Part C

Q8. 8. Do you have any other comments you would like to make about this plan?

This process is far too verbose -- you are expecting people to download a 40MB PDF, read it and then respond to it? I predict there will be a very poor response. And there's not just one document, there's 10 of them!

Why not *list the key elements of the plan* on the *web page*?

I can tell you what I think about the Climate Emergency (massive investment in solar, wind & tide power; promoting a plant-based diet; creating support for meat & dairy farmers to transition; massive investment in clean public transport; re-instate railway lines where possible; huge rewilding projects on marginal land etc). But to ask people to read a whole load of stuff in order to get feedback doesn't a very user friendly approach.

Sorry for the critical line but I don't know how useful this exercise will be.
