# Introduction

This is the first release of the main estimates for the volume and value of domestic overnight tourism trips taken by British residents in Wales and Great Britain for the period October to December 2023. This report also includes estimates covering the period January to December 2023.

This statistical release contains annual estimates for 2023. This series will now be subject to a methodological review. Following this review, estimates published in this release will change. Please use caution in interpreting or using the estimates published here. For further information, please see the statement on [methodological review](#).

This report includes estimates for the main purpose of overnight trips; holidays, visits to friends and relatives (VFR) and business trips, with the definitions for each of these provided in the relevant section of this report.

The report includes estimates and details of overnight trips taken in Wales, and in Great Britain for comparative purposes. Detailed results for England and Scotland are being published by [VisitEngland](#) and [VisitScotland](#).

These statistics are used to monitor domestic tourism demand and measure the contribution and impact of domestic tourism on the visitor economy. A key purpose of these statistics is to uncover insights into market trends over time. Changes in survey methodology introduced in 2021, together with the interruption in data collection due to COVID-19, mean that results published in this release are not directly comparable with data published for 2019 and previous years. [Estimates of domestic overnight trips to Wales from April 2021](#) have been published and are comparable with the results in this release. Please refer to the section on [comparability and coherence](#). Changes in expenditure should be considered in light of increased costs, as these estimates have not been adjusted for inflation.

This document was downloaded from GOV.WALES and may not be the latest version.

Go to <https://www.gov.wales/domestic-gb-tourism-statistics-overnight-trips-october-december-2023-html> for the latest version.

The statistics are labelled as 'experimental' to enable testing and further modification to meet user needs. Further information on this is available on the [Office for National Statistics website](#). We are keen to check that the new tourism statistics meet user needs and invite you to provide feedback on the information in this output at [tourismresearch@gov.wales](mailto:tourismresearch@gov.wales).

## Main points

### Wales trips

- Between October and December 2023, Great Britain (GB) residents took 1.79 million overnight trips in Wales with 5.49 million nights and £479 million spent during these trips.
- From January to December 2023, GB residents took 8.58 million overnight trips in Wales with 24.95 million nights and £2.04 billion spent during these trips.
- 38% of overnight trips taken in Wales during 2023 were holidays. 35% were visits to friends and relatives, 5% were for business purposes and 22% were for miscellaneous purposes.
- Approximately 7% of all GB trips included an overnight stay in Wales, and the share of total GB nights and spend were also 7%.
- The average duration of Wales trips in 2023 was 2.9 nights with an average spend of £237 per trip.
- Compared to the same period in 2022, the volume of trips taken in Wales from January to December 2023 was 1% lower, whilst expenditure was 6% higher. The decrease in annual trip volume for 2023 is driven by a sharp decrease in trips taken during the fourth quarter of the year.

## Great Britain trips

- Between October and December 2023, GB residents took 28.12 million overnight trips in GB with 74.71 million nights and £7.06 billion spent during these trips.
- From January to December 2023, GB residents took 117.28 million overnight trips in GB with 339.38 million nights and £30.94 billion spent during these trips.
- 32% of overnight trips taken in GB during this period were holidays, 37% were visits to friends and relatives (VFR), 5% were for business purposes and 26% were for miscellaneous purposes.
- 85% of trips taken in GB included an overnight stay in England, 11% included an overnight stay in Scotland and 7% included an overnight stay in Wales.
- The average duration of GB trips in 2023 was 2.9 nights with an average spend of £264 per trip.
- Compared to the same period in 2022, the volume of trips taken in GB from January to December 2023 was 7% lower, whilst expenditure was 6% lower. The decrease in annual trip volume for 2023 is driven by a sharp decrease in trips taken during the fourth quarter of the year.

Get [information on copyright](#).

period there were 8.58 million overnight trips taken in Wales with a total of 24.95 million nights and a total expenditure of £2.04 billion.

Approximately 7% of all domestic overnight trips by British residents were taken in Wales, compared to 85% taken in England and 11% taken in Scotland, similar to the share of trips reported in 2022. The share of both total GB nights and total GB spend in Wales was 7%. These figures are similar to the shares reported in 2022 (7% of total GB nights and 6% of total GB expenditure).

	October to December 2023	Year to date 2023
<b>VFR</b>	£154	£458
<b>Business</b>	£18	£84
<b>Miscellaneous/other</b>	£114	£495

Source: Great Britain Tourism Survey (GBTS), January to December 2023

[Note 1] Low base sizes for business trips to Wales – data should be treated with caution.

Compared to 2022, the volume of overnight trips taken in Wales in 2023 has decreased by 1%. There were also decreases in the volumes of holiday trips and business trips, although the volumes of trips to visit relatives and friends and trips for miscellaneous/other purposes were higher, compared to 2022. Additionally, the number of nights spent in Wales from January to December 2023 for all purposes decreased, compared to the same period in 2022. This decrease is driven by a lower number of nights spent in Wales on holiday trips. Expenditure on trips taken in Wales during 2023 for all purposes has increased compared to expenditure during the same period in 2022.

of all other trip purposes were lower, compared to 2022. The number of nights spent in GB during 2023 was lower compared to 2022. Nights spent in GB were lower for all trip purposes. Expenditure on trips taken in GB during 2023 has decreased compared to expenditure during 2022, across all trip purposes except business trips and trips for miscellaneous/other purposes, which saw small increases in expenditure.

## Characteristics of GB and Wales trips

	Great Britain	Wales
<b>VFR</b>		2.7
		2.8
<b>Business</b>		3.0
		3.5

Source: Great Britain Tourism Survey (GBTS), January to December 2023

[Note 1] Low base size for business trips to Wales – data should be treated with caution.

The average duration of trips taken in Wales from January to December 2023 was 2.9 nights, in line with the average for GB. The spend per trip and spend per night on trips taken in Wales are generally lower than for GB as a whole, consistent with the findings for 2022. Between January and December 2023, the average spend per night is highest for holiday trips taken in Wales, whereas it is highest for business trips for GB as a whole.

The average spend per trip for Wales in 2023 is well above the level in 2022, continuing the overall trend of increasing spend on trips taken. This is consistent for trips taken in Wales and trips taken in GB as a whole, and across all types of trips, except for holiday trips taken in GB, which saw a slight decrease in average spend per trip. Changes in expenditure should be considered in light of increased costs, as these estimates have not been adjusted for inflation. The average length of trips taken for all purposes during 2023 has decreased, compared to the same period in 2022, for both trips taken in Wales and trips taken in GB as a whole. The average length of holiday trips taken during 2023 has decreased compared to 2022, for both trips taken in Wales and in GB, by 10% and 7% respectively.

Source: Great Britain Tourism Survey (GBTS), January 2022 to December 2023

There was a decrease of 25% in spend on overnight trips taken in GB between October to December 2023, with £7.06 billion spent, compared to £9.36 billion during the same period in 2022. From January to December 2023, expenditure for trips taken in GB was 6% lower compared to the same period in 2022, with £30.94 billion spent during 2023. Changes in expenditure should be considered in light of increased costs, as these estimates have not been adjusted for inflation.

## Quality and methodology information

### Definitions

To qualify as an eligible GB Domestic Overnight Trip the following criteria must be met:

- The trip involved a stay of at least one night in one or more of the GB nations; England, Scotland or Wales.
- The trip is not taken on a frequent basis (less often than once a week).
- For GB Domestic Overnight Holiday Trips; the main purpose of the trip was for holiday, pleasure or leisure.
- For GB Domestic Overnight VFR Trips (VFR); the main purpose of the trip was for visiting friends and relatives, including VFR trips that were combined with a holiday.
- For GB Domestic Overnight Business Trips; the main purpose of the trip was for business.
- For GB Domestic Overnight Miscellaneous/Other Trips; the main purpose of the trip was for another type of trip taken not covered by the above classifications including personal events, public events, or for study, medical, religious purposes, or any overnight stay in GB as part of an overseas trip.

**This document was downloaded from GOV.WALES and may not be the latest version.**

## Other definitions used in this publication

### Volume

An estimate of what the grossed-up number of overnight trips undertaken by the population would be if the survey sample is representative of the whole GB population. The reported volume of trips is an estimate of trips by individuals, so that a travel party of two people would count as two individual trips.

### Value

An estimate of what the total expenditure relating to the volume of overnight visits undertaken by the population would be if the survey sample is representative of the whole GB population.

### Bednights

An estimate of what the grossed-up number of nights spent on overnight trips undertaken by the population would be if the survey sample is representative of the whole GB population.

These definitions and the associated qualifying criteria have been revised as part of the new combined GBTS/GBDVS survey to align with agreed international standards. These changes impact the comparability of the published domestic overnight tourism estimates for 2021, 2022 and 2023 with 2019 and previous years.

**This document was downloaded from GOV.WALES and may not be the latest version.**

## Methodology

In 2019, Visit Wales, VisitScotland and VisitEngland, undertook a review of the requirements and methods for producing the official GB domestic tourist statistics, to future-proof the data collection methods, whilst maintaining the reliability and robustness of the information reported. As a result, substantial changes were introduced as part of a new combined online survey collecting data on both domestic overnight trips as well as domestic day trips. This represents a fundamental change in the way data is collected for overnight visits including moving from the previous in-home face to face survey method to a new combined online survey covering both domestic overnight trips and day trips.

The sample for the new combined online survey is a non-probability-based design sourced from 4 ESOMAR accredited online panel providers and includes quotas for key demographic variables to make the overall sample as representative as possible of GB population. The target annual sample size for the survey of overnight visitors is 60,000 completed interviews. Not every person who is interviewed will have taken an eligible overnight trip and so the base sizes used for trip estimation are lower than the number of interviews.

As part of the survey changes, a revised weighting scheme has been introduced to improve efficiency, whilst making the results as representative as possible of the GB population. However, the use of a non-probability online sample limits the extent to which the survey responses are truly representative of the full GB population, a limitation of similar online sample surveys. The new weighting scheme uses the National Statistics Socio-economic Classification (NS-SEC) mapped to approximate social grade for population statistics, for the purpose of quotas and weighting to the GB population. The change to using NS-SEC as the population statistics source will impact the estimation and reporting of trips compared to the previous reporting of social grade used for GBTS in 2019 and previous years. We are planning to introduce a new question in the survey during 2023 that captures household income that will be used to analyse

**This document was downloaded from GOV.WALES and may not be the latest version.**

Go to <https://www.gov.wales/domestic-gb-tourism-statistics-overnight-trips-october-december-2023-html> for the latest version.

Get [information on copyright](#).

and report on trips taken by different household income bands from 2023 onwards.

Further details of the changes to survey method, sample design, estimation approaches and the effects of applied caps and recalibration are available in the [GBTS Background Quality Report 2022](#).

## Comparability and coherence

Statistics for domestic overnight tourism have been collected in a broadly similar way since 1989. However, the changes in survey methodology introduced in 2021, together with the interruption in data collection due to COVID-19, means that results published from April 2021 onwards are not directly comparable with data published for 2019 and previous years. [Results from April 2021 onwards](#) are available, and are comparable with the results in this report.

As part of the survey, respondents are asked about any overnight trips they have taken in the 4 full weeks prior to their date of interview (reference period). Trip and expenditure estimates are reported for individual calendar months as well as for quarterly and annual periods. As the interview reference periods do not exactly correspond with calendar months an adjustment is made using a 'seasonal smoothing factor' to improve monthly comparisons within and between years. The monthly estimates are subject to limitations on sample size and seasonal fluctuations in trip taking across the year.

## Accuracy

The statistics produced from the Great Britain Tourism Survey in 2019 and previous years have been designated as official statistics, which provides reassurance to users that the statistics are produced to the very highest professional standards of trustworthiness, quality and value, set out in the [Code](#)

This document was downloaded from GOV.WALES and may not be the latest version.

Go to <https://www.gov.wales/domestic-gb-tourism-statistics-overnight-trips-october-december-2023-html> for the latest version.

Get [information on copyright](#).

**of Practice for Statistics (Office for National Statistics)**. Due to the changes in methodology and the impact of the COVID-19 pandemic, the survey results for 2021 have been labelled as **‘experimental statistics’ (Office for National Statistics)**. The new survey and statistics have undergone a comprehensive programme of quality assurance including piloting of the survey, analysis of changes to the trip definitions, testing the impact of the new weighting scheme and a review of caps and imputation rules. Changes to the survey methodology and estimation have taken account of a review and advice provided by the Methodology Advisory Service of the Office for National Statistics.

As the statistics are produced using a non-probability online survey method, they are subject to the limitations and potential sources of bias and error associated with such surveys. These include:

- coverage error: due to part of the GB population not having online access
- sampling error: using a sample to measure the behaviour of the full GB population
- sample bias: including differences between people with online access and who are online panel members compared to those who are not
- measurement error: due to respondents entering incorrect values
- non-response error: including survey refusals and drop-outs and the availability of ‘don’t know’ and ‘prefer not to say’ options

The GBTS data are weighted to correct for any imperfections in the achieved sample that might lead to bias and to rectify any differences between the sample and the target GB population. The survey uses a mix of accredited online panels to mitigate for possible panel specific biases, and the mix of panels is kept consistent over time. Demographic quotas are used to align the sample with the GB population. The survey script and data processing include bespoke checks to verify the accuracy of responses. Imputation is used to cover missing data and caps are used to minimise the impact of extreme values that are entered. It is not possible to measure standard sample errors due to the non-probability sample being used, but base sizes are reported for eligible trip takers and users

are advised to consider and be cautious of small base sizes, particularly for monthly data and lower-level geographies, when drawing inferences from the statistics.

## Relevance

These statistics are used both within and outside the Welsh Government to monitor domestic tourism demand and measure the contribution and impact of domestic tourism on the visitor economy. A key purpose of these statistics is to uncover insights into market trends over time.

As far as possible, the new combined GBTS and GBDVS survey provides consistency with previous information collected, but new questions capture enhanced information on activities undertaken, booking methods and responder profiles including protected characteristics. It is envisaged that this additional information will be of value for the various users of the survey. The current questionnaire is included in the [GBTS Background Quality Report 2022](#).

The survey sponsors are planning to engage with the priority users of the statistics to check the new survey information meets their needs and we encourage users of the statistics to provide feedback on the data and this output at [tourismresearch@gov.wales](mailto:tourismresearch@gov.wales).

## Timeliness and punctuality

All outputs adhere to the Code of Practice by pre-announcing the date of publication through the upcoming calendar. Furthermore, should the need arise to postpone an output this would follow the [statement on revisions, errors and postponements](#). We aim to publish data as soon as possible after the relevant research time period. It is anticipated that future results for Wales will be published on a quarterly basis, to ensure estimates are supported by robust trip

base sizes. Specific publication timings will be notified on the WG website, but the aim is to publish quarterly statistics for Wales approximately 9 to 10 weeks after the end of each quarter based on the 4 week survey trip taking reference period and to allow for quality assurance and reporting timescales.
