Subject: Consultation on Draft National Development Framework.
Date: 09 November 2019 10:20:33

I am not a Welsh Citizen but someone who cares deeply for your beautiful Land and Culture. Having contributed to your local economy, through tourism , for the past 45 years, I feel able to make a contribution. Your far sighted document has much to celebrate. My concern is the overall size of the areas earmarked for wind and solar development. This form of energy power is essential for the development of green energy but has to be sympathetic to landscape and communities. I hope you will also consider other forms of this type of generation, e.g. off shore wind , tidal power, solar panels for all new housing and public buildings, adding to existing buildings such as Hospitals and Schools

Wide scale destruction of your beautiful countryside would have a detrimental impact on ecosystems that support wildlife and outdoor activity that brings money into your economy but so much more. The wild beauty of your landscape must be protected.

I do hope you are able to work with local communities to achieve progress in green energy generating without destroying one of your more valuable assets, your beautiful landscape.

Regards Pat Rogers ,
