Introduction	v-xii
Breakdown of Total Standard Spending (TSS)	1 - 4
Overall assumptions in calculating the standard spending assessment (SSA).	1
Disaggregation of SSA between the unitary authority and police forces tiers.	2
Disaggregation of Revenue Support Grant (RSG) and the distributable amount from Non-Domestic Rates (NDR) between the unitary authority and police forces tiers.	3
Illustration of SSA aggregation - how the financing of, and expenditure from, TSS adds up on an overall basis (ignoring the split between unitary authorities and police forces).	4
Summaries of SSAs, Aggregate External Finance (AEF), entitlement to RSG and shares of the distributable amount from NDR	5 - 11
Summary of the SSA and its component parts, i.e. RSG, NDR, income from the council tax (assuming spending at the level of SSA).	5
Summary of the SSA and its component parts, shown in pounds per head of population. Population is taken as 2011-based projections of those that will be usually resident in the area at 30 June 2015, as estimated by the Welsh Government Knowledge & Analytical Services Division.	6
Comparison of total SSA for the 2014-15 and 2015-16 Settlements, giving the difference in absolute and percentage terms.	7
Aggregate External Finance (AEF) - the amount of RSG, NDR and police grant for each authority and this figure expressed as a percentage of SSA.	8
Comparison of RSG between the 2014-15 and 2015-16 Settlements, giving the difference in absolute and percentage terms.	9
Comparison of NDR between the 2014-15 and 2015-16 Settlements, giving the difference in absolute and percentage terms.	10
The overall change between 2014-15 and 2015-16 in the Aggregate External Finance (AEF) – the entitlement for RSG and NDR in absolute and percentage terms.	11

SUMMARY INFORMATION FOR STANDARD SPENDING ASSESSMENTS 2015-2016

Introduction

This is an annual publication that is commonly known as the “Green Book.” It provides the essential background information used in the calculation of the revenue settlement for unitary and police forces in Wales. It is an important part of the Welsh Government’s policy to provide greater transparency in the publication of the annual Local Government Revenue Settlement.

The material contained in this publication is a collection of tables and information intended for use as general background to the calculation of Standard Spending Assessments (SSAs) for 2015-16. It is a statistical companion to the Local Government Finance Report (No 1) 2015-2016.

It is important to understand that the report shows individual authority SSAs broken down into service categories. This breakdown is solely for the purpose of calculating the total SSA. The ability of unitary authorities to set their own spending priorities remains an important part of the Welsh Revenue Support Grant (RSG) distribution system. Therefore, the service IBAs shown in this report are not intended for use in determining individual authorities’ budgeted expenditure on particular services.

Most of the figures given in the report are rounded. Therefore, the sums and calculations shown may not always appear to equate exactly with the figures in the tables. The calculations in the SSA models use data that are largely unrounded.

Background

The data used to calculate the distribution of SSA across the service areas are collected from various sources, largely on an annual basis. The exceptions are the settlement and dispersion data, which are based on the 1991 and 2001 Census’ and other indicators derived from the 2001 and 2011 Census. Other data are collected directly from the authorities, including numbers of pupils, planning applications, street lighting units, lengths of road, lengths of coastline, homelessness and housing data. Data on the number of dwellings are provided by the Valuation Office Agency and food and trading premises data by HM Revenue and Customs. Population projection figures for local authorities are prepared by the Welsh Government Knowledge and Analytical Services Division. In a small number of cases the actual, or best estimate of expenditure on a service is used, where the expenditure is pre-determined and is not directly under the control of authorities. Examples of this are levies for drainage and National Parks.

INTRODUCTION

The formulae for all services were reviewed ahead of the 2001-02 Settlement following recommendations made by an independent review undertaken by Swansea University and Pion Economics. The recommendations were incorporated in 2001-02 and subsequent settlements as the necessary analysis were completed, through the mechanism of the Distribution Sub Group (DSG).

DSG is a working group under the Partnership Council between Welsh Government and Local Government whose members include Welsh Government officials from the Local Government Finance and Performance Division and representative officials of the Welsh Local Government Association (WLGA). Each year DSG follows a remit and work programme that looks at certain sectors of the Settlement as well as areas of specific interest, for example distributional issues associated with specific grants that are due to transfer into the RSG.

BACKGROUND GUIDE TO STANDARD SPENDING ASSESSMENTS

Introduction

1. Standard Spending Assessments are intended to reflect variations in the need to spend which might be expected if all authorities responded in a similar way to the demand for services in their area. This is the mechanism for distributing Revenue Support Grant (RSG) to local authorities to enable them to charge the same council tax for the provision of a similar standard of service.

SSAs and Budgets

2. At the Wales-level, the total of SSAs is the same as the total of assumed budgets for Welsh authorities. This means that the overall amount is influenced by decisions on the underlying increase in funding from central government and the actual amount assumed raised through council tax. Actual budgets may vary above or below the SSA for an authority as decisions on the level of service provided varies from authority to authority.

Funding of SSA

3. SSA funding is the sum of three elements and in particular years an adjustment for the floor mechanism.

$$\text{SSA} = \text{NDR} + \text{CT} + \text{RSG} + \text{FF}$$

NDR is an authority's allocation of re-distributed non-domestic rates. In Wales this is based on the authority's proportion of the population aged 18 and over.

CT is the total notional council tax income based on a standard council tax figure multiplied by the number of dwellings within the authority.

The standard council tax figure at band D is the same for all authorities and is referred to as the **Council Tax for Standard Spending (CTSS)**. It is calculated on an all-Wales level by taking the difference between aggregate SSAs and the aggregate available for distribution for RSG and NDR, divided by the number of dwellings in Wales.

The number of dwellings used is referred to as the **taxbase** and is effectively the number of band D equivalent dwellings within the authority which are liable for council tax adjusted to take account of the number of properties in each council tax band. The figure is presented in terms of the number of council tax Band D properties. The taxbase will therefore vary between authorities depending on both the number and value of properties in their area.

CTSS is a notional figure because all local authorities budget to collect less than their full taxbase and also because authorities spend above or below SSA. Spending above SSA is funded wholly from council tax.

RSG is a "balancing" sum, which tops up the amounts available from NDR and CT above and enables an authority to spend at SSA.

FF is the floor funding adjustment applied in particular years to the RSG to place a floor on the amount of change that is visited on any individual authority. For the 2015-16 Settlement, a floor funding adjustment was applied and set at -4.6% (All subsequent reference to RSG in this publication is net of this adjustment.)

INTRODUCTION

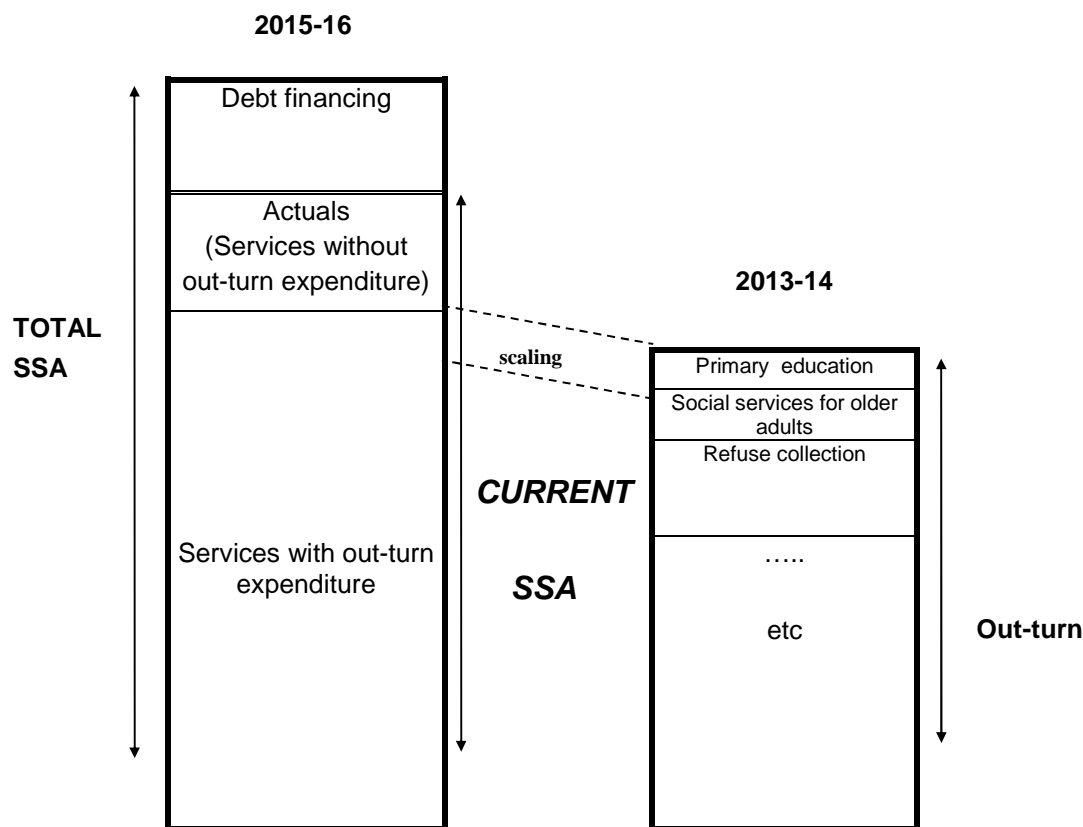

Individual SSA Components

4. For the purpose of calculating individual SSA allocations local government revenue spending is broken down into 49 notional service areas. A separate method of distribution exists for each of these elements in order to distribute the service total across the authorities. The distribution methods fall into two categories:
 - Formula based on indicators of need
 - Distribution based on actual expenditure or estimates of expenditure.
5. Authorities' elements of the individual service areas are "unhypothecated" - they are notional figures which serve as building blocks for the overall SSA; **they do not represent spending targets for individual services and are not in any way meant to be prescriptive.**

Defining Service Totals

6. The total amount available for distribution as SSA is divided into two elements:-
 - *current expenditure* (the amount notionally available for spending on current revenue services e.g. teaching costs)
 - *debt financing expenditure* (the notional amount available for financing debt. From 2004-05 the old system of credit approvals has been replaced by the prudential borrowing system.)
7. The totals for the debt-financing components are calculated at the all-Wales level outside the SSA formula and are based on the amounts authorities have borrowed in the past plus any new debt. The total for current expenditure (current SSA) is calculated by subtracting this from the overall total. The services that make up current SSA are termed 'current services'.
8. Service totals for current services are derived from out-turn expenditure data. The 2015-16 settlement calculations used the 2013-14 out-turn expenditure data.
9. Some local authority functions, for instance those that have existed for less than two years, do not have relevant out-turn expenditure data. The services relating to these functions have definite totals, which are fed into the SSA calculation and are known as **actuals**. Excepting this, however, they are treated in the same way as all other services. They form a small proportion of the unitary authority total SSA (6.2% for 2015-16).
10. The totals for 'actuals' are subtracted from the total for current SSA. The remaining amount is distributed amongst the other services depending on the proportion of their out-turn. Figure 1 overleaf illustrates the breakdown of total and current SSA.
11. The service-based approach minimises the effect of individual authorities' spending decisions on the distribution of SSA. Each service is only a part of the final SSA total and, for each service, each unitary authority's element is determined purely in terms of a need indicator.

Figure 1: Breakdown of total and current SSA e.g. for 2015-16

Service out-turn expenditures are scaled to ensure that their sum is equal to the total for the Settlement year.

Distribution using a formula based on indicators of needs

12. The majority of services are distributed on the basis of a formula containing indicators of need. Indicators of need are used as opposed to direct measures of service utilisation so that authorities are not able to directly influence their SSAs and hence the amount of grant that they receive. The indicators used in the formulae can be placed in 3 categories:

- Main client group - The main factor influencing cost.
e.g. population, pupil numbers or road lengths.
- Deprivation - Indicators to reflect the additional cost of providing services to populations with higher levels of deprivation.
e.g. income support recipients, people with long-term illness
- Population dispersion - Indicators to reflect the additional cost of providing services to populations in rural areas. Measures of population dispersion were developed specifically for use in the Welsh local government Settlement, based on the pattern of settlements in Wales.

INTRODUCTION

13. The formulae for all services were reviewed prior to the 2001-02 Settlement following recommendations made in an independent review undertaken by Swansea University and Pion Economics. The outcomes of this work were implemented in the 2001-02 and subsequent year's settlements. A major review of the main PSS service formulae was carried out during 2004, with the new formulae for the 'children and young persons' and 'older adults services' incorporated in the 2005-06 Settlement, and for 'younger adults' in the 2007-08 settlement.
14. The formulae have mainly been derived using statistical modelling methods but for a small number of services this is not possible as the pattern of expenditure across authorities is so varied that it is necessary to develop a formula based on informed judgement. This is also the case for new services where expenditure data is not available to be able to derive a formula using statistical modelling.
15. Some services do not have their own formula but are distributed using that of a related service. This is often the case for a new service where patterns of expenditure are not yet known and the formula for the most similar service is used, but is also the case for some general functions such as administration which are distributed on the basis of all relevant services, e.g. education administration is distributed on the basis of SSAs for all education services.
16. The percentage share of funding for each authority is listed in the sections on service and sector Indicator Based Assessments (IBAs). This shows the weighting given to each authority based on the Composite Primary Indicator (CPI). The CPI is calculated by multiplying each authority's indicator value by the weight shown in the formula. This is repeated for each part of the formula and the resulting values are added. The total value is divided by the value for Wales and used to calculate the percentage share of the funding for each authority.
17. The capital financing component of an authority's SSA is modelled separately. A new prudential borrowing system was introduced in 2004-05. Debt incurred as a result of government approved loans for capital projects that existed on 31/03/2004 will be written off on a reducing balance basis over 25 years. Currently the Welsh Government makes an assessment of new borrowing that it is prepared to support and includes this in the calculations along with debt already incurred as a result of Government approved loans. There are also adjustments for leasing charges (this does not include operational leasing charges) and for grants provided by central government for capital financing purposes.

Distribution using expenditure

18. In a small number of cases the actual expenditure on a service (or the best available estimate) is used. This is the case where the expenditure is pre-determined and is in a sense not directly in the authorities' control. Examples of this are levies for drainage and national parks.

Summary

19. The total SSA for an authority is calculated as the sum of current SSA and the debt-financing components mentioned above.
20. The following main points form the basis of the system.
 - The overall size of the Settlement is determined by government control totals.
 - The relative weights of the services are determined by actual expenditure patterns.
 - The distribution within services is, in general, determined by objective indicators of authorities' relative need to spend.
 - SSAs and component services do not represent expenditure targets for local authorities. They are a means of grant distribution only.

INTRODUCTION

SUMMARY OF FORMULA CHANGES FOR 2015-16 INDICATOR BASED ASSESSMENTS

1. Consumer Protection formula

Old formula:

50% x Population, all ages (projected)

32% x Total income support, job seekers allowance and pension credit claimants

10% x Trading premises

8% x Dispersion threshold 7,500 (1991)

New formula:

40% x Population, all ages (projected)

40% x Total income support, job seekers allowance and pension credit claimants

20% x Trading premises.

STRUCTURAL CHANGES TO THE STANDARD SPENDING ASSESMENT SECTORS FOR 2015-16

There have been a number of structural changes to the SSA sectors for the 2015-16 Settlement that will carry forward into following years. Details are as follows:

A new sector entitled 'Debt Financing SSA' has been created, which comprises the Debt Financing IBA along with the three pre-determined commitments that are included in the 2015-16 Settlement:

- Local Government Borrowing Initiative – Highways
- Local Government Borrowing Initiative – 21st Century Schools
- Private Finance Initiative

This will lead to a reduction in the size of the Transport and Other Services sectors, which has been reflected in the 2014-15 figures. Therefore, the sector-level figures will not be wholly comparable with previous editions of this publication.

In addition to this change, the Indicator Based Assessment Council Tax Reduction Schemes has been removed from the Other Services sector and assigned its own SSA sector. This causes a significant effect on the size of the Other Services sector, which has also been reflected in the 2014-15 figures.

WELSH LOCAL GOVERNMENT REVENUE SETTLEMENT 2015-2016

**ANNEX D
General Capital Funding Calculations**

GENERAL CAPITAL FUNDING (GCF) CALCULATIONS 2015-16

Summary

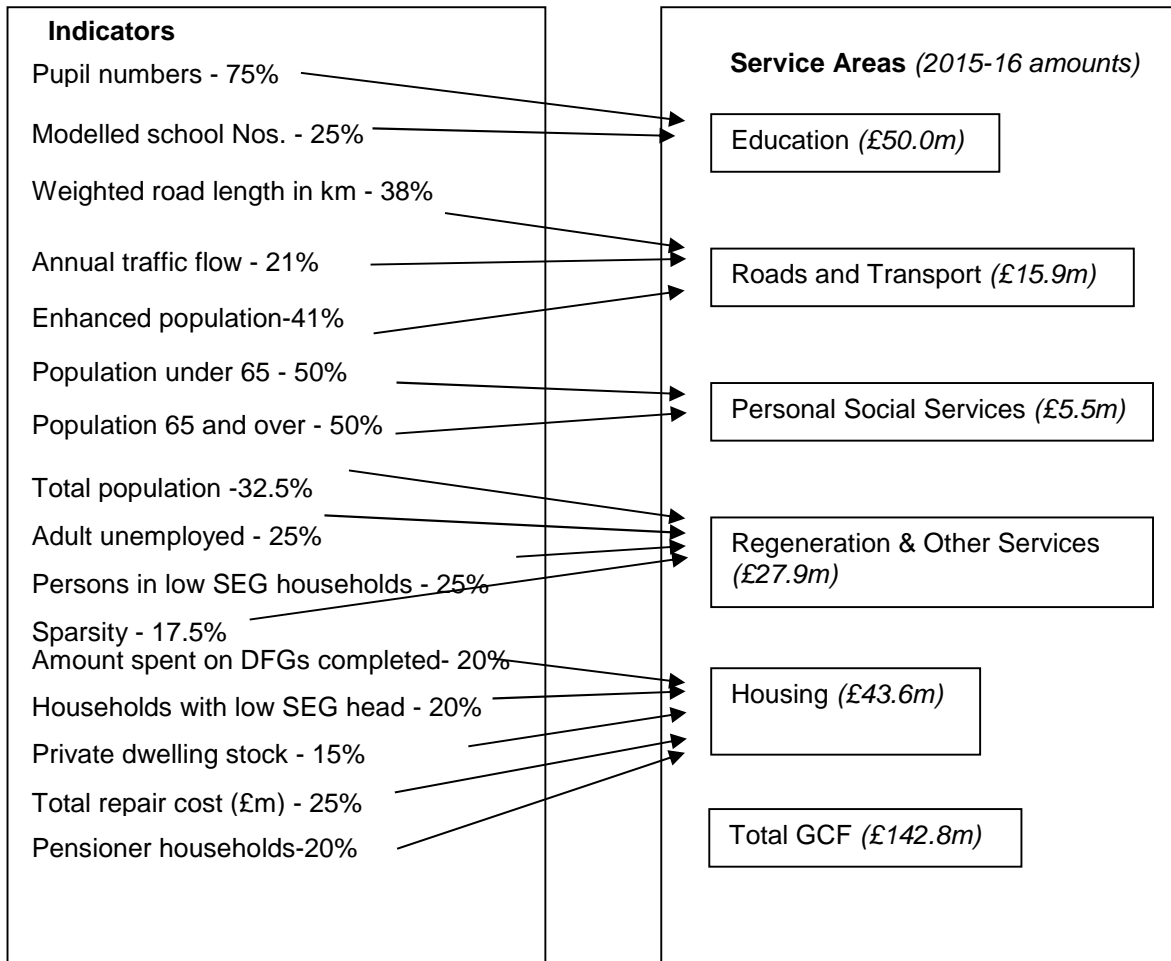

1. This paper gives details of the indicators used to allocate the distribution of General Capital Funding (GCF) in Wales and the service areas for which funds are allocated.
2. It also provides details of the total amounts allocated to each unitary authority in Wales for 2015-16.

Background

3. GCF is the heading under which funds are provided to unitary authorities for capital projects on a non-hypothecated basis. Funding is provided as a combination of general capital grant and support for borrowing through the revenue settlement.
4. Like local government Standard Spending Assessments, the distribution of funds is calculated on a formula basis using a variety of indicators.

Detailed Consideration

5. The amount available for GCF is laid out in the Welsh Government budget under appropriate service headings. The calculations use a number of indicators to assess the relative need and produce the distribution for capital funds for each of the 22 unitary authorities in Wales. As shown below, weightings are applied to the indicators to produce notional amounts for five service areas for each unitary authority. However the resulting total is non-hypothecated and can be used for capital projects under any service area as required.

ANNEX D
General Capital Funding Calculations

6. The breakdown of the local authority capital settlement is below. The General capital fund also includes £20m currently within the Local Government budgets prorated over the GCF totals shown in other departments.

Service breakdown of the local authority (LA) capital settlement 2015-16.

Service	£ thousands			
	Local Authority Capital Settlement (a)	Specific Grants (b)	Additional General Grant (d)	General Capital Funding (e)

Personal Social Services	10,527	5,072	764	5,455
Grand Total	398,313	255,476	20,000	142,837

(a) The Local Authority capital settlement excludes any special grant provision issued under section 88B of the Local Government Finance Act 1988.

(b) These grants exclude Housing Exchequer Contributions.

(c) This includes former Strategic Development Scheme and DBRW / WDA / Programme for the Valleys resources. It also includes the block formerly referred to as Other Local Services and the Local Regeneration Fund and substance misuse

(d) Additional GCF is prorated over the GCF totals showing in other MEGS

(e) Includes Additional £20m GCF

7. The majority of indicators are obtained directly from published statistics. Tables 1-6 on pages 129-131 contain details of each dataset used in the calculation of the general capital funding total. The adult unemployed data is averaged for the latest twelve month period for which it is available. The sparsity figures are effectively the number of hectares per person, calculated using land area and the latest population estimates data. The school numbers are modelled for primary and secondary schools. Minor road length is calculated by aggregating figures for unclassified and non-principal roads.
8. The overall totals for General Capital Funding by authority for 2015-16 are set out on the next page (page 128).

ANNEX D
General Capital Funding Calculations

2015-16 breakdown of general capital funding, by unitary authority

Authority	Final				
	£thousands				
	General capital funding 2015-16	of which: HRAS supported borrowing	Non-HRA general capital funding	of which: General capital grant	Unhypothesized supported borrowing
(1)	(2)	(3)=(1)-(2)	(4)	(5)=(3)-(4)	
Isle of Anglesey	3,521	0	3,521	1,332	2,189
Gwynedd	6,637	0	6,637	2,511	4,126
Conwy	5,538	0	5,538	2,095	3,443
Denbighshire	4,847	0	4,847	1,834	3,013
Flintshire	6,868	0	6,868	2,598	4,270

Monmouthshire	3,865	0	3,865	1,462	2,403
Newport	6,427	0	6,427	2,431	3,996
Cardiff	13,449	0	13,449	5,088	8,361
Total unitary authorities	142,837	0	142,837	54,037	88,800

- (1) General capital funding is split into unhypothesized supported borrowing (USB) and general capital grant.
- (2) Following the exit of the Housing Revenue Account Subsidy system at the end of 2014-15. Councils are no longer asked to confirm if they wish any USB to be eligible for HRA subsidy funding.
- (3) General capital funding for the non-HRA element is derived by subtracting the HRA figures from the total in column (1). This non-HRA element takes the form of USB and general capital grant.
- (4) General capital grant is distributed in proportion to total general capital funding for the non-HRA element.
- (5) The non-HRA USB is derived by subtracting the general capital grant allocations from the non-HRA general capital funding.

Data used for the calculation of GCF

1. Indicators used in Education IBAs

Deprivation

Dependent children in households where head is in a low occupational classification	page 88 (4)	page 106 (4)
Dependent children in lone adult households	page 89 (1)	page 107 (1)
Dependent children in out of work families	page 89 (2)	page 107 (2)
Primary school pupils eligible for free school meals	page 99 (3)	page 117 (3)
Secondary school pupils eligible for free school meals	page 100 (1)	page 118 (1)
Total income support, job seekers allowance and pension credit claimants	page 103 (1)	page 121 (1)

Population

Population aged 3 to 11 (projected)	page 97 (2)	page 115 (2)
Population aged 3 to 16 (projected)	page 97 (3)	page 115 (3)
Population aged 11 to 15 (projected) and secondary school pupils in year groups 12 to 14	page 95 (4)	page 113 (4)
Population aged 16 to 18 (projected) other than at school	page 96 (3)	page 114 (3)
Population aged 11 to 20 (projected)	page 96 (1)	page 114 (1)
Population aged 16 and over (projected)	page 96 (2)	page 114 (2)

Pupils

Primary school pupils and modelled nursery school pupils	page 99 (2)	page 117 (2)
Secondary school pupils in year groups 7 to 11	page 100 (3)	page 118 (3)
Secondary school pupils in year groups 10 and 11	page 100 (2)	page 118 (2)

Schools

Area per modelled primary school index	page 87 (3)	page 105 (3)
Area per modelled secondary school index	page 87 (4)	page 105 (4)

Sparsity

Dispersion threshold 2,500 (1991)	page 90 (2)	page 108 (2)
Settlement threshold 1,000	page 100 (4)	page 118 (4)
Settlement threshold 7,500	page 101 (4)	page 119 (4)
Settlement threshold 12,500	page 101 (1)	page 119 (1)
Settlement threshold 40,000	page 101 (3)	page 119 (3)

	Annex A Page (col)	Annex B Page (col)
2. Indicators used in PSS IBAs		
Deprivation		
Adults aged 18 to 64 in non-white ethnic groups	page 87 (1)	page 105 (1)
Dependent children in out of work families	page 89 (2)	page 107 (2)
Dependent children in overcrowded housing	page 89 (3)	page 107 (3)
Dependent children in social rented housing	page 89 (4)	page 107 (4)
Households where head is aged 18 to 64 with no carer	page 91 (4)	page 109 (4)
Income support, job seekers allowance and pension credit claimants aged 18 to 64	page 92 (3)	page 110 (3)
Integrated Family Support Service	page 93 (1)	page 111 (1)
Pension credit claimants aged 65 and over	page 94 (4)	page 112 (4)
Pensioners living alone in households	page 95 (1)	page 113 (1)
Pensioners with a limiting long-term illness	page 95 (2)	page 113 (2)
Severe disablement allowance and disability living allowance claimants aged 18 to 64	page 102 (1)	page 120 (1)
Density		
Population aged under 18 in wards with weighted density greater than the Welsh average	page 98 (2)	page 116 (2)
Population		
Population aged 18 to 64 (projected)	page 97 (1)	page 115 (1)
Population aged 85 and over (projected)	page 98 (1)	page 116 (1)
Sparsity		
Dispersion threshold 300 (2001)	page 90 (3)	page 108 (3)
Dispersion threshold 7,500 (2001)	page 91 (1)	page 109 (1)
3. Indicators used in Transport IBAs		
Enhanced population (projected)	page 91 (2)	page 109 (2)
Population aged 60 and over (projected)	page 97 (4)	page 115 (4)
Population aged under 60 (projected)	page 98 (3)	page 116 (3)
Population, all ages (projected)	page 99 (1)	page 117 (1)
Settlement threshold 7,500	page 101 (4)	page 119 (4)
Street lighting units	page 102 (3)	page 120 (3)
Traffic flow	page 103 (3)	page 121 (3)
Urban road length	page 103 (4)	page 121 (4)
Weighted Road Length	page 104 (1)	page 122 (1)
4. Indicator used in Fire IBA		
Population, all ages (projected)	page 99 (1)	page 117 (1)

5. Indicators used in Other services IBAs

Caseload and other

All dwellings	page 87 (2)	page 105 (2)
Council Tax Reduction Schemes Caseload	page 88 (1)	page 106 (1)
Food premises	page 91 (3)	page 109 (3)
Housing General Capital Funding	page 92 (2)	page 110 (2)
Land drainage levies	page 93 (2)	page 111 (1)
Length of artificially protected coastline	page 93 (3)	page 111 (3)
National park levies	page 94 (2)	page 112 (2)
Planning applications received	page 95 (3)	page 113 (3)
Ships arriving at ports	page 102 (2)	page 120 (2)
Trading premises	page 103 (2)	page 121 (2)
Urban road length	page 103 (4)	page 121 (4)

Deprivation

Housing Benefit Recipients	page 92 (1)	page 110 (1)
Index-weighted working age population	page 92 (4)	page 110 (4)
Total homelessness decisions	page 102 (4)	page 120 (4)
Total income support, job seekers allowance and pension credit claimants	page 103 (1)	page 121 (1)

Population

Enhanced population (projected)	page 91 (2)	page 109 (2)
Number of deaths from all causes	page 94 (3)	page 112 (3)
Population aged 18 and over (projected)	page 96 (4)	page 114 (4)
Population within settlement threshold 50,000	page 98 (4)	page 116 (4)
Population, all ages (projected)	page 99 (1)	page 117 (1)

Sparsity

Dispersion threshold 5,000 (1991)	page 90 (4)	page 108 (4)
Settlement threshold 7,500	page 101 (4)	page 119 (4)
Settlement threshold 30,000	page 101 (2)	page 119 (2)

6. Indicator used in Deprivation Grant IBA

Deprivation Grant	page 90 (1)	page 108 (1)
-------------------	-------------	--------------

8. Indicators used in the Debt Financing SSA IBAs

Debt Financing	page 88 (3)	page 106 (3)
Local Government Borrowing Initiative - 21st Century Schools	page 93 (4)	page 111 (4)
Local Government Borrowing Initiative - Highways Improvement	page 94 (1)	page 112 (1)
Private Finance Initiative	page 99 (4)	page 117 (4)

Annex C
Page (col)

Notional debt at the beginning of 2015-16	page 124 (3)
Average notional debt for 2015-16	page 125 (2)
Leasing charges	page 125 (3)
Specific Grants Against Loan Charges	page 125 (4)

Figure 3: Aggregation of SSA elements into need indicator categories¹

¹Figure 3 shows the percentage of current SSA across Wales distributed by category of indicator of need. Client-based indicators, which account for 69% of current SSA, include population data, pupil numbers, road lengths data, levies and other. Sparsity (6%) covers the settlement and dispersion threshold indicators. Deprivation, which accounts for the remaining 25% of current SSA, includes indicators of deprivation, caseload measures and indicators of population density.
