---

Sir/Madam

As a resident of Powys, I write to register my views on the onshore wind and solar development outlined in the National Development Framework.

1. I believe that our landscape is our prime national heritage and as such deserves protection at national level from such industrial scale development.
2. If we turn this beautiful landscape into an industrialised zone we will lose much-needed visitors, tourists and consequently jobs.
3. Mid Wales does not have the infrastructure to support such a development – we have already seen the devastation caused by the Hendy wind farm development with the concrete scarring of the landscape. I should also mention the breaches of planning law in the rush to benefit from subsidies.
4. As well as the wind and solar farms themselves, the required giant pylons will further immeasurably devastate the landscape. Insufficient mention of this is made in the NDF. As a consequence, house values will suffer as well as residents' totally reasonable wishes for a peaceful and rural quality of life – a reason why many of them have opted to live in Mid Wales.
5. It is wholly unacceptable that local decisions on such vast and unwanted development should be overturned at national level.

I hope for the sake of Mid Wales that this part of the NDF is immediately abandoned.

Sincerely

Ann Jackson
