Clearly, people will have different views on the proposals. In my own response, which I shall be incorporating views from others, I shall include my view that:

The Mid Wales landscapes should be protected and that an acceptance of landscape change as set out in the proposals is entirely unacceptable.

Our rural economy supports thousands of businesses and jobs that are dependent on the scenic mid Wales landscapes.

In England, local councils are able to determine Wind Energy applications, and applications must have the backing of local communities to be approved. It is unacceptable that applications in Wales are determined through a decision by Welsh Government Ministers and not local authorities.

The proposals in the document make insufficient reference to how energy produced by potential large scale wind developments will be connected to the National Grid.

There is insufficient road and highway access across North Powys to facilitate large scale wind development and associated infrastructure.
