

# National Development Framework: Easy Read questionnaire

## Part A – the main points of the NDF

Q1. 1. Do you think we are aiming to do the right things with our plan?

No

**Comments:**

You are spending too much energy on providing so called energy, its about time you thought about the residents of this area, what is it going to do to them, the noise from the turbines, the ugly scar on the landscape and the effect it will have on property in the area. If this goes ahead then all property within the proposed area will be worthless, tourism will be hit, who would want to come and spend a holiday looking and listening to wind turbines. The who idea is irresponsible.

Q2. 2. We have 10 aims in the NDF. Should we think about anything else? Tell us anything we've missed out

Yes

**The NDF also needs to think about...**

Think about tourism, property values, residents health and wildlife. Your plan will decimate all of these.

Q3. 3. Do you think the Plan will help achieve healthy and well-planned places?

No

**Comments:**

How can it when it will destroy local communities, tourism ( which is a large percentage of income in North Wales) and wildlife. All you will achieve is a barren, ugly, disturbed landscape, with no wildlife.

Q4. 4. Do you think the plan will help us take care of our environment?

No

**Comments:**

As above if you wish to care for your environment don't do it. And certainly don't do it under the umbrella of we are caring for our environment.

## Part B – different parts of Wales

Q5. 5. Do you agree with our plans for North Wales?

No

**Comments:**

Your plans for North Wales are going to destroy the beautiful countryside of Wales and particularly in Anglesey. You will destroy local communities, wildlife and the environment. The erection of Wind Turbines is detrimental to the landscape, the noise made by these will hurt local communities and wildlife. It has been proved that these monsters kill wild birds and bats. Your plan will turn Anglesey into a barren region that no one will wish to live in or visit. It will also make properties in the area totally worthless, are you going to recompense property owners?

Q6. 6. Do you agree with our plans for Mid and South West Wales?

No

**Comments:**

I don't agree with any plans that will see the landscape destroyed in the name of progress.

Q7. 7. Do you agree with our plans for South East Wales?

No

**Comments:**

I don't agree with any plans that will see the landscape destroyed in the name of progress.

## Part C

Q8. 8. Do you have any other comments you would like to make about this plan?

It has been proved in a lot of countries that wind turbines are not worth the money spent to build them and erect them. The only green energy you should be looking at is tidal energy, a constant source of power, not relying on Wind or Sun. AND MOST OF ALL NOT DESTRUCTIVE TO THE COUNTRYSIDE. Also would you be considering this if there were no subsidies for wind turbines. Subsidies are the only reason wind turbines and solar panels are being put up everywhere with no respect for the countryside, and all the subsidies do is make everyone's electric more expensive, so again the normal every day person loses out because of greed. This would be one of the worst decisions that you could make if you have any respect for the country that you are supposed to look after you will RETHINK.

## Submit your response

Q9. You are about to submit your response. Please ensure you are satisfied with the answers you have provided before sending.

**Name** Lynne Tod

**Where are you from?** [REDACTED]

-

Q10. If you want to receive a receipt of your response, please provide an email address.
