Need to consider : Social well being A framework for health
 The economic value of landscape for tourism
 as well as 'well being'. Agriculture & tourism
 are the major GDP : Mid Wales + social economic
 entrepreneurship
 Implications of self-employment

Esboniwch y mater rydych wedi codi yn fyr ac esboniwch sut gall yr ardal rydych wedi nodi ar y map helpu ymafael â'r mater yma.

Please briefly explain the issue you have raised and how the areas you have identified on the map can help address this issue.

Local democracy
Need for local accountability — place plans need to have teeth
Local people know their areas best and what the needs and constraints are

Planning should not be driven by the urban imperative of South & NW Wales rural issues are very different

Carbon reduction must focus far more on tackling the cause — low carbon build; solar panels on all new buildings (domestic, industrial & agricultural) Reduce travel by having accessible services encourage development of self-employment & home based working high speed broadband / mobile / health care facilities and educational opportunity.

SSA (TAFs) policy with presumption: favour of renewable development a complete failure that failed to recognise local issues of biodiversity, water retention, uplands, historic landscapes and the superb panoramic, unspoilt landscapes that draw our tourists and are essential to well being, diversification and maintenance of our local rural

Welsh Government: NDF Engagement Jan/Feb 2017

DNS is not an appropriate measure for NDF — May DNS are for too small (low wind 25+ hours) services

Please briefly explain the issue you have raised and how the areas you have identified on the map can help address this issue.

National Development Plan should cover:

- a) Renewable energy - Wind, sun, hydro, tidal
to address decarbonisation. (also tree planting)
- * Use of natural resources to deliver infrastructure (minerals, water etc)
- b) Need to address cross border issues affecting transport, rivers, canals,
- c) Rural depopulations, particularly an issue in Powys.
low incomes + aging population
Would a university (in Newtown) help to build a more skilled workforce + help to address loss of young people to cities?
Growth is dependent on having a skilled workforce - ~~Need clear focus~~
- d) Food security - designated land for food production. Need alternatives to agricultural intensification.
- e) Tourism. Need to identify infrastructure needed to support recognised [tourist destinations] ^{growth objectives}
Need technology to support tourism + business.
Restoration of Montgomery Canal from National network to Newtown would bring huge tourism + economic benefits, but requires changes to trunk roads to make it navigable again. Real opportunities for Upper Severn valley.
- f) Discussion of regulatory framework linked to Brexit. Does NDP need to reinstate some rules?

Improve communication
Cross borders / east / west /
North South.
Better Rail links.
Bring in more
industry to generate
jobs and halt rural
depopulation

Tourism - open up
Montgomery Canal to Newtown

Broadband / mobile

Mater / Issue

Nationally - important that before making decisions on major infrastructure projects there has to be mechanism to identify if construction materials are available and they have planning permission.

Mater / Issue

- 1) Connectivity as key enabler. (all sorts of connectivity)
- 2) Dispersed or Central development \Rightarrow Service Centres
- 3) Cross-border a significant influence (inwards & outwards)
- 4) Consistency of service across all areas.
- 5) What organisations do we have to deliver outputs

Esboniwch y mater rydych wedi codi yn fyr ac esboniwch sut gall yr ardal rydych wedi nodi ar y map helpu ymafael â'r mater yma.

Please briefly explain the issue you have raised and how the areas you have identified on the map can help address this issue.

- 2) NDF can lead to define a move away from a Centralised development, towards a dispersed 'service-hub' approach.
- small to medium sized "service centres" serving a dispersed ~~the~~ living population
- 5) Do we have an organisational model in place to actually deliver the outputs of the range of plans in the hierarchy of plans - locally there is a lack of resources to deliver.
- 3) Cross-border: plan needs a huge focus on the effects of 2 way the movement across border of goods / people / capital / resources.
