Welsh Government Consultation Document

A487 Llanrhystud safety scheme

Date of issue: 12 March 2021
Action required: Responses by 9 April 2021

Mae'r ddogfen yma hefyd ar gael yn Gymraeg.
This document is also available in Welsh.

Overview	The North and Mid Wales Trunk Road Agency, on behalf of the Welsh Government is currently investigating safety improvements on the trunk road network within mid Wales
How to respond	<p>The public consultation includes a set of specific questions to which the Welsh Government would welcome your response by 9th April 2021. You can reply in the following ways:</p> <p>Online: Complete the response form on the consultation webpage.</p> <p>Email: Complete the response form at the end of this document and email to enquiries@NMWTRA.org.uk using the subject 'A487 Llanrhystud Safety Scheme'</p> <p>Post: Complete the response form at the end of this document and post to:</p> <p>A487 Llanrhystud safety scheme Transport, Welsh Government, Government Buildings, Sarn Mynach, Llandudno Junction, LL31 9RZ</p>
Further information and related documents	<p>Large print, Braille and alternative language versions of this document are available on request.</p> <p>Project webpage: https://gov.wales/a487-llanrhystud</p>
Contact details	<p>For further information:</p> <p>Email: Complete the Response Form at the end of this document and email to enquiries@NMWTRA.org.uk using the subject 'A487 Llanrhystud safety scheme'</p>

General Data Protection Regulation (GDPR)

The Welsh Government will be data controller for any personal data you provide as part of your response to the consultation. Welsh Ministers have statutory powers they will rely on to process this personal data which will enable them to make informed decisions about how they exercise their public functions. Any response you send us will be seen in full by Welsh Government staff dealing with the issues which this consultation is about or planning future consultations. Where the Welsh Government undertakes further analysis of consultation responses then this work may be commissioned to be carried out by an accredited third party (e.g. a research organisation or a consultancy company). Any such work will only be undertaken under contract. Welsh Government's standard terms and conditions for such contracts set out strict requirements for the processing and safekeeping of personal data.

In order to show that the consultation was carried out properly, the Welsh Government intends to publish a summary of the responses to this document. We may also publish responses in full. Normally, the name and address (or part of the address) of the person or organisation who sent the response are published with the response. If you do not want your name or address published, please tell us this in writing when you send your response. We will then redact them before publishing.

You should also be aware of our responsibilities under Freedom of Information legislation

If your details are published as part of the consultation response then these published reports will be retained indefinitely. Any of your data held otherwise by Welsh Government will be kept for no more than three years.

Your rights

Under the data protection legislation, you have the right:

- to be informed of the personal data held about you and to access it
- to require us to rectify inaccuracies in that data
- to (in certain circumstances) object to or restrict processing
- for (in certain circumstances) your data to be 'erased'
- to (in certain circumstances) data portability
- to lodge a complaint with the Information Commissioner's Office (ICO) who is our independent regulator for data protection.

For further details about the information the Welsh Government holds and its use, or if you want to exercise your rights under the GDPR, please see contact details below:

Welcome

Welsh Government and the North and Mid Wales Trunk Road Agent welcome you to this public consultation. We are holding this consultation to present our proposal for improving the A487 at Llanrhystud which forms part of the Mid Wales Safety Schemes Programme and are seeking your feedback on the proposal.

Introduction and brief overview

The A487 forms part of the trunk road network in Wales, managed by the North and Mid Wales Trunk Road Agent (NMWTRA) on behalf of the Welsh Government. The A487 provides one of the key connecting routes between north and south Wales. This road is a key route for tourists and for freight and provides connections between many communities within mid Wales.

Mid Wales safety schemes programme overview and objectives

Study overview

Welsh Government has identified a need to undertake improvements at pinch points on the Trunk Road network throughout Wales to improve safety, resilience and movement along the transport network. This has led to an initiative to develop a strategy for safety schemes on the mid-Wales Trunk Road network.

The initiative has strong Ministerial support centred around improved connectivity for all north-south trunk road links, with particular focus on sections of the A487, A483, the A470 and the A44 (W).

The overarching strategy is to consider improvements to sections of the network that

experience a high proportion of vehicle collisions and poor journey time reliability with increased levels of driver stress and frustration.

Study objectives

- Improve safety on the network for all users;
- Reduce driver stress / frustration;
- Improve journey time reliability for longer journeys on the strategic road network;
- Improve connectivity between mid-Wales communities;
- Protect and enhance biodiversity and ecosystem resilience;
- Support modal shift to active modes (walking and cycling) for shorter journeys and public or third sector transport for longer journeys;
- Reduce greenhouse gas emissions through smarter design, construction, operation and maintenance of the road network, including support to Electric Vehicle charging;
- Encourage and support key economic sectors of the Mid Wales economy, such as tourism, by improving links to work, leisure and education;
- Create a more resilient strategic road network, including managing the impact of climate change by future proofing infrastructure.

Why the Llanrhystud scheme is needed?

A487 Southbound view from Llanrhystud

A487 Llanrhystud Safety Scheme

A487 Llanrhystud has been identified as one of the priority schemes within the programme.

Slow moving vehicles on this part of the network can cause driver frustration. The straight road alignment encourages informal overtaking in both directions, which can be risky due to visibility issues, such as hidden private accesses onto the trunk road and dips in the road to the south.

This section of the A487 has experienced 20 collisions within the last five years, including six which were a result of vehicles trying to overtake slower moving vehicles. Lack of natural traffic calming on approach to the village encourages speeding vehicles through the village.

There is currently no formal walking and cycling infrastructure along the A487 at this location to link communities.

What has been done so far?

The Welsh Transport Appraisal Guidance (WelTAG) has been produced by Welsh Government for use in the development, appraisal and evaluation of transport interventions to ensure that investment in transport is targeted where it can have the greatest impact. To date, a WelTAG Stage 1 and 2 has been completed for the Mid Wales Safety Scheme Programme. A WelTAG Stage 3 Study is ongoing which includes preliminary development of options at sites identified, including the A487 Llanrhystud Safety Scheme. The below provides a summary of the work that has been completed to date through the WelTAG process.

A WelTAG Stage 1 Study (Outline Strategic Case) was carried out to identify a long list of potential improvement schemes across the Mid Wales trunk roads (A470, A487, A44 and A483). The recommendation of this stage was that schemes were to be taken forward which were in a close geographic area to maximise the benefits of the programme with an initial focus on the A470 and A487, including the A487 section between Aberarth and Llanrhystud.

A WelTAG Stage 2 Study (Outline Business Case) was undertaken to identify the most deliverable and beneficial schemes within each geographic area. Shortlisted schemes were taken forward to Stage Three, including the A487 Llanrhystud, with agreed methods to be used at the next stage to provide additional evidence to support the appraisal.

A WelTAG Stage 3 Study (Full Business Case) is currently being developed which includes preliminary design of the shortlisted schemes, including the A487 Llanrhystud, and additional impact assessment work and surveys. The conclusion of this stage will be to recommend schemes for detailed design and construction.

Developing a solution for the A487 Llanrhystud

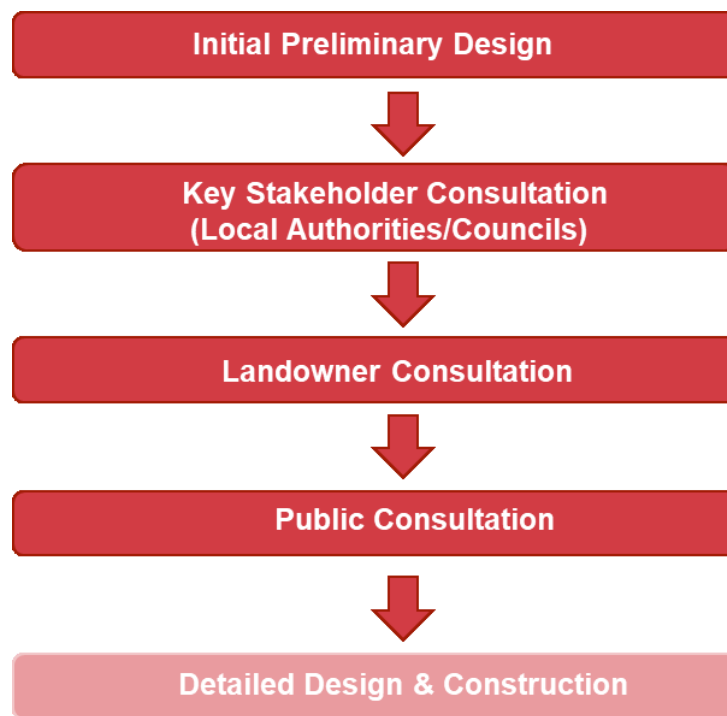

Several initial concept ideas were first considered as a potential solution to the problems identified at the A487 Llanrhystud. These were evaluated on which would provide the most benefit to all users and best satisfy the Mid Wales Safety Schemes Programme objectives, with the preferred solution taken forward to preliminary design.

In developing a solution and design, it is important to get the input from all stakeholders

affected by the scheme.

The figure opposite shows the consultation process that has been followed to get the views and opinions of all interested parties, and at each stage the design has been revisited to address any feedback.

Following this consultation, any feedback will be reviewed and the design amended if necessary. The WelTAG Stage 3 will be finalised and the scheme recommended for detailed design & construction.

A487 Llanrhystud scheme description

It is proposed to introduce a new three-arm roundabout at the southern extents of the village of Llanrhystud. As well as the new roundabout, a Differential Acceleration Lane (DAL) is proposed in the southbound direction along the A487 towards Aberaeron.

This would provide 250 metres of formal overtaking opportunity via an extra lane for southbound drivers to safely pass slower moving vehicles.

The scheme would require the acquisition of third party land outside of the existing highway boundary for the widening of the existing carriageway to accommodate the extra lane width.

Design standards require existing private accesses to the highway be stopped up within a clear proximity to a Differential Acceleration Lane scheme, therefore alternative private access arrangements have been proposed.

Along the length of the scheme, it is proposed to introduce a new shared use foot/cycleway as part of the Active Travel Wales initiative to improve links for non-motorised users.

The roundabout will help improve access arrangements to the existing caravan parks. Morfa Farm Caravan Park will gain access via the new roundabout, whilst Pengarreg Caravan Park will have its own priority junction onto the Trunk Road.

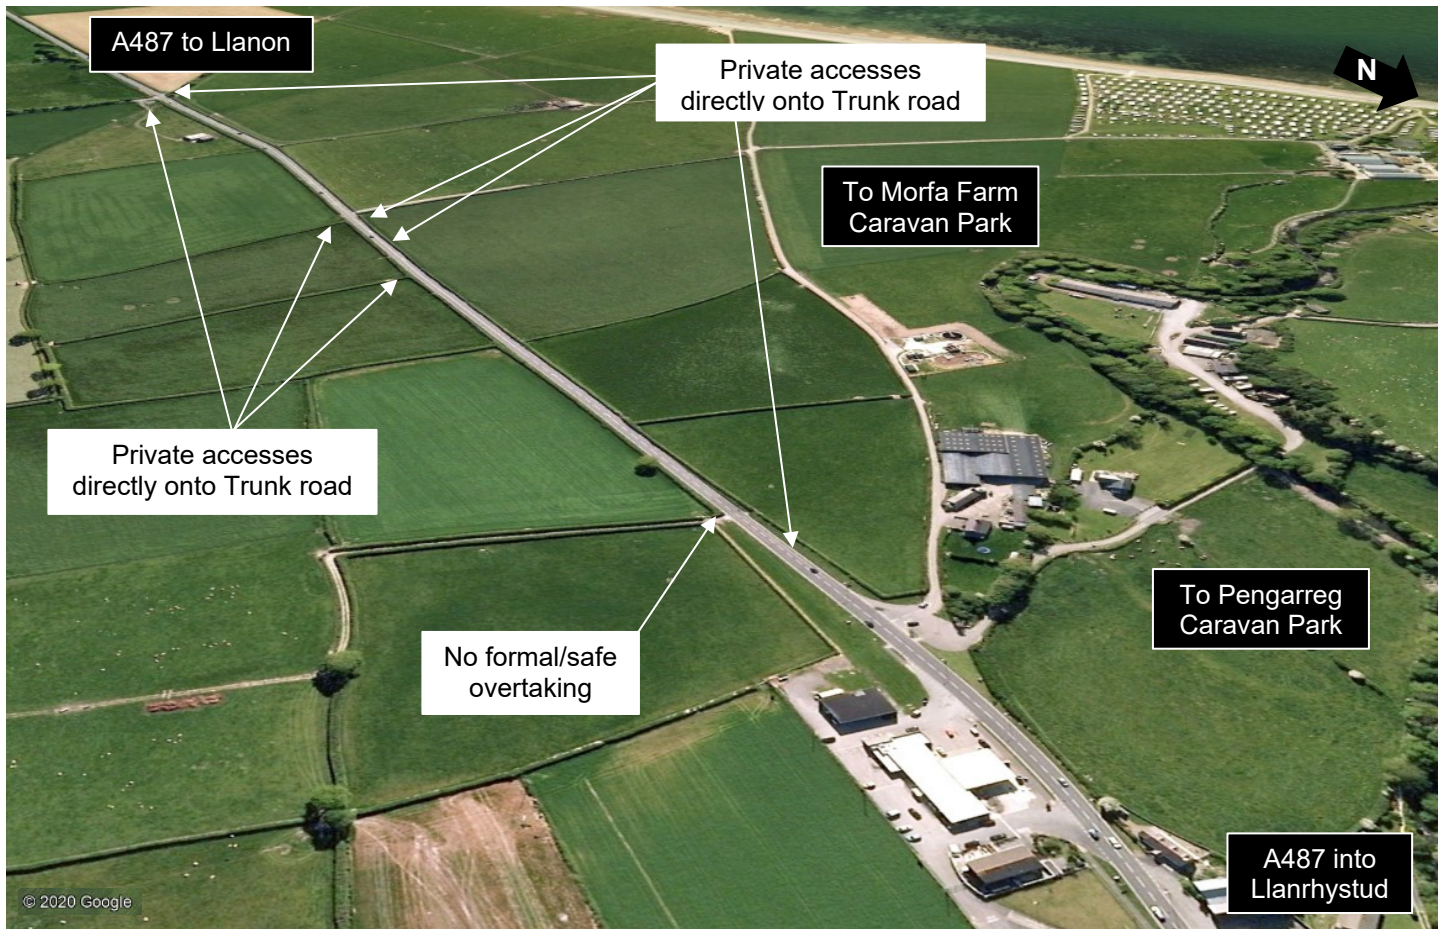

The proposed roundabout will act as a traffic calming feature, reducing vehicle speeds as they enter the village.

Summary of scheme benefits

The proposed scheme was tested against the overarching Programme objectives and the following four WeITAG appraisal areas to ensure the proposal addresses the problems identified and positively contributes to.

- Economy
- Environment
- Social and cultural
- Value for money

The scheme has the following benefits:

- ✓ The safety of this section of the A487 will be improved as 6 of the accidents within the last 5 years were caused due to either overtaking manoeuvres, or poor visibility.
- ✓ The number of private accesses with direct access onto the A487 will also be reduced.
- ✓ Reduction in driver stress/frustration in the southbound direction as the Differential Acceleration Lane allows the opportunity for drivers to safely overtake slow moving vehicles.
- ✓ Improved journey time reliability for vehicles in the southbound direction, improving connectivity between Aberystwyth and Aberaeron. Potential for short term delays during construction, however impacts will be minimised.
- ✓ 1.5km of new active travel infrastructure with a new shared use foot/cycleway which improves facilities for walkers and cyclists, linking into existing public rights of way.
- ✓ Improved access to Morfa Farm and Pengarreg Caravan Parks.
- ✓ Reduced speed of vehicles entering village as they will be slowed down at the roundabout, improving safety for all within the village.
- ✓ Renewal of highway assets such as drainage and surfacing reducing the need for maintenance over the next 10 years.
- ✓ Planting and landscaping to enhance biodiversity and ecosystem resilience. Short term landscape and visual impact as mitigation planting becomes established.

Conclusion and next steps

Conclusion

The A487 Llanrhystud Safety Scheme addresses the problems identified at the junction and provides several additional benefits addressing the objectives of the Mid Wales Safety Scheme Programme.

Next steps

Following this consultation exercise, feedback provided will be considered in the next stage of detailed design development.

Detailed design will be progressed during 2021,

How can I comment?

We want to hear what you think about our proposed scheme. We can then consider your views and comments in shaping the final design. There are several ways you can comment:

- Complete the response form on the website: <https://gov.wales/a487-llanrhystud-safety-scheme>
- Email the North and Mid-Wales Trunk Road Agent: enquiries@NMWTRA.org.uk using the subject 'A487 Llanrhystud safety scheme'
- Discussion of the consultation information using Microsoft Teams can also be requested. Email enquiries@NMWTRA.org.uk using the subject 'A487 Llanrhystud safety scheme'
- Write to: A487 Llanrhystud safety scheme, Transport, Welsh Government, Government Buildings, Sarn Mynach, Llandudno Junction, LL31 9RZ

To help shape our final design, please submit your response by 9 April 2021.

Next Steps

We will review all comments and suggestions once the consultation feedback window is closed. These will be analysed and considered as part of the design process. We will also produce a report to summarise the feedback responses.

Updates on the scheme's progress will be provided on the project website:
<http://gov.wales/a487-llanrhystud>

Consultation Response Form

Your name:

Organisation (if applicable):

E-mail / telephone number:

Your address:

Q1: Which of the following best describes the reason for your interest in this consultation)
(please select one only)

Local resident
Local business owner
Employed locally
Visitor to the area
Not local but interested in the scheme

Other (please specify):

--

Q2: Do you believe that the A487 at Llanrhystud should be improved?

Yes

--

No

--

Q3: Please tell us what you like about the proposed scheme. (Please tick those that apply)

a) Junction arrangement
b) Increased overtaking opportunities
c) Shared footway/cycleway
d) Improved safety
e) Improved journey time reliability
f) Landscaping and planting
g) Renewal of highways assets including drainage and surfacing
h) Access to caravan parks
i) Closure of direct accesses onto the A487
j) Traffic calming

Other (please specify below):

--

Comments:

--

Q4: Do you have any further comments that you would like to make about the proposed scheme?

Question A: We are under a duty to consider the effects of our policy decisions on the Welsh language, under the requirements of the Welsh Language (Wales) Measure 2011.

We would like to know your views on the effects that the proposals would have on the Welsh language, specifically on opportunities for people to use Welsh and on treating the Welsh language no less favorably than English.

What effects do you think there would be? How could positive effects be increased, or negative effects be mitigated?

Question B: Please also explain how you believe the proposals could be formulated or changed so as to have positive effects or increased positive effects on opportunities for people to use the Welsh language and on treating the Welsh language no less favorably than the English language, and no adverse effects on opportunities for people to use the Welsh language and on treating the Welsh language no less favorably than the English language.

Question C: We have asked a number of specific questions. If you have any related issues which we have not specifically addressed, please use this space to report them:

Please enter here:

Responses to consultations are likely to be made public, on the internet or in a report. If you would prefer your response to remain anonymous, please tick here:
