<u>Organisation (if applicable)</u>	

1. NDF Outcomes (chapter 3)

The NDF has proposed 11 Outcomes as an ambition of where we want to be in 20 years' time.

- Overall, to what extent do you agree or disagree the 11 Outcomes are a realistic vision for the NDF?

Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	<i>Don't know</i>	<i>No opinion</i>
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- To what extent do you agree with the 11 Outcomes as ambitions for the NDF?

Agree with all of them	Agree with most of them	Agree with some of them	Agree with none of them	<i>Don't know</i>	<i>No opinion</i>
<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- If you disagree with any of the 11 Outcomes, please tell us why:

Within this draft plan, large scale wind and solar renewable energy developments are proposed, however Governments cannot just state that landscape related objections will not be accepted – that is not democracy. Such a huge part of Wales cannot be surrendered to these RE projects, and objections and the people local to these project cannot object to the impact on their landscape! Area of land for RE is too large in proportion to Wales.

Lack of public consultation.

Spatial Strategy (policies 1 - 4)

The NDF **spatial strategy** is a guiding framework for where large-scale change and nationally important developments will be focused over the next 20 years.

- To what extent do you agree or disagree with the spatial strategy and key principles for development in...

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	<i>Don't know</i>	<i>No opinion</i>
Urban areas (Policies 1, 2 & 3)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Rural areas (Policy 4)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- If you have any comments on the spatial strategy or key principles for development in urban and rural areas, please tell us:

Rural Areas Policy – 4 - Large scale wind and solar renewable energy development are visually obtrusive and prominent. Governments cannot just state that landscape related objections will not be accepted – that is not democracy. Such a huge part of Wales cannot be surrendered to these RE projects.

Such a huge part of Wales cannot be given over to these RE projects – with objection to landscape not accepted.

Area of land for RE is too large in proportion to Wales.

Lack of public consultation

7. Renewable Energy and District Heat Networks (policies 10-15)

- To what extent do you agree or disagree with the NDF's policies to lower carbon emissions in Wales using...

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	<i>Don't know</i>	<i>No opinion</i>
Large scale wind and solar developments	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
District heat networks	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

- If you disagree with the NDF's approaches to green infrastructure, renewable energy or district heat networks, what alternative approaches should we consider to help Wales to enhance its biodiversity and transition to a low carbon economy?

Disagree with the volume of land that would be compromised by inefficient renewable energy projects which I do not agree are in the interest of the Welsh people. We need to acknowledge other more localised approaches where we are all responsible for our own needs.

No consideration is given for the short lives of the turbines or the enormous costs/destruction with the inherent with distribution network.

Any profits will be for National Grid, not the local economy. However the destruction will be localised. Just imposing this framework on Wales is unacceptable especially after the last Public Inquiry which demonstrated the local unrest with things just being imposed on them.

15. Further comments

- Are there any further comments that you would like to make on the NDF, or any alternative proposals you feel we should consider?

There is evidence of little democracy in this plan which is worrying as it's claimed to be a vision for us. The public can't even object to the damage to the landscape... What?? That is our most important asset.
