STOCKING DIARY SUBMISSION

Stocking Diary Year:

Association Name:

Grazing Association CRN:

Individual CRN	Trading title	Date first animal returned to the common	First date the common was free of stock
(A0000123)	(A.Farmer & Son)	(02-February-2017)	(01-November-2018)

Please use the following instructions to complete the diary above and see examples in brackets within the table titles.

- Enter the CRN of each grazier under the '*Individual CRN*' title
- Please add the trading title of the grazier under '*Trading title*'
- '*Date first animal returned to the common*' – this will be the date you first put stock out onto the common at the beginning of the calendar year.
- '*First date the common was stock free*' – this is the date the common became stock free and not the date the stock was being removed from the common

If your Grazing Association has a high number of individual members, you can record a single row for the whole common and you are not required to maintain a record per grazier. If you wish to use this method, please record the date of the first animal onto the common and when clearing the common, please record the date when the common became stock free.
