Subject: OBJECTION To The National Development Framework (NDF) For Wales
Date: 12 October 2019 10:29:53

Dear Sirs,

This is to say that the proposed National Development Framework for Wales with regard to 'large-scale on-shore wind and solar energy development' is utterly unacceptable. The Mid Wales landscape needs to be protected from industrialisation which is what the Welsh Government in Cardiff is meant to do, but at the moment WG is on course to destroy the wealth and roots of Wales. The rural population is proud of their unspoilt countryside which offers respite from stress and pressure for visitors, tourists and residents. Space and beauty are rare these days and must not be ruined.

Actually, the rural economy supports thousands of businesses and jobs that are dependent on the scenic Mid Wales landscapes. I strongly object to these large windfarm developments and possibly massive pylons everywhere; the infrastructure in Mid and North Powys cannot support these intrusive and highly disturbing projects. In this case developments are not for the better.

Further, it is unacceptable that the local authorities in Wales have no say in this matter, that all the decision making for wind energy applications are in the hands of Welsh Government Ministers—this is tyrannical. Look at England, where local authorities are the decision makers for windfarm applications!

There are surely ways of generating energy which are not highly destructive to the environment.

Yours sincerely,

Sabine (Pixi) Saergel
