

National Development Framework: Easy Read questionnaire

Part A – the main points of the NDF

Q1. 1. Do you think we are aiming to do the right things with our plan?

Comments:

I strongly object to large scale wind and solar developments in Mid-Wales which will trash the landscape for ever. It is a mis-guided mission to avert climate change but will increase global warming due to the worst gas SF6 in their switching gear. This awful scheme is being imposed on local people and is against the majority's wishes. It is totally unacceptable to industrialise a beautiful, wild landscape to supposedly offset climate change whilst irretrievably wrecking the environment by cladding the hills in irremovable concrete, turbines and pylons.

Q2. 2. We have 10 aims in the NDF. Should we think about anything else? Tell us anything we've missed out

No Response

Q3. 3. Do you think the Plan will help achieve healthy and well-planned places?

No Response

Q4. 4. Do you think the plan will help us take care of our environment?

No

Part B – different parts of Wales

Q5. 5. Do you agree with our plans for North Wales?

No Response

Q6. 6. Do you agree with our plans for Mid and South West Wales?

No

Comments:

Your plans will wreck the unique landscape of Mid-Wales whilst adding the worst global warming gas SF6 used in electrical switch gear. It is 23,500 times more potent than CO2 and active in the atmosphere for 1000 to 3000 years. In 2017 the emissions of SF6 across Europe were equivalent to 6.73 million tonnes of CO2. This is now rising. There are safe alternatives which Wales should guarantee using should it ignore common sense and pursue these destructive plans.

Q7. 7. Do you agree with our plans for South East Wales?

No Response

Part C

Q8. 8. Do you have any other comments you would like to make about this plan?

The local people should be properly consulted and democratically involved before anything is constructed in their region.
