally unacceptable, to one of our major industries in Wales.

And the public cannot even object to the landscape change?? This cannot be correct – the plan is FOR Wales. Not against it.

## 7. Renewable Energy and District Heat Networks (policies 10-15)

- To what extent do you agree or disagree with the NDF's policies to lower carbon emissions in Wales using...

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	<i>Don't know</i>	<i>No opinion</i>
Large scale wind and solar developments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
District heat networks	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- If you disagree with the NDF's approaches to green infrastructure, renewable energy or district heat networks, what alternative approaches should we consider to help Wales to enhance its biodiversity and transition to a low carbon economy?

Tourists to Wales spend 8 million pounds a day which equates to around 3 billion pounds a year. 100,000 people are employed in Wales in the Tourism industry which is around 10% of our employment. Some of the top tourist things want are walking and visting visitor attractions. Yet this plan suggests that we could cover up to 20 % of the countryside in wind/solar farms. The countryside is seen as one of the major attractions for tourists. Over 1 million tourists come to Wales every year. I can understand some small-scale projects (even though they are so inefficient), but the extent suggested in this plan, is suicide, to one of our major industries in Wales.

And the public cannot even object to the landscape change?? This cannot be correct – the plan is FOR Wales, not AGAINST WALES??

## 15. Further comments

- Are there any further comments that you would like to make on the NDF, or any alternative proposals you feel we should consider?

Concerned about the time scale for public to consult, also WG acceptance of landscape change, and the lack of concern about the damage to ecosystems present on the land "given over" to RE. Lack of public involvement and concern with plan written for RE companies, and not in the interest of the Welsh people. These proposals are unacceptable.
