

National Development Framework: Easy Read questionnaire

Part A – the main points of the NDF

Q1. 1. Do you think we are aiming to do the right things with our plan?

No

Comments:

These proposals are ridiculous in so far as they will industrialise large areas of Wales and totally spoil its natural beauty. I for one am totally against these proposals.

Q2. 2. We have 10 aims in the NDF. Should we think about anything else? Tell us anything we've missed out

Yes

The NDF also needs to think about...

A Wales that keeps its identity, beauty and is not industrialised by 250 M high wind turbines. A Wales that makes best use of its coast to generate clean under sea energy Item 2 (A Wales where people can live happily in the countryside. With good homes, jobs and services.) This can't happen if people are expected to live close to 250 M high wind turbines

Q3. 3. Do you think the Plan will help achieve healthy and well-planned places?

No

Comments:

How can these proposal possible help when people have to live in amongst 250 M high wind turbines. I ask all those who are suggesting this to search their consciences and ask 'Would I be happy to live near 250 M high wind turbines?'

Q4. 4. Do you think the plan will help us take care of our environment?

No

Comments:

This is a case of the tail wagging the dog! Destroying large parts of Wales to try to reduce pollution is not the correct answer. I suggest a much smaller scheme with other sources of power generation like Wave, Tidal, Nuclear, Solar etc. which could provide a much more robust plan and acceptable plan.

Part B – different parts of Wales

Q5. 5. Do you agree with our plans for North Wales?

No

Comments:

As these proposals show Anglesey has many areas of ONB and any 250M high wind turbines that can be seen from any of those areas will totally spoil them. Anglesey relies heavily on tourism Industrialising the centre of the island will destroy this tourism.

Q6. 6. Do you agree with our plans for Mid and South West Wales?

Not sure

Comments:

The areas and number of 250 M high wind turbines should be reduced.

Q7. 7. Do you agree with our plans for South East Wales?

Not sure

Comments:

The areas and number of 250 M high wind turbines should be reduced.

Part C

Q8. 8. Do you have any other comments you would like to make about this plan?

I suggest a much smaller scheme with other sources of power generation like Wave, Tidal, Nuclear, Solar etc. which could provide a much more robust plan and acceptable plan.

Submit your response

Q9. You are about to submit your response. Please ensure you are satisfied with the answers you have provided before sending.

Name

[REDACTED]

Where are you from?
