PAST RELEASES

Release date: 10 May 2018 Period covered: 2016/17

This report provides information about students training to become teachers on courses of Initial Teacher Education (ITE) that lead to Qualified Teacher Status.

It covers students studying in Higher Education Institutions in Wales and also students from Wales studying across the UK.

Each year the Welsh Government sets intake targets for ITE courses in Wales. The targets are based on whether they are training to be primary or secondary school teachers and whether they are taking postgraduate or undergraduate courses.
