

National Development Framework: Easy Read questionnaire

Part A – the main points of the NDF

Q1. 1. Do you think we are aiming to do the right things with our plan?

No

Comments:

I have concerns that the plan will run roughshod over the lesser populated areas. Why is the old county of Radnorshire being destroyed for a dream that can not be achieved

Q2. 2. We have 10 aims in the NDF. Should we think about anything else? Tell us anything we've missed out

Yes

The NDF also needs to think about...

The health for people living in the countryside which might be affected by too many Turbines. The world is made up of more than technology. People should be allowed to enjoy what they wish to enjoy without the threat of it being destroyed.

Q3. 3. Do you think the Plan will help achieve healthy and well-planned places?

No

Comments:

Why destroy what God gave in his wisdom for the people to enjoy, once a thing is destroyed there is no putting it back. Young people need a reason to stay living in the countryside, there for encourage small industry to move to the small towns and not to the big conurbations which seem to create more ill feelings towards your neighbour. If the countryside is spoiled there is no valid reason for young people to stay. A Wales where people can live happily in the countryside must be a goal worth aiming for.

Q4. 4. Do you think the plan will help us take care of our environment?

No

Comments:

Too much hope is being put into unreliable wind turbines and not enough into tidal or river generation. There are some river generators but not enough. Why generate electricity in one area and then have to cover the landscape with pylons to take it to the main centres. It must be better to build something in Cardiff or Swansea.

Part B – different parts of Wales

Q5. 5. Do you agree with our plans for North Wales?

No Response

Q6. 6. Do you agree with our plans for Mid and South West Wales?

No

Comments:

It appears the people of Powys are being totally ignored by the Assembly. We don't ask for a lot but it seems that Powys tourist business will be killed of in the quest by the Welsh government to appear to be green. Powys depends to a large extent on tourists and farming. Turbines do not help generate tourists by there nature they are hostile. Mid Wales does not include Swansea the area should be looked at again and not try to group people according to population mass.

Q7. 7. Do you agree with our plans for South East Wales?

No Response

Part C

Q8. 8. Do you have any other comments you would like to make about this plan?

Turbines do kill birds and when you follow the food chain birds are important. They eat insects and the raptures help control the small mammals. Mice and rats could grow in population to become a health hazard. the pollution caused by building a turbine is not equal to the pollution they claim to save. The watercourse are polluted and might never recover to there former quality. If you have turbines and chicken sheds in close proximity the flies multiply a thousand fold.

It seems that the Welsh Government is not listening to Powys County Council who in turn do not appear to listen to the public. A local wind farm (Hendy) was refused permission by Powys, they went to appeal and the inspector turned them down but a Welsh AM minister over rode everything and gave permission. The MP for the area did a survey in which 78% of the people were against it. My survey (a much smaller and more local one) found 98% were against it but it is still going ahead, at the end of construction it probably will not generate any electricity. Where is the democracy for us. I don't mind anyone reading my comments but wish my E mail address to be hidden.

Submit your response

Q9. You are about to submit your response. Please ensure you are satisfied with the answers you have provided before sending.

Name

[REDACTED]

Where are you from?

[REDACTED]

-

Q10. If you want to receive a receipt of your response, please provide an email address.
