## **EXECUTIVE SUMMARY**

### **Introduction**

The agreement of the European Council and the European Parliament on the EU budget for 2007-2013 means that East Wales will receive “Regional Competitiveness & Employment” funding – the second highest level of support available under the next round of Structural Fund programmes. This provides East Wales with a major opportunity to build on the significant progress made under the Objective 3 programme (2000 - 2006), and to complete the transformation from a region suffering protracted economic problems, into a strong and sustainable economy.

The region will receive total Community funding of €136 million to support Regional Competitiveness & Employment programmes worth over €338 million. This ESF Regional Competitiveness & Employment programme will receive Community funding of €64 million (47% of the total). When this is combined with national public and private funding, the programme will provide €158 million to boost growth and jobs over the period 2007-2013.

### **Vision**

Our vision for East Wales is to make it a high skill, knowledge driven economy with full employment, a skilled and adaptable workforce, and a region at the cutting edge of sustainable economic development.

Our ambition is for East Wales to be at the forefront of the EU’s drive to be a beacon of economic, social and environmental progress to the rest of the world. East Wales will be a world-class exemplar of a region of 1.01 million people, at the geographical periphery of Europe, but thriving in competitive world markets and providing a world-class environment in which people want to live, work and play.

### **Analysis**

East Wales performs well compared to the rest of Wales on almost all of the leading economic indicators. Supported in part by the current round of structural funds, the economy of East Wales has shown marked signs of improvement over recent years. Headline Gross Value Added per capita across East Wales is above the Welsh average, driven by the success of Cardiff and south-east Wales and the labour market has improved rapidly in recent years with rising employment, falling economic inactivity and higher average earnings than for Wales as a whole. The sub-region has also seen an overall increase in population, highlighting the area as an attractive place to live and adding to the potential workforce of the sub-region.

These strengths offer considerable opportunities and act as important drivers for the Welsh economy as a whole. It will be critical to build on the contribution offered by East Wales, through its better employment opportunities and its relatively high GVA, to support future growth not only of the sub-region, but also within West Wales and the Valleys. Increasing the value-added and productivity of the sub-region will do also do much in closing the gap between Wales and the UK.

Whilst East Wales has seen a significant rise in overall employment there is still much to be done to reduce economic disparities within the sub-region. Over one fifth of the sub-regions working age population remain economically inactive with certain groups suffering greater disadvantage than other in accessing and engaging with the labour market. Rates of economic inactivity for people with work-limiting health conditions and disabilities, young people classed as NEETs, older people and Black and Minority Ethnic people still remain high. In particular, the sub-region as a whole has seen a significant rise in youth unemployment over recent years.

Supporting economic growth rests not only on ensuring higher levels of employment and economic activity but on also ensuring the region has a highly skilled workforce. The sub-region already has a favourable skills profile with a higher proportion of its working age population at the upper end of the skills spectrum but despite this, value added per job (typically referred to as productivity) is lower in East Wales than across the UK as a whole. This is largely explained by the under-representation of typically higher value-added sectors industries than compared to the UK average. A key challenge for the sub-region in raising productivity will be to ensure skill levels of the workforce are developed to address any skill gaps and shortages needed to support higher value adding sectors.

The key focus of the activity which will be supported by the ESF Operational Programme will be to tackle two major challenges – economic inactivity and unemployment in the region, and raising basic skills levels and the adaptability of the workforce. The programme will add value to mainstream UK employment policies aimed at getting people into work, by using funds to focus on engagement and helping individuals reach a stage where they become ready to engage with such programmes. It will also focus on tackling low skills throughout the region by funding the provision of basic skills training, supporting systems to help identify future demand, and match provision of training and learning opportunities accordingly and supporting the higher level management and leadership skills in small enterprises (up to 50 employees).

The activities supported under the ESF Operational Programme will complement the East Wales ERDF Operational Programme which will focus on building an enterprising and flexible business sector, promoting innovation and R&D, and increasing innovation and adaptability in the use of energy and resources.

## **Policy Context**

The new Structural Fund programmes for 2007-2013 will have a stronger focus on the Lisbon and Gothenburg agenda for growth, jobs and sustainable development as set out in the *Community Strategic Guidelines for Cohesion* approved by Member States. The objectives and priorities of the East Wales Regional Competitiveness & Employment programmes are consistent with the Lisbon and Gothenburg agenda, and have been developed in the context of the *UK National Strategic Reference Framework (NSRF)* which explains how the Structural Funds will contribute to the overall *UK National Reform Programme (NRP) for Growth and Jobs*.

To maximise the impact from the Structural Funds, the Regional Competitiveness & Employment programmes will be aligned with relevant Welsh Assembly Government policies for delivering sustainable growth and jobs. These include:

- *Wales: A Better Country* – the Welsh Assembly Government’s broader strategic policy agenda;
- *Wales: A Vibrant Economy* – the economic development strategy for Wales;
- *The Learning Country 2: Vision into Action* – the education and lifelong learning strategy for Wales;
- *The Wales Skills and Employment Action Plan 2005*;
- *The Wales Spatial Plan – People, Places, Futures*;
- *The Wales Sustainable Development Scheme – Starting to Live Differently*;
- *The Environment Strategy for Wales*; and
- *Mainstreaming Equality*.

## **Strategy**

The overall aim of the ESF Regional Competitiveness & Employment programme is:

To create a high skill, knowledge driven economy, with full employment, a skilled, adaptable workforce and responsive businesses, at the cutting edge of sustainable development.

The key drivers to achieving this through the ESF programme are by:

- (a) Increasing employment and tackling economic inactivity; and
- (b) Improving skills levels, and systems for workforce development, to help businesses move continually up the value chain, and increase the value-added per job, thereby raising productivity and earnings.

The success of the Programme will be assessed on tracking progress against a range of economic and skills indicators set out in *Wales: A Vibrant Economy* and the *Learning Country 2*, notably employment, qualification levels and GVA, in absolute terms and relative to other parts of the UK and EU. Indicators and targets for individual priorities will also be closely monitored and will be grossed up to provide programme level targets. The Programme will also be subject to evaluation.

## **Priorities**

The programme will be implemented through a simplified structure comprising two main priorities plus a Technical Assistance priority.

### Priority 1: Increasing employment and tackling economic inactivity

*Objective* – to increase employment and promote social inclusion, and tackle economic inactivity.

### Priority 2: Improving skill levels and adaptability of the workforce

*Objective* – to improve basic skill levels amongst the workforce, and improve systems for workforce development.

## **Cross Cutting Themes**

The Cross-Cutting themes of Equal Opportunities and Environmental Sustainability will be fully integrated into these priorities. The Programme will also support Innovative Actions and Transnational/Inter-regional Co-operation. A separate Technical Assistance priority (Priority 3) will ensure the efficient and effective management of the Programme.

## **Financial Allocation**

98% of ESF Regional Competitiveness & Employment resources will be targeted at those categories of investment which will contribute most to achieving the Lisbon objectives for growth and jobs as defined in EU General Regulation [1083/2006], Article 8. Detailed financial allocations by Priority are set out in Chapter 7 – Financial Allocations, within the main Operational Programme document.

## **Implementation**

The programme has been developed in partnership and will also be implemented in partnership. A single Programme Monitoring Committee (PMC) will oversee the implementation of the Convergence and the Regional Competitiveness programmes in Wales. Strategic Frameworks will strengthen programme delivery and ensure projects are focused on key headline objectives and targets. There will also be a stronger emphasis on regional collaboration in the development of strategies and projects, in the context of the *Wales Spatial Plan*.

## CHAPTER 1: INTRODUCTION

1.1 This Regional Competitiveness & Employment Operational Programme details the Welsh Assembly Government's strategy and priorities for the economic and social regeneration of East Wales over the period 2007 – 2013, with the support of the European Social Fund. It is supported by a separate but complementary European Regional Development Fund (ERDF) operational programme. Acting together these programmes will have a catalytic effect in extending and enhancing the Welsh Assembly Government's own strong commitments to the Lisbon and Gothenburg reform agenda.

1.2 The Regional Competitiveness & Employment Operational Programmes have been developed in the context of the *Integrated Guidelines for Growth and Jobs (2005 – 2008)*, and the *Community Strategic Guidelines (2007 – 2013)* which set out cohesion policy objectives at EU level. The programmes complement the *UK National Strategic Reference Framework* and will contribute directly to addressing the challenges set out in the *UK National Reform Programme for Jobs and Growth*, with the aim of delivering long-term sustainable growth, high employment and a fair and inclusive society.

1.3 The ESF Regional Competitiveness & Employment Programme will promote a close alignment between EU and national policies for jobs and growth. The Wales economic development strategy, *Wales: a Vibrant Economy*, provides strategic direction towards a vibrant economy delivering strong and sustainable economic growth by providing opportunities for all. It has a clear focus on the Lisbon objectives of improving economic growth and providing additional jobs for the people of Wales, taking forward the priorities in *Wales: A Better Country*.

1.4 The main policy framework on employment and skills is set out in *The Learning Country 2: Vision into Action*, alongside the *Skills and Employment Action Plan 2005*, and *Reaching Higher*. The Welsh Assembly Government wants Wales as a place where high quality, lifelong learning liberates talent, extends opportunities, empowers communities, provides better jobs and skills to enable people to prosper in the new economy, and creates a sustainable future for Wales as a whole. To achieve this vision, these strategies recognise the need to increase employment levels, particularly by tackling economic inactivity, and to improve the skill levels of the workforce to support higher value-added jobs, and to contribute to the development of the knowledge economy.

1.5 These considerations lead to an emphasis within the ESF Operational Programme on:

- encouraging unemployed and economically inactive persons to enter the labour market; and
- improving skill levels and the adaptability of the workforce.

1.6 The ESF Regional Competitiveness & Employment Operational Programme builds on the extensive consultation that has taken place with a wide range of partners and stakeholders over recent months to shape the direction of the new European Structural Fund programmes.

## CHAPTER 2: ANALYSIS

### Executive Summary

2.1 The aim of the European Social Fund (ESF) is to strengthen economic and social cohesion by improving employment opportunities. Specifically ESF funding is designed to increase economic growth, by promoting employment and adaptability, and by enhancing human capital.

2.2 Within the range of ESF priorities this analysis highlights specific challenges for Wales and its regions. Given this, and in accordance with the objectives of the Community in relation to social inclusion, non-discrimination, the promotion of equality, education and training and to better contribute to the implementation of the objectives and targets of the Lisbon and Gothenburg European Councils, the analysis is presented in the following sub-sections:

- Demographic Trends – highlighting how the population across Wales has changed and the implications these changes have on the labour market and wider economic prospects.
- Access to employment and inclusion in the labour market – providing a headline overview of labour market conditions including issues relating to specific constraints and accessibility.
- Social inclusion of people at a disadvantage – describing specific issues for those disadvantaged in the labour market. This includes analysis, where available, of labour market trends by gender, age, ethnicity and for those with a disability. This disaggregated analysis provides an overview of whether particular groups of society are disadvantaged in the labour market and a summary of some of the reasons underlying any disadvantage using empirical evidence where available, and focussing in particular on younger people.
- Human capital –providing analysis of the skills of the Welsh population are assessed together with a review of the importance of skills in determining labour market outcomes. This analysis provides a focus on the role of education in labour market outcomes especially for individuals from disadvantaged backgrounds.
- Deprivation – Review of spatial deprivation in Wales and the potential for administrative capacity to improve the quality of public services in Wales. In addition, aspects of the environment that affect the quality of life for individuals are also assessed.

2.3 The analysis provides the evidence for our strategy and proposed interventions via the ESF. These will take forward the guidelines and recommendations made under the *European Employment Strategy (EES)* which reflecting the Lisbon agenda aims to achieve full employment, improve quality and productivity at work and enhance social and territorial cohesion. The analysis presented highlights the progress Wales and its sub-regions have made in relation to a number of headline targets set in the EES including targets to increase participation in lifelong learning.

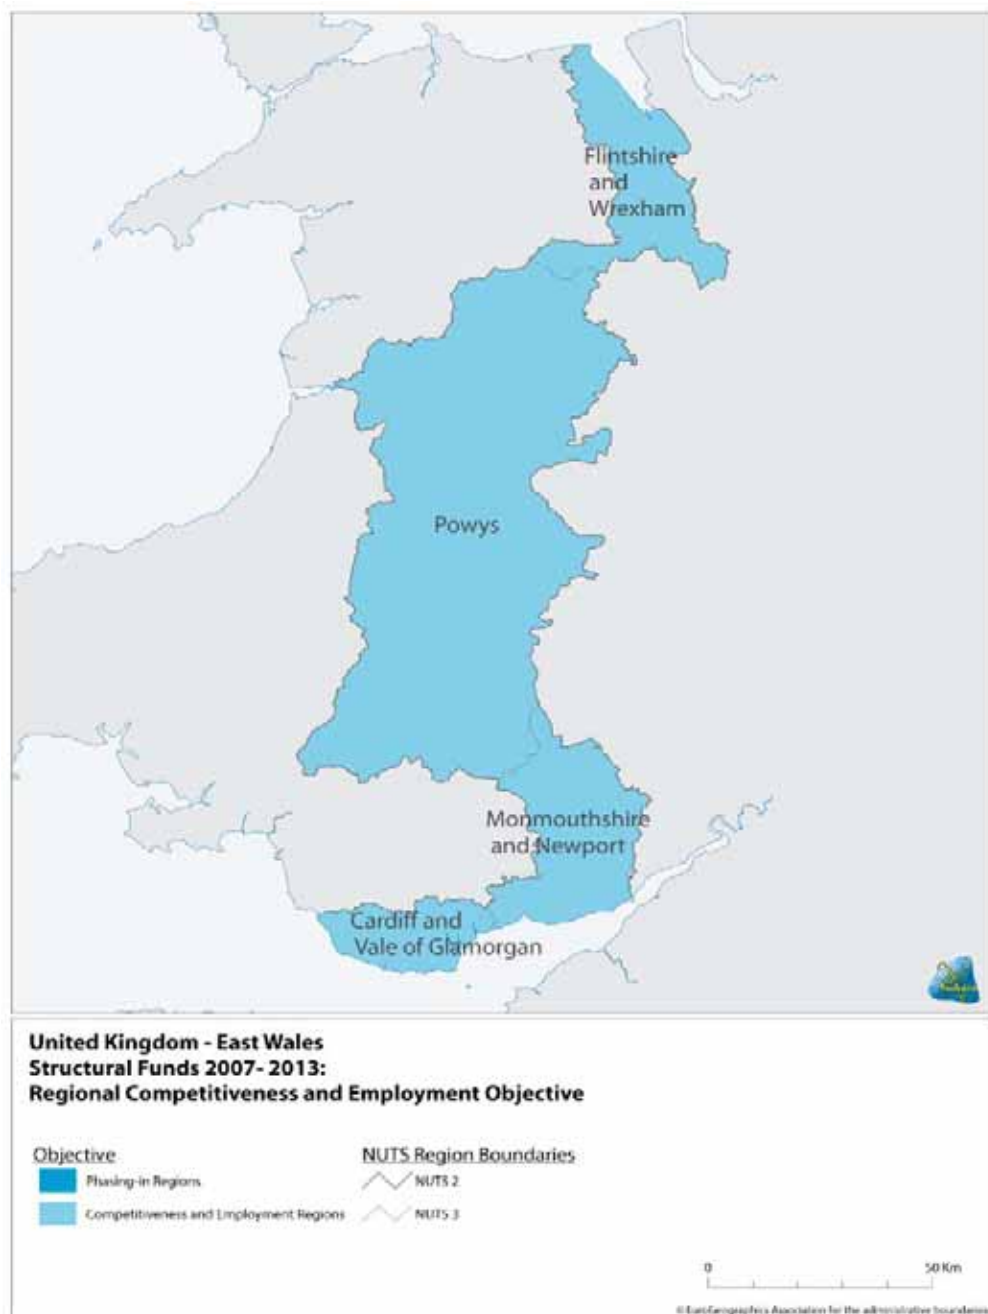

2.4 The analysis also examines the underlying strengths and weaknesses of the Welsh labour market of East Wales and West Wales and the Valleys, which sets the scene for programming in the context of the Lisbon agenda and the *UK's National Reform Programme*.

2.5 Wales covers an area of 2.078 million hectares (around 20,000 km<sup>2</sup>), comprising a population of some 2.9 million. The mountains of Wales are the most significant relief feature, covering more than half of the country and dominating the appearance of the landscape. Approximately 80% of the total area of Wales is designated as Less Favourable Areas, which parallels closely the mountainous and upland areas within Wales. East Wales is a diverse area of where approximately 35% of the total population of Wales reside. The East Wales region includes the following local authorities:

- Flintshire;
- Wrexham;
- Powys;
- Monmouthshire;
- Newport;
- Cardiff;
- Vale of Glamorgan.

2.6 The relevant eligible areas are illustrated in the East Wales Regional Competitiveness & Employment region map, below at Figure 1.

**Figure 1. Map of the East Wales Regional Competitiveness & Employment Programme area**

2.7 The analysis presented in this chapter provides an overview of the Welsh labour market in accordance with the Community Strategic Guidelines, with a particular focus on the priority of creating more and better jobs across Member States. In addition to the headline all-Wales overview the analysis highlights particular issues at the regional level with a particular emphasis on common themes and differences between the Regional Competitiveness and Employment and Convergence Programme areas of Wales, with some additional local level analysis.

2.8 The analysis in this chapter utilises a range of data sources. At the EU level the Eurostat Regio database has been used to highlight Wales and sub-Wales level data in the context of European wide data and trends. Data from the UK's Office for National Statistics has been used to provide specific UK, Wales and sub-Wales data. This has been supplemented by reference to academic research in the field of labour and social economics to provide evidence of the underlying reasons for statistical trends.

## Introduction

2.9 This analysis provides a more detailed appraisal of the demographic structure and labour market conditions that underpin the development of the Regional Competitiveness and Employment and Convergence ESF programmes. It provides an analysis of the strengths and weaknesses for Wales as a whole, with further sub-regional analysis for both East Wales and West Wales and the Valleys.

2.10 Headline economic performance is conventionally measured by Gross Domestic Product per head of population<sup>2</sup>. Across East Wales GDP per head was 18% above the average for the 25 countries of the European Union, and in West Wales and the Valleys GDP per head is approximately 77% of the average for the 25 countries of the European Union.

2.11 The importance of demographic structure and labour market conditions are highlighted in the analysis of the prosperity gap between Wales and the UK as a whole<sup>3</sup>. Between 2001 and 2003 GVA<sup>4</sup> per head across East Wales stood at £15,600 compared to £12,100 across Wales, £15,400 across the UK as a whole, and in West Wales and the Valleys at £10,100. Analysis of the components that contribute to overall economic performance show that approximately 35% of the overall gap in GVA per head in Wales compared to the UK average is explained by adverse labour market conditions (employment to working age ratio and jobs to employment ratio), with a further 10% of the overall gap explained by Wales having a slightly larger dependent population<sup>5</sup>.

2.12 Figure 2 below shows the results of this analysis. Overall variations in GVA per head can be broken down principally into differences in:

- the proportion of the population that is of working age;
- the proportion of the working age population that is actually in work;
- the proportion of the working age population that work in a given area (reflecting commuting patterns); and

---

<sup>2</sup> It is widely recognised that GDP per head may not fully reflect wider welfare or quality of life factors. However, it does provide a useful measure of economic performance within each time period.

<sup>3</sup> Welsh Assembly Government's *Wales: A Vibrant Economy*:  
<http://new.wales.gov.uk/about/departments/dein/publications/wave?lang=en>

<sup>4</sup> GVA is calculated as GDP minus indirect taxation and subsidies. Data comparing Wales to the EU average is only available as GDP per head.

<sup>5</sup> Relative dependency of the population is calculated by the ratio of working age individuals compared to the total population.

- the average output or value-added per job<sup>6</sup>.

2.13 The lower employment to working age ratio (the employment rate) explains approximately 25% of the overall gap in GVA per head in Wales compared to the UK average. Approximately 10% is explained by Wales having a lower jobs-to-employment ratio. This is in part a consequence of commuting patterns in Wales with individuals resident in Wales working outside the region for employment. The orange section of Figure 2 shows that GVA per head in Wales is less than the UK average because Wales has a lower proportion of working age individuals than the UK as a whole. That is, Wales has a larger proportion of dependents in the population than the UK average.

2.14 Figure 2 shows some interesting differences between East Wales and West Wales and the Valleys. GVA per head in East Wales is approximately £250 higher than across the UK as a whole. Despite East Wales having lower value added per worker, and a lower employment rate, these are more than off-set by a higher jobs-to-employment ratio. GVA per head in West Wales and the Valleys is approximately £5,300 lower than across the UK as a whole. The majority of this gap is explained by lower value-added per job. Labour market conditions (lower employment to working age ratio in particular) explain the majority of the remaining gap.

**Figure 2. Analysis of GVA per head differences across Wales compared to the UK average, 2001–2003 average**

Source: Welsh Assembly Government based on ONS data

<sup>6</sup> Often referred to as productivity, although as illustrated later in the document, referring to productivity differences can be misleading, as productivity measures do not account for the industrial structure of the economy.

2.15 Figure 2 shows that enhancing the employment opportunities for individuals in Wales and maximising the potential of the Welsh population are key considerations in closing the gap in GVA per head in Wales compared to the UK average. Within this analysis it is important to understand the differing performance of sub-regions within Wales and the differing needs of individuals, in particular, those currently disadvantaged and those suffering from poverty and deprivation.

2.16 Table 1 provides a summary of the data supporting Figure 2. The data shows the overall contribution each factor has on explaining the lower/higher GVA per head of population compared to the UK average. The data in Table 1 have been rounded to the nearest 5% since this analysis is provide to indicate broad rather than to specific estimates of the extent the factors explain differences in GVA per head.<sup>7</sup>

**Table 1: Contribution of the factors that explain GVA per head differentials, percentage of total gap**

	<b>GVA per workforce job</b>	<b>Jobs to employment</b>	<b>Employment to working age</b>	<b>Working age to population</b>
<b>Wales</b>	-55%	-10%	-25%	-10%
<b>West Wales and the Valleys</b>	-55%	-15%	-20%	-10%
<b>East Wales</b>	-0.5%	+250%	-60%	-70%

### **Demographic trends**

2.17 Table 2 shows key demographic trends in Wales and the overall age profile of the Welsh population. Overall, there are just under three million people resident in Wales according to the Mid-2004 population estimates.

2.18 Approximately 35% of the Welsh population live in the NUTSII<sup>8</sup> area of East Wales, with the remaining 65% living in West Wales and the Valleys. As Table 2 shows, Wales (especially West Wales and the Valleys) has a higher proportion of individuals in the upper age brackets, particularly in the 60-69 and 70+ age brackets than compared to the UK as a whole.

2.19 In total some 60% of the total population of Wales is of working age, with approximately 20% aged under 16 and 20% in post-retirement ages. There is some slight difference within the sub-regions of Wales, with East Wales having a slightly higher proportion of the total population in the working age bracket than West Wales and the Valleys (61% versus 59%), and a slightly lower proportion of individuals in the post-retirement age bracket (19% versus 21%).

<sup>7</sup> Further details on the methodological approach are available in Welsh Assembly Government's *Wales: A Vibrant Economy*, Strategy for Economic Development, 2005.

<sup>8</sup> Nomenclature of Territorial Units for Statistics. Further details are available at: [http://europa.eu.int/comm/eurostat/ramon/nuts/introduction\\_regions\\_en.html](http://europa.eu.int/comm/eurostat/ramon/nuts/introduction_regions_en.html)

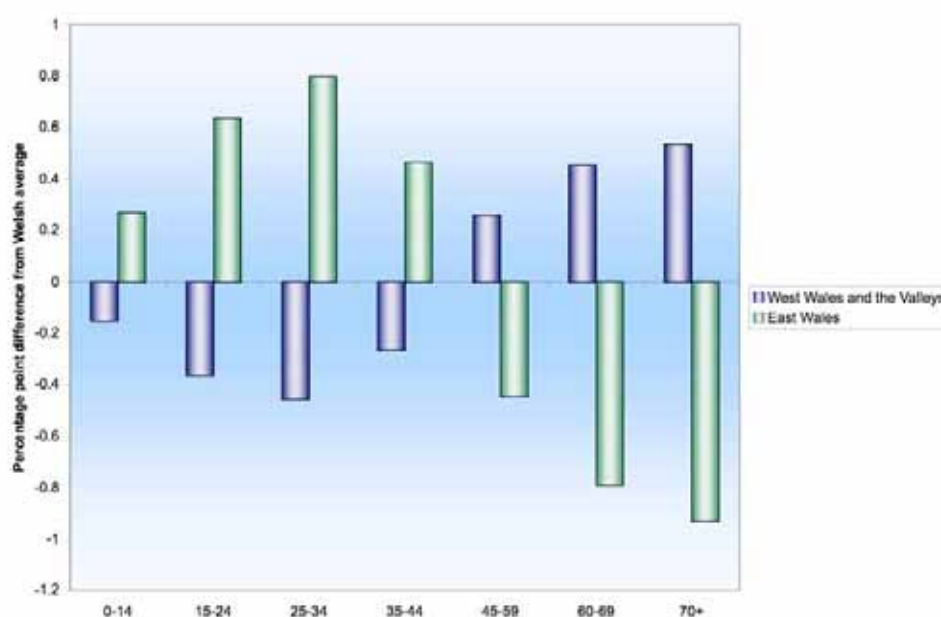

**Table 2: Population by age group, 2004**

	Age group							Total
	0-14	15-24	25-34	35-44	45-59	60-69	70+	
Thousands								
East Wales	197	147	133	159	209	105	126	1,077
West Wales and the Valleys	336	238	208	263	378	206	247	1,896
Wales	533	385	342	422	587	311	373	2,953
UK	10,866	7,720	7,937	9,192	11,518	5,716	6,885	59,834
Percentage of total								
East Wales	18.3	13.7	12.4	14.8	19.4	9.8	11.7	100.0
West Wales and the Valleys	17.9	12.7	11.1	14.0	20.2	11.0	13.2	100.0
Wales	18.0	13.0	11.6	14.3	19.9	10.5	12.6	100.0
UK	18.2	12.9	13.3	15.4	19.2	9.6	11.5	100.0

Source: ONS Mid-2004 population estimates

2.20 Sub-regional analysis shows that East Wales has a similar age profile as the UK, with a slightly higher proportion of individuals in the 15-44 age bracket. West Wales and the Valleys, however, has a lower proportion of individuals in the 44 and under age brackets, and a higher proportion of individuals in the 45 and over age brackets. Figure 3 shows the differences in the age composition of East Wales and West Wales and the Valleys, compared to Wales as a whole.

**Figure 3. Population age profile percentage point difference in age group shares, East Wales and West Wales and the Valleys compared to Welsh average, 2004**

Source: Mid-year population estimates, Office for National Statistics

2.21 Figure 4 below compares the age profile of East Wales, West Wales and the Valleys, Wales and the UK, compared to the average for the EU25. As Figure 4 shows, Wales and the UK have a relatively low concentration of individuals in the prime working age bracket 25-44. This is particularly the case for West Wales and the Valleys. Compared to the EU25 average, Wales has a relatively high concentration of individuals in the upper age brackets, typically, post-retirement ages. The sub-regions of Wales, Wales and the UK have a relatively high concentration of children compared to the EU25 average.

**Figure 4. Population age profile percentage point difference in age group shares, Wales and the UK compared to EU25 average, 2004**

Source: Mid-year population estimates, Office for National Statistics and Eurostat

2.22 Demographic patterns and in particular migration can provide an insight into the relative attractiveness of an area for individuals<sup>9</sup>. Table 3 shows that since 1981 the population of East Wales grew at the 1981–1991 growth rate (3.8%) while West Wales and the Valleys has increased by 2.3%, but for the period 1991–2001 the population growth ceased. Across all the time periods shown, population growth in West Wales and the Valleys lagged that for East Wales and consequently for Wales as a whole.

<sup>9</sup> It must be noted that migration patterns are a factor of various interactions and not just relative attractiveness.

**Table 3: Population change since 1981**

	Level (000s)				Change (Percentage)			
	1981	1991	2001	2004	1981-1991	1991-2001	1981-2004	1991-2004
East Wales	980	1,017	1,056	1,077	3.8	3.8	9.9	5.9
West Wales and the Valleys	1,834	1,856	1,855	1,876	1.2	-0.1	2.3	1.1
Wales	2,814	2,873	2,910	2,953	2.1	1.3	4.9	2.8

Source: Census, Mid-Year Population Estimates

2.23 Figure 5 below, shows the population change between 1991 and 2004<sup>10</sup> according to broad age breakdowns. A key consideration in the analysis is the proportionate increase in the working age population since this has a strong correlation to the overall dependency ratio<sup>11</sup> of the population.

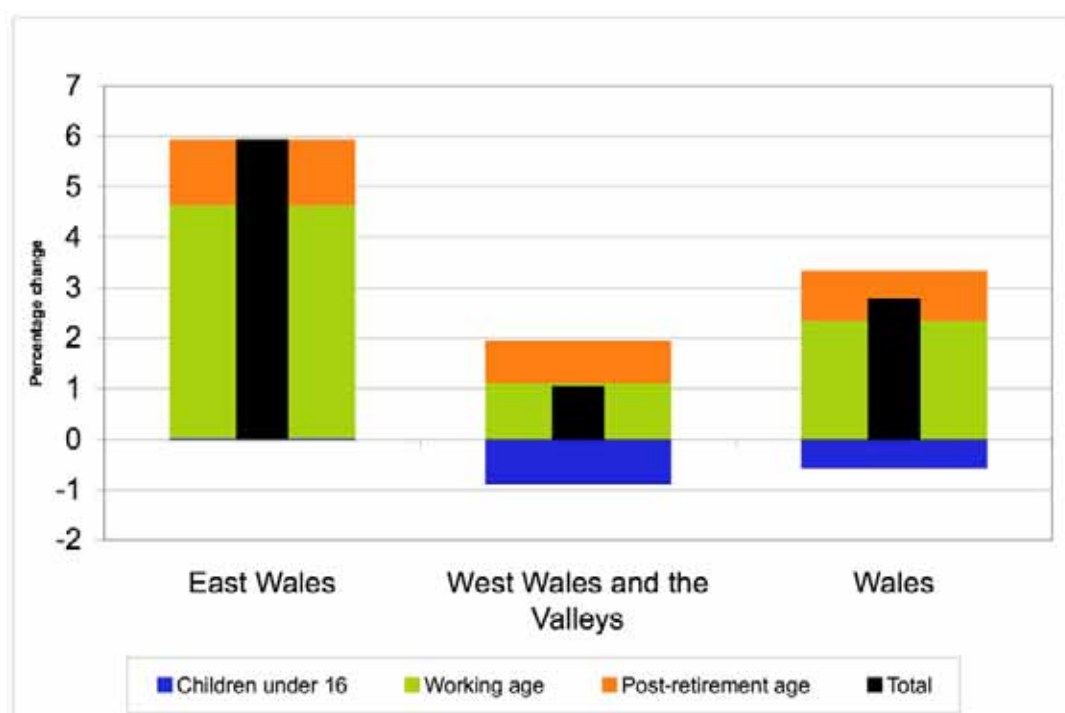

2.24 East Wales experienced a small increase in the child population unlike Wales as a whole, and West Wales and the Valleys during the time period. Proportionately, this fall was greater in West Wales and the Valleys than across Wales as a whole.

2.25 In East Wales the greatest increase was observed in the working age population, accounting for nearly 80% of the population growth over the time period. Unlike East Wales and Wales as a whole, the proportionate increase in the post-retirement age population across West Wales and the Valleys was almost as large as that for the working age population. This trend is due to the relatively small increase in the working age population across West Wales and the Valleys rather than the relative change in the post-retirement population.

<sup>10</sup> Data for specific age groups for 1981 was not available for the geographies selected, therefore 1991-2004 was chosen for the analysis.

<sup>11</sup> Relative dependency of the population is calculated by the ratio of working age individuals compared to the total population.

**Figure 5. Age breakdowns of population change, 1991–2004**

Source: Mid-year population estimates, Office for National Statistics

2.26 Table 4 below shows the components of population change across Wales, East Wales and West Wales and the Valleys. It identifies that Wales' natural population is falling, that is, deaths exceed births. This trend is a common phenomenon across most of the developed world and results in birth rates below the required replacement rate for the population to remain broadly constant<sup>12</sup>. Against this general trend, the number of births exceeded the number of deaths in East Wales. This increase was predominately concentrated in the city regions of Cardiff and Newport.

**Table 4: Components of population change, 2001–2004**

	Mid-2001 population	Live births	Deaths	Natural change	Net migration and other changes	Total change	Mid-2004 population
East Wales	1,056	35	33	2	20	22	1,077
West Wales and the Valleys	1,855	58	67	-9	29	21	1,876
Wales	2,910	93	99	-7	49	42	2,953

Source: Office for National Statistics (Totals may not add due to rounding)

<sup>12</sup> If the average woman has less than 2 children then the number of second generation will be less than the current generation, thus the second generation does not 'replace' the previous generation.

2.27 The Government's Actuary Department produce population projections. The latest projection for Wales shows that net in-migration is expected to continue to be the key driver of population growth across Wales. Between 2004 and 2024 the population of Wales is predicted to increase by approximately 239,000 people, of which 234,000 is predicted to be due to net in-migration with the remaining 5,000 due to the number of births exceeding the number of deaths, which is contrary to the recent trend shown in Table 4. The number of children aged 16 and under, and the number of dependent children, is predicted to fall with a rise in the number of dependent pensioners.

2.28 The main driver of population change across Wales is net in-migration and other changes more than offset the natural population decline. Within West Wales and the Valleys, however, net out-migration is a feature of the upper valleys (with low in-migration and some out-migration),<sup>13</sup> while most other areas experience net in-migration.

2.29 The sub-Wales analysis is presented in Figure 6. It shows that the only Local Authorities in Wales that experienced net out-migration were Torfaen, Blaenau Gwent and Merthyr Tydfil, all located in the upper South Wales Valleys. Migration patterns can be important as they can provide an insight into the relative attractiveness of an area for individuals<sup>14</sup>.

**Figure 6. Local Authority analysis of population change, 2001–2004**

Source: Office for National Statistics

<sup>13</sup> Defined as the Local Authorities of: Blaenau Gwent; Merthyr Tydfil and Torfaen.

<sup>14</sup> It must be noted that migration patterns are a factor of various interactions and not just relative attractiveness.

2.30 Table 5 shows net migration according to age bands. This Table shows that East Wales is a net gainer of population from migration across each age band including the 16-24 age bracket and this is partially explained by the large student population centred around Cardiff University. West Wales and the Valleys is a net gainer in population for all age bands except 16-24, which is mostly explained by student migration to universities. The pattern for Wales is much the same as other regions of the UK except London and the South East. Linked to the above net out-migration the overall population of individuals aged 11-25 across Wales as a whole (sub-Wales data not available for this time period) between 1981 and 2004 has fallen by 11.2%. Between 1991 and 2004 the population of individuals aged 11-25 experienced a rise of 4.7% across East Wales, while across West Wales and the Valleys this population age group fell by 2.1%.

2.31 Net in-migration from England is driving the overall trend both across East Wales and West Wales and the Valleys. An interesting trend is the net out-migration from East Wales to West Wales and the Valleys. This is driven in the main by large migration flows of people from Cardiff to areas in Caerphilly, Rhondda Cynon Taff and Bridgend. Of particular note is the net in-migration of individuals of working age. Evidence<sup>15</sup> suggests that working individuals with higher skills are more socially mobile<sup>16</sup>. This might suggest that Wales is likely to benefit economically from in-migration of working age individuals. Recent evidence from Experian's Mosaic database<sup>17</sup> shows that Wales has a high representation of in-migration from career professionals living in sought after locations which has a strong association with the attractiveness of a location for employment prospects but also quality of life factors.

**Table 5: Average annual net migration trends area analysis, 2002–2004**

Age band	East Wales to West Wales and the Valleys	England to West Wales and the Valleys	Net immigration to West Wales and the Valleys	West Wales and the Valleys to East Wales	England to East Wales	Net immigration to East Wales	Net migration to Wales

<sup>15</sup> Gibbons, S et al, 2005, Is Britain Pulling Apart? Area Disparities in Employment, Education and Crime, Centre for Market and Public Organisation Working Paper 05/120, published in N. Pearce and W. Paxton (eds.) *Social Justice, Building a Fairer Britain*, Institute of Public Policy Research: <http://www.bris.ac.uk/Depts/CMPO/workingpapers/wp120.pdf>

<sup>16</sup> Social mobility measures the degree to which people's social status changes between generations.

<sup>17</sup> Further details are available at: <http://www.business-strategies.co.uk/Products%20and%20services/Micromarketing%20data/Consumer%20segmentation/Mosaic.aspx>

2.32 Within Wales the largest net movements are between South East Wales and the Valleys with an average annual net flow of 680. The second largest flow is between the Valleys and South West Wales<sup>18</sup> with an average annual net movement of 600 people from the Valleys moving to South West Wales. Migration patterns within Wales are typically North to South with average annual net flows from North Wales to Mid (40), South West Wales (20) and South East Wales (160) and net flows from Mid Wales to South West Wales (170) and South East Wales (180). There is an annual average net outflow of people from the Valleys to Mid (70) and North Wales (20) but an average annual net in flow of people from South East Wales (680).

2.33 There is evidence<sup>19</sup> that employment rates for the low skilled have increased in areas that have also seen a rise in the opportunities for highly paid employment. The rationale supporting this is that lower skilled individuals gain employment opportunities in service sector occupations supporting the more affluent consumers. Changes in the social structure of an area can therefore have a role for wider economic regeneration, and migration patterns can be an important function including migration from outside the UK. A total of 392,000 individuals applied to the Worker Registration Scheme between 01 May 2004 and 31 March 2006. Wales had the lowest percentage of total UK registrations with only 2% registered representing just over 7,200 applications. Early evidence suggests that accession workers are continuing to go where the work is, helping to fill the gaps in our labour market, particularly in administration, business and management, hospitality and catering, agriculture, manufacturing and food, fish and meat processing. Data from the International Passenger Survey shows that over the period 2002 – 2004, there has been net in-migration from the rest of the world to Wales, of just over 5,500 individuals<sup>20</sup>.

### **Access to employment and inclusion in the labour market**

2.34 As Figure 2 shows, adverse labour market conditions explain approximately 35% of the overall gap in GVA per head in Wales compared to the UK average. Understanding the Welsh labour market and, in particular, understanding the barriers to participation and the needs of the disadvantaged are of crucial importance.

2.35 Table 6 summarises the latest (i.e. the latest year that data is available) labour market conditions, comparing East Wales, West Wales and the Valleys, Wales, the UK, and the European Union (EU25). As Table 6 shows, East Wales, West Wales and the Valleys, and Wales as a whole, perform well on the leading labour market indicators compared to the average for the EU25, and have shown significant improvement since 2001. Despite considerable progress in recent years, approximately 16% of Welsh children live in workless households, compared to 15% for the UK as a whole and 10% for the EU25.

---

<sup>18</sup> Local authority level data not published due to the small numbers of net movements at this local level.

<sup>19</sup> Gibbons, S et al, 2005, *Is Britain Pulling Apart? Area Disparities in Employment, Education and Crime*, Centre for Market and Public Organisation Working Paper 05/120, published in N. Pearce and W. Paxton (eds.) *Social Justice, Building a Fairer Britain*, Institute of Public Policy Research.

<sup>20</sup> Data is not available on the origin of immigrants in Wales due to the small sample size.

2.36 Interestingly, the lower unemployment rate across West Wales and the Valleys than for the EU25, is not matched by an equivalent difference in employment rates. The explanation lies in the relatively lower economic activity (or higher economic inactivity) across West Wales and the Valleys compared to the EU25. This is also the case for comparisons between East Wales and the UK. East Wales has a considerably lower unemployment rate than the UK average but the employment rate is still below the UK average. Again, it is higher economic inactivity that explains the difference in the headline employment rate. This is explained further in the following sections.

2.37 Long-term unemployment has been highlighted in the European Employment Strategy as a particular concern. The fall in long-term unemployment seen across Wales and its sub-regions is welcome news. The UK Government has recently introduced measures including work-focussed interviews to assist individuals currently not in employment back into active engagement<sup>21</sup>. These measures are expected to help the UK and its sub-regions to meet the targets and benchmarks in the EES in relation to providing a new start for long-term unemployment individuals and increase participation in active labour market measures.

(a) Employed persons are all persons aged between 15 and 64 who during the reference week (week when the data was collected) worked at least one hour for pay or profit, or were temporarily absent from such work. Family workers are included. Rate for those aged between 15 and 64;

(b) Economically active population comprises employed and unemployed persons. Rate for those aged between 15 and 64;

(c) Unemployment rate represents unemployed persons as a percentage of the economically active population. Rate for those aged 15 and over.

(d) Those unemployed for at least 12 months

.. Data unavailable.

Source: Eurostat

2.38 Figure 7 shows the progress that the Wales has made towards the headline Lisbon employment targets. As Figure 7 shows, using Eurostat data for 2004, Wales falls just short of the main Lisbon employment targets for 2010 with the exception of the employment rate for females. The data uses the European definitions for employment for age ranges 15-64. The key difference with this definition and the data presented in the rest of this analysis is the UK definition for

employment uses males aged 16-64 and females 16-59. Care should be taken when comparing data from Eurostat and data from UK sources<sup>22</sup>. A further discussion of labour market issues is available in the next section.

**Figure 7. Progress against Lisbon targets 2005 and 2010**

Source: Eurostat

2.39 Table 7 on page 20 shows the latest labour market conditions across Wales and its sub-regions using the UK Labour Force Survey (care should be taken when comparing Tables 6 and Table 7 due to differences in methodology and time periods<sup>23</sup>). Despite recent improvements, the employment rate in Wales remains below the UK, reflecting continuing high rates of economic inactivity rather than high rates of unemployment.

2.40 Despite East Wales having a higher employment rate than for Wales as a whole, the employment rate fall well below the aspiration for the employment rate for the UK to reach 80%<sup>24</sup>. There have however, been strong increases in employment levels in West Wales and the Valleys, with the employment rate

<sup>22</sup> An overview of the methodology for the European Labour Force Survey is available at: [http://circa.europa.eu/irc/dsis/employment/info/data/eu\\_lfs/index.htm](http://circa.europa.eu/irc/dsis/employment/info/data/eu_lfs/index.htm)

<http://www.statistics.gov.uk/statbase/Product.asp?vlnk=1537>

<sup>24</sup> DEPARTMENT FOR WORK AND PENSIONS, 2006, A New Deal for Welfare: Empowering People to Work.

increasing at over twice the rate of growth in East Wales. Since 2001, employment in West Wales and the Valleys has increased by approximately 40,000<sup>25</sup> and the employment rate has increased by 2.4 percentage points to 69.5%. However, the nominal employment rate has still not caught up the Welsh average.

2.41 Unemployment in Wales has fallen to historically low levels. Since 2001, the unemployment rate in Wales has fallen by 0.3 percentage points to stand at 5.1%. Contrary to the trend across Wales as a whole, the unemployment rate across East Wales has increased, with the current rate just below the UK and Welsh averages. Across West Wales and the Valleys unemployment has fallen by 0.6 percentage points to stand at 5.3%. Despite historically higher unemployment, it is not the unemployment picture that explains Wales' relatively low employment rate; it is higher rates of economic inactivity that explain the lag in employment rates.

2.42 Despite significant reductions in economic inactivity across the whole of Wales over the last four years, the rate of economic inactivity remains more than three percentage points higher in Wales, and nearly five percentage points higher in West Wales and the Valleys than in the UK as a whole. Economic inactivity in East Wales has fallen by 1.4 percentage points since 2001 to stand at 22.5%, which is well below the Welsh average. Despite generally favourable labour market conditions across East Wales, economic inactivity is still above the UK average. Most progress has been made in reducing economic inactivity in West Wales and the Valleys.

---

<sup>25</sup> Data comparing 12 months to March 2005 to 2001 from the Local Labour Force Survey.

**Table 7: Labour market summary**

		2001	Year to March 2006	Change since 2001
<b>Employment (a)</b>				
East Wales	Level (000s)	478	495	16
	Rate (%)	(72.6)	(73.7)	(1.1)
West Wales and the Valleys	Level (000s)	756	796	40
	Rate (%)	(67.0)	(69.5)	(2.4)
Wales	Level (000s)	1,234	1,291	56
	Rate (%)	(69.1)	(71.0)	(2.0)
UK	Level (000s)	27,433	28,117	684
	Rate (%)	(74.1)	(74.1)	(0.0)
<b>ILO Unemployment (b)</b>				
East Wales	Level (000s)	23	25	2
	Rate (%)	(4.5)	(4.8)	(0.3)
West Wales and the Valleys	Level (000s)	48	45	-3
	Rate (%)	(6.0)	(5.3)	(-0.6)
Wales	Level (000s)	71	70	-1
	Rate (%)	(5.4)	(5.1)	(-0.3)
UK	Level (000s)	1,450	1,483	32
	Rate (%)	(5.0)	(5.0)	(-0.0)
<b>Economic inactivity (c)</b>				
East Wales	Level (000s)	152	146	-6
	Rate (%)	(23.9)	(22.5)	(-1.4)
West Wales and the Valleys	Level (000s)	312	293	-20
	Rate (%)	(28.6)	(26.5)	(-2.1)
Wales	Level (000s)	464	438	-26
	Rate (%)	(26.9)	(25.0)	(-1.9)
UK	Level (000s)	7,856	7,986	130
	Rate (%)	(21.9)	(21.9)	(-0.0)

(a) Levels are for those aged 16 and over, rates are for those of working age (males aged 16-64, females aged 16-59);

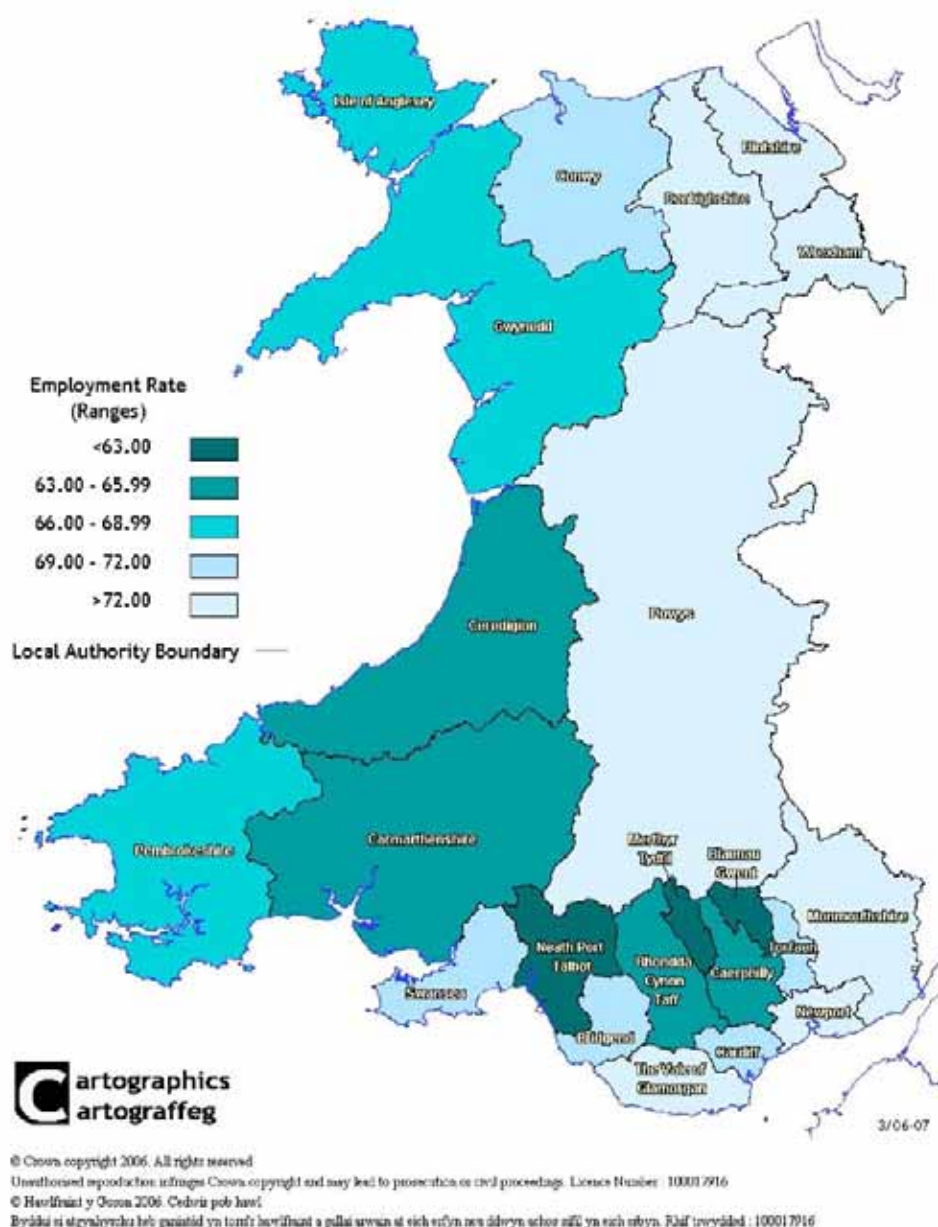

(b) Levels and rates are for those aged 16 and over. The rate is as a proportion of economically active (employment plus ILO unemployed). The International Labour Organisation (ILO) definition of unemployment covers those who are out of work and want a job, have actively sought work in the last four weeks and are available to start work in the next two weeks; plus those who are out of work, have found a job and are waiting to start in the next two weeks;

(c) Levels and rates are for those of working age (males aged 16-64, females aged 16-69).

Source: Labour Force Survey

2.43 Within Wales considerable variations exist in labour market performance. Figure 8 shows the employment rate across Wales, with the darker shades showing where the employment rate is low and lighter shades showing higher employment rates. Within East Wales, Cardiff has the lowest employment rate, and as shown in later sections, pockets of deprivation. The areas with the lowest employment rate are found in South Wales, in particular in Blaenau Gwent, Merthyr Tydfil and Neath Port Talbot.

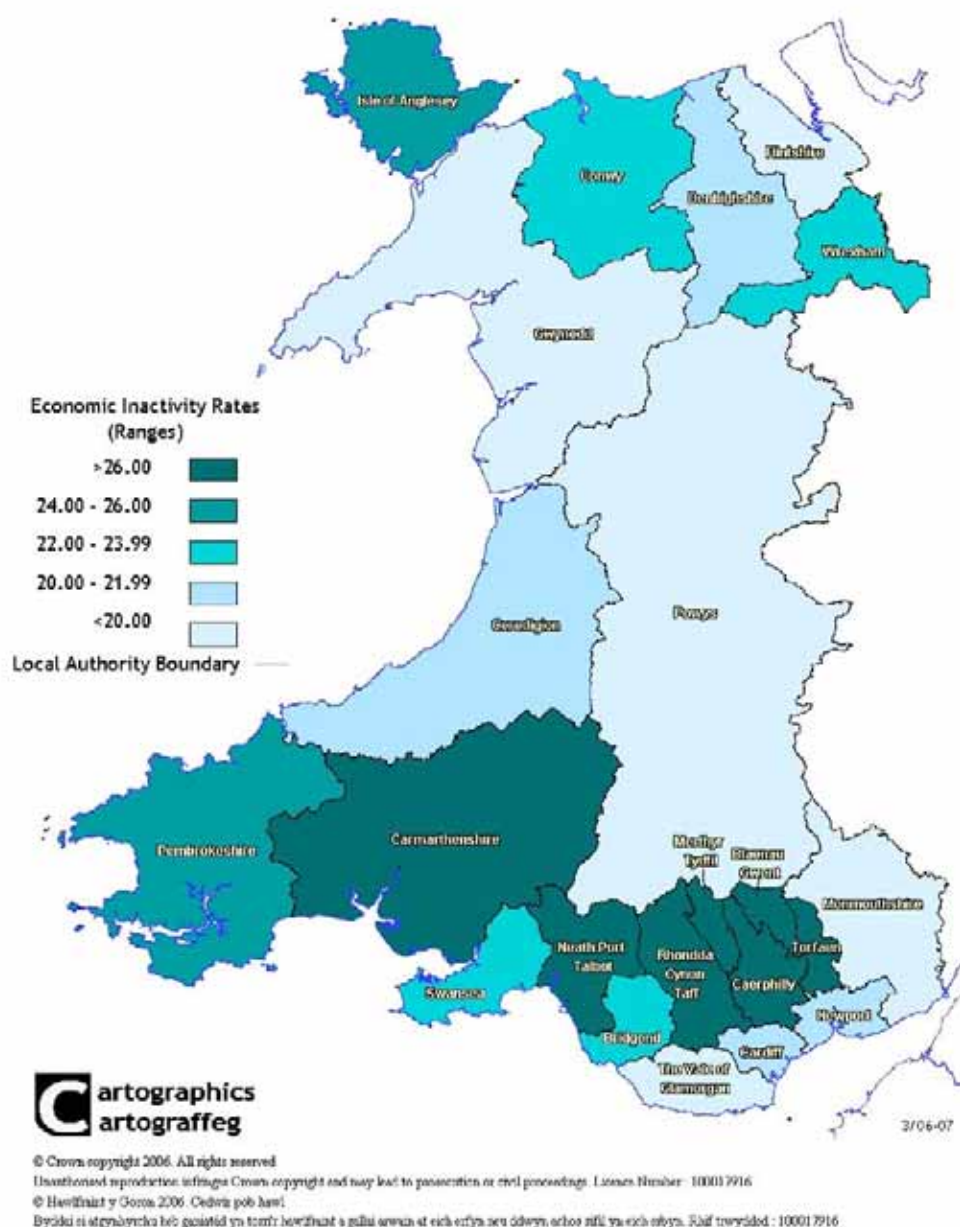

### Figure 8. Employment Rates by Local Authority

Source: Labour Force Survey

2.44 Figure 9 below shows further that in terms of labour market indicators it is in the South Wales valleys where Wales' relative underperformance is concentrated. Figure 9 illustrates the economic inactivity rates by local authority. The darker the shade the higher the economic inactivity rates within the local authority. Within East Wales, Wrexham has the highest economic inactivity rates with Flintshire, Powys and Monmouthshire all having economic inactivity rates below 20% of the Working age population. All of the local authorities of the South Wales valleys have an economic inactivity rate above 26% compared to only Carmarthenshire outside the South Wales valleys.

### Figure 9. Economic Inactivity rates by Local Authority

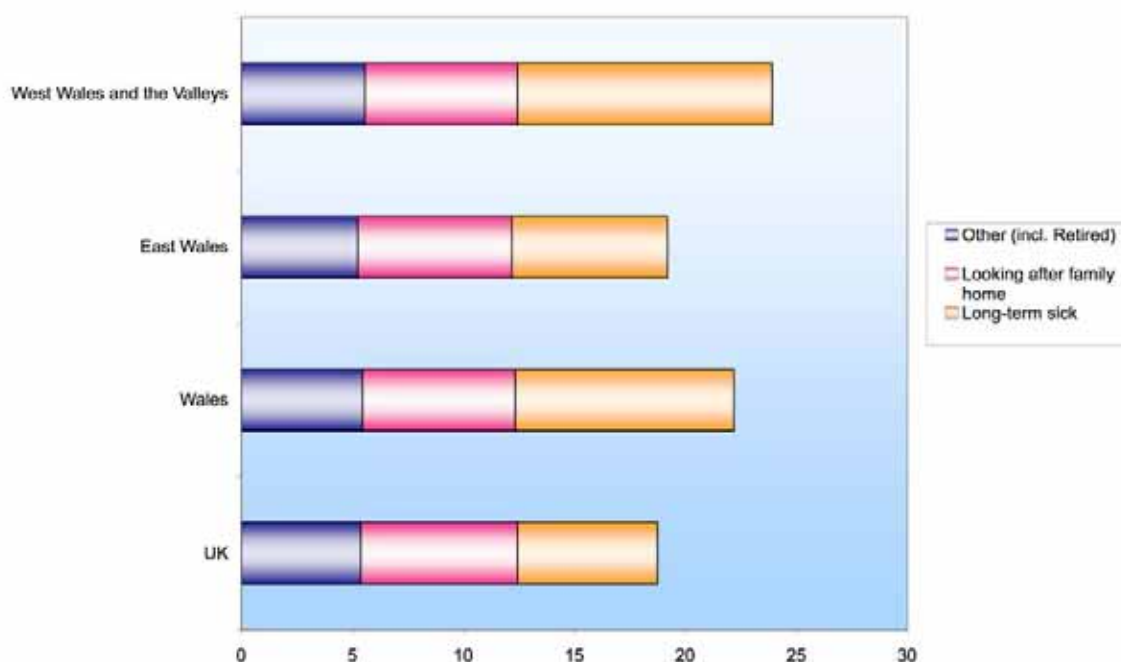

Source: Labour Force Survey

2.45 A key challenge facing the Welsh economy in enhancing access to employment is the sustainable inclusion in the labour market of inactive individuals. As highlighted in the above analysis, despite these improvements in labour market conditions, the employment rate in Wales is still below the average for the UK as a whole. With unemployment rates in Wales now in line with the UK average, higher unemployment does not explain this difference, indeed it is higher rates of economic inactivity that explain the majority of the differential in employment rates.

2.46 Progress has been made in reducing economic inactivity rates across Wales as a whole. To make further progress in this area it is important to understand the underlying causes of excess inactivity in West Wales and the

Valleys. The factor most commonly identified by respondents, particularly men, was a long-standing, self-reported, work-limiting health condition. As Figure 10 shows, this accounts for much of the overall difference in economic inactivity between West Wales and the Valleys and Wales to the average for the UK. Respondents for East Wales were similar to the UK as a whole. Levels of inactivity are persistently highest amongst those with low skills.

**Figure 10. Economic Inactivity rate by reason given, 2004**

Source: Labour Force Survey

2.47 Reported ill health is undoubtedly more of an issue in some parts of Wales than in the UK as a whole. Table 8 summarises some results from the Welsh Health Survey on self-reported health assessments<sup>26</sup> for individuals of working age. Table 9 shows that in 2004/05 there was a higher incidence of nearly all illnesses and conditions in West Wales and the Valleys than in East Wales and Wales as a whole for working age individuals. Areas with the highest concentration of work limiting disability are found in the Valley authorities of Blaenau Gwent, Merthyr Tydfil, Caerphilly, Rhondda Cynon Taff and Neath / Port Talbot<sup>27</sup>.

<sup>26</sup> Reflects people's own understanding of their health rather than a clinical assessment of their condition.

<sup>27</sup> Office for National Statistics (2003) Statistical focus on Disability and long term illness in Wales – <http://new.wales.gov.uk/topics/statistics/publications/focus-disability2003/?lang=en>

**Table 8: Percentage of adults reporting selected illnesses/conditions <sup>(a)</sup>**

Currently being treated for	West Wales & the Valleys	East Wales	Wales
High blood pressure	10	8	10
Any heart condition (excl high blood pressure)	4	4	4
Asthma	10	8	9
Any respiratory illness (incl asthma)	11	10	11
Any mental illness	10	8	9
Arthritis	8	6	7
Back Pain	10	8	10
Diabetes	3	3	3
Limiting long-term illness	21	17	20
Has fewer than 21 teeth	17	13	16

(a) Working age adults is defined as 16-64 for men and 16-59 for women. See Welsh Health Survey report and survey webpages for description of survey and full definitions.

<http://new.wales.gov.uk/topics/statistics/publications/publication-archive/health-survey2003-04/?lang=en>

2.48 While self-reported ill health is identified as a key reason explaining higher economic inactivity, male economic inactivity rates rose during the 1980s and 1990s at a time when objective measures (measures such as those highlighted in Table 8) for health improved. Extensive research<sup>28</sup> in this area has led to an emerging consensus that a significant proportion of those with apparently work-limiting health conditions, including people on incapacity benefits, could, with the right help and support, play a more active role in the labour market.

2.49 Figure 11 shows some interesting results of the excess economic inactivity in Wales compared to the UK by gender, age and reason given. Figure 11 shows that for both males and females in the upper age brackets it is long-term sick that explains the majority of the excess in economic inactivity in Wales compared to the UK as a whole. This is also the case for males and females in the 35-49 age bracket, however, for females in this age bracket Wales has fewer females economically inactive due to them looking after the home and family, than compared to the UK average. For females in the 16-24 and 25-34 age brackets, looking after the home and family explain the majority of the excess economic inactivity in Wales, than compared to the UK as a whole.

**Figure 11. Number of economically inactive in Wales in excess of UK average inactivity rates, by age group, gender and reason, 2003**

Source: Labour Force Survey

2.50 The rise in female employment in general across Wales has focussed attention on the issue of childcare as a potential barrier to participation in the labour market<sup>29</sup>. As Figures 10 and 11 show 'looking after home and family' accounts for a large proportion of the reasons given for being economically inactive.

2.51 Research from the Office for National statistics shows that the presence of dependent children has a dramatic effect on the economic activity rates of lone parents. Over the past decade, more lone mothers have become economically active, although the rate is still lower than for the female working age population as a whole (57 per cent, compared with 73 per cent). In addition research undertaken by the Joseph Rowntree Foundation<sup>30</sup> finds that the numbers of lone parents leaving the benefit system are significantly lower in the wards where there is a high concentration of claimants indicating that lone parents in deprived areas face an extra labour market penalty.

2.52 It has been argued that the UK has suffered both from poor accessibility to and affordability of childcare and that this helps to explain in part economic inactivity across the UK<sup>31</sup>. The *Childcare Strategy for Wales* highlights a number of areas where Wales has deficiencies in the provision of childcare in particular under provision in some of Wales' most deprived areas<sup>32</sup>. Research<sup>33</sup> indicates that subsidising childcare and increasing availability leads to an increase in employment for females and, in particular, lone parents; the impact, however, is

greatest when policies are targeted and means tested. In addition to childcare there is a body of evidence<sup>34</sup> that shows that the presence of elderly family members decreases participation in the labour market.

2.53 In addition to childcare, several other barriers to employment have been identified for those currently economically inactive. The importance of networks, both informal and formal, in the form of access to public transport have been highlighted as potential barriers especially for individuals living in rural areas<sup>35</sup>. This has obvious implications for Wales given that a large proportion of the land mass is rural in nature.

2.54 Figure 12 below shows access to key employment centres in Wales<sup>36</sup> by bus and walking. The red areas show where access is beyond one hour. The areas with the poorest bus/walking access to key employment centres in Wales can be found in West Wales. However, there are large pockets of poor access to employment centres within the South Wales valleys. This is a concern especially given the relative economic inactivity rates across South Wales Valleys and the links between transport access as a barrier to employment for some individuals that are economically inactive<sup>37</sup>.

2.55 Although individual barriers to activity have been identified, individuals face several disadvantages, therefore, a coordinated approach is needed to reduce economic inactivity across East Wales and West Wales and the Valleys<sup>38</sup>.

### **Social inclusion of people at a disadvantage**

2.56 While the leading labour market indicators have shown encouraging progress in recent years, Wales still suffers from lower employment and higher

<sup>38</sup> Berthour, R. 2003. Multiple Disadvantages in Employment: A Quantitative Analysis. A Report for the Joseph Rowntree Foundation.

economic inactivity rates than the UK. As the following analysis shows, certain groups in society fare worse in terms of overall labour market participation.

2.57 Table 9 shows the changes in employment rates disaggregated by disability and ethnicity. Table 9 shows that employment rates and economic activity rates for those with a disability<sup>39</sup> across East Wales, West Wales and the Valleys and Wales as a whole are significantly lower than for those without any disability. This is not surprising given that disability in the Labour Force Survey is partially defined as those with a work limiting disability<sup>40</sup>. Unemployment rates (which measures those able, willing and actively seeking employment) for those with a disability, however, are considerably higher than for those without a disability. In total across Wales as a whole 221,000 disabled individuals are economically inactive and just under 13,000 disabled individuals are registered unemployed. Recent research<sup>41</sup> has highlighted that the employment rate for individuals with a disability but which is not work limiting, are almost identical to those for individuals without a disability. It is therefore the work limiting component that lies at the heart of employment differentials between individuals with and without a disability.

2.58 Table 9 also shows that Black Ethnic Minority (BME) individuals fare worse in terms of labour market outcomes compared to the non-BME population across Wales as a whole and the sub-regions of Wales. In terms of relative concentration Cardiff and Newport have the highest proportion of the population from BME backgrounds than across any other local authorities in Wales, with 8% and 5% of the total population within Cardiff and Newport respectively. This compares with an overall Wales average of just over 2%<sup>42</sup>. However, some care should be taken when interpreting the figures for the BME population in Wales due to small sample sizes. For example, for Wales as a whole the unemployment rate over the period 2001–04 has large annual changes with the unemployment rate in 2001 being 7.5% and then rising to 14.8% in 2002. In addition, changes in unemployment, while large in percentage terms, are small in absolute. The rise in the unemployment rate between 2001 and 2004 represented an additional 1,600 individuals registered as unemployed across Wales as a whole. In total across Wales as a whole, there are 3,000 individuals from BME origin registered as unemployed and 14,000 registered as being economically inactive.

2.59 Recent evidence<sup>43</sup> has investigated the differences in labour market outcomes of BME individuals in England and Wales and the reasons for these differences. Three main conclusions appear from this work. Firstly BME individuals tend to live in disadvantaged areas and so face a labour market penalty (although

---

<sup>39</sup> Disability is defined as work limiting disabled or Disability Discrimination Act disabled or both.

<sup>40</sup> Labour market outcomes for individuals with a disability, but not work limiting are similar to that of non-disabled individuals.

the causality of this is unclear). Secondly, BME individuals have lower educational attainment than non-BME individuals. Finally, evidence suggest that religion is an additional source of variation in labour market behaviour in that after controlling for individual characteristics, individuals with certain religious beliefs have adverse labour market outcomes.

**Table 9: Labour market summary, disaggregated by disability (a) and ethnicity (percentage)**

	Employment		Economic Inactivity		Unemployment (b)	
	2001	2004	2001	2004	2001	2004

(a) Disability is defined as work limiting disabled or Disability Discrimination Act disabled or both;

(b) Unemployment rates broken down by disability are based on working age people only as disability question not asked to those in work, but over working age. Therefore the all persons rate will differ to working age unemployment rates;

(c) All in BMEs.

Source: Annual Labour Force Survey / Annual Population Survey

2.60 The gap between male and female employment rates in Wales is around half that for the UK as a whole and female employment has recently been growing faster than male employment across Wales as a whole. Between 2001 and 2004, the female employment rate across Wales increased by 2.9% compared to 1.7% for males, and now stands at 67.8%. The female employment rate has increased for each age bracket, but has been particularly pronounced for those aged 35–59. This is set against a fall in employment rates of prime working age<sup>44</sup> males across Wales of some 0.4 percentage points between 2001 and 2004 compared to an increase of 1.7 percentage points for females. Across Wales as a whole 250,000 females and 188,000 males are economically inactive, the causes of which are discussed in later sections.

2.61 Also of concern is the fall in male youth (aged 16-24) employment in East Wales. Recent data<sup>45</sup> (2003–2004) shows that across Wales as a whole (sub-Wales data not available) the number of young people not in employment, education or training (NEET) has risen to 13% from 11% in 2002–2003. It is widely acknowledged in the economic literature<sup>46</sup> that for young adults' education, skills and their labour market experiences are crucial for their future life chances. Therefore, time away from active engagement in the labour market can pose problems later in life for these individuals. Recent evidence has highlighted the importance of improving educational achievement, and preventing the build-up of substantial periods in unemployment as youths and that this may reduce the extent to which a minority of individuals (particularly men) spend a large part of their working lives unemployed.

2.62 A headline Lisbon employment target is to increase the employment rate of older workers (those aged between 55 and 64) to 50% by 2010. Figure 13 summarises the latest position for Wales, East Wales and West Wales and the Valleys against this target. The overall employment rate for older workers across Wales is just below the Lisbon target of 50%. Across East Wales the employment rate for older workers is above the Lisbon target and has been since 2002. The employment rate for older workers across West Wales and the Valleys is just below the Lisbon target at 45.2%. Increasing the employment rate for older workers will help towards the target to increase the effective average exit age from the labour market identified in the EES<sup>47</sup>.

<sup>47</sup> European Commission (2005/600/EC) Council decision of 12 July 2005 on "Guidelines for the employment policies of the Member States".

**Figure 13. Older Worker Employment rate**

Source: Eurostat

2.63 Across Wales as a whole approximately 50% of the rise in employment between 2001 and 2004 has been in part-time employment. For males, 56% of the rise in employment was part-time while the corresponding figure for females was 44%. The picture across East Wales is somewhat different to that for Wales as a whole with approximately one-third of the total increase in employment being part-time for males and females over the period 2001 to 2003. In total, 26% of all employees work part-time across Wales, totalling 334,000 individuals. For females this figure is 44% (264,000 individuals) compared to 11% (70,000 individuals) for males. The proportions across West Wales and the Valleys and East Wales are much in line with the all Wales average.

2.64 In addition to the increase in employment levels across Wales, average earnings have also increased. Since 1999, average earnings in Wales have increased by 28% in nominal terms (13% in real terms). This increase is much the same across the sub-regions of Wales and for the UK as a whole. However, Wales had the third lowest average weekly earnings amongst UK regions and devolved administrations in 2005. Average gross weekly earnings for full-time adults in Wales were £455 in April 2005, 88.0% of the average for the UK as a whole<sup>48</sup>. Within Wales and its sub-regions there are clear differences as shown in Figure 14 with lower average earnings across West Wales and the Valleys than across East Wales. Within East Wales however, Powys and Monmouthshire have lower

<sup>48</sup> Annual Survey of Hours and Earnings 2005, Office for National Statistics:  
<http://www.statistics.gov.uk/STATBASE/Product.asp?vlnk=13101>

average earnings than for Wales as a whole and the second lowest for all local areas within Wales. Carmarthenshire, Ceredigion and Pembrokeshire have the lowest average earnings at some 93% of the Welsh average. These differences are in part explained by relative industrial structures of the sub-regions.

**Figure 14. Average gross weekly earnings (a)(b)**

(a) Based on average gross weekly earnings (including overtime) for full-time adults whose pay was not affected by absence;

(b) Since the 2004 survey, supplementary information has been collected in order to improve coverage and hence make the survey more representative. This includes information on businesses not registered for VAT and for people who changed or started new jobs between sample selection and the survey reference period. Therefore there is some discontinuity in comparing data for 2005 with that of earlier years.

Source: Annual Survey of Hours and Earnings.

2.65 Together with an increase in female employment in Wales, the earnings gap between males and females is lower in Wales than the UK average, and Welsh women fare better compared to their UK counterparts than Welsh men do in terms of average hourly earnings<sup>49</sup>. Female full-time hourly earnings (excluding overtime) in Wales (and across East Wales and West Wales and the Valleys) in April 2005 were 88% of the equivalent male figure. This was considerably above the average for the UK as a whole (82.7%).

<sup>49</sup> A factor explaining the relatively small gender pay gap in Wales is the relatively low pay for men rather than higher than average pay for women.

2.66 The average difference between male and female earnings across the UK is greater than across the EU25<sup>50</sup>. In 2004, average gross hourly earnings for females were some 78% of the average male rate, compared to 85% across the EU25.

2.67 A recent study<sup>51</sup> that investigated the difference in pay for males and females across the UK highlighted that labour market segregation was a factor that explained the relative earnings of males and females in that women are generally working in a narrow group of occupations, mainly offering part-time work with pay below the average for the UK. In addition, the economic contribution of women is not fully utilised. For women in part-time employment this is even more pronounced with up to 45% of women working part-time not fully utilising their skills and qualifications in their job. Secondly, there is strong evidence that women are not sufficiently rewarded for their economic contribution and that the gender pay gap, although narrowing steadily over recent decades, still persists.

2.68 In Wales in 2004, women occupied 83% of jobs in personal service occupations and 78% of jobs in administrative and secretarial occupations. In contrast, men occupied 93% of skilled trades and 84% of process, plant and machine operatives. It is still the case that the majority of senior positions in virtually all sectors are taken by men; for example, in the teaching profession the majority of secondary teachers are women, yet the majority of secondary head teachers are men.

2.69 Research<sup>52</sup> indicates that: 36% of the pay gap is due to differences in life-time working patterns (for example, taking time off work to look after children and often returning to lower-paying posts, or women making fewer job moves than men, which contributes directly to wage increases for men); occupational segregation accounts for 18%; 38% is due to differences in labour market motivations and preferences of women compared to men and to direct discrimination; and 8% is due to human capital differences such as women's lower qualification mix and lower number of years' experience if they have taken time off for caring responsibilities. Employers, in anticipation that women will take career breaks, may also treat women less favourably so that even those women who do not take a career break, or take a very short one, will suffer a penalty. Lack of equal pay for equal work is still a factor and some researchers believe that even once all explanatory factors are taken into account an unexplained gap of around

---

<sup>50</sup> The gender pay gap is given as the difference between average gross hourly earnings of male paid employees and of female paid employees as a percentage of average gross hourly earnings of male paid employees. The gender pay gap is based on several data sources, including the European Community Household Panel (ECHP), the EU Survey on Income and Living Conditions (EU-SILC) and national sources. The target population consists of all paid employees aged 16-64 that are 'at work 15+ hours per week'. UK level data is based on data for employees aged 16-59/64, therefore care should be taken when comparing the data based on EU comparisons to that based on UK definitions.

<sup>51</sup> Women and Work Commission, 2005, Shaping A Fairer Future:

10% may exist. Consequently, despite 47% of the Welsh workforce now being female, the pay gap remains.

## **Human capital**

2.70 Long-term economic growth and increases in earnings depend crucially on raising value-added per job in the economy. Analysis<sup>53</sup> of the variation across Great Britain suggests that skills are a major factor in the level of productivity. As discussed in more detail below, Wales as a whole (West Wales and the Valleys in particular) has an adverse skills profile with a higher proportion of individuals without any formal qualifications than compared to the UK as a whole. For Wales (sub-Wales data not available) the adverse skills profile explains approximately 20% of Wales' lower productivity compared to the average for Great Britain as a whole. Evidence<sup>54</sup> suggests that a 10% increase in the proportion of individuals with degree level qualifications or better increases productivity by nearly 1%, while the same proportionate decrease in the proportion of individuals with no formal qualifications increases productivity by around 0.7%. Continued investment in improving the skills of the population could therefore help boost productivity, as well as help alleviate disparities in employment rates through reducing economic inactivity.

2.71 Increasing the level of skills in the workforce is also associated with increased rates of economic activity and improvements to productivity, both of which will raise rates of gross value-added per head, which in turn will impact on levels of individual and community prosperity. The 2004 EU Joint Interim Report states that 'raising the average educational attainment of the population by one year represents a 5% increase in growth in the short term, and a further 2.5% in the long term'<sup>55</sup>.

2.72 There is a broad consensus that a change in the composition of the demand for labour lies at the heart of the analysis of trends in the labour market over the last couple of decades. The relative labour market position of low skilled people has worsened across the developed world, taking the form of lower relative pay and/or lower employment rates<sup>56</sup>.

2.73 Levels of skills in the Welsh workforce have risen over recent years. While the proportion of working age adults in West Wales and the Valleys with no qualifications has fallen, skills levels remain below other UK regions and the EU as a whole. Employment rates for low skilled people tend to be higher where there are low concentrations of such people. (The clearest example of such a pattern is the South East of England outside London). The changing composition of the demand for labour has therefore had its greatest negative effects where the supply of such

<sup>56</sup> Faggio, G and Nickell, S, 2005. Inactivity Among Prime Age Men in the UK. *CEP Discussion Paper* 673: <http://cep.lse.ac.uk/pubs/download/dp0673.pdf>

labour is highest, including parts of Wales. Furthermore, as it is much more difficult for unskilled people than for skilled people to migrate to places where the demand for their labour is relatively high, such spatial disparities have become entrenched<sup>57</sup>.

2.74 Skills are increasingly important in determining labour market outcomes. Table 11 shows the employment rate disaggregated by the highest qualification held by employees. It also shows that while the overall employment rate has increased, the employment rate for those with no formal qualifications has fallen. The same pattern has occurred across East Wales and West Wales and the Valleys. Analysis of the employment rate disaggregated by age and qualifications shows that only 30% of individuals aged 16-24 without any qualifications are in employment, compared to 70% for those with Level 4 and above. The employment rate for young people without any qualifications is over 10 percentage points lower than for any other age bracket.

2.75 This trend of falling employment for those with low level skills is a common phenomenon across the European Union. Using data from Eurostat employment for individuals aged 15 and over with pre-primary, primary and lower secondary education (level 0-2 on ISCED 1997) fell by nearly 4,000. This compares to rises of 7,300 and 7,700 for those with level 3-4<sup>58</sup> on ISCED 1997 and 5-6<sup>59</sup> on ISCED 1997 respectively across the EU. However, individuals with level 0-2 qualifications represented 27% of total employment across the EU compared to 10% for the UK, 13% for Wales, 11% for East Wales and 14% for West Wales and the Valleys.

**Table 11: Employment rate by highest qualification, Wales**

Highest Qualification level	2001	2004	Change 2001-04
<b>West Wales and the Valleys</b>			
Level 4 and above	84.1	84.7	0.6
Level 1-3	69.7	72.2	2.5

<sup>58</sup> Upper secondary and post-secondary non-tertiary education.

<sup>59</sup> Tertiary education.

2.76 A major part of the explanation of the inactivity problem is the skill profile of the Welsh population. The available evidence suggests that the skills position in Wales is worse than in the UK as a whole, and that the position in West Wales and the Valleys is worse than in the rest of Wales. Figure 15 shows the relative skills set for individuals in Wales compared to the average for the UK as a whole. The chart is illustrated as a location quotient. A location quotient measures the relative concentration of a variable compared to a benchmark area. In Table 12 a score of 1 shows where the relative concentration of individuals with a given skill/qualification level is the same as for the UK average. A score of less than 1 shows where an area has a relatively low concentration and a score of greater than 1 shows where an area has a relatively high concentration compared to the UK average.

2.77 As Figure 15 shows, East Wales has a profile similar to the UK average, but with a slightly higher concentration of individuals with Level 4 and above. Wales, and to a greater extent West Wales and the Valleys, have relatively high concentrations of individuals with no qualifications, and a relatively low concentration of individuals at the higher end of the qualification spectrum, Level 4 and above. The distribution of low skills therefore closely fits the distribution of inactivity across Wales, which is consistent with there being a strong skill-related cause of inactivity. Across Wales as a whole some 304,000 working age individuals do not have any formal qualifications. The figures for East Wales and West Wales and the Valleys are 96,000 and 208,000 respectively.

2.78 Using Eurostat data for 2005 shows that East Wales, West Wales and the Valleys, Wales and the UK as a whole, have a far lower proportion of its population with pre-primary, primary and lower secondary level qualifications. 43% of the population of the EU (aged 15 and over) have their highest qualification at this level, compared to 13% for West Wales and the Valleys, 12% for East Wales, 14% for Wales and 11% for the UK as a whole.

**Figure 15. Qualification/skills set (UK=1)**

Source: Labour Force Survey

2.79 Table 12 shows the highest qualifications held by individuals across Wales broken down by individuals with and without a disability and individuals from BME groups and those not from BME groups. As Table 12 shows, disabled people have lower levels of skill attainment than individuals who are not disabled. This is true across the sub-regions of Wales as well as for Wales as a whole. Interestingly, the proportion of individuals from BME groups without any formal qualifications is lower in West Wales and the Valleys than those that are not from BME groups. This is contrary to the observations across East Wales and Wales as a whole. The proportion of individuals from BME groups with level 4 and above qualifications is also higher in West Wales and the Valleys than for individuals from non BME groups. This again is contrary to the observation across East Wales and Wales as a whole.

**Table 12: Levels of highest qualifications held by persons of working age, percentage of working age population, 2004**

		<b>No Qualifications</b>	<b>Level 2 and above</b>	<b>Level 3 and above</b>	<b>Level 4 and above</b>
<b>Not disabled</b>	<b>West Wales and the Valleys</b>	14.3	68.8	43.8	24.0
	<b>East Wales</b>	12.0	71.5	50.2	30.3
	<b>Wales</b>	13.4	69.8	46.3	26.4
<b>Disabled (a)</b>	<b>West Wales and the Valleys</b>	33.0	49.1	28.7	14.1
	<b>East Wales</b>	26.6	55.5	34.4	20.1

2.80 The level of skill attainment for females in Wales is similar to that for males. There are two main differences however. Firstly, females across Wales as a whole have higher attainment rates at level 4 and above. Secondly, a higher proportion of females in Wales as a whole do not have any formal qualifications. The differences however are small and only represent between 0.5 and 1 percentage point. A similar pattern is found across East Wales and West Wales and the Valleys, with a higher proportion of females with qualifications at level 4 and above, and a higher proportion of females without formal qualifications. The difference in the overall level of qualification attainment between males and females across West Wales and the Valleys compared to East Wales is generally reflective of the population as a whole as illustrated in Table 13.

**Table 13: Levels of highest qualifications held by persons of working age by gender, percentage of the working age population, 2004**

		<b>No Qualifications</b>	<b>Level 2 and above</b>	<b>Level 3 and above</b>	<b>Level 4 and above</b>

2.81 According to the latest survey of adult basic skills in Wales<sup>60</sup>, it is estimated that 25% of adults in Wales have entry level literacy skills and 53% in Wales are estimated to have entry level numeracy skills. Compared to England, Wales has a higher percentage of adults with entry level numeracy and literacy skills, but the gap is particularly pronounced in literacy (see full report for details). Unsurprisingly, there is a strong correlation between education attainment and performance in both literacy and numeracy assessments. Overall males and females had similar scores in the literacy assessments; however, males outperformed females in the numeracy assessments. The recent Leitch Review of Skills<sup>61</sup> has highlighted the importance of improving the basic skills of the population to enhance employability

<sup>60</sup> BASIC SKILLS AGENCY FOR WALES, 2004, The National Survey of Adult Basic Skills in Wales. and productivity. A recent study conducted for Wales<sup>62</sup> also highlighted the role of improving the basic skills of the population of Wales as one of the main areas of focus to alleviate the skills gap Wales has with the UK and many leading developed countries.

2.82 The Maastricht Study 'Achieving the Lisbon goal: the contribution of Vocational Education and Training' stressed the importance of tackling basic skills' deficits estimating that by 2010 only 15% of jobs will be for those with basic schooling, and that the impact for individuals and businesses of training the low skilled is as high as the impact for the highly educated, though many of the disadvantaged and employers are unaware of this<sup>63</sup>. Tackling basic skills early in life will therefore be of crucial importance as modern economies develop.

2.83 The weakening of the demand for less skilled labour across the developed world is reflected in unemployment and economic inactivity rates amongst groups with different qualifications and skills set. Figure 16 sets out the rates of economic inactivity in West Wales and the Valleys, Wales and the UK according to the individual's highest level of qualifications.

2.84 This shows that there is significantly increased economic inactivity in groups with no formal qualifications. The higher the qualification/skill levels (moving from right to left on Figure 16), the lower the economic inactivity rate for individuals within each cohort. This is most significant, however, between no qualifications and Level 1, and where there is a high relative concentration of individuals with no formal qualifications a higher percentage of individuals are economically inactive, as is the case for West Wales and the Valleys.

2.85 Data on the qualifications held by pupils in the final year of formal education shows that pupils in West Wales and the Valleys under-perform the average for East Wales and Wales as a whole. Across West Wales and the Valleys the percentage of pupils that achieve five or more GCSEs grade A\*-C or vocational equivalent is below the average for East Wales and Wales as a whole. Pupils in West Wales and the Valleys also under-perform in the core subjects (English or Welsh, Maths and Science). In addition, the average GCSE points score in West Wales and the Valleys is also below the average for East Wales and Wales as a whole, and a higher proportion of pupils in West Wales and the Valleys leave school without any formal qualifications.

**Table 14: Attainment of pupils in final year of compulsory education (percentage) 2005/06 provisional results**

	Percentage of pupils in final year of compulsory education					
Maintained schools in..	Achieved five or more GCSEs grade A*-C or vocational equivalent	Achieved five or more GCSEs grade A*-G or vocational equivalent	Achieved one or more GCSEs grade A*-G or vocational equivalent	Average GCSE/ GNVQ points score	Achieved no GCSE/ GNVQ or ELQ (a)	Achieved GCSE grade A*-C in each of the core subjects (b)
East Wales	54.7	87.1	93.5	42.4	3.6	40.8
West Wales & Valleys	52.0	85.5	93.2	40.1	3.9	37.6
Wales (c)	53.4	85.9	93.1	41.0	4.1	39.4

2.86 Linked to the above analysis, West Wales and the Valleys has a slightly lower proportion of pupils continuing in further education beyond the age of 16 than compared to East Wales and the average for Wales as a whole. In total 76% of pupils across East Wales compared to 73% of pupils in West Wales and the Valleys continue in schools or further education institutions following the final year of compulsory education, and compared to 74% across Wales as a whole.

2.87 The qualification levels of 16-18 year olds across East Wales, West Wales and the Valleys and Wales are much in line with the UK average. In the 19-21 year age bracket there are two noticeable differences. Firstly, West Wales and the Valleys has a higher proportion of 19-21 year olds without any formal qualifications compared to Welsh and UK averages (10% for West Wales and the Valleys and 8% for Wales and the UK). Linked to this, West Wales and the Valleys has a lower proportion of 19-21 year olds with higher level skills (Level 3 and above) than Wales and the UK (50% for West Wales and the Valleys and 52% for Wales and the UK).

2.88 Table 15 shows the achievement of pupils entered for at least 2 A/AS Levels across East Wales, West Wales and the Valleys and Wales as a whole. As Table 15 shows A/AS level achievement across West Wales and the Valleys is below the Welsh average.

**Table 15: Attainment of pupils aged 17 at the start of the academic year, 2005/06 provisional results**

Maintained schools in..	Percentage of pupils who entered 2 or more A/AS Levels or achieved vocational equivalent who...		
	Achieved 2 or more A/AS levels grade A-C or vocational equivalent	Achieved 2 or more A/AS level grade A-E or vocational equivalent	Achieved points score per pupil
East Wales	69.0	94.1	20.7
West Wales & Valleys	66.2	93.3	19.3
Wales	68.2	93.8	20.2

Source: Office for National Statistics

2.89 A variety of studies<sup>64</sup> have found that it is possible to dramatically improve the life chances of disadvantaged children through well-funded and sustained early years interventions. These include intensive programmes that are focused on the most disadvantaged. The evidence also shows that continued support for the most disadvantaged throughout schooling can help to raise employment prospects. Evidence<sup>65</sup> from the Education Maintenance Allowance (EMA) (financial support available to disadvantaged children to maintain in school post 16) shows that young people who had spent two years in post-16 education were generally in a better position than those who had entered the labour market immediately after compulsory education. In particular, those who spent two years in post-16 education before entering the labour market at 18, were much more likely to be in managerial, professional and associated professional and technical jobs.

2.90 Additional evidence<sup>66</sup> shows that the EMA increased the proportion of 16-18 year olds who were in full-time education at both age 16 and 17 by 6.1 percentage points; the effect was particularly strong for young men (8.6 percentage points). The largest effect was on young people from lower socio-economic groups in particular those from semi-skilled and unskilled workers and those not in work. EMA also had a substantial impact on young people who had been 'low' or 'moderate' achievers at the end of Year 11. In addition young people that received the EMA were less likely to 'long-term' NEET (14.2 per cent) than those that did not receive support (23.2 per cent).

<sup>64</sup> For a review of the evidence underpinning the statements in this paragraph, see Cunha, F., Heckman, J., Lochner, L. & Masterov, D. (2005) *Interpreting the evidence on life cycle skill formation*

<sup>65</sup> Department for Education and Skills (2006) young people and the labour market: Evidence from the EMA pilots database. <http://www.dfes.gov.uk/research/data/uploadfiles/RW59.pdf>

<sup>66</sup> Department for Education and skills, 2005, Evaluation of the Education Maintenance Allowance pilots: Young people aged 16 to 19 years final report of the quantitative evaluation <http://www.dfes.gov.uk/research/data/uploadfiles/RR678.pdf>

2.91 Further evidence<sup>67</sup> shows that individuals still receive a positive premium for each year in school despite the rise in the supply of education. In the UK there has been a large expansion in the supply of qualified labour. This expansion has not led to a fall in the average return to a year of schooling in the UK, suggesting that the demand for qualifications in the UK is still sufficiently high to justify further expansion.

2.92 Following the changing composition for the demand for labour resulting in falling demand for individuals with low skill levels<sup>68</sup> training throughout an individuals working life has increased in importance. Lifelong learning is the concept that 'It's never too soon or too late for learning' and covers all education and training for individuals of working age, although indicators typically include those aged 25-64.

2.93 Table 16 shows the percentage of adults aged 25-64 that are participating in lifelong learning. As Table 16 shows both Wales and the UK as a whole have a higher percentage of adults aged 25-64 in lifelong learning than Europe. The percentage of adults aged 25-64 participating in life-long learning across West Wales and the Valleys is below the average for Wales as a whole, albeit marginally. Across Wales as a whole and across the sub-regions, participation in life-long learning is above the 12.5% target as set in the *European Employment Strategy*<sup>69</sup>.

**Table 16: Participation in lifelong learning, 2004 (a)**

	Percentage of adults aged 25-64 in education and training
West Wales and the Valleys	14.3
East Wales	15.5
Wales	14.8
UK	15.5
EU(15)	9.3
EU(25)	8.6

(a) Life-long learning indicator refers to persons aged 25 to 64 who answered they received education or training in the four weeks preceding the survey (numerator). The denominator consists of the total population of the same age group, excluding no answers to the question 'participation to education and training'.

Source: Eurostat

2.94 As noted above, skills are very important in determining labour market outcomes, in particular economic inactivity. However, the skills of the labour force can also have implications for employers. The Future Skills Wales<sup>70</sup> survey aims to

<sup>67</sup> Powdthavee, N and Vignols, A 2005. Using rate of return analysis to understand sector skill needs. Centre for the Economics of Education <http://cee.lse.ac.uk/cee%20dps/ceedp70.pdf>

<sup>69</sup> European Commission (2005/600/EC) Council decision of 12 July 2005 on guidelines for the employment policies of the Member States. [http://eur-lex.europa.eu/LexUriServ/site/en/oj/2005/l\\_205/l\\_20520050806en00210027.pdf](http://eur-lex.europa.eu/LexUriServ/site/en/oj/2005/l_205/l_20520050806en00210027.pdf)

<sup>70</sup> The Future Skills Wales Partnership's collective aim is to provide reliable information on the skill deficiencies employers in Wales are experiencing which can be used to inform skills development

provide information on skills' gaps among employers in Wales. Results from the latest survey show that 18% of employers in Wales reported a skills gap in 2005. This figure is broadly in line with previous years' surveys. The skills most commonly lacking among employees were generic skills, such as problem solving skills, customer handling skills, communication skills and team working.

2.95 Analysis<sup>71</sup> of skill shortages on a sectoral basis in Wales highlight that the occupations with the highest proportion of hard-to-fill vacancies reported were Skilled Trades, Associate Professional occupations and Elementary occupations. Amongst these hard-to-fill vacancies just over half were due to skill shortages in technical and practical skills.

2.96 Recent evidence<sup>72</sup> has further highlighted the importance of generic skills in determining individuals' outcomes in the labour market and to the wider social status of individuals. Generic skills such as communication skills, the ability to pay attention and problem solving skills are found to be important in determining labour market outcomes, although to a lesser extent than formal qualifications.

2.97 A proficiency in ICT is also important for a very large number of jobs in the UK, and according to e-Skills UK, 90% of new jobs now require some level of ICT skills and over 400,000 employees need to increase their IT skills to meet growing demand. The development of ICT skills across the workforce is required for developing, operating and maintaining ICT systems, making effective use of tools used in modern office environments, exploiting new ways of conducting business and organisational processes, and to establish new enterprises.

### **Industrial structure, innovation and R&D**

2.98 In addition to human capital, recent evidence<sup>73</sup> has highlighted the importance of industrial structure in explaining regional differences in productivity and overall economic performance. Across Wales as a whole and its sub-regions there is a relatively high representation of civilian workforce jobs in declining industries typically with low value added. Although East Wales has a higher representation of employment in service sector activities compared to the Welsh average there is still a higher representation of employment in agriculture and production activities both of which have seen a decline in employment over recent years. The high representation of employment in agriculture is particularly pronounced in Powys where some 12% of all employment is within this sector. The high relative employment concentration in agriculture et al and production sectors and the relatively low concentration of employment in finance and business services are even more pronounced for West Wales and the Valleys. Figure 17 summarises the distribution of civilian workforce jobs across Wales and its sub-

---

policy and planning. The survey is far reaching and is based on information gathered from no fewer than 6,719 organisations across Wales between March and May 2005. Further details are available at: <http://www.futureskillswales.com/>

regions according to broad industrial groups<sup>74</sup>. The evidence<sup>75</sup> suggests that it is important not only to improve employment opportunities but to improve these opportunities in higher value added sectors. Such improvements will help to improve the productivity of Wales and its overall economic prosperity.

**Figure 17. Civilian workforce jobs (UK=1)**

Source: Office for National Statistics

2.99 The industrial structure of Wales helps to explain Wales' relative position on a number of headline indicators of innovation and R&D. For example, overall R&D expenditure as a percentage of GVA across Wales (sub-Wales data are not available) is below the average for the UK as a whole at 1.3% of total GVA. The main underlying factor explaining this low figure is the proportionately lower R&D expenditure found within the business sector in Wales. This is mostly reflective of the industrial structure of the Welsh economy with, for example, relatively low representation of pharmaceutical companies that have high R&D spend.

2.100 The industrial structure of Wales has implications on labour market indicators associated with innovation and R&D. The number of researchers provides a useful proxy for the number of people employed in providing high value-added services and research and development functions. West Wales and the Valleys has a lower number of researchers in HEIs per 10,000 population than across Wales and the UK as a whole. Using data from the UK's Annual Population Survey; West Wales and the Valleys had a lower proportion of total employment in R&D related activities than compared to Wales and the UK as a whole. In total 2%

<sup>74</sup> The chart is illustrated as a location quotient. A location quotient measures the relative concentration of a variable compared to a benchmark area.

<sup>75</sup> Rice, P and Venables, A, 2004, 'Spatial determinants of productivity analysis for the regions of Great Britain', *CEP Discussion Paper No.642*.

of all employment was in R&D related activities across West Wales and the Valleys compared to 2.3% for Wales and the UK respectively. Across East Wales, 2.6% of all employment was in R&D related activities.

2.101 Information on employment in high technology sectors<sup>76</sup> is collected by Eurostat and shows the proportion of total employment that is in high and medium high technology and knowledge intensive high technology services sectors. The data set is useful, as it is possible to make comparisons across West Wales and the Valleys to that of the average for the EU25. Table 17 shows the latest data.

2.102 As Table 17 shows, the proportions of employment in high and medium high technology manufacturing and knowledge-intensive high-technology services in East Wales and West Wales and the Valleys are below that of the UK and European averages, representing just under 10% of total employment in the sub-region. Between 2001 and 2004, employment in high and medium high technology manufacturing and knowledge-intensive high-technology services in East Wales fell as a percentage of total employment in the sub-region. The figure for West Wales and the Valleys is by contrast, higher than for Wales as a whole. This is partially explained by the high representation of manufacturing employment in West Wales and the Valleys, some of which is in high technology sub-sectors.

**Table 17: Employment in high and medium high technology manufacturing and knowledge-intensive high-technology services, percentage of total employment**

	2001	2004	Change since 2001
EU25	10.26	10.18	-0.08
EU15	11.17	10.46	-0.71
UK	11.93	10.00	-1.93
Wales	9.64	9.69	0.05
East Wales	10.04	9.41	-0.63
West Wales and the Valleys	9.38	9.88	0.50

## Deprivation

2.103 Table 18 provides information on relative income poverty<sup>77</sup> in Wales compared to the regions and devolved administrations of Great Britain. In Wales, 21% of the total population were in households in relative income poverty, a little higher than for Great Britain as a whole (20%). A total of 19% of working age adults and 18% of pensioners in Wales were in households of relative income poverty, both slightly higher than for Great Britain as a whole. The proportion of

<sup>76</sup> 'Statistics on high-tech industries and knowledge-intensive industries' comprise economic, science, technology, innovation and employment data describing manufacturing and services industries broken down by technological intensity. Further details are available at: [http://epp.eurostat.ec.europa.eu/cache/ITY\\_OFFPUB/KS-SF-07-102/EN/KS-SF-07-102-EN.PDF](http://epp.eurostat.ec.europa.eu/cache/ITY_OFFPUB/KS-SF-07-102/EN/KS-SF-07-102-EN.PDF)

<sup>77</sup> Income poverty is defined as below 60 per cent of median household income. The results above are based on the 'after housing costs' measure but data is available in the full report on both a 'before housing costs' and 'after housing costs' basis.

children living in households of relative income poverty was above that for Great Britain as a whole, albeit marginally.

**Table 18: Risk of being in low-income groups after housing costs, percentage (3-year rolled average 2002/03–2004/05)**

	All People	Working age adults	Children	Pensioners

Scotland	20	19	25	18
<b>Wales</b>	<b>21</b>	<b>19</b>	<b>28</b>	<b>18</b>
England	21	19	28	20
Great Britain (a)	20	18	27	17

(a) Totals for Great Britain and shown for the year 2004/05 only and are not 3-year rolled averages. Source: DWP, Households Below Average Income 2004/05

2.104 Recent evidence<sup>78</sup> has highlighted some of the trigger events that result in large changes in individual income levels and entry into poverty. One of the main events is a marital split which account for some 40% of entries into poverty. This has particular implications for lone parents. It is however important to look at repeat poverty spells. The average duration of being in poverty is 3.6 years and more time spent in poverty is associated with having more children, being a lone parent, being elderly and not working. The evidence highlights the importance of the labour market as a route out of poverty for those of working age and job retention is crucial in preventing entries into poverty. Particular help is required for certain groups that are at higher risk of entering poverty which include families with children and in particular lone parents.

2.105 The Welsh Index of Multiple Deprivation 2005 (WIMD)<sup>79</sup> is the official measure of deprivation for small areas in Wales. Deprivation is a wider concept than poverty. Poverty means not having enough money (or other essentials) to get by. Deprivation refers to problems caused by a general lack of resources and opportunities (not just money). The WIMD 2005 is made up of seven separate kinds of deprivation<sup>80</sup>. Figure 18 summarises the overall picture. Within East Wales severe pockets of deprivation are present in Wrexham and particularly around the

<sup>78</sup> JENKINS, S (2006) Poverty dynamics, family background and attainment: BHPS evidence. Seminar to the Welsh Assembly Government.

<sup>79</sup> For further details see: <http://new.wales.gov.uk/topics/statistics/theme/wimd2005/?lang=en>

<sup>80</sup> Income, employment, health, education, housing, access to services and environment.

City regions of Cardiff and Newport. Indeed, the most deprived small area in Wales is located in Cardiff. Figure 18 also shows that areas of the upper valleys have the highest relative concentration of deprivation across West Wales and the Valleys, and Wales as a whole<sup>81</sup>.

2.106 Figure 18 also shows some interesting findings in terms of rural and urban deprivation. While it is acknowledged that rural deprivation is an issue in Wales, particularly in terms of access (see figure 19), many of the most deprived areas within local authorities typically rural in nature (Pembrokeshire, Gwynedd and Ceredigion for example) are around urban centres. The most deprived areas in Pembrokeshire are around the urban areas of Pembroke Dock and Milford Haven. In Gwynedd, one of the most deprived areas is Caernarfon, and Holyhead in Anglesey is the most deprived area within the Local Authority<sup>82</sup>.

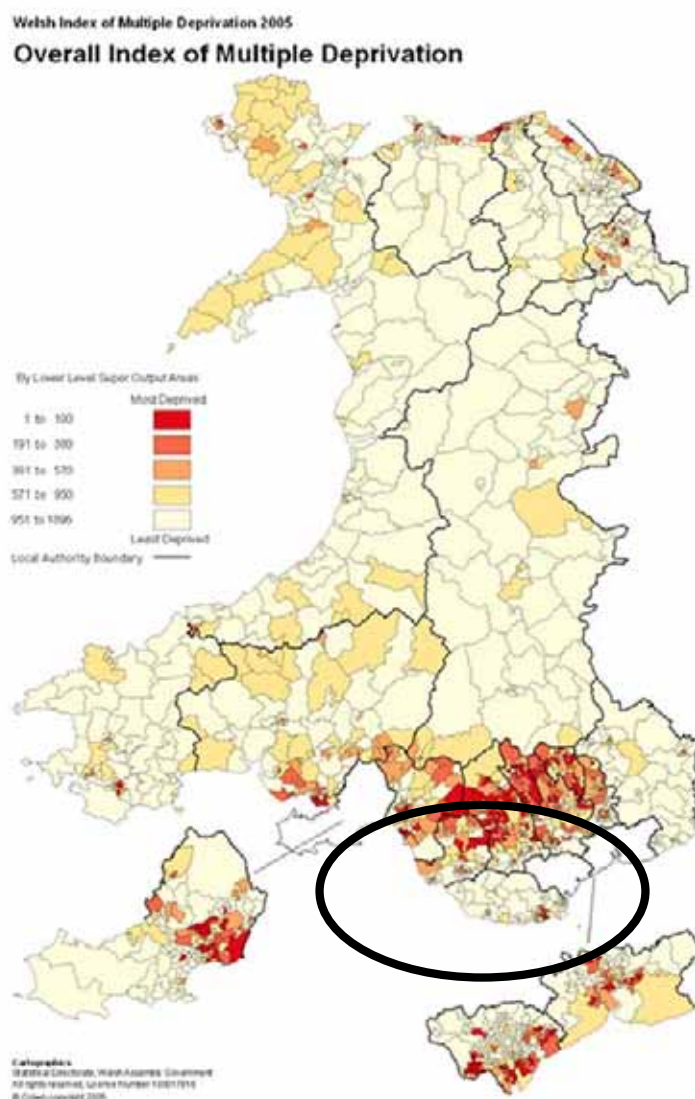

---

<sup>81</sup> Although city wards of Cardiff, Newport and Swansea also suffer from high relative deprivation.

<sup>82</sup> Further Local authority analysis is available at:

<http://new.wales.gov.uk/topics/statistics/theme/wimd2005/results/?lang=en>

**Figure 18. Overall Index of Multiple Deprivation**

Source: Welsh Index of Multiple Deprivation 2005

2.107 Overall, the most deprived 10% of Lower layer Super Output Areas (LSOAs) in Wales have around twice the concentration of both income and employment deprived individuals as the average for Wales as a whole. Therefore, it is in these areas where the concentration of deprivation is greatest. Across the Local Authorities in Wales, Merthyr Tydfil had the largest percentage of LSOAs in the most deprived 10% of LSOAs. In total, 36% of all LSOAs in Merthyr Tydfil were in the most deprived 10% in Wales. In the North East, Wrexham had six LSOAs that rank amongst the top 7% of most deprived areas in Wales. At ward level in Wrexham, Queensway had a high claimant unemployment rate (5.8%) relative to Wales (2.5%) in May 2006. This suggests that there is a high degree of correlation between worklessness and wider deprivation in this area. Table 19 shows the number and percentage of LSOAs within each Local Authority that are within the most deprived in Wales.

2.108 As Table 19 shows the Local Authorities in Wales with the lowest concentration of deprivation include Monmouthshire, Powys and Ceredigion. The Local Authorities with the highest concentration of deprivation include Merthyr Tydfil, Blaenau Gwent, Rhondda Cynon Taff and Neath Port Talbot. Interestingly Cardiff had a high proportion of LSOAs within the 10% most deprived and the highest absolute number of LSOAs within this category in Wales.

2.109 The WIMD also provides a useful insight into issues of access to services<sup>83</sup>. Figure 19 shows this type of deprivation is concentrated in the western areas of Wales rather than the valleys. The access to services domain not only provides an insight to the quantum of services in a given location, but also relative access to transport since the indices are measured as time taken to access a given service.

**Figure 19. Access to services**

Source: Welsh Index of Multiple Deprivation 2005

2.110 Although individuals' characteristics are viewed in the academic literature<sup>84</sup> as more important in determining economic outcomes, evidence on the significance of 'place' shows that the overall attractiveness of a town or region can

<sup>83</sup> Services include, access to food shop, GP, schools, NHS Dentist, public library and leisure centre. For more details see:

<http://new.wales.gov.uk/topics/statistics/theme/wimd2005/results/?lang=en>

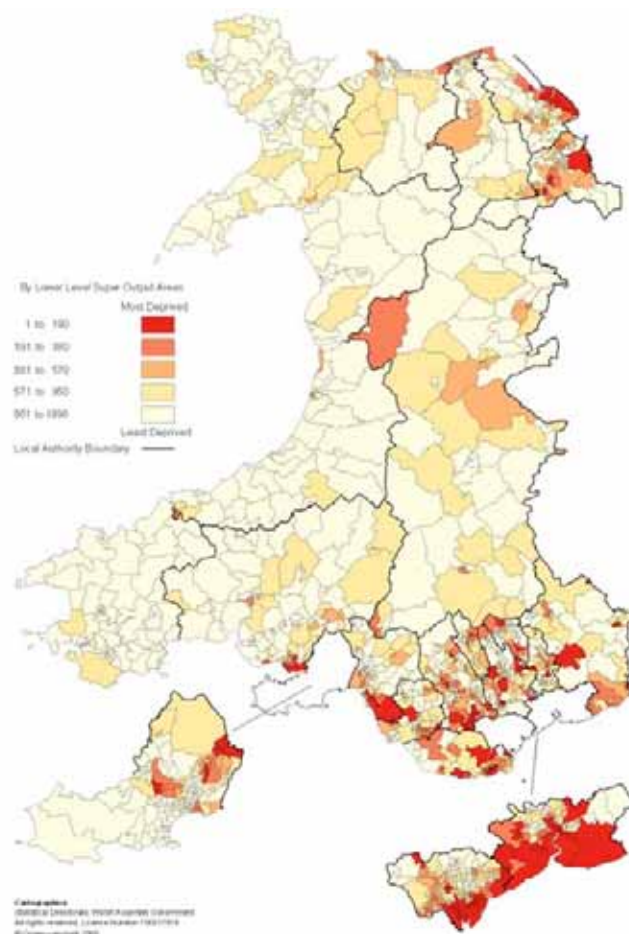

<sup>84</sup> See Durlaf, S, 2004. Neighbourhood Effects. Handbook of Urban and Regional Economics, Volume 4, Economics, J. V. Henderson and J.-F. Thisse, eds. and Mackay, S, 2003 Local Area Characteristics and Individual Behaviour. Social Research Division, Department of Work and Pensions. In-house report 123.

have a significant impact on the economic outcomes of the inhabitants<sup>85</sup>. The environment can therefore be an important driver of economic and social well being, as well as being a public good in its own right. A high quality environment can help stimulate the delivery of growth and competitiveness agendas and there are economic opportunities to exploit in the growing environmental goods and services sector. Preserving and enhancing the quality of the environment will be increasingly important for our economy and quality of life in the era of the knowledge economy.

2.111 The environment domain from the WIMD 2005 is intended to model the factors related to the physical environment which may affect quality of life. The domain includes indicators such as air quality, air emissions, access to waste disposal site, relative proximity to Environment Agency regulated industrial sources and risk of flooding.

2.112 Figure 20 shows that the main areas of environmental deprivation are seen across Cardiff and Newport, especially around the city centre wards and former heavy industrial areas (Newport in particular).

**Figure 20. Physical Environment Deprivation**

Source: Welsh Index of Multiple Deprivation 2005

<sup>85</sup> Dynamic Small Towns: Identification of Critical Success Factors. Report for the Economic Research Advisory Panel 2002.

2.113 Of the top 10% of LSOAs in the Welsh Index of Multiple Deprivation, i.e. the 10% most deprived, the majority are located in West Wales and the Valleys. One of the seven core indicators within the Welsh Index of Multiple Deprivation (2005)<sup>86</sup> is access to services. Further studies have demonstrated that other factors of deprivation, such as low income and economic inactivity, also appear to reinforce constraints on service usage<sup>87</sup>.

## SWOT Analysis

2.114 The following summarises the socio-economic evidence in the form of a SWOT (Strengths, Weaknesses, Opportunities and Threats) analysis. The SWOT analysis highlights the particular areas where Wales stands out as being different to the rest of the UK as a whole, as well as providing key areas where targeted intervention can best make an impact. The SWOT is disaggregated at the all-Wales level to show where there are distinct differences between East Wales and West Wales and the Valleys. However, common themes are present in both East Wales and West Wales and the Valleys.

**Table 20 East Wales SWOT**

Strengths	Weaknesses
<ul style="list-style-type: none"> <li>-Higher GVA per head than across Wales as a whole, explained by favourable labour market conditions.</li> <li>-Higher employment rate and lower economic inactivity rate than for Wales as a whole.</li> <li>-Higher average earnings than Wales as a whole and much in line with the UK average excluding London and the South East of England.</li> <li>-Lower gender pay gap than across the UK as a whole.</li> <li>-Overall increase in population driven by net in-migration highlighting Wales is deemed an attractive place to live.</li> <li>-Exceptional quality natural environment in almost all areas of East Wales.</li> </ul>	<ul style="list-style-type: none"> <li>-Lower value added per job than the UK average, explained in part by a lower representation of employment in higher value added service sector and a higher representation of employment in lower value added production and agricultural sectors.</li> <li>-Lower GVA per head across Powys than compared to Wales as a whole.</li> <li>-Average earnings across Powys and Monmouthshire the second lowest in Wales.</li> <li>-Higher dependency ratio than compared to the European average explained by a higher representation of individuals above the working age.</li> <li>-Higher economic inactivity rates than for the UK as a whole with more than 1 in 5 of the working age population economically inactive.</li> </ul>

<sup>86</sup> <http://new.wales.gov.uk/topics/statistics/theme/wimd2005/results/?lang=en>

<sup>87</sup> For example: 'Social Exclusion and Lack of Access to Services - Evidence from the 1999 PSE Survey of Britain', Bramley G. and Ford T., Herriott-Watt University, 2001

Strengths	Weaknesses
<p>Higher proportion of individuals with higher level skills (Level 4 and above) than for Wales and the UK as a whole</p> <p>-Higher proportion of individuals obtaining good GCSEs (A*-C) than across Wales as a whole.</p>	<p>-Lower employment rate than the UK average.</p> <p>-Higher long-term unemployment rate than for Wales and the UK as a whole.</p> <p>- Higher unemployment rate amongst disadvantaged groups (disabled individuals and individuals from Black and Minority Ethnic groups)</p> <p>-Lower female employment rate compared to the equivalent male rate.</p> <p>-Poor accessibility and problems with affordability of childcare</p> <p>-Adverse skills profile for individuals with a disability compared to those without a disability.</p> <p>- Only 30% of individuals aged 16-24 without any qualifications are in employment compared to 70% for those with Level 4 and above. The employment rate for young people without any qualifications is over 10 percentage points lower than for any other age bracket.</p> <p>-Higher proportion of pupils leaving compulsory education without any formal qualifications than across Wales as a whole.</p> <p>-Low levels of basic skills across Wales as a whole (sub-Wales data not available) than compared to England.</p> <p>- Rise in the number of young people not in employment, education or training (NEET).</p> <p>-Greater importance placed on preventing the build up of substantial periods of unemployment and NEET for young people given the negative effects this can have on individuals.</p> <p>-A higher proportion of females across East Wales do not have any formal qualifications compared to males.</p> <p>-High proportion of females working in part-time employment.</p>

Strengths	Weaknesses
	<ul style="list-style-type: none"> <li>-Over-reliance on low value-added declining sectors, in particular agriculture and production.</li> <li>-Lower R&amp;D expenditure as a percentage of GDP than for the UK as a whole.</li> <li>-Lower proportion of employment in high and medium technology manufacturing and knowledge-intensive high-technology services.</li> <li>-High levels of deprivation found in areas with a high concentration of residents from BME groups.</li> <li>-Higher risk of being in low income groups in Wales than across Great Britain as a whole, with the exception of child poverty.</li> </ul>
Opportunities	Threats
<ul style="list-style-type: none"> <li>-Continuation of in-migration of working age individuals across many parts of East Wales adding to the potential workforce.</li> <li>-Opportunities to utilise existing higher education infrastructure to improve the skills of the population.</li> <li>-Opportunity to build on the strengths of the previous round of Structural Funds and the increase in capacity for community, public and private sector regeneration.</li> <li>-Opportunities to improve the educational outcomes of children by effective targeted interventions on the most disadvantaged</li> <li>-Scope to improve the skills levels and increase the size and depth of the labour pool.</li> <li>-Potential to build on local strong community networks to achieve lasting benefits to individuals.</li> </ul>	<ul style="list-style-type: none"> <li>-Recent fall in male youth employment across East Wales. Evidence shows that early interaction with the labour market can be vital in future life chances.</li> <li>-Nearly 1 in 5 businesses reporting a skills gap in Wales.</li> <li>-Falling demand for low skilled individuals cited as principal cause for higher economic inactivity in Wales. As a result of increased globalisation demand is expected to fall as low skilled jobs are relocated to low wage cost countries. Social issues may therefore, become entrenched.</li> <li>-Ageing population resulting in a lower relative proportion of working age individuals (high dependency ratio) and increased pressure on many public services (although a better understanding of migration patterns is required, as this may counter the natural ageing of the population).</li> </ul>

## CHAPTER 3: STRATEGY

### Introduction

3.1 This chapter sets out the overall strategy for the East Wales ESF Regional Competitiveness & Employment programme. It considers the key challenges facing the region and reviews the progress made in addressing them, including the support of the current Objective 3 Programme. The strategy sets out the Priorities for the new Regional Competitiveness & Employment programme, explaining how these will contribute to strengthening the considerable impetus that has been built up for sustainable economic growth to help raise the economic competitiveness and performance of East Wales as a region. It has been developed in the context of both the European Commission's *Integrated Guidelines for Growth and Jobs*<sup>88</sup> and the *Community Strategic Guidelines for Cohesion 2007–2013*<sup>89</sup>.

3.2 The strategy explains how the programme will contribute to the UK's overall response to the Lisbon agenda for jobs and growth, as set out in the *National Reform Programme*<sup>90</sup> and the *National Strategic Reference Framework (NSRF)*<sup>91</sup>. It also explains how €63.597m of EU funds will be concentrated to maximise the potential for growth and jobs and to add value to the Welsh Assembly Government's strategies for supporting sustainable economic development. This chapter also provides justification for the thematic, geographical and financial concentration of the Programme in accordance with Article 37(3) of the General Regulation. Finally, the strategy sets out the main principles that will guide the implementation of the new programme, including the key role of national, regional and local partners. The development of the programme will be taken forward reflecting the principles of partnership transparency, fairness, equal opportunities and added value.

### Current EU Structural Funds 2000–2006

3.3 East Wales is benefiting from support of £94 million (€138 million) from the European Structural Funds Objective 3 programme for 2000–2006. Coupled with match funding from the public, private and voluntary sectors, over 550 projects are receiving investment totalling more than £225 million (€332 million), making a real difference to the futures of businesses, communities and individuals across the region. The Mid-term Evaluation Update (MTEU) of the Objective 3 programme 2000–2006<sup>92</sup> estimated that up to 11,500 unemployed or economically inactive people will have moved into employment or further learning. Structural Funds have

<sup>91</sup> UK National Strategic Reference Framework: 2007–2013 consultation document <http://www.dti.gov.uk/files/file26282.pdf>

<sup>92</sup> Mid-term Evaluation Update for Objective 3 Programme 2000–2006, Final Report, December 2005 by Old Bell 3 for the Welsh Assembly Government: <http://www.wefo.wales.gov.uk/default.asp?action=page&ID=1583>

made a significant contribution to improving the region's economic prosperity in line with the Lisbon and Gothenburg reform agenda.

3.4 The new Regional Competitiveness & Employment programme will build on this success and learn from the experience of past Structural Fund programmes, in terms of strategic focus and implementation. The next phase will take forward existing interventions with a proven track record of success, while encouraging new and innovative approaches. It will not simply be more of the same but more of the best, with a strong focus on increasing business competitiveness and employment. The available funding will be devoted to building lasting economies and communities that will thrive and drive strong and sustainable economic growth. Investments will be made on the basis of future potential and this theme of long-term economic capacity building – essential for jobs and growth – will be the cornerstone of resource allocation.

3.5 As part of the Ex Ante Evaluations a review of previous evaluations of the 2000-2006 Structural Funds Programmes was undertaken in order to identify key conclusions and lessons learned. The review noted that: to be most effective, programmes need to be closely aligned to national and regional economic development strategies and to the key aims of organisations delivering these strategies; and there needs to be sufficient flexibility in the programmes to adapt to changed national and regional contexts and socio-economic conditions, as well as taking into account any overlaps and duplications with other funding programmes which emerge in the course of the programming period. There should be a proactive approach to reviewing of the programmes to ensure that required changes are anticipated. [The key conclusions and recommendations are detailed further within this chapter and the full report is included in the Ex Ante Evaluation Report at Annex E].

### **Key strategic challenges for East Wales**

3.6 Chapter 2, the Analysis, shows that East Wales performs well compared to the rest of Wales on almost all of the leading economic indicators. Supported in part by the current round of structural funds, the economy of East Wales has shown marked signs of improvement over recent years. Headline Gross Value Added (GVA) per capita across East Wales is above the Welsh average, driven by the success of Cardiff and South-east Wales, and the labour market has improved rapidly in recent years with rising employment, falling economic inactivity, and higher average earnings than for Wales as a whole. The sub-region has also seen an overall increase in population, highlighting the area as an attractive place to live and adding to the potential workforce of the sub-region.

3.7 These strengths offer considerable opportunities and act as important drivers for the Welsh economy as a whole. It will be critical to build on the contribution offered by East Wales, through its better employment opportunities and its relatively high GVA, to support future growth not only of the sub-region, but also within West Wales and the Valleys. Increasing the value-added and productivity of the sub-region will do also do much in closing the gap between Wales and the UK.

3.8 Whilst East Wales has seen a significant rise in overall employment there is still much to be done to reduce economic disparities within the sub-region. Over one fifth of the sub-regions working age population remain economically inactive with certain groups suffering greater disadvantage than other in accessing and engaging with the labour market. Rates of economic inactivity for people with work-limiting health conditions and disabilities, lone parents, young people classed as not in employment, education or training (NEETs), older people and BME people, still remain high. In particular, the sub-region as a whole has seen a significant rise in youth unemployment over recent years.

3.9 Supporting economic growth rests not only on ensuring higher levels of employment and economic activity but on also ensuring the region has a highly skilled workforce. The sub-region already has a favourable skills profile with a higher proportion of its working age population at the upper end of the skills spectrum but despite this, value added per job (typically referred to as productivity) is lower in East Wales than across the UK as a whole. This is largely explained by the under-representation of typically higher value-added sectors industries than compared to the UK average. A key challenge for the sub-region in raising productivity will be to ensure skill levels of the workforce are developed to address any skill gaps and shortages needed to support higher value adding sectors.

3.10 The key focus of the activity which will be supported by the ESF Operational Programme will be to tackle two major challenges as identified in the SWOT analysis – tackling economic inactivity and unemployment in the region; and raising skills levels and the adaptability of the workforce in East Wales. The programme will add value to mainstream UK employment policies aimed at getting people into work by using funds to focus on engagement and helping individuals reach a stage where they become ready to engage with such programmes. It will also focus on tackling low skills throughout the region by funding the provision of basic skills training, and supporting the development of higher level management and leadership skills to managers and workers in small enterprises (up to 50 employees) in small businesses where demand led, and supporting systems to help identify future demand, and match provision of training and learning opportunities accordingly.

**Table 21: East Wales challenges addressed by the ERDF and ESF Operational Programmes**

<b>Challenges for East Wales</b>	<b>Intervention by the Programmes</b>
<b>Value-added per job</b> Lower value-added per job due to: - adverse occupational or industrial mix; - unfavourable qualifications profile in the workforce as a whole; and - sparsely populated areas within the region not benefiting from the effects of agglomeration.	ESF Priority 2 will support research into skills needs and systems for matching learning to employer demand; and helping employers identify and address the future needs of their sector.  ERDF Priority 1 will help businesses to move up the value chain and support investment in innovation and R&D.

<p><b>Knowledge and Innovation</b></p> <ul style="list-style-type: none"> <li>- Low R&amp;D expenditure especially in the business sector</li> </ul>	<p>ESF Priority 2 will support development of management and leadership skills in the workforce for SMEs.</p> <p>ERDF Priority 1 will support R&amp;D in business and build capacity in Higher Education for the commercialisation of innovation.</p>
<p><b>Enterprise</b></p> <ul style="list-style-type: none"> <li>- Lower rates of VAT registrations than compared with the average of the UK as a whole</li> </ul>	<p>ESF Priority 2 will support the development of management and leadership skills in the workforce for SMEs</p> <p>ERDF Priority 2 will improve access to finance, information and support services to encourage business start ups and growth, and by the development of clusters.</p>
<p><b>Transport and Infrastructure</b></p> <p>There are a number of issues around - access to key services, particularly in the more rural parts of the Programme area, and</p> <ul style="list-style-type: none"> <li>- increasing concerns about the growing environmental impact of transport and congestion.</li> </ul>	<p>There is little scope for infrastructure in ERDF and this will be addressed through domestic programmes and policies. There is scope in ERDF Priority 4 for a small number of regeneration initiatives.</p>
<p><b>Education and skills</b></p> <ul style="list-style-type: none"> <li>- Higher proportion of individuals with higher level skills than for Wales and the UK as a whole.</li> <li>- Higher proportion of individuals obtaining A level grades A*-C than Wales as a whole.</li> <li>- Higher proportion of pupils leaving compulsory education without any formal qualifications</li> <li>- Falling demand for low-skilled workers</li> </ul>	<p>ESF Priority 1 will address basic skills needs of targeted groups within the economically inactive, including young people who are classed as NEET ( not in education, employment or training).</p> <p>ESF Priority 2 will support initiatives to improve basic skills provision for workers to improve their employability and earnings, and some intermediate or higher management skills in small businesses, or where there is sectoral need.</p>
<p><b>Employment</b></p> <ul style="list-style-type: none"> <li>- Economic Inactivity</li> <li>- NEETs – fall in male employment in the 16-24 age group</li> </ul>	<p>ESF Priority 1 focuses on tackling economic inactivity and targeted support to help certain disadvantaged groups, including NEETs, to access sustainable employment opportunities.</p>

<ul style="list-style-type: none"> <li>- Continued decline of traditional sectors where East Wales has a large proportion of employment</li> <li>- Ageing population resulting in a lower proportion of working age individuals</li> </ul>	<p>ESF Priority 2 supports the development of systems to identify current and future skills needs of employers to raise the skill levels of the workforce.</p> <p>ESF Priority 1 aims to bring more unemployed and economically inactive older people into work.</p>
<p><b>Environment</b></p> <ul style="list-style-type: none"> <li>- Good quality natural environment in many areas attractive to individuals and investors</li> <li>- Many parts need to improve its management of waste in response to stricter EU legislation</li> </ul>	<p>ERDF Priority 3 will support environmental protection and conservation and there will be scope to promote the Environmental Goods and Services Sector in ERDF Priorities 1 and 2.</p>
<p><b>Climate Change</b></p> <ul style="list-style-type: none"> <li>- Wales' CO<sub>2</sub> emissions need to be reduced to meet UK's commitments under the Kyoto protocol.</li> </ul>	<p>ERDF Priority 3 will support actions to improve energy efficiency and the development of renewable and alternative technologies.</p>
<p><b>Social Deprivation</b></p> <ul style="list-style-type: none"> <li>– Pockets of deprivation found in urban areas within Cardiff and Newport, many with high concentration of residents from BME communities.</li> </ul>	<p>ESF Priority 1 supports action to combat economic inactivity which will address social deprivation issues and target BME communities.</p> <p>ESF Priority 2 aims to support workers with work limiting health issues to support their entry into, and retention, in employment.</p> <p>ERDF Priority 4 seeks to address deprivation through the improvement of degraded urban environments.</p>
<p><b>Infrastructure</b></p> <p>Sites and premises: opportunities in high quality, mobile investments in sectors like software and financial services are being lost to Wales and that one of the main reasons for this is the absence of quality buildings on high quality sites.</p>	<p>ERDF Priority 4 will provide for small scale targeted support for sites and premises.</p>
<p><b>Demographic Trends</b></p> <p>Ageing population resulting in a lower relative proportion of working age individuals</p>	<p>ESF Priority 2 will seek to assist older workers with low qualification levels increase their skills and therefore remain in work.</p>

## **Aims and Objectives for the ESF Regional Competitiveness & Employment Programme**

3.11 The following objectives have been arrived at by an examination of the key challenges facing East Wales in the context of achieving sustainable economic growth. The SWOT analysis summarises the main challenges and opportunities for the region over the next seven year period, and the programme priority axes have been developed to add value to existing policies for addressing these issues. The separate ESF and ERDF programmes should be viewed collectively as a means of achieving the vision for East Wales as a vibrant entrepreneurial region at the cutting edge of sustainable growth.

3.12 The overall aim of the Regional Competitiveness & Employment ESF programme is:

**To make East Wales a high skill, knowledge driven economy with full employment, a skilled, adaptable workforce and responsive businesses, at the cutting edge of sustainable development.**

3.13 The two objectives of the ESF operational programme are to:

- tackle economic inactivity and increase employment; and
- improve skill levels and the adaptability of the workforce.

3.14 The objectives of the complementary ERDF Operational Programme are:

- promote knowledge and innovation for growth;
- promote business competitiveness and growth;
- tackle the challenges of climate change; and
- encourage regeneration for growth;

3.15 These priorities will deliver the Lisbon objectives of improving economic growth and providing additional jobs for the people of East Wales, supporting complementary relationships between economic, social and environmental policies.

## **Policy Response**

3.16 The Structural Funds Regulations anticipate a more strategic approach to programming in the 2007 – 2013 period, with a strengthening of the focus of EU cohesion policy on the Lisbon and Gothenburg agendas for growth, jobs and sustainable development<sup>93</sup>. Member States have approved a set of “*Community Strategic Guidelines for Cohesion*”<sup>94</sup> (CSGs), which provides a framework for helping to deliver the Lisbon objectives as defined in the Integrated Guidelines for Growth and Jobs. Not all elements of this framework are relevant to all regions of

<sup>93</sup> Common Actions for Growth and Employment: The Community Lisbon programme, 20 July 2005 ([www.europa.eu.int](http://www.europa.eu.int))

<sup>94</sup> Community Strategic Guidelines on Economic, Social and Territorial Cohesion 2007-2013, Council of the European Union, 18 August 2006  
[http://ec.europa.eu/regional\\_policy/sources/docoffic/2007/osc/1180706\\_en.pdf](http://ec.europa.eu/regional_policy/sources/docoffic/2007/osc/1180706_en.pdf)

the EU, and each region must select the most appropriate combination of investments to deliver the growth and jobs agenda, taking account of its particular strengths and weaknesses.

3.17 The CSGs establish that future Structural Fund programmes should address three main priorities:

- Enhancing the attractiveness of Member States, regions and cities by improving accessibility, ensuring adequate quality and level of services, and preserving their environmental potential;
- Encouraging innovation, entrepreneurship and the growth of the knowledge economy by research and innovation capacities, including new information and communication technologies; and
- Creating more and better jobs by attracting more people into employment, improving adaptability of workers and enterprises and increasing investment in human capital.

3.18 All three CSG objectives are relevant in shaping the Regional Competitiveness & Employment strategy for East Wales, where there is a need to focus investments on actions to promote long-term regional competitiveness and employment, job creation and sustainable development. The third guideline is particularly relevant to this ESF operational programme.

**Table 22 - Community Strategic Guidelines addressed by the ERDF and ESF Operational Programmes**

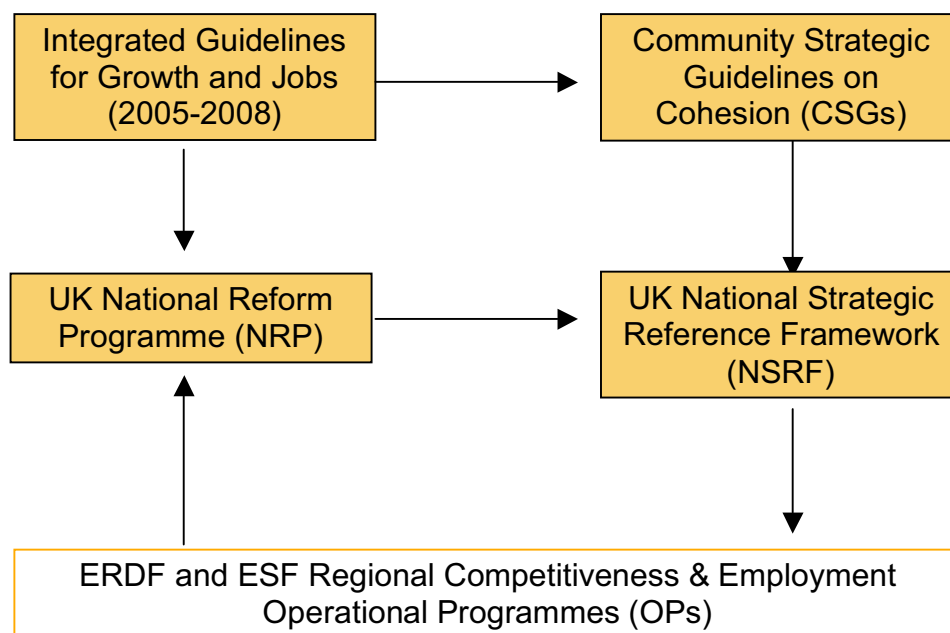

<b>Guidelines</b>	<b>Addressed by the Programmes</b>
<b>1.1 Making Europe and its regions more attractive places in which to invest and work</b>	
1.1.1 Expand and improve transport infrastructures	ERDF Priority 3 will support small scale sustainable transport solutions.
1.1.2. Strengthen the synergies between environmental protection and growth	ERDF Priority 3 aims to realise the economic potential of East Wales' natural environment and support will be available under ERDF Priority 1 for innovation in the EGS sector.  The ESF programme supports environmental sustainability as a cross cutting theme.
1.1.3. Address Europe's intensive use of traditional energy sources	Environmental Sustainability is a cross-cutting issue tackled throughout the ESF and ERDF programmes.  ERDF Priority 3 will encourage businesses to reduce their resource consumption.

<b>1.2. Guideline: Improving knowledge and innovation for growth</b>	
1.2.1. Increase and better target investment in R&D	ERDF Priority 1 promotes a high value-added economy by fostering R&D.
1.2.2. Facilitate innovation and promote entrepreneurship	The region's capacity for Innovation is supported through ERDF Priority 1. ERDF Priority 2 promotes the growth and expansion of new and existing SMEs.
1.2.3. Promote the information society for all	<p>The ERDF Programme supports the exploitation and take-up of ICT within the region's SMEs.</p> <p>The ESF programme will support initiatives using ICT that will promote workforce flexibility, and provide access to sustainable employment opportunities.</p>
1.2.4. Improve access to finance	ERDF Priority 2 seeks to address areas of market failure in financial support mechanisms.
<b>1.3. Guideline: More and better jobs</b>	
1.3.1. Attract and retain more people in employment and modernise social protection systems	<p>ESF Priority 1 seeks to attract more people, particularly the economically inactive into the workforce.</p> <p>ESF Priority 2 seeks to retain people in the workforce through improving skills levels.</p> <p>(The modernisation of social protection systems is considered outside the scope of the ESF Programme).</p>
1.3.2. Improve adaptability of workers and enterprises and the flexibility of the labour market	ESF Priorities 1 & 2 seek to improve the skills of those in employment, the unemployed, economically inactive, and disadvantaged groups in order to promote labour market flexibility.
1.3.3. Increase investment in human capital through better education and skills	The ESF Programme seeks to address basic skills needs within the employed workforce, the unemployed and economically inactive, and disadvantaged groups.
1.3.4. Administrative Capacity	The Programmes will not seek to address this guideline which is applicable to Convergence regions.
1.3.5. Help maintain a healthy labour force	The ESF Programme aims to address barriers to employment, and improve workforce adaptability, by assisting those with work-limiting health conditions enter sustainable employment.

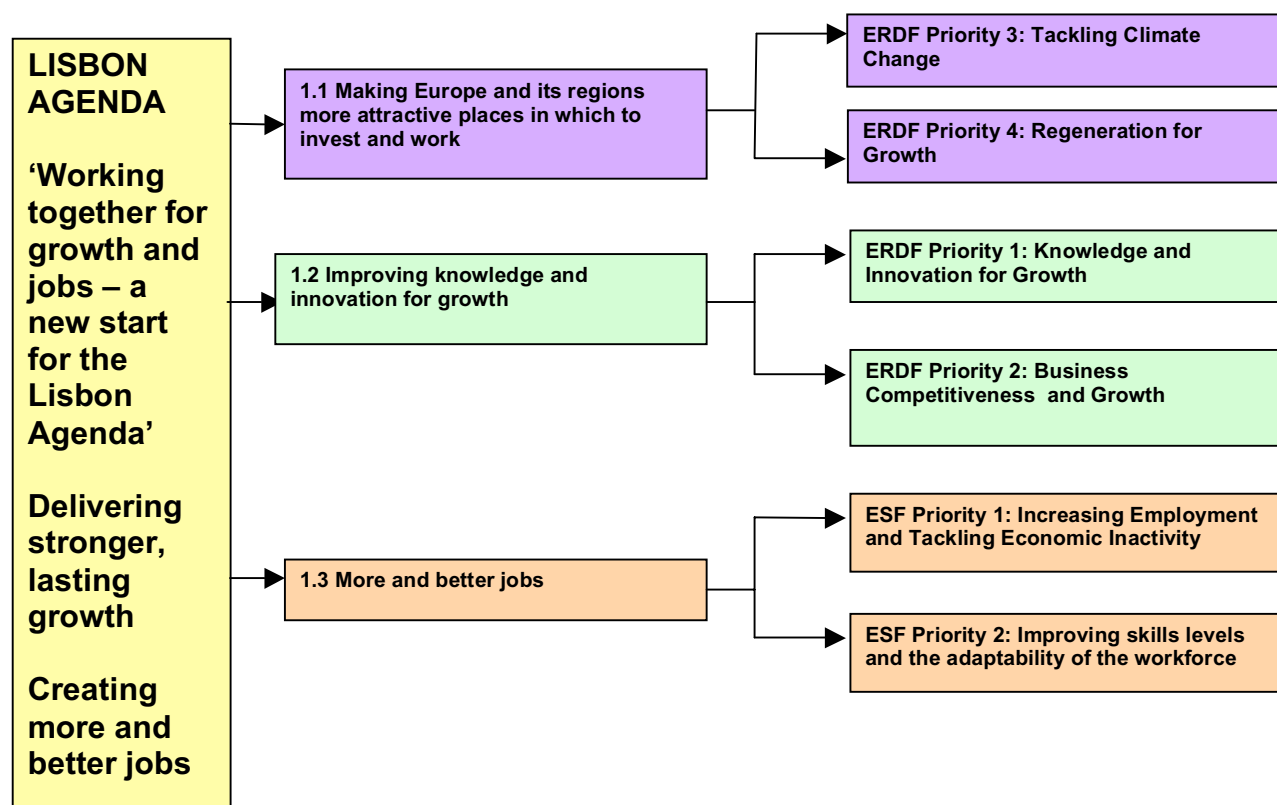

3.19 The objectives and priorities of the East Wales Regional Competitiveness & Employment programmes are consistent with the Lisbon agenda, and will contribute directly to the overall *UK National Reform Programme* (NRP), which in turn responds to the Integrated Guidelines for Growth and Jobs. This response includes policies and actions under the ESF Regional Competitiveness & Employment Programme to address the challenges of widening opportunities for the acquisition of skills and supporting the adaptability of workers and enterprises, improving employment prospects for the most disadvantaged.

**Figure 21 Links between Operational Programmes, CSGs and Integrated Guidelines**

**Figure 22 Link between CSG objectives and ESF & ERDF Regional Competitiveness & Employment Priorities**

3.20 The contribution which the Structural Funds will make to this programme of reform is set out in the *UK National Strategic Reference Framework (NSRF)*. The NSRF provides a policy framework to inform the preparation of Operational Programmes (OPs) at national and regional levels. It includes an analysis of the UK's economic strengths and weaknesses and specifies the strategy chosen for the Convergence and Regional Competitiveness & Employment programmes in each part of the UK. The *UK NSRF* includes a separate chapter setting out the strategy for regional economic growth in Wales and the Structural Fund priorities for both the Convergence and Regional Competitiveness & Employment programmes. The East Wales ESF Regional Competitiveness & Employment Operational Programme is closely aligned with this policy framework.

3.21 The programme is designed to deliver our vision for creating a thriving, vibrant and competitive region that has a highly skilled, innovative workforce that can compete internationally. The key drivers to achieving this are:

- Increasing employment , in particular by tackling economic inactivity; and
- Improving skills levels of workers and the adaptability of the workforce.

3.22 The strategic framework for supporting economic development has been developed in the context of *Wales: A Better Country*<sup>95</sup>, the Welsh Assembly

<sup>95</sup> Welsh Assembly Government's *Wales: A Better Country*:  
<http://new.wales.gov.uk/about/strategy/strategypublications/strategypubs/935753/?lang=en>

Government's broader strategic policy agenda. In particular, actions to promote economic development must occur alongside other elements of this strategic agenda – namely improving quality of life for everyone by advancing social justice, improving the environment, health and education, in line with the *Wales Sustainable Development Scheme – Starting to Live Differently*<sup>96</sup>.

3.23 The economic development strategy is set out in *Wales: A Vibrant Economy*<sup>97</sup>, (W:AVE) which sets the strategic framework for the European Structural Funds programmes 2007–2013. Its vision is of a thriving, vibrant economy capable of delivering strong and sustainable economic growth by providing opportunities for all. The aims of *Wales: A Vibrant Economy*, which take forward the Lisbon agenda, are:

- Increasing employment by supporting job creation;
  - Investing in the regeneration of deprived communities;
  - Helping businesses to grow and increase value-added per job, output and earnings by:
    - investing in transport, ICT networks and other economic infrastructure;
    - attracting more high value-added functions to Wales and supporting businesses and sectors with strong growth potential;
    - improving the skills base and delivering more demand-led training tailored to the needs of businesses;
    - helping businesses to become more competitive by supporting the drivers to business growth: entrepreneurship, innovation, investment and trade; and
- Ensuring that all economic programmes and policies support sustainable development, in particular by encouraging clean energy generation and resource efficiency.

3.24 W:AVE features an approach which works through key sectors. These have been identified through a number of routes. It identifies ten sectors as important for future economic growth, these include automotive, aerospace, agri-food, high technology, pharmaceuticals/ bio chemicals, financial services, creative industries, construction, hospitality, leisure and tourism, and social care. Action undertaken through the ESF programme will complement the activity of the ERDF programme, which will be targeted initially on supporting businesses and employees within these key sectors. This initial set of sectors will be reviewed at a later date, following a more detailed sectoral and structural analysis of the changes within the Welsh economy.

3.25 The strategy is also supported by and complemented UK level employment policies delivered in East Wales by the Department for Work and Pensions.

---

<sup>96</sup> Welsh Assembly Government's Wales Sustainable Development Scheme:  
<http://new.wales.gov.uk/about/strategy/strategypublications/strategypubs/startlivedifferently/?lang=en>

<sup>97</sup> Welsh Assembly Government's Wales: A Vibrant Economy:  
<http://new.wales.gov.uk/about/strategy/strategypublications/strategypubs/935778/?lang=en>

Proposals in *A New Deal for Welfare: Empowering people to work*<sup>98</sup>, focuses more support on tackling economic inactivity and raising employment amongst those traditionally considered to be at a greater distance from engagement with the labour market.

3.26 The *W:AVE* strategy is complemented and supported by *The Learning Country 2: Vision into Action*<sup>99</sup> and the *Skills and Employment Action Plan 2005*,<sup>100</sup> which take forward Wales' lifelong learning agenda and demonstrates Wales' commitment to achieving the objectives of the *European Employment Strategy*<sup>101</sup>. Alongside this the Welsh Assembly Government strategies *Extending Entitlement*, and *14–19 Learning Pathways*,<sup>102</sup> specifically tackle the high proportion of 16-18 year olds with no qualifications and who are not in employment, education or training.

3.27 *The Learning Country 2: Vision into Action*, builds upon the original 10 year strategy published by the Welsh Assembly Government in 2001, which aims to transform education and training in Wales to create a place where high quality lifelong learning liberates talent, extends opportunities, empowers communities, provides better jobs and skills to enable people to prosper in the new economy and creates a sustainable future for Wales. The *Learning Country 2* re-affirms and updates this vision. It contains a number of key objectives and targets which will contribute to the Lisbon agenda of delivering stronger, lasting economic growth and creating more and better jobs. These objectives are to:

- Promote inclusion in education and learning;
- Provide engaging, stimulating and flexible learning programmes and pathways;
- Equip young people to be able to respond to changing employment markets;
- Extend and enhance the capabilities of our learning workforce;
- Develop the skills and knowledge of our learning workforce;
- Improve skills and add value to the Welsh economy;
- Improve knowledge exploitation and maximise the contribution of HE to the development of a knowledge economy; and
- Promote equality of opportunity for all learners.

---

<sup>101</sup> European Employment Strategy: [http://ec.europa.eu/comm/employment\\_social/employment\\_strategy/index\\_en.htm](http://ec.europa.eu/comm/employment_social/employment_strategy/index_en.htm)

<sup>102</sup> Welsh Assembly Government's *Extending Entitlement and 14-19 Learning Pathways*: [http://new.wales.gov.uk/topics/educationandskills/policy\\_strategy\\_and\\_planning/extending\\_entitlement/?lang=en](http://new.wales.gov.uk/topics/educationandskills/policy_strategy_and_planning/extending_entitlement/?lang=en) and [http://new.wales.gov.uk/topics/educationandskills/policy\\_strategy\\_and\\_planning/learning\\_pathways/?lang=en](http://new.wales.gov.uk/topics/educationandskills/policy_strategy_and_planning/learning_pathways/?lang=en)

3.28 There are also a number of key targets which have been set to assess and benchmark progress towards the strategic vision of the *Learning Country 2*. These include:

- The percentage of 15 year olds achieving the equivalent of GCSE grade A\* - C to reach 60 % by 2010 (2007 milestone 53%)
- By 2010 no pupil to leave full-time education without an approved qualification;
- The percentage of 16 – 18 year olds in employment, education or training to reach 93% by 2010;
- 95 % of young people by the age of 25 to be ready for high skilled employment and / or further or higher education by 2010;
- By 2010 the completion rates for Modern Apprenticeships to increase to 40%;
- The percentage of working age adults with level 1 or above basic skills in literacy to be 80% and level 1 or above basic skills in numeracy to be 55% by 2010;
- The percentage of adults of working age with a qualification equivalent to level 2 or above to be 70%, with level 3 or above to be 50% and with level 4 or above to be 30% by 2010.

3.29 *The Learning Country 2: Vision into Action* is complemented and supported by the *Skills and Employment Action Plan 2005 (SEAP 2005)*, which takes forward Wales' lifelong learning agenda, and demonstrates Wales' commitment to achieving the objectives of the *European Employment Strategy*<sup>103</sup>. The Action Plan supports the Welsh Assembly Government's work with its partners in the public, private and voluntary sectors to make real progress in taking forward action to tackle the skills and employment challenges facing Wales. The vision is for a Wales where everyone has the skills, motivation and opportunity to obtain good quality jobs that meet their aspirations and abilities, and where employers work with their employees and public sector agencies to raise the skills to the highest possible levels to support high quality jobs in a growing economy. The key objectives of the plan are:

- To improve the mechanisms for workforce development;
- Supply new entrants to the labour market with the skills needed for employment;
- Work with employers and employees to improve skills; and
- Help more people into sustained employment.

3.30 The aspiration is to lift the number of people in the workforce with the higher skills needed for economic growth and prosperity, whilst at the same time pressing for more employment opportunities at higher levels. Level 3 has been identified as the minimum level Wales needs to aspire to achieve, if it is to lift its economic performance to match the ambitions of *Wales: A Vibrant Economy*. However, East Wales, and Wales generally, has a basic skills deficit and this needs to be tackled as a priority. Work is required to tackle step by step improvements in basic literacy

---

<sup>103</sup> European Employment Strategy:  
[http://ec.europa.eu/comm/employment\\_social/employment\\_strategy/index\\_en.htm](http://ec.europa.eu/comm/employment_social/employment_strategy/index_en.htm)

and numeracy, increase the supply of people with intermediate and higher level management and leadership skills, whilst at the same time aiming to raise the demand for higher level skills across the board.

3.31 The Action Plan also supports the UK Government's agenda to help more people of working age into sustainable employment by addressing the range of barriers to participation in work. Action through this programme will add to the work envisaged and planned through *SEAP2005*, and contribute to the UK Government's long-term goal of increasing employment opportunities for all and meeting its challenging target of an 80% per cent employment rate.

3.32 At the UK level a major review of the UK's skills levels and future needs was published in December 2006 by Lord Sandy Leitch. His report on UK skills, "*Prosperity for all in the global economy – World class skills*"<sup>104</sup>, contains a number of recommendations on how the vision of developing the UK as a world leader on skills by 2020, can be progressed. This followed the publication in 2003 and 2005 respectively of the UK central government's White papers, *Skills: Getting on in business, getting on at work*, and *21<sup>st</sup> Century Skills: realising our potential*. UK central government has welcomed the Leitch review, and accepted the proposal for a new UK wide Commission for Employment and Skills. It has been agreed that Wales will have a representative on this body. The formal UK Government response will be published in Summer 2007, following the Comprehensive Spending Review.

3.33 Since devolution the Welsh Assembly Government has developed its own Wales' tailored strategies for skills and education which are outlined above. Many of the issues raised by Lord Leitch are already recognised, and are being addressed within Wales. The Welsh Assembly Government has therefore welcomed the report and the inclusion of Welsh initiatives cited within the report e.g. all age careers advice services that link advice to actual employment opportunities. Much of the activity recommended by Lord Leitch is being progressed using *SEAP 2005*. The particular area where Wales will need to co-ordinate activity will be with the Sector Skills Councils which have a UK wide remit, to ensure a distinctly Welsh approach to the issues raised by Lord Leitch.

3.34 There are a couple of key UK level policies for employment, such as *Empowering People to Work*, which are delivered in Wales by Jobcentre Plus, the government agency supporting people of working age from welfare into work, and helping employers to fill vacancies. It is part of the Department for Work and Pensions (DWP). Its key objectives are to:

- Increase the effective supply of labour by promoting work as the best form of welfare and helping unemployed and economically inactive people move into employment;
- Work towards parity of outcomes for BME customers;

---

<sup>104</sup> HM Treasury – The Leitch Review of Skills in UK, [http://www.hm-treasury.gov.uk/independent\\_reviews/leitch\\_review/review\\_leitch\\_index.cfm](http://www.hm-treasury.gov.uk/independent_reviews/leitch_review/review_leitch_index.cfm)

- Provide high-quality and demand-led services to employers, which help fill job vacancies quickly and effectively with well-prepared and motivated employees
- Help people facing the greatest barriers to employment to compete effectively in the labour market and move into and remain in work;
- Improve continuously the quality, accessibility and delivery of services to all customers; and
- Ensure that people receiving working age benefits fulfil their responsibilities while providing appropriate help and support for those without work.

3.35 It delivers a number of mandatory and voluntary programmes for individuals under the overarching Welfare to Work banner, such as the *New Deal* suite of programmes – *New Deal for Young People; for Disabled; for Lone Parents; for partners of the unemployed*. It also works with the Welsh Assembly Government on a number of initiatives, notably the *Want2Work* project under the current Objective 1 and 3 programmes, and is responsible for delivering support, where requested, to employers whose workers are under threat of, or under notice of redundancy.

3.36 The *Wales Spatial Plan*<sup>105</sup> provides the overall framework for future collaborative action between the Welsh Assembly Government and its partners to achieve sustainable economic growth and development in all parts of Wales. It sets a 20 year horizon for development and for integrating the investment necessary for the sustainable development of communities throughout Wales. Economic development policies will take account of location differences and priorities and this requires co-ordinated action at national, regional and local levels. It also recognises the importance of cross-border and inter-regional connections eg: North East Wales and the economic links with West Cheshire.

3.37 There is recognition that ‘one size’ solutions do not fit all parts of Wales and distinctive local issues will require different approaches. East Wales includes the following *Spatial Plan* areas:

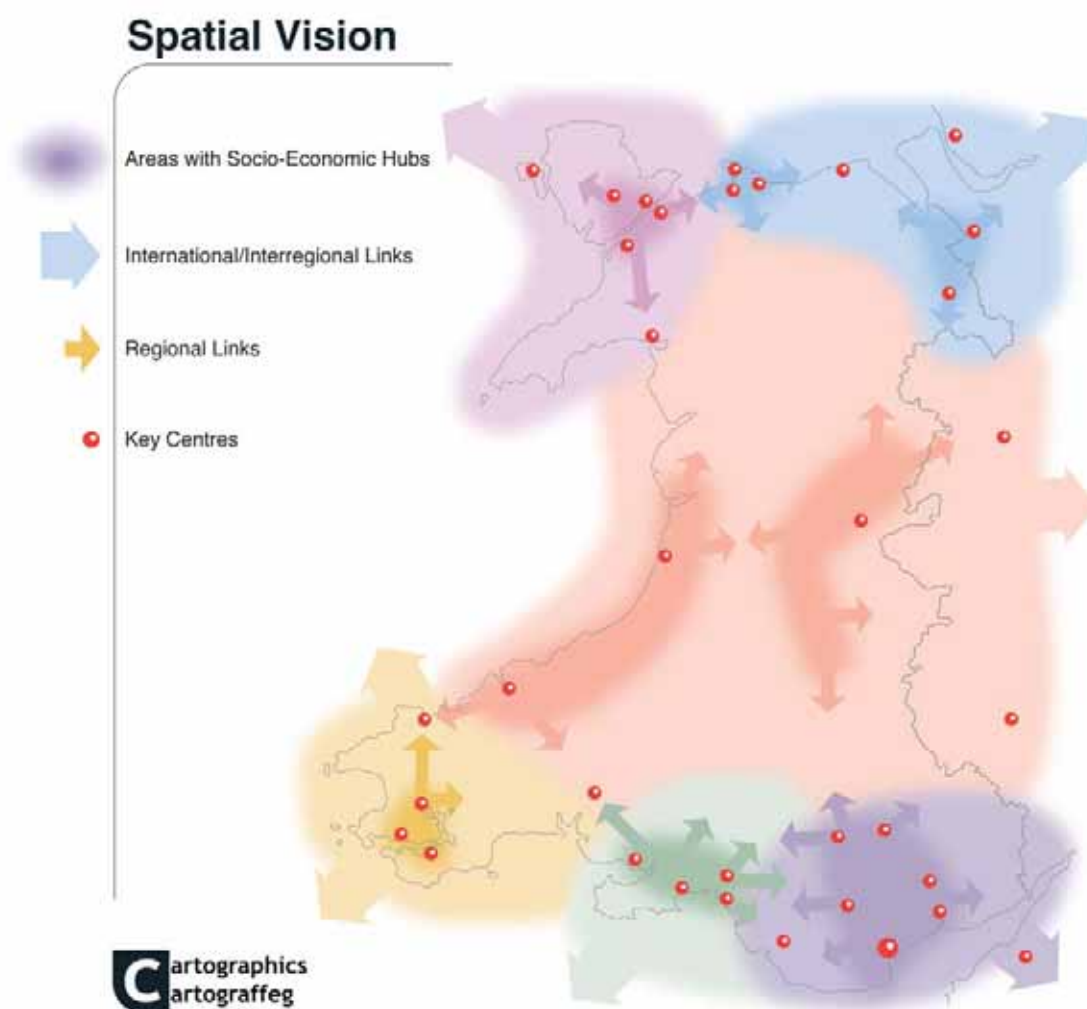

- **North East:** The counties of Flintshire and Wrexham sit within the North East, an area harnessing the economic drivers on both sides of the border, reducing inequalities and improving the quality of its natural and physical assets.
  - Parts of this area are experiencing skills shortages, increasing house prices and congestion. Some of the communities in particular on the eastern side have high levels of deprivation and are in need of urban regeneration. Improved accessibility and raising skill and educational attainment levels, which are low in the area is key to spreading opportunities to areas in need of regeneration.

<sup>105</sup> Welsh Assembly Government's *Wales Spatial Plan*:  
<http://new.wales.gov.uk/about/strategy/spatial/sppublications/walesspatial?lang=en>

- **Central Wales:** High-quality living and working in smaller-scale settlements set within a superb environment, providing dynamic models of rural sustainable development, moving all sectors to higher value added activities.
  - Powys contains several key settlements such as Welshpool and Newtown and has a relatively low population density. This area has the highest educational attainment levels in Wales but schools need to help young people make informed choices between academic and vocational options. Economic development needs to build on regional strengths and provide job opportunities for the region's large graduate population. Good ICT links are key enablers of future development as is making better links with the education sector.
- **South East:** An innovative skilled area offering a high quality of life – international yet distinctively Welsh. It will compete internationally by increasing its global visibility through stronger links between the Valleys and the coast and with the UK and Europe, helping to spread prosperity within the area and benefiting other parts of Wales.
  - Monmouthshire, Newport, Cardiff and the Vale of Glamorgan sit within this region, Wales' most populous. The area is rich in high quality HE and FE facilities and these institutions are of major importance in attracting and keeping talent in the area. However, there are challenges of low economic activity rates, particularly amongst key groups, low skills levels, poor health and social exclusion which need to be tackled to improve economic performance in a lasting way.

**Figure 23. Wales Spatial Plan Areas**

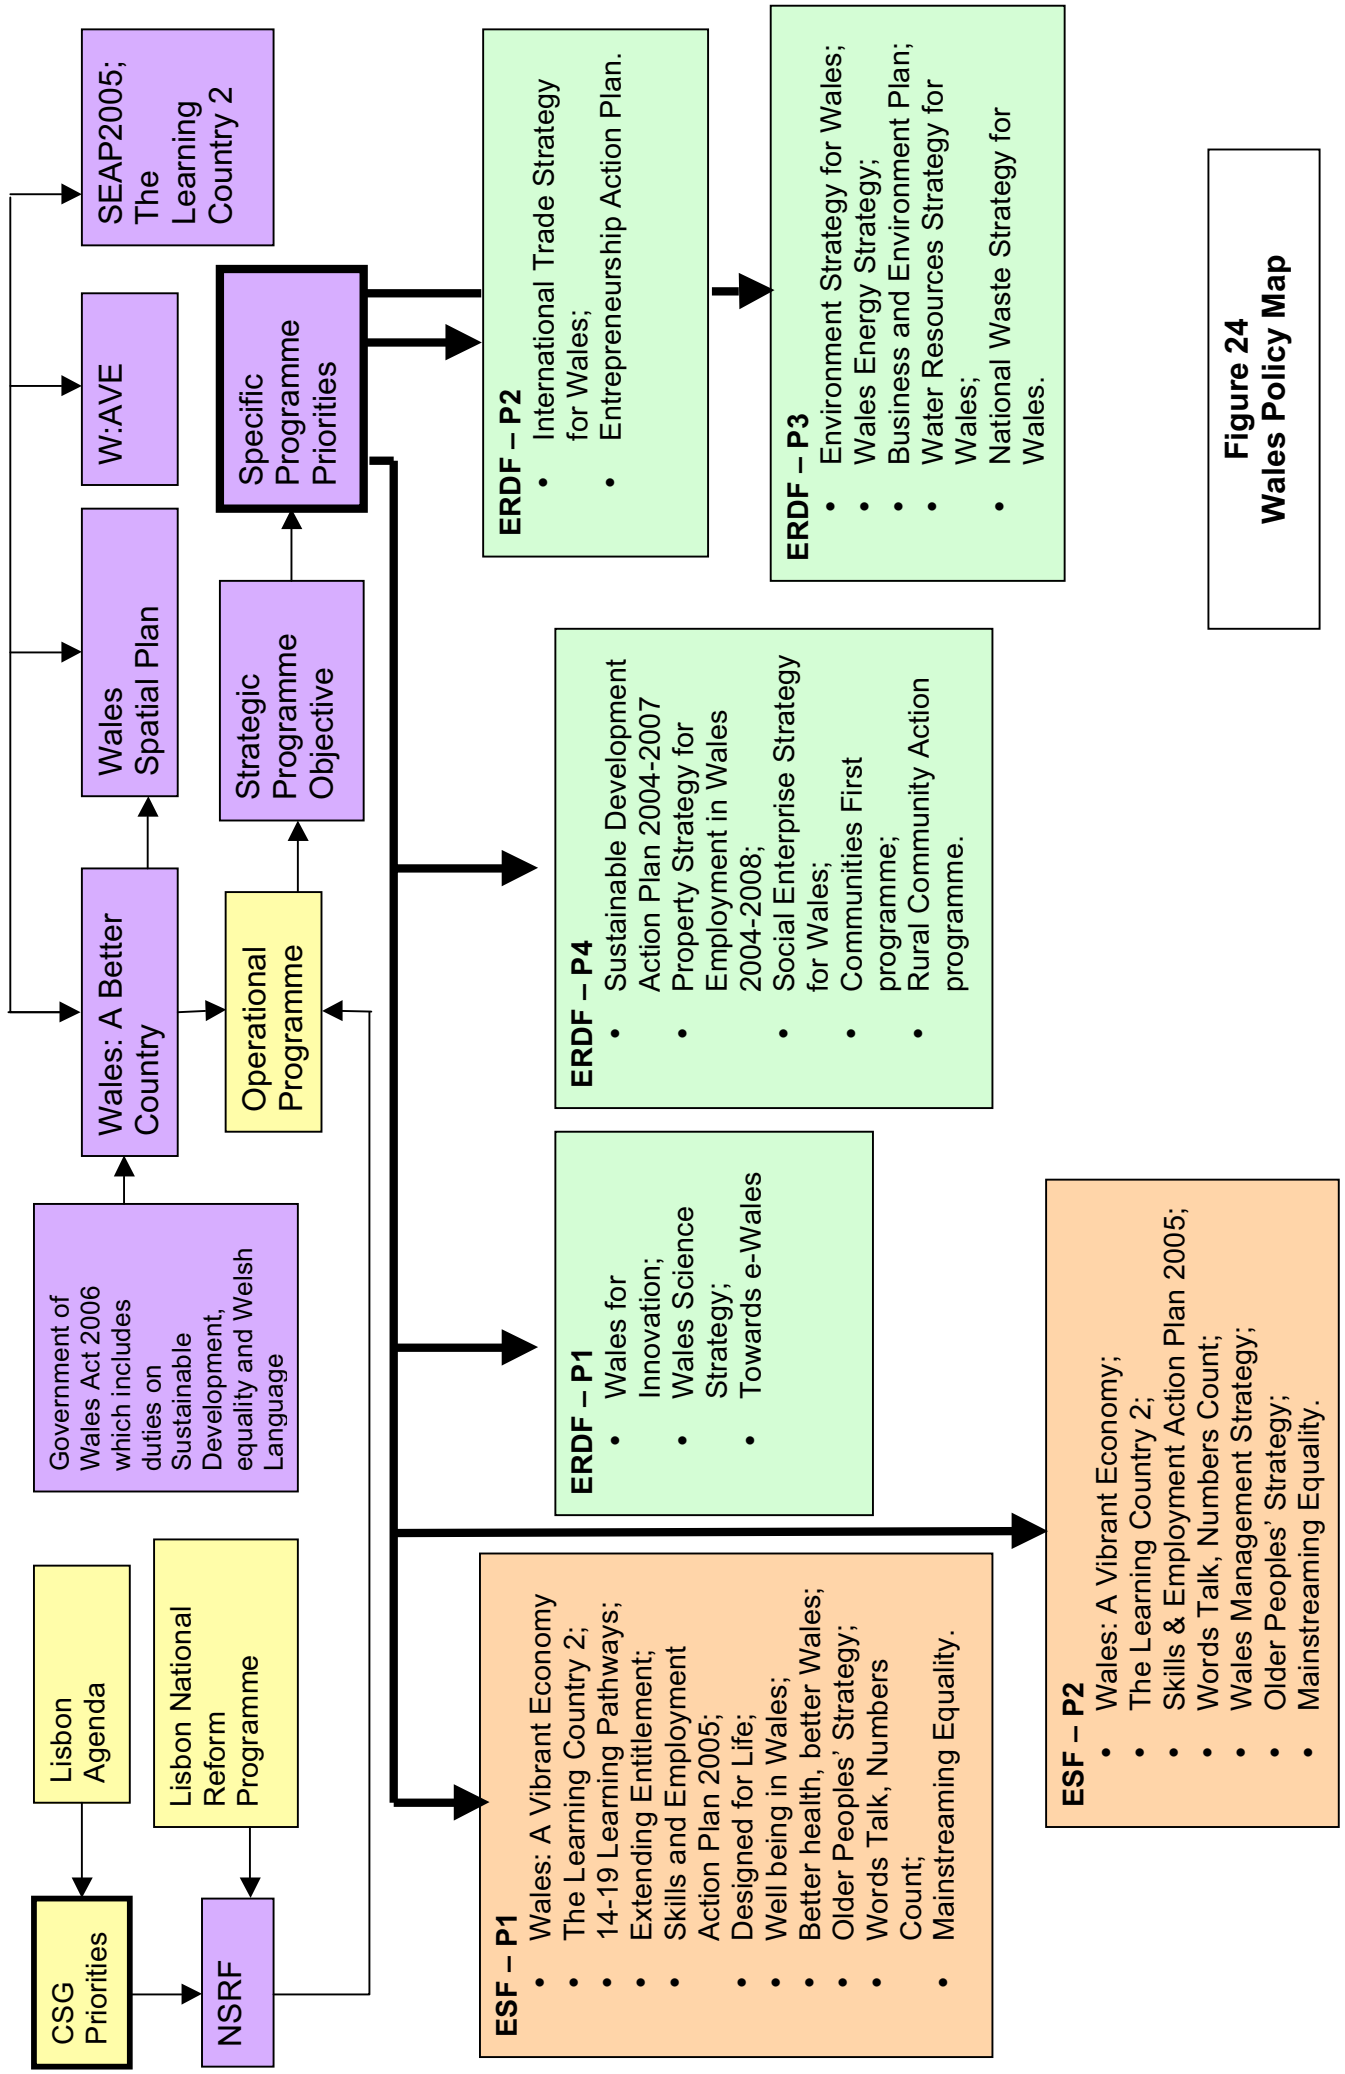

3.38 The new *Environment Strategy for Wales*<sup>106</sup> will provide opportunities for further development of the environment as a fast growing economic sector in its own right and will be used to ensure that the Structural Fund interventions are targeted so as to deliver economic and environmental progress in tandem and in line with the principles agreed at the Gothenburg Council.

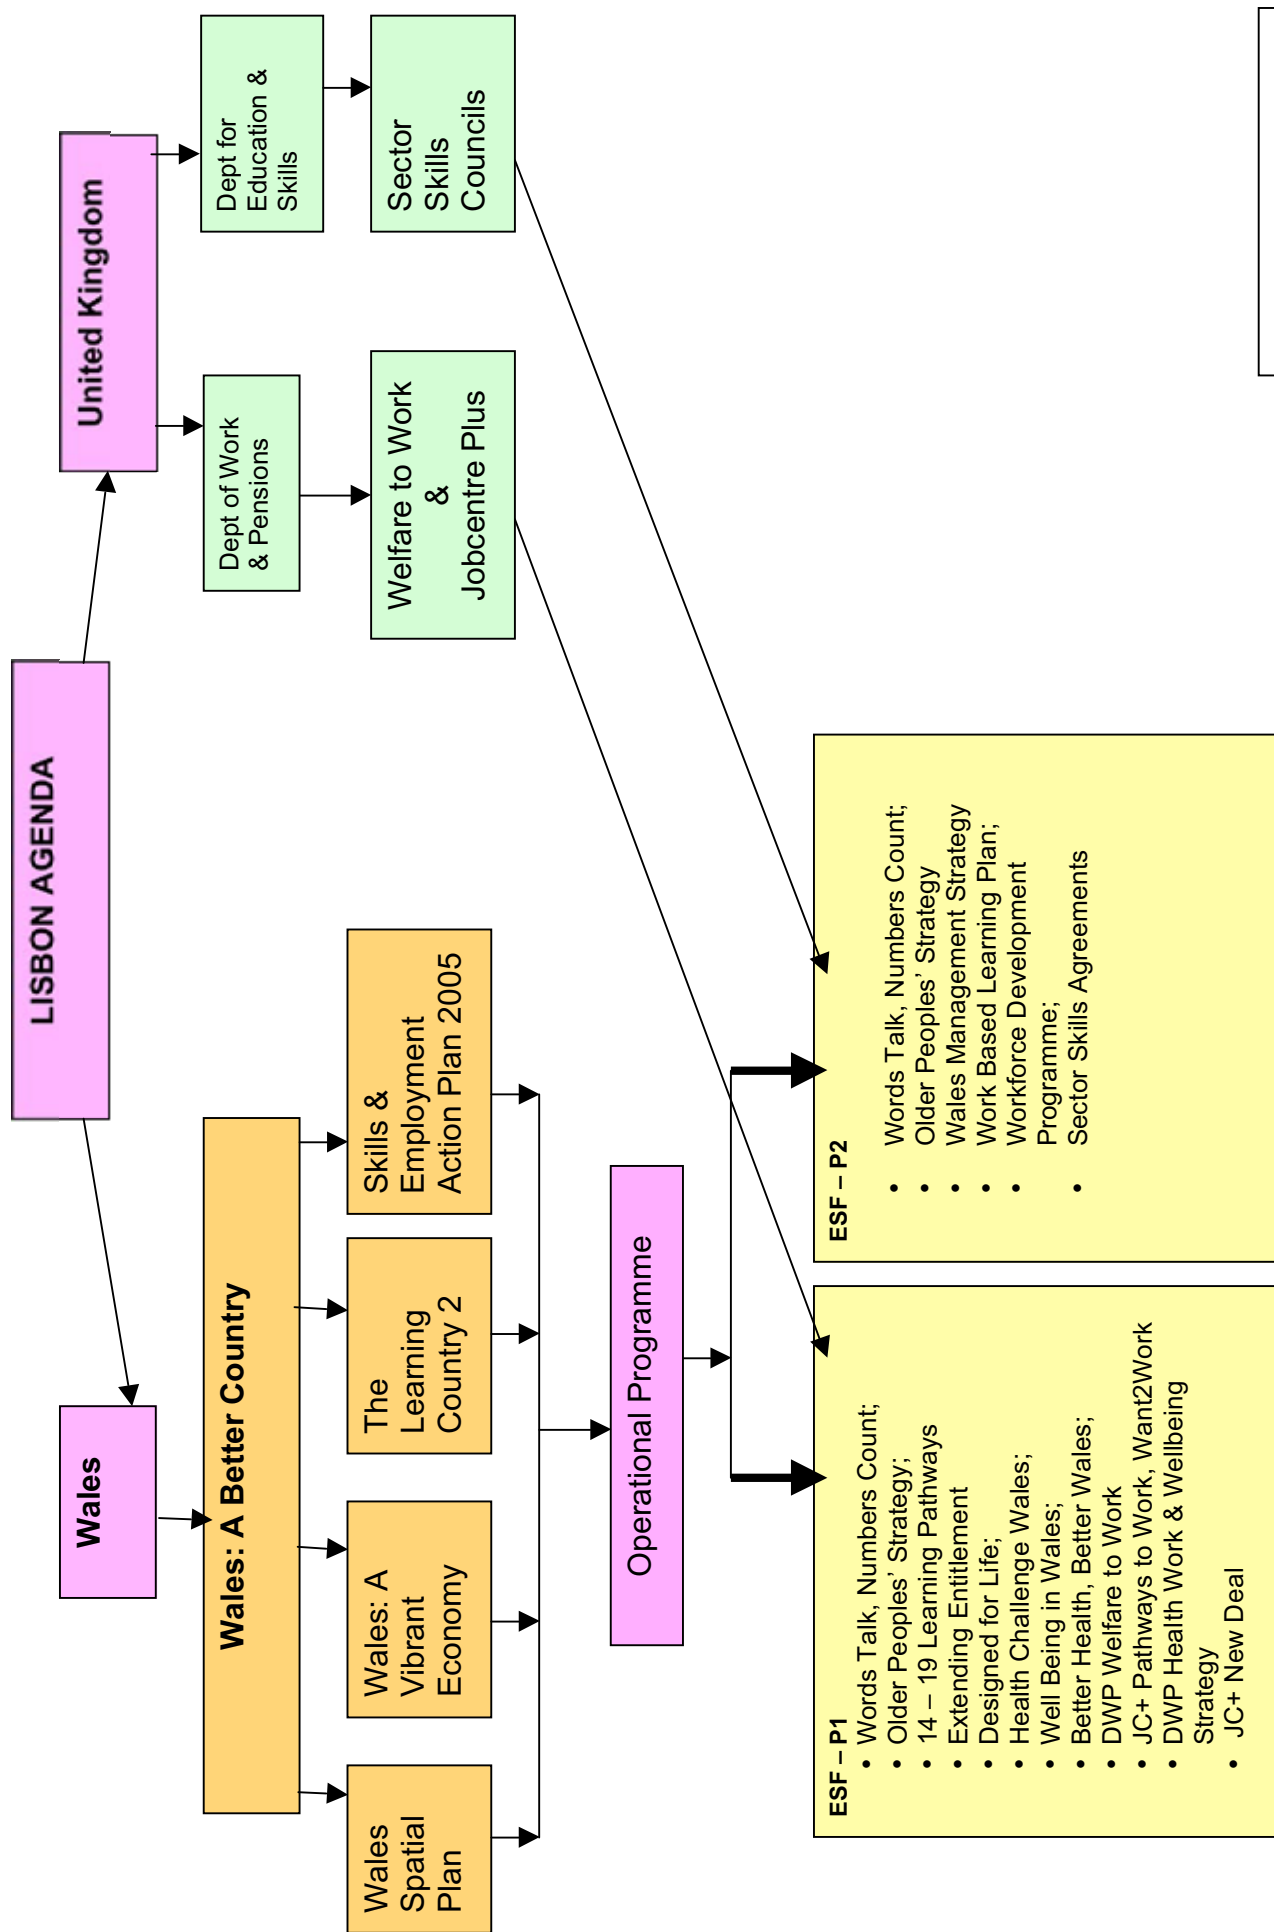

3.39 In addition to the key policies outlined above, the ESF Regional Competitiveness & Employment programme will be informed by a range of other thematic policies and strategies. These are highlighted in Chapter 4 – Priorities, in relation to the programme priorities.

3.40 The Wales Policy Map and Key Strategies Map shown below, at Figures 24 and 25, identify the key strategies in relation to each priority, and illustrate the hierarchy of where these sit in the overarching policy picture.

<sup>106</sup> Welsh Assembly Government's *Environment Strategy for Wales*:

- **Environmental Sustainability:** Environment Strategy; Education Strategy for Sustainable Development & Global Citizenship, Sustainable Development Action Plan

## Concentration of Resources

3.41 The Community Strategic Guidelines for Cohesion emphasise the importance of concentrating resources, both thematically and geographically. The aim is to focus on the investments that are required to increase long-term competitiveness, job creation and sustainable development. This is particularly important for the new programme which will have limited European resource of €63.597 million. The Programme will focus entirely on interventions that contribute to the Lisbon growth and jobs agenda, by tackling the main weaknesses and challenges identified for East Wales, whilst at the same time complementing the activities of the ERDF programme in areas such as knowledge and innovation for growth, competitiveness and environmental protection and regeneration. This means more investment on measures to increase employment, tackle inactivity, and raise skills levels. This concentration will be achieved by:

- Targeting 98% of the ESF Regional Competitiveness & Employment resources on categories of investment identified in EU General Regulation [1083/2006], Article 9(3) as supporting the objectives of Integrated Guidelines for Growth and Jobs (with the exception of the Technical Assistance Priority). For both ERDF and ESF programmes the combined target will be 86%, compared with the minimum target of 75% for both.
- Ensuring that the Regional Competitiveness & Employment programme contributes to relevant priorities identified in the UK's *National Reform Programme*;
- Focusing priorities on the Welsh Assembly Government's key policies and strategies, including *Wales: A Vibrant Economy*, which in turn is closely aligned with the Lisbon and Gothenburg agenda, the *Learning Country 2: Vision Into Action*, which sets out future strategy for education and lifelong learning and *SEAP 2005*;
- Using the key sectors identified in *W:AVE* to focus resources on those with significant growth potential;
- Using the framework of the *Wales Spatial Plan* to target resources on areas of need and opportunity;
- Implementing the programmes through Strategic Frameworks which will ensure project activity is focused on key programme objectives and is effectively co-ordinated; and
- Fostering synergies with other EU and national policies on the ground.

3.42 The detail of the financial allocations is contained in Chapter 7 – Financial Allocations, but in summary spending will be focused as per the Welsh Assembly Government's intention to increase ESF funded people-related interventions to 47% of total resources. This proposal received widespread support from partners across all sectors during the public consultation exercise. This also addresses the European Council's recommendation to the UK in March 2007 as part of its review of the UK's progress in implementing the *National Reform Programme* for growth and jobs, that the UK increase basic and intermediate skills, to raise productivity, and further improve employment prospects for the most disadvantaged.

3.43 In Priority 1 funding will focus on the needs of the economically inactive in becoming ready for employment, and accessing employment opportunities through targeting individual barriers and needs. In Priority 2 support will focus on the basic skills needs of the workforce and some elements of systems development for identification of skills gaps or shortages and future skills needs.

### **Geographical Concentration**

3.44 It is not proposed to target the ESF Programme spatially. The impact of the East Wales programmes will be enhanced by the ability to operate in synergy with the Strategic Framework structure, which also covers the West Wales and the Valleys Convergence Programmes. There will be two thematic Strategic Frameworks covering the East Wales Operational Programme priorities. Priority 1 will be covered by the Convergence ESF Strategic Framework, “Increasing employment and tackling economic inactivity”. The Strategic Framework for Priority 2, Improving skills levels and the adaptability of the workforce, will be specific to the Regional Competitiveness & Employment Programme, rather than having certain aspects of the priority covered by different Convergence ESF Frameworks. These frameworks and potential lead partners are identified in Annex G. This approach was supported by respondents to the public consultation on the Regional Competitiveness & Employment Programmes.

### **Framework of Priorities**

3.45 In line with the European Commission’s agenda for simplification of Structural Funds programming and implementation, the new Regional Competitiveness & Employment programme will be implemented through a simplified structure, comprising separate ERDF and ESF Operational Programmes. For the ESF Operational Programme there will be a framework of two main priorities, as identified below, (plus the Technical Assistance priority). As with the Convergence ERDF and ESF Operational Programmes, there will be no ‘measure level’ programming.

#### *ESF Priority 1: Increasing employment and tackling economic inactivity*

3.46 The objective of this priority is to increase employment and promote social inclusion, and tackle economic inactivity.

3.47 The priority will focus on helping economically inactive and unemployed people in key disadvantaged groups to enter sustainable employment. Key target groups are people with work-limiting health conditions and disabilities, young people aged 16 – 18 who are not in employment, education or training (NEET), individuals from BME communities, Lone Parents, older people, particularly the low skilled, and a range of other groups facing particular disadvantage in the labour market.

3.48 Bringing more people from these groups into work will be essential to maintain the current economic position of East Wales as well as tackling the wider social issues of poverty, ill health and social inclusion felt in certain communities and by particular disadvantaged groups. Evidence suggests there is a complex

web of personal factors affecting economic activity and that in helping people to become more active in the labour market, individuals need co-ordinated sustained support to overcome personal barriers to entering and staying in work.

3.49 The following table illustrates how this priority will contribute to the EU and UK policy priorities. This priority will contribute to categories 66 and 71 of the categories of Structural Fund investment identified in EU General Regulation [1083/2006] Article 9. This priority will address the scope of assistance as identified in ESF regulation [1081/2006] Article 3, section 1b.

**Table 23: Priority 1 contribution to EU and UK policy priorities**

	<b>Contribution of Priority to EU and UK Policy Priorities</b>
<b>Integrated Guidelines for Growth and Jobs</b>	GL17: Implement employment policies aimed at achieving full employment, improving quality and productivity at work, and strengthening social and territorial cohesion; GL18: Promote a lifecycle approach to work; GL19: Ensure inclusive labour markets, enhance work attractiveness, and make work pay for job seekers, including disadvantaged people, and the inactive; GL21: Promote flexibility combined with employment security and reduce labour market segmentation having due regard to the role of social partners; GL23: Expand and improve investment in human capital
<b>Community Strategic Guidelines</b>	GL1.3.1: Attract and retain more people in employment GL1.3.3: Increase investment in human capital through better education and skills GL1.3.5: Help maintain a healthy labour force
<b>UK National Reform Programme</b>	Skills (3.77 – 3.90) Delivering employment opportunity for all (4.7–4.35) Equipping people to raise their potential (4.36 – 4.38)
<b>UK NSRF</b>	Increasing employment and tackling economic inactivity (278 – 279)

*ESF Priority 2: Improving skills levels and adaptability of the workforce*

3.50 The objectives of this priority are to improve skill levels amongst the workforce, and improve systems for workforce development.

3.51 This priority will focus on raising basic skills levels of employees. The main target groups will be employees with skills below Level 2, especially those without basic numeracy, literacy and ICT skills. Particular attention will be given to interventions which help part-time working women, older workers, disabled people, and people from BME communities. This priority will also support management and leadership training to all levels for managers and workers in small enterprises (up to 50 employees). Finally it will support interventions which improve systems for identifying and addressing future workforce skill needs.

3.52 The following table illustrates how this priority will contribute to the EU and UK policy priorities. This priority will contribute to categories 72 and 73 of the categories of Structural Fund investment identified in EU General Regulation [1083/2006] Article 9. This priority will address the scope of assistance as identified in ESF regulation [1081/2006] Article 3, section 1a.

**Table 24: Priority 2 contribution to EU and UK policy priorities**

	<b>Contribution of Priority to EU and UK Policy Priorities</b>
<b>Integrated Guidelines for Growth and Jobs</b>	GL17: Implement employment policies aimed at achieving full employment, improving quality and productivity at work and strengthening social and territorial cohesion; GL 18: Promote a life-cycle approach to work; GL20: Improve matching of labour market needs; GL21: Promote flexibility combined with employment security and reduce labour market segmentation; GL23: Expand and improve investment in human capital; GL24: Adapt education and training systems in response to new competence requirements.
<b>Community Strategic Guidelines</b>	GL1.3.2: Improve adaptability of workers and enterprises and the flexibility of the labour market GL1.3.3: Increase investment in human capital through better education and skills
<b>UK National Reform Programme</b>	Skills (3.77–3.90) Delivering employment opportunity for all (4.7 – 4.35) Equipping people to realise their potential (4.36–4.38) Tackling gender inequality (4.43 – 4.51)
<b>UK NSRF</b>	Improving skill levels and improving the adaptability of the workforce (280)

#### *ESF Priority 3 : Technical Assistance*

3.53 A separate Technical Assistance (TA) priority will provide support for programme management and implementation, including communications and publicity, research and evaluation and targeted capacity building actions. A brief outline of the strategy for using Technical Assistance is provided in Chapter 6 – Implementing Provisions. This priority will contribute to categories 85 and 86 of the categories of Structural Fund investment identified in EU General Regulation [1083/2006] Article 9.

#### **Employment Recommendations to the UK**

3.54 The ESF Regional Competitiveness & Employment programme will contribute to action taken in East Wales to address the European Council's recommendation to the UK in March 2007, as part of its review of the UK's progress in implementing the *National Reform Programme* (NRP) for growth and jobs. It will also support action to address the four employment recommendations

to the UK made by the European Council on 14 October 2004 as part of the *2004 European Employment Strategy* (EES) process.

3.55 The EES has now been brought within the scope of the *Integrated Guidelines for Growth and Jobs* and the associated Lisbon planning and reporting processes, but the employment recommendations remain extant and very relevant to the needs of the region.

*European Council Recommendation (March 2007)* - Increase basic and intermediate skills, in order to raise productivity, and further improve employment prospects for the most disadvantaged.

3.56 The NRP identifies the need to open up opportunities for sections of the population with low employment rates and to raise the skill levels in the workforce. Good progress is being made in addressing these challenges but, as indicated in the Leitch review, more needs to be done. Action under ESF Priority 1 – Increasing employment and tackling economic inactivity will support the integration of vulnerable groups into the labour market including incapacity benefit claimants, disabled people, BME groups, young people who are NEET, older people, lone parents, and those from areas of high deprivation. ESF Priority 2 – Improving Skills levels and the adaptability of the workforce will have a particular focus on increasing basic skills in the workforce, and supporting management and leadership skills at intermediate and higher levels for workers in SMEs.

*EES Recommendation 1* - Increase adaptability of worker and enterprises and ensure that wage developments do not exceed productivity developments.

3.57 Action to improve skills under ESF Priority 2 – Improving skill levels and the adaptability of the workforce, will help to improve levels of productivity and increase the ability of enterprises and workers to innovate, and adapt to new forms of work organisation and new technologies.

*EES Recommendation 2* - Ensure that active labour market policies and benefit systems prevent de-skilling and promote quality in work, by improving incentives to work and supporting the sustainable integration and progress in the labour market of inactive and unemployed people; address the rising number of people claiming sickness or disability benefits, and give particular attention to lone parents and people living in deprived areas.

3.58 ESF Priority 1 – Increasing employment and tackling economic inactivity - will make an important contribution to addressing this recommendation. It will aim to increase employment by bringing more unemployed and economically inactive people into employment, including incapacity benefit claimants, disabled people, BME groups, older people, lone parents, and those from areas of high deprivation. Barriers to participation in work will be addressed through individually tailored support to increase employability and help people find jobs as well as by skills improvement.

*EES Recommendation 3 - Improve access to, and affordability of, childcare and care for other dependants, increase access to training for low paid women in part-time work, and take urgent action to tackle the causes of the gender pay gap.*

3.59 Notwithstanding considerable recent improvements in the availability and affordability of childcare, further progress on both aspects is needed for all parents to have a real choice to work. ESF Priority 1 will include action to enhance access to affordable and appropriate support for people with caring responsibilities, e.g. lone parents, especially childcare. Priority 2 identifies part time working women as a key target group for support in terms of developing basic skills such as literacy, numeracy or ICT, or leadership and management skills as appropriate, which supports efforts to address the gender pay gap.

*EES Recommendation 4 - Investing more, and more effectively, in human capital and lifelong learning by implementing national and regional skills strategies to provide better incentives for lifelong learning, and thereby increase productivity and quality in work; place particular emphasis on improving literacy and numeracy of the workforce, the participation and achievement of 16-19 year olds, and low-skilled workers, especially those in poorly paid jobs.*

3.60 Increasing skills in the workforce is identified as key to productivity growth and will be addressed through ESF Priority 2 – Improving Skill levels and the adaptability of the workforce. The main focus will be on improving basic levels of literacy and numeracy, support for workers in small enterprises who need to develop their management and leadership skills, supporting systems for workforce development, including addressing skills gaps and shortages in support of the knowledge economy.

## **Social Inclusion**

3.61 The ESF Regional Competitiveness & Employment programme will also take forward action which complements the *UK National Action Plan on Social Inclusion (2006 – 2008) - Working Together*. This Action Plan and the Welsh Assembly Government's Social Justice Report<sup>107</sup> highlight the key challenges to be addressed in tackling poverty and inequality. These include improving access to employment and tackling economic inactivity, raising skills, eradicating child poverty, reducing homelessness, combating health inequalities and improving access to quality services.

3.62 Tackling poverty and inequality is an essential objective in improving quality of life, promoting social inclusion, and delivering equality of opportunity to every community in Wales. The Welsh Assembly Government is developing and implementing a range of policies and programmes aimed at combating poverty and exclusion faced by disadvantaged groups and those living in the most deprived communities. These include *Communities First*, the Want2Work initiative, the *Child Poverty Strategy* and subsequent Implementation Plan, *14-19 Learning Pathways* agenda, the *Inequalities in Health Fund* and the *Welsh National Homelessness*

<sup>107</sup> Welsh Assembly Government's Wales Social Justice Report  
<http://new.wales.gov.uk/topics/socialjustice/publications/socjustreport2006?lang=en>

*Strategy.* The current Structural Fund programmes have supported action under a number of these initiatives.

3.63 The *UK Social Inclusion National Action Plan* sets out 4 key policy objectives, where the activities of the new ESF Regional Competitiveness & Employment Operational Programme will assist and add value:

- Eliminating child poverty
- Increasing labour market participation
- Improving access to quality services; and
- Tackling discrimination

3.64 The UK Government has set a target to eliminate child poverty by 2020, and under Priority 1 – Increasing Employment and Tackling Economic Inactivity, the new ESF Regional Competitiveness & Employment Operational Programme will help young people affected by some of the side effects of child poverty, such as poor literacy and numeracy, social disaffection and disengagement from learning, and barriers to future employment prospects, and help lift young people out of deprivation and break the cycle of poverty.

3.65 The UK NAP outlines the strategy for providing more help to people who are excluded from the labour market in order to achieve a reduction in the number of people claiming incapacity benefits by 1 million in a decade, 300,000 more lone parents in work, and an increase in the number of older workers by 1 million. ESF Priority 1 – Increasing Employment and Tackling Economic Inactivity will support these objectives by tackling economic inactivity through encouraging and assisting individuals who are disengaged from the labour market to access employment opportunities, helping the low skilled and disadvantaged groups e.g. lone parents, tackle barriers to employment, and support measures to help individuals with work-limiting health conditions become economically active.

3.66 Under Priority 2 – Improving skills levels and the adaptability of the workforce - action will focus on improving skills levels amongst the workforce, particularly basic skills such as literacy and numeracy, and to a limited degree, developing intermediate and higher management and leadership skills, as well as helping businesses adapt to changing economic conditions. In recognition that by 2024 around half of adults in the UK will be aged over 50 years, the retention and re-skilling of older workers within businesses and organisations, is an important step towards meeting future skills needs and adapting to a changing economic climate. This aspect of the ESF programme supports the NAP by ensuring people are able to break the cycle of poverty and obtain financial security via employment, and tackle issues such as age discrimination.

3.67 Under the ERDF Regional Competitiveness & Employment Operational Programme's Priority 4 – Regeneration for Growth - a range of activity will support the overarching objectives contained within the *UK National Action Plan*. It will support the regeneration of communities as part of an integrated regeneration strategy, supporting physical improvements to the urban fabric of towns and villages, and the wider natural and built environment, and develop effective ways of engaging local communities and local networks with the aim of funding and

implementing regeneration activity. In taking these issues forward, it will develop synergies with activity supported elsewhere in the ERDF Operational Programme and under the ESF Regional Competitiveness & Employment Programme's priorities.

3.68 The NAP also identifies the UK Government's commitment to tackling discrimination. There has been considerable progress over the past 30 years but some groups are still at greater risk of deprivation than others, in particular disabled people and people from Black and Minority Ethnic (BME) groups. Too many people are prevented from achieving their full potential as a consequence of discrimination. Both the ESF and ERDF operational programmes will support this objective through its Equal Opportunities cross cutting theme which ensures all projects build in recognition of the need to address equality issues.

### **Approach To Added Value**

3.69 The programme will build on investments supported under current and previous programmes, drawing on the evaluation of their impact and the lessons learned in their implementation. It is clear that the European Structural Funds are adding value to the implementation of national policies and programmes in Wales, both in terms of substance and process. This emphasis on added value will be carried forward into the new programme period.

3.70 In terms of the programme's overall aim and objectives, the Structural Funds will complement national policies and support closer alignment with EU policies for supporting economic development. Making the most of these synergies will help to ensure that maximum value is derived from the new programmes. Multi-annual programming also provides a firm basis for longer term action aimed at addressing more fundamental or intractable issues, and effecting transformational change.

3.71 In terms of actual investment, the Structural Funds will add value to current provision in a number of ways. This includes introducing new employment and training services, or extending the provision of existing services. Secondly, value can be added by improving the quality of services and provision. Thirdly, there is an opportunity to bring forward investments that might be planned for some future date, for example, bridging the gap between the "*Want2Work*" programme, helping economically inactive people back into work, and the planned roll-out of "*Pathways to Work*" by the UK Department for Work and Pensions. The Structural Funds will also add value through increasing the focus on equal opportunities for all, and environmental sustainability through implementation of the Cross Cutting themes.

3.72 Value from the Structural Funds also comes through process. One key benefit is the interaction encouraged between partners at national, regional and local levels in the shared endeavour of promoting economic growth. Such partnership working has been a key feature of the preparatory phase of this new Programme and will be extended to include partnership at the Spatial Plan Area level and the arrangements for Strategic Frameworks. The funds also promote the principles of transparency, fairness and equal opportunities and these principles will continue to be reflected in the arrangements for dispersing funds. Finally the

Structural Fund programmes encourage innovation and provide a platform for working with other regions and a wide range of organisations to share best practice. Given the limited financial resources available, this Operational Programme will continue to learn from the experiences of other organisations, projects, other UK regions and EU Member States, and actively encourage projects to adopt innovative approaches under each of the two priorities' proposed indicative activities. More detail on added value is contained in Chapter 4 - Priorities.

## **Cross Cutting Themes**

3.73 In addition to the priorities outlined above, two Cross-Cutting or horizontal themes will be integrated into all aspects of the ESF Regional Competitiveness & Employment Programme in accordance with the requirements of EU General Regulation [1083/2006] Articles 16 and 17. The strategy for implementing the two Cross-Cutting themes of Equal Opportunities and Environmental Sustainability is addressed in more detail in Chapter 5 - Cross Cutting Themes, and in the Implementing Provisions – Chapter 6.

### *Gender equality and equal opportunities for all*

3.74 The need to recognise the contribution that all individuals can make is an important one. The European Roadmap for Equality between men and women 2006–2010<sup>108</sup>, and the package of measures introduced in 2000 by the European Union designed to enforce the right of people everywhere to be treated equally and to strengthen respect for human rights throughout the European Union<sup>109</sup>. These directives reflect a growing recognition of the benefits of diversity for the economy and for society as a whole.

3.75 Equal Opportunities will be integrated as a cross-cutting theme into the ESF Competitiveness programme in order to promote equal access for all to opportunities within the programme. All Projects will be expected to address the equal opportunities theme and assistance will be provided for targeted interventions for previously excluded groups, particularly Black and Minority Ethnic people and disabled people.

### *Environmental sustainability*

3.76 The growing evidence of climate change and its wider consequences emphasise the importance of making sure that economic growth does not come at the cost of ever-increasing demands on the environment. Negative effects of growth will be offset both by specific actions, and by the integration of environmental sustainability throughout the programme as a horizontal theme. All projects will be expected to address the environmental sustainability theme by including appropriate opportunities to address the environmental issues that affect the region and the wider global environment.

---

<sup>108</sup> The European Road Map for Equality between men and women 2006-2010

<sup>109</sup> [http://ec.europa.eu/employment\\_social/fundamental\\_rights/legis/legln\\_en.htm](http://ec.europa.eu/employment_social/fundamental_rights/legis/legln_en.htm)

3.77 The range of actions that will be taken within the priorities and themes to promote horizontal integration of the programme's environmental sustainability and equal opportunities objectives is demonstrated by a matrix analysis (Annexes B and C).

### **Complementarity between ERDF and ESF Programmes and other EU policies and funding instruments**

#### *ERDF and ESF*

3.78 The ESF Regional Competitiveness & Employment programme has been developed to align closely with the ERDF Regional Competitiveness & Employment programme, ensuring that the priorities identified for each programme, complement and add value to each other. There are close linkages especially in the areas of employment opportunities and skills, where delivery of the ESF elements support the innovation, research and development initiatives of the ERDF programme. Also, in the area of regeneration for growth, getting more people into sustainable employment will be central to the long-term well being of individuals, families and thriving communities. The programmes will work together to support the shared vision of a vibrant East Wales economy.

3.79 The Regional Competitiveness & Employment programmes seek to maximise synergies between ESF and ERDF interventions. This could include support for the ESF programme's objectives through small scale capital costs for upgrading facilities for learning under ERDF Priority 1 – Knowledge and Innovation for Growth.

3.80 In particular, use will be made of the provisions in EU Regulation [1083/2006] Article 34 (2), which allow up to 10% of the funds available within relevant Priority axis to finance, in a complementary manner, actions falling within the scope of assistance of the ESF or ERDF fund. The flexibility facility will be used to fund actions which fall within the scope of ERDF, where those actions are directly linked to the ESF operation, and necessary for its successful implementation. The approach to deploying this flexibility is outlined in respect of each of the relevant Priorities in Chapter 4.

#### *EAFRD and EFF*

3.81 In line with EU Regulation [1083/2006] Article 37(1f), the demarcation criteria and mechanisms for co-ordination between the ESF and the ERDF on the one hand, and the European Agricultural Fund for Rural Development (EAFRD) and the European Fisheries Fund (EFF) on the other are set out below. This explains how the Welsh Assembly Government will ensure that there is maximum alignment and value for money, whilst avoiding any duplication or double funding.

3.82 As a general principle, ESF funded activities will primarily address rural issues as part of a wider regional, sub-regional or national activity through the provision of integrated employment and skills programmes which contribute to improved economic performance. These will include interventions to raise economic activity rates within rural areas by reducing unemployment and

economic inactivity, and supporting the development of a more skilled and adaptable workforce.

3.83 RDP and EFF funding will be focussed on supporting diversification of rural economies at the local level and on improving the quality of life in rural areas. This includes interventions in agriculture, including supporting innovative farm diversification, forestry and food processing, and the development and management of viable and sustainable marine and inland fisheries.

3.84 Demarcation will be achieved through clear differentiation in the eligibility rules. No activity will be eligible for funding from more than one programme. ESF funding will not be available for interventions that target individuals or enterprises engaged in agriculture, forestry or fisheries, or individuals or enterprises engaged in the primary processing of agricultural, forestry or fisheries products. This will be clearly stated in the eligibility rules and this eligibility requirement will apply across all Structural Fund Programmes. The ESF will not fund activities which support agri-food schemes or the primary processing of agricultural and / or forestry products. This principle will apply equally to EFF in respect of fish and shellfish products and processing.

3.85 The RDP specifically identifies the need to create better rural communities with better access to economic opportunity. Where these actions may include addressing gaps in skills provision and mainstream training provision the general principle of demarcation by eligibility will apply in that RDP and EFF actions will be specific to meet the needs of the sectors identified above. For instance, provision of vocational training for farmers, or in the case of EFF support for the marine and inland fisheries sector, will not be eligible for support through the scope of the ESF programme.

3.86 Similarly, vocational training for agriculture and forestry workers relating to their skills levels will be covered under RDP Axis 1 (Farming Connect). Environmental management would be covered under Axis 2, and life skills or generic personal, basic and business skills could be supported under Axis 3. The ESF may support craft-based training programmes, for example, construction skills, but not in the fields outlined above. There is scope for complementarity between the instruments in how training and employment programmes work together, including helping on the non-vocational skills agenda, wider community needs, developing alternative sources of income, developing opportunities for family members, addressing general social and cultural needs.

3.87 The RDP sets out the requirement for the development of local development strategies to establish the governing principles and key areas for action and the exact activities to be undertaken. The LEADER methodology will be embedded in this process and for RDP Axes 3 and 4 these local strategies will be discussed with the Spatial Plan Area Groups, which will be asked to endorse them. The Spatial Plan Area Groups are responsible for contributing to the development of the separate thematic Strategic Frameworks delivering the ESF programme and this process will allow for the identification of any potential overlap between the ESF and EAFRD or EFF, whilst at the same time ensuring that

opportunities to added-value and complementarity between the each of the funds is identified and maximised where possible.

3.88 Welsh Assembly Government recognises the need to take account of the demarcation and complementarity set out above in the implementation of the ESF programme. This will be done in three ways:

- Cross membership of the respective PMCs for the Structural Funds, the EAFRD and the EFF.
- A specific statement in the Structural Funds' eligibility rules that farmers and those engaged in primary processing of agricultural, fisheries or forestry products are not eligible for support from the ESF for these activities; and
- External guidance for potential project applicants, developed jointly with staff working on the RDP and the EFF programme for Wales.

3.89 To eliminate the potential for double funding and to maximise complementarity at a project level, further communication will be made between the respective teams at application stage. As part of the WEFO process, applicants will need to show how their project fits with the relevant strategies and programme. Part of this will be the RDP and the EFF and WEFO appraisal officers will ensure that where any project has the potential to fit into the demarcation or complementarity areas as outlined above, the relevant officers will be consulted and rigorous appraisal will be carried out.

3.90 Post approval, projects will be subject to strict monitoring to ensure that the terms of the approval are adhered to and any subsequent request to amend a project will be given equally careful consideration. A reciprocal arrangement will be introduced for projects submitted under the RDP and EFF.

3.91 Other European policies and instruments such as the Research Framework Programme 7<sup>110</sup> and Employment and Skills, such as the Lifelong Learning Programme<sup>111</sup> will be complemented by the ESF programme's activities. The Lifelong Learning Programme comprises four sectoral programmes on school education (Comenius), higher education (Erasmus), vocational training (Leonardo da Vinci) and adult education (Grundtvig), and is completed by a transversal programme focusing on policy cooperation, languages, information and communication technology and dissemination and exploitation of results. The aim of the new Lifelong Learning programme is to contribute through lifelong learning to the development of the Community as an advanced knowledge society, with sustainable economic development, more and better jobs and greater social cohesion. It aims to foster interaction, cooperation and mobility between education and training systems within the Community, so that they become a world quality reference.

<sup>111</sup> European Union Lifelong Learning Programme, [http://ec.europa.eu/education/programmes/newprog/index\\_en.html](http://ec.europa.eu/education/programmes/newprog/index_en.html)

## *ESF and Sustainable Development*

3.92 In accordance with the European Council's Sustainable Development Strategy, adopted in June 2006, EU funding will be channelled and used in an optimum way to promote sustainable development. The ESF Operational Programme will seek to co-ordinate activity to ensure complementarity and synergy between different strands of Community and other co-funding mechanisms, such as Cohesion policy, rural development, LIFE+, research and development (RTD), the Competitiveness & Innovation programme (CIP) and the European Fisheries Fund (EFF).

### **Research and Development**

3.93 The successful exploitation of research, technology and innovation will be critical to achieving our ambition of a thriving competitive economy. This will provide a cornerstone for achieving ever-increasing productivity and enterprise, and for creating more jobs and wealth, making Wales a world-class player. With the low level of business R&D expenditure compared to other parts of the UK, businesses need to be encouraged to collaborate in order to create a 'virtual agglomeration effect'. Higher education, further education and business will be encouraged to work together in order to promote technological development, transfer and commercialisation and to increase their access to the EU's 7<sup>th</sup> Research Framework Programme. There are no ESF funds in the East Wales programme to support R&D therefore the needs of the sector will be covered by appropriate national resources.

### **Monitoring and Evaluation of Progress**

3.94 The Welsh Assembly Government considers high quality monitoring and evaluation to be essential for effective programme management and evidence-based policy decision making. Monitoring and evaluation made an important contribution to the management of the 2000-2006 Structural Funds Programmes in Wales and the lessons learned from monitoring and evaluation have been taken on board in the design of the 2007-2013 Structural Funds Programmes. Monitoring and evaluation will continue to have key roles to play in maximising the quality and effectiveness of the 2007-2013 Programmes.

3.95 The Welsh Assembly Government's approach to assessing the success of the Structural Funds Programmes is based around:

- tracking progress of a range of economic indicators, notably employment, earnings and GVA, in absolute terms and relative to other parts of the UK and EU;
- monitoring against the indicators set for individual priorities, grossed up to programme level;
- programme-level evaluation;
- strategic framework-level evaluation; and
- project level evaluation.

## Tracking Indicators

3.96 The high-level tracking indicators set out in *Wales: A Vibrant Economy* and *The Learning Country 2: Vision into Action*, have been developed to provide a broad and robust picture of the fundamentals of sustainable economic growth. The indicators will be used both to monitor progress over time against the baselines and to compare Wales against other countries and regions. Many of these tracking indicators are also available at NUTS 2 level and will therefore be used to provide a balanced assessment of progress in the East Wales economy. Where data is not available at NUTS 2 level, appropriate alternative indicators have been identified. Progress will also be tracked against selected Lisbon indicators, many of which overlap closely with the indicators set out in *Wales: A Vibrant Economy*, but some of which are defined slightly differently.

3.97 It should be noted that performance against these indicators is dependant on the other factors such as macroeconomic trends and global events. Nevertheless, the following high level economic development and tracking indicators provide the overall context for assessing progress of East Wales. The use of these tracking indicators will ensure that broader economic trends in the economy are taken into account in the evaluation of the Regional Competitiveness & Employment programmes in Wales.

3.98 The following high level economic development tracking indicators will therefore provide the overall context for assessing the progress of the Regional Competitiveness & Employment programme.

**Table 25: Programme Level Tracking Indicators**

	<b>Economic development and Labour Market indicators</b>
<b>High-level economic</b>	GVA per capita <sup>i</sup> Household disposable income per capita <sup>i</sup> Employment rate <sup>i</sup> Average earnings <sup>i</sup>
<b>Labour market</b>	Economic inactivity rate Unemployment rate <sup>i</sup> Migration flows
<b>Value-added per job</b>	GVA per worker and per hour worked <sup>i</sup>
<b>Skills</b>	Qualifications of working age population <sup>ii</sup> Qualifications of 16-18 year olds and 19-21 year olds <sup>i</sup> Proportion of the workforce in professional, technical, managerial and scientific employment
<b>Social cohesion</b>	Percentage of working age adults in workless households <sup>iii</sup> Percentage of children in workless households <sup>iii</sup>
<b>Equal opportunities</b>	Female earnings as a percentage of male earnings <sup>iv</sup>

<sup>i</sup> Indicator similar to short listed Lisbon Structural Indicator;

<sup>ii</sup> Indicator covers qualification indicators in *The Learning Country 2*;

<sup>iii</sup> Indicator not in *W:AVE*, alternative proposed. Data not currently available but expected to be available in 2007;

<sup>iv</sup> Indicator not in *W:AVE*, alternative proposed.

3.99 Baseline data against these indicators can be found in the Indicators – Annex K.

3.100 All indicators and targets within this Operational Programme cover the whole Programme (Community, national public and national private funding) and are to be achieved by 2015.

**Table 26: Programme level indicators**

<b>Indicator</b>	<b>Target (2015)</b>
Total participants <sup>112</sup>	<b>26,600</b>
Female participants <sup>113</sup>	<b>15,190</b>
Economically inactive participants <sup>114</sup>	<b>11,900</b>
Unemployed participants <sup>115*</sup>	<b>2,100</b>
Employed participants <sup>116</sup>	<b>12,600</b>
Employers assisted <sup>117</sup>	<b>2,800</b>
Participants entering employment <sup>118</sup>	<b>3,500</b>
Participants gaining qualifications <sup>119</sup>	<b>9,650</b>
Participants gaining a basic skills qualification <sup>120</sup>	<b>5,740</b>
Participants gaining a qualification at Level 2 <sup>121</sup>	<b>2,570</b>
Participants gaining a qualification at Level 3 <sup>122</sup>	<b>800</b>
Participants gaining a qualification at Level 4 and above <sup>123</sup>	<b>540</b>
Participants entering further learning <sup>124</sup>	<b>4,620</b>

\*Unemployed participants includes individuals under formal notice of redundancy

## **Strategic Implementation**

3.101 In addition, experience and lessons learned suggest that a more strategic approach to implementation will help ensure that the new programmes makes an even stronger contribution to sustainable economic development. Evaluations of the 2000-2006 programmes have suggested that there are too many projects and

<sup>112</sup> The number of individuals participating in this Programme

<sup>113</sup> The number of female participants participating in this Programme

<sup>114</sup> The number of participants who are economically inactive (excluding students) participating in this Programme

<sup>115</sup> The number of participants who are unemployed participating in this Programme

<sup>116</sup> The number of participants who are employed participating in this Programme

<sup>117</sup> The number of employers that receive assistance through this Programme

<sup>118</sup> The number of participants entering employment following participation in this Programme

<sup>119</sup> The number of participants gaining a qualification as a result of participation in this Programme

<sup>120</sup> The number of participants gaining a basic skills qualification as a result of participation in this Programme

<sup>121</sup> The number of participants gaining a qualification at Level 2 as a result of participation in this Programme

<sup>122</sup> The number of participants gaining a qualification at Level 3 as a result of participation in this Programme

<sup>123</sup> The number of participants gaining a qualification at Level 4 or above as a result of participation in this Programme

<sup>124</sup> The number of participants entering further learning following participation in this Programme

that it is difficult to quantify the contribution of some of these to achieving the strategic aims and objectives of the programme. There is much to be gained by bringing complementary projects together to drive the delivery of key parts of the programme.

3.102 Further information on this more strategic approach to delivery and the principles which will guide the development of the new frameworks is provided in Chapter 6, Implementing Provisions.

## **Welsh Language**

3.103 The Welsh Assembly Government wants Wales to be a truly bilingual nation where people can choose to live their lives through the medium of either Welsh or English or both and where the presence of the two languages is a visible and audible source of pride and strength to everyone. In order to fulfil that vision, the Welsh Assembly Government has made a commitment – in *laith Pawb*<sup>125</sup>, the National Action Plan for a Bilingual Wales and its Welsh Language Scheme – to mainstream the Welsh Language across policy areas. The implementation of the Regional Competitiveness & Employment programme will reflect this commitment.

## **Mainstreaming of Community Initiatives**

3.104 Wales has been very successful in its implementation and drawdown of funds on the Great Britain EQUAL programme for 2000–2006, particularly in the second round. In the first round of EQUAL (2001–2005), Wales had a total of four Development Partnerships operating with an overall allocation of £1.6m worth of European Funding. In the second round of EQUAL (2004–2007), Wales has a total of 15 Development Partnerships currently in operation with a total allocation to date of £15m of European Funding (there is still a further £5m available for the final phase of the programme). A number of EQUAL projects have provided important learning which will feed into projects under the new round, for example, Healthy Minds at Work, a project tackling the links between economic inactivity and mental health in the workplace.

3.105 As well as the policy lessons from EQUAL, the approach to implementation through development partnerships has been immensely successful at building understanding and partnership into all aspects of the projects. Such partnership working will be encouraged in the new programme through the Wales Spatial Plan and Strategic Frameworks. The experience of EQUAL will be taken forward under the new ESF Regional Competitiveness & Employment programme in developing arrangements for supporting both innovative actions, and trans-national co-operation.

## **Social Partner Actions**

3.106 In accordance with EU Regulation [1081/2006] Article 5, the participation of the social partners (business and trade unions) will be actively encouraged in

---

<sup>125</sup> Welsh Assembly Government's *laith Pawb*:  
<http://new.wales.gov.uk/about/strategy/strategypublications/strategypubs/935744/?lang=en>

implementing the ESF Regional Competitiveness & Employment programme. This will include support for actions which improve the effectiveness of social dialogue and activities jointly undertaken by or led by the social partners, in particular as regards the adaptability of workers and enterprises. An appropriate amount of resources will be specifically allocated for social partner led activities as indicated in Chapter 4. It is envisaged that approximately €0.3 million of ESF will be allocated through the two Priorities. The following activities provide an indication of actions that could be taken forward in close collaboration with the social partners:

#### *Priority 1*

- social partner led initiatives which help disadvantaged groups overcome barriers to employment, including mentoring programmes;
- social partner led initiatives to improve disability awareness and management, including partnership arrangements addressing health related employment barriers; and
- social partner led initiatives aimed at promoting equality and diversity in employment.

#### *Priority 2*

- initiatives aimed at supporting the retention of older workers in employment;
- fostering employer and employee engagement in learning, including through initiatives which promote, recognise and reward good practice; and
- Improving environmental awareness and management.

### **Strategy for innovation and transnational activity**

3.107 The Managing Authority will promote and support both innovative action and transnational activity through a range of Priorities within the Operational Programme, thereby ensuring that the principles that underpin them have a major influence on overall delivery. Because of this mainstreaming purpose, there will not be a separate and distinct programme or priority axis within the Operational Programme for either innovation or transnational activity.

3.108 The scope for both innovation and transnational activity will be identified at the level of Priority Themes as part of the development of Strategic Frameworks. This will ensure the full involvement of Framework partnerships and the Programme Monitoring Committee in selecting the areas in which both innovative action and transnational activity should be actively promoted and encouraged.

### **Innovative Actions**

3.109 The revised Lisbon agenda places a strong emphasis on activating knowledge and promoting innovation. This is reflected in the *Community Strategic Guidelines* which encourage the development of strategies with specific provision for experimentation to stimulate regional and local actors to innovate, and the new regulatory requirements concerning the mainstreaming of innovative actions. Innovation in this context is broader than traditional 'technological innovation'. It is defined as the generation of new knowledge and its transformation into new products, processes or services that respond to a demand from citizens. It includes

social innovations that support the modernisation of the economy, as well as the reform of employment and social inclusion policies and actions.

3.110 In accordance with ESF Regulation [1081/2006] Articles 3(5) and 7, the new Regional Competitiveness & Employment programme will encourage innovation through agreed Strategic Frameworks, and will actively support the dissemination of outcomes and the sharing of best practice. In so doing, the Managing Authority will encourage the application of lessons learnt under the EQUAL programme. The Programme will continue to learn from the experiences of other organisations, projects, other UK regions and EU Member States, and the proposed indicative activities within each priority will encourage and provide scope for projects to develop and deliver support for target groups, using innovative practices and approaches.

3.111 Intensive evaluation will be a core feature of all projects promoting innovation and the results of this experimental work will be used to inform both policy and delivery, with the lessons learned feeding into mainstream programme implementation and project development. A clear strategy to promote this mainstreaming will be developed in consultation with the Programme Monitoring Committee (PMC) as part of the arrangements for implementation of all ESF and ERDF programmes.

3.112 The scope for innovative actions will be identified in consultation with partners as part of the work on Strategic Frameworks and will subsequently be agreed with the Managing Authority (see Chapter 6 – Implementing Provisions). The sections within Strategic Frameworks that cover scope for Innovative Actions will also cover guidance on evaluation and the potential for mainstreaming action.

3.113 In advising sponsors on the development of projects promoting innovation the Managing Authority will draw on the lessons learned from the implementation of EQUAL, including the need for involvement of policy makers and key stakeholders and the importance of rigorous and independent evaluation.

3.114 Innovative action projects will be subject to specific monitoring as part of the Managing Authority's new programme management system (PPIMS) and will operate under standard eligibility rules. All innovative action projects will be subject to external evaluation.

3.115 Possible areas for innovative actions might include:

- New ways of engaging with and integrating the most disadvantaged groups into sustainable employment (Priority 1);
- New ways of supporting employers and new employees in dealing with health related issues (Priority 1);
- Supporting the retention of older workers in employment (Priority 2); and
- Innovative learning delivery approaches and methodologies for identifying and addressing skills needs (Priority 2).

## **Transnational and Inter-regional Co-operation**

3.116 The new regulatory framework also provides for the mainstreaming of transnational and inter-regional co-operation. This provides an exciting opportunity to add value to the implementation of the ESF Regional Competitiveness & Employment programme by facilitating collaboration in areas of mutual interest with other European regions.

3.117 While projects involving partners from across the European Union will be considered, particular emphasis will be given to activities with Member States and regions with which the Welsh Assembly Government has formal co-operation agreements. These include Latvia, Brittany, Catalonia, Upper Silesia and Baden-Württemberg. It will also be possible to build upon successful transnational cooperation arrangements established under the EQUAL initiative and with regions that are members of the European Association of Regional and Local Authorities for Lifelong Learning (EARLALL), which has already has significant experience of facilitating transnational working among its members.

3.118 Examples of transnational networks that could provide access to potential ESF partners for East Wales include the European Regions Research and Innovation Network (ERRIN) which has a particular focus on R&D; the informal e-Learning Group which aims to develop structured networking opportunities for e-learning practitioners on a range of pedagogic, technological and policy issues; and the Brussels based information network for Education and Training (BBInet) which was recently created to bring together Chambers of Commerce and Industry with education associations and other social or business agencies, to consider topics such as mobility, entrepreneurship and adult education.

3.119 In line with the provision in the European Social Fund Regulation [1081/2006], Articles 3(6) and 8, the ESF will support innovative and high quality trans-national and inter-regional activities across all relevant programme priorities.

3.120 These will be delivered in line with the following themes:

- increasing and improving adaptability, including for example action to support lifelong learning;
- supporting the integration of job-seekers and inactive persons, e.g. including action to promote age management, youth unemployment (in the context of the European Youth Pact), work-life balance and migrants;
- supporting integration of disadvantaged groups and combating discrimination, e.g. action to support persons with disabilities, Black and Minority Ethnic people (BME), and people with caring responsibilities; and
- enhancing human capital including e.g. action strengthening systems for the validation of skills.

3.121 The Managing Authority will establish a separate Transnational Co-operation Unit to support and co-ordinate action under the programmes. Arrangements will be put in place through that Unit to ensure that transnational

activities supported through the ESF Regional Competitiveness & Employment programme do not overlap with those supported through other Community programmes, notably the vocational education and training (VET) and adult education strands within the EU Lifelong Learning Programme, namely the Leonardo and Grundtvig sub-programmes, together with the VET projects within the Erasmus sub-programme, and the policy development and information and dissemination strands of the transversal sub-programme. To take this forward, we will co-operate closely with the UK national agencies responsible for the Lifelong Learning programme (British Council and ECOTEC) to ensure that there is no double funding, and that projects are complementary. In addition, trans-national and inter-regional projects supported through ESF will take account of integrating the lessons learnt from the EQUAL Community Initiative.

3.122 Wales is a founder member of EARLALL. It has participated in a number of joint projects with other EARLALL members, including an initial project proposed by the Commission to test the concept of 'valorisation' and an on-going project designed to test the 'open method of co-ordination' as a mechanism of dissemination.

3.123 It is currently working with EARLALL partners to put in place a series of bilateral 'mobility agreements' promoting the free flow of learners, researchers and workers between member regions, and anticipates that such agreements are likely to involve further joint development work in areas such as:

- e-learning;
- skillsets for entrepreneurship;
- the definition of other vocational competences;
- the recognition of credit towards vocational qualifications; and
- the encouragement of reciprocal work experience placements for students and practitioners between regions.

3.124 The emerging Regions for Economic Change initiative was introduced by the European Commission in November 2006. The EU-wide Inter-regional Co-operation Programme for 2007-2013 supported under the Territorial Co-operation Objective, will provide an important instrument for implementing this initiative. Regions for Economic Change offers significant opportunities for East Wales in the area of mainstreaming transnational and innovative actions, and is aimed at exchanging best practice between Europe's regions.

3.125 The initiative provides opportunities for organisations in Wales to engage with regions in other areas of Europe around themes connecting European Union policies to the Lisbon agenda. It introduces a new vehicle for regions to share and test best practice for economic modernisation and increased Regional Competitiveness & Employment, and to disseminate results into mainstream Regional Competitiveness & Employment programmes.

3.126 In the framework of the Regions for Economic Change initiative the Managing Authority commits itself to:

- a) make the necessary arrangement to welcome into the mainstream programming process innovative operations related to the results of the networks in which the region is involved;
- b) to allow in the Programmes Monitoring Committee (or programming committee) the presence of a representative (as an observer) of the network(s) where the Region is involved, to report on the progress of the network's activities;
- c) foresee a point in the agenda of the Programmes Monitoring Committee (or programming committee) at least once a year to take note of the network's activities and to discuss relevant suggestions for the mainstream programme concerned; and
- d) inform in the Annual Report on the implementation of the regional actions included in the Regions for Economic Change initiative.

## Consultation

3.127 The Wales chapter of the *NSRF* and the Regional Competitiveness & Employment programmes have been developed through an extensive process of engagement with partners. This has included an External Stakeholders Group, which brings together representatives of the main partner organisations and five workstreams<sup>126</sup> which contain experts from across the private, public and voluntary sectors. These workstreams have supported the development of the new Operational Programme and have advised on future programme management, evaluation and monitoring and audit and compliance arrangements.

3.128 The Regional Competitiveness & Employment programmes consultation was launched on 01 December 2006 for a period of 8 weeks, closing on 26 January 2007. Independent analysis of the consultation responses has been undertaken by CRG Research Ltd and the full report will be placed on the WEFO web site<sup>127</sup> along with the formal consultation responses. Feedback was also received from the three WEFO consultation events. A total of 40 formal responses were received from the public consultation.

---

<sup>126</sup> The Post 2006 workstreams are part funded by Objective 1 ERDF and Objective 1 ESF Technical Assistance.

<sup>127</sup> [www.wefo.wales.gov.uk](http://www.wefo.wales.gov.uk)

**Table 27: Responses to the Public Consultation by Sector**

Sector	Number of responses
Voluntary & Community Sector	5
Economic Development / Training Partnerships	3
Private Sector	3
HE / FE organisations	3
Trade / Professional Associations	2
Local Authorities	10
Government Agencies	5
National Assembly for Wales	3
Environment, Culture & Heritage	6
Other	0

3.129 The main points that emerged were:

- broad support for the strategy, priorities and themes;
- greater detail on the diversity between the sub-regions contained within the East Wales to be included in the Analysis section;
- mixed views on the level of focus on the Lisbon agenda, strong support from some and concern about a reduced focus on some areas of activity from others;
- support for the role of higher education in economic development;
- more information requested on the role of the Wales Spatial Plan and its interaction with the proposed Strategic Frameworks;
- support for the Strategic Frameworks approach in East Wales – ensuring coherence with the Convergence programmes;
- emphasis on the importance of transport to addressing accessibility issues;
- a perceived lack of emphasis on support for the tourism sector; and
- support for a single PMC with recognition that the needs of East Wales should be ensured and given fair coverage.

3.130 Details of the full range of comments together with a list of those who participated in the consultation are given at Annex A – Public Consultation Responses Report.

### **Summary of ESF Regional Competitiveness & Employment Ex Ante Evaluation**

3.131 In accordance with EU General Regulation [1083/2006], Article 45, Ex Ante Evaluations have been undertaken for the Regional Competitiveness & Employment Programmes (ERDF and ESF) to ensure that resources are allocated optimally and to maximise the quality of plans for programme implementation. In April 2006, following a competitive tender process, DTZ Consulting and Research were contracted by WEFO to undertake these evaluations.

3.132 The ESF Regional Competitiveness & Employment Ex Ante Evaluation concluded that the Analysis has a clear focus on East Wales, that the evidence is well presented and that the issues facing East Wales are clearly identified. DTZ

concluded that the data sources used were credible and up-to-date, that conclusions reached were based on sufficient evidence and that overall the Analysis was accurate, comprehensive and relevant, thus providing a good foundation for identification of the priorities for the Programme.

3.133 DTZ made a number of comments and recommendations on the strategy in order to strengthen its rationale and internal consistency. The majority of the comments made were in reference to the appropriateness of programme focus given the evidence that was presented in the Analysis. In essence, there was a mismatch between the issues highlighted in the Analysis and the Programme Priorities suggested. DTZ recommended that the Analysis was reviewed and the rationale for the Priorities reassessed.

3.134 Following these comments, the Analysis and Programme Priorities were altered to maximise focus on the challenges and issues faced in East Wales. The Programme Priorities were assessed to have a high degree of internal consistency, with few conflicts between Priorities. DTZ found that the majority of interventions proposed are well-established and tried and tested in previous programmes, which reduces policy risk. However, they suggest that there may be scope to include more risky policies with higher levels of potential impact. DTZ have recommended that WEFO consider further the issue relating to skills gaps and skills shortages and the implications in terms of whether activity is aimed at increasing individuals' employability or increasing the regional GVA.

3.135 DTZ concluded that in the main the objectives and aims of the Programme are cohesive with other relevant policies at EU, UK and Wales level. The Programme was also assessed for consistency with other Structural Fund programmes in Wales such as the ERDF Regional Competitiveness & Employment Programme and the ERDF and ESF Convergence Programmes, and following improvements made by WEFO, was found to be consistent with the content and direction of these Programmes.

3.136 In terms of implementation arrangements it was concluded that almost all recommendations have been addressed although some recommendations (for example, the development of a high-level risk register, and provision of more detailed project selection criteria) are being implemented outwith the Operational Programme.

3.137 In summary, the Ex Ante Evaluation has been characterised by a high degree of positive and productive interaction between the evaluators and WEFO. The vast majority of recommendations and suggestions made by DTZ have been accepted by WEFO and have been incorporated in the draft of the Operational Programmes. The final Ex Ante Evaluation Report is attached at Annex E.

## **Strategic Environmental Assessment**

3.138 Given the nature of the European Social Fund, focusing on immaterial operations related to Human Resources Development, this Operational Programme does not set the framework for operations likely to have significant

environmental effects, such as infrastructure projects, especially the one listed in Annexes I and II to Directive 85/337/EEC as amended.

3.139 Should infrastructure projects be envisaged subsequently, particularly using the flexibility clause of Article 34.2 of Regulation (EC) No1083/2006, the need for a Strategic Environmental Assessment would be revisited. Consequently, the Managing Authority considers – and the national authorities have agreed – that there is no need for a Strategic Environmental Assessment of this Operational Programme under Directive 2001/42/EC, at this time.

3.140 This is without prejudice to any screening determinations that are deemed necessary according to national laws or other measures to implement Directive 2001/42/EC.

## **CHAPTER 4: PRIORITIES**

### **PRIORITY 1: INCREASING EMPLOYMENT AND TACKLING ECONOMIC INACTIVITY**

#### **Objective**

4.1 To raise levels of employment and economic activity, and secure higher participation in the labour market in the East Wales region.

#### **Target Groups**

4.2 This priority will focus primarily on the economically inactive with the aim of helping them into sustainable employment. Approximately 85% of the funding allocated to this priority will support interventions for those identified as economically inactive, with the remainder providing additional support to those who are categorised as unemployed.

4.3 Key target groups will be people with work limiting health conditions and disabilities; young people aged 16 – 18 years who are classed as NEET (not in employment, education or training); people from BME communities; Lone Parents, older people, particularly the low skilled, and a range of other groups facing disadvantage in the labour market.

#### **Rationale**

4.4 Action is needed to help unemployed and economically inactive people of all ages in East Wales enter the workforce, but there is a particular need to help those who are disadvantaged and economically inactive to gain a firm foothold in employment. Increasing employment will not only support economic growth in the region, it will underpin wider action to reduce the risk of long-term poverty and ill-health, widen social inclusion and improve economic outcomes for individuals, disadvantaged groups and communities. Increasing the size of the workforce is important if East Wales is to continue the economic growth it has shown over recent years. The challenge for the region in sustaining this development, becoming more competitive and supporting economic growth across Wales, lies in enabling more people to take up the opportunities available to them in a growing economy.

4.5 For many people, low skills, poor or no qualifications, lack of self confidence or work experience, are some of the main barriers they face in getting a job. But, over and above this, certain groups of economically inactive and unemployed people, such as young people classed as NEET, BME communities, disabled people or individuals with work-limiting health conditions, and older people, experience specific disadvantages which limit their ability to engage with the labour market. Specific action will be needed to address the full range of factors contributing to their disadvantage if their successful move into, and retention in employment is to be secured. At the same time, concentrations of some of these groups within certain areas mean problems of poverty and deprivation are felt at a community level.

4.6 While a high emphasis must be given under this priority to bringing more people into employment, attention must also be given to support their retention in work. The cost benefit of getting someone into a job will be lost if the right support and aftercare is not available for employees and employer. Beyond this, the social cost of someone falling back into unemployment and potential long term inactivity, can have a significant bearing on individuals and communities alike. For many employers, especially SMEs, the prospect of employing people formerly classed as economically inactive or long-term unemployed can be misperceived as problematic. Much of the misperception can be addressed if advice, guidance and mentoring, is made available as a package of support and aftercare for the employer. Activities aimed at working with employers to help new employees remain in work, will be key to preventing them flowing back into long-term unemployment and economic inactivity.

4.7 Ongoing support to achieve long-term employment will be crucial. Action is not only needed to help more people into work but also to support their retention and stop the flow back into economic inactivity. Once an individual has been in work for 12 months, their likelihood of remaining in work long-term is very significantly increased. Providing sustained post recruitment support (including financial) during these first few weeks and months is an important part of a single integrated intervention.

4.8 Social partners have a key role to play in helping to support sustainable integration into employment for those who are significantly distanced or disadvantaged in the labour market. The programme will support measures to build the capacity of social partners, through training and networking to allow for a stronger role at a local level, and greater potential for more collaborative working with other key partners e.g public employment services or primary healthcare providers. The links between ill health, low skills and unemployment and economic inactivity are now well established. Programmes aimed at working with employers, and individuals with work limiting health conditions to help them into employment, manage their conditions, and prevent them flowing back into unemployment or inactivity, are key to tackling the issue of economically inactive individuals who may want to, or be capable of working, but who are discouraged by their health condition.

4.9 Financial and cultural dependency on inactive benefits combined with a perceived loss of the financial safety created by the current benefits system can deter many individuals from seeking work. Peer pressure within local communities and within certain age groups leads to a reliance on a lifetime of benefit and has the potential to develop into a culture of worklessness across families, generations and communities. Mainstream interventions, for example UK Government's New Deals and *Pathways to Work* pilots, have tended to target the flow of individuals into long-term unemployment and inactivity. Action to help those already claiming benefit, especially the stock of long-term economically inactive, has been more limited.

4.10 Recent developments under the New Deals and Pathways to Work provision, has extended support to those individuals who have been on benefit for a couple of years, but despite this additional concerted action is needed to bring

the long term inactive back into the labour market. Future activity would build on the success of projects such as *Want2Work*, developed in partnership between the Welsh Assembly Government and Jobcentre Plus Wales in the 2000-2006 programmes by extend the reach of mainstream programmes to the more disadvantaged client groups.

4.11 There are also important links to be made to environmental sustainability. East Wales has increasing employment opportunities in sectors dependant on a good natural environment and healthy lifestyles, such as tourism and sport. Increasing awareness of environmental issues and considerations, and the promotion of healthier lifestyles can help to prepare inactive people for employment in these growing sectors, and inform their understanding of how they can best support better environmental practices.

## Policy Context

### *European*

4.12 This priority will address the two employment recommendations to the UK in 2004 as part of the *European Employment Strategy*. These call for action to:

- ensure that active labour market policies and benefit systems prevent de-skilling and promote quality in work, by improving incentives to work and supporting sustainable integration and progress in the labour market of inactive and unemployed people; and
- address the rising number of people claiming sickness or disability benefits, and give particular attention to lone parents and people living in deprived areas.

4.13 The priority also reflects the following strategies and principles that influence policy design and delivery in Wales:

- the Maastricht Communiqué on strengthening European co-operation in Vocational Education and Training, in which Education Ministers called for the Structural Funds to support actions that update the skills of an ageing population<sup>128</sup>.
- activities in the field of occupational health and promoting healthier lifestyles respond to the aims set out in the *Health and Consumer Protection Strategy 2005*<sup>129</sup>, which emphasises the contribution health makes to productivity, labour participation and economic growth, particularly in the context of an ageing labour force;

---

<sup>128</sup> Maastricht Communiqué on the Future Priorities of Enhanced European Cooperation in Vocational Education and Training (VET) 14 December 2004:

[http://www.bologna-bergen2005.no/Docs/00-Main\\_doc/041214\\_Maastricht\\_com\\_en.pdf](http://www.bologna-bergen2005.no/Docs/00-Main_doc/041214_Maastricht_com_en.pdf)

<sup>129</sup> Health and Consumer Protection Strategy – Healthier, safer, more confident citizens: a Health and Consumer protection Strategy COM (2005) 115:

- where appropriate, projects supported via the second Community Action programme in the field of health (2007–2013)<sup>130</sup> should seek synergies with those undertaken within this priority, particularly as the health action programme has a strong focus on ‘promoting health for prosperity and solidarity’;
- the Green Paper ‘Promoting healthy diets and physical activity: a European dimension for the prevention of overweight, obesity and chronic diseases’<sup>131</sup>, which followed on from the strategy (2005) highlights the financial costs of poor health and notes that the workplace setting has a strong potential to promote healthier lifestyles; and
- the strong emphasis on promoting sustainable development in the Lisbon and Gothenburg agenda, and the need to improve awareness and skills that will be necessary to respond to environmental challenges now and in the future.

## UK

4.14 This priority and its themes will seek to address the objectives and aims of the following UK level policies as well as those at EU and Welsh national level. The UK Government, through the Department for Work and Pensions (DWP) retains overall responsibility for the development of employment policy, and supports the delivery of a range of active labour market measures. Key programmes include the New Deal which, over the last five years has extended support beyond the registered unemployed to include those classed as economically inactive, and the ‘Pathways to Work’ initiative that targets supports towards people claiming Incapacity Benefit. The programme will need to take account of future developments under the DWP’s Green Paper: *A New Deal for Welfare: Empowering people to Work*<sup>132</sup>.

4.15 From 1 October 2006, the new laws to protect workers from age discrimination, the Employment Equality (Age) Regulations make it illegal for employers to discriminate against employees, trainees or job seekers because of their age and ensure that all workers, regardless of age, have the same rights in terms of training and promotion. Changes announced by the UK Government in May 2006 to the state pension age in its *White Paper – Security in Retirement*<sup>133</sup>, will also encourage people to work for longer.

4.16 As well as welfare systems and their proposed changes impacting on this priority, the UK *Health, Work and Well-Being Strategy*<sup>134</sup> produced by the

<sup>130</sup> Text of Amended Commission proposal establishing a second Programme of Community action in the field of Health and consumer protection (2007–2013) COM (2006) 234:

<sup>133</sup> DWP White Paper Security in Retirement, Towards a new pensions system,

<http://www.dwp.gov.uk/pensionsreform/whitepaper.asp>

<sup>134</sup> DWP, HSE & Dept of Health, “Health, Work and Well Being: Caring for our future” Strategy:

[http://www.dwp.gov.uk/publications/dwp/2005/health\\_and\\_wellbeing.pdf](http://www.dwp.gov.uk/publications/dwp/2005/health_and_wellbeing.pdf)

Department of Health, DWP and Health and Safety Executive, aims to bring together all those with a role to play in relation to the health of working age people. The strategy focuses on reducing the flow of people out of work and into unemployment due to health issues and will direct the focus of this priority in tackling work limiting health conditions and assisting work related health interventions for individuals who are entering or re-entering the labour market.

### *National*

4.17 Helping more people into jobs is one of the four key priorities in *Wales: A Better Country*. This recognises that people and their communities need to be provided with the economic tools, which include better access to better quality education and training, jobs and employment opportunities to enable them to break out of the poverty trap and a lifetime of deprivation.

4.18 The approach is further developed by the strategic economic development agenda set out in *Wales: A Vibrant Economy*, which focuses attention on delivering strong and sustainable economic growth and opportunities for all. This strategy is complemented and supported by the *Skills and Employment Action Plan 2005*, which takes forward the Wales lifelong learning agenda and demonstrates Wales' commitment to achieving the objectives of the *European Employment Strategy*.

4.19 This priority's policy objectives are further developed in *The Learning Country 2: Vision into Action*<sup>135</sup>, which sets out an ambitious agenda for education and training in Wales. Also of relevance are the Assembly Government policies for young people, *Extending Entitlement*, and *14 – 19 Learning Pathways*.

4.20 The *14-19 Learning Pathways* agenda aims to lift the proportion of young people with Level 2 qualifications at 16, and Level 3 qualifications at 19, while reducing the number of young people leaving full time education without qualifications. Reducing levels of 16-18 year olds who are NEET is a key target, as is increasing the number of young people aged 16 progressing to further learning, full time or work based learning. Closely related to this is the 11-25 year olds *Extending Entitlement* policy which aims to provide young people with the advice support and confidence needed for them to make informed decisions and engage in society.

4.21 Given the cross-cutting nature of the range of barriers facing individuals in accessing and remaining in sustainable employment, and in tackling gender inequalities, there will also be strong links to a number of other key Welsh Assembly Government strategies, namely *Designed for Life - A World Class Health Service for Wales*<sup>136</sup>, *Health Challenge Wales*<sup>137</sup>, *Well Being in Wales*, *Better*

---

<sup>135</sup> The Learning Country: Vision into Action, Welsh Assembly Government, <http://new.wales.gov.uk/topics/educationandskills/educationskillsnews/wales-action-on-learning?lang=en>

<sup>136</sup> Designed for Life Health Strategy <http://new.wales.gov.uk/about/strategy/strategypublications/designedforlife/?lang=en>

<sup>137</sup> Welsh Assembly Government's *Health Challenge Wales*: <http://new.wales.gov.uk/topics/health/improvement/hcw/?lang=en>

*Health Better Wales; the Strategy for Older People*<sup>138</sup>; and *Childcare is for Children*<sup>139</sup>. Action will also be set in a spatial context through use of the *Wales Spatial Plan*.

4.22 The importance of improving awareness and skills of sustainable development issues are identified in the Welsh Assembly Government's *Education for Sustainable Development and Global Citizenship Strategy*<sup>140</sup>. It aims to integrate sustainable development into education and learning programmes for children, young people and adults. Also outcomes identified in the *Environment Strategy for Wales* relate to individuals understanding and taking responsibility for their environmental impact and changes in behaviour that help reduce negative impacts. These aims and outcomes will be promoted by integrating the Regional Competitiveness & Employment environmental sustainability objectives into supported training and education programmes.

4.23 Alongside strategies which will steer the cross cutting theme of Environmental Sustainability, the application of the cross cutting theme for Equal Opportunities will be steered by the legal requirement of section 120 of the Govt of Wales Act 1998, to embed equality of opportunity, and the Welsh Assembly Government strategy - Mainstreaming Equality.

### **Priority Level Indicators**

4.24 The following indicators, relevant to the Priority, will be used to track the progress of projects and the Programme. The output and result indicators are monitoring indicators, which projects will be required to report against during the life of the project. The impact indicators are evaluation indicators and should be considered during project- and Programme-level evaluation.

4.25 In addition to reporting against these indicators, projects will be required to provide further monitoring information that underpins the indicators in order to meet Commission requirements as set out in Annex XXIII of the Implementing Regulations and to allow WEFO to assess the effectiveness of the Programme. In line with article 66(2) of the General regulation, monitoring information collected will allow for the breakdown of statistics by gender and size of the recipient undertakings, where appropriate.

4.26 Under the flexibility facility allowed for by Art 34(2) of Regulation (EC) 1083/2006, the ERDF indicator "Premises created or refurbished" will be available to capture ERDF activity funded through this Priority.

4.27 Targets are also presented in the table below. All targets are to be achieved by 2015. Impacts indicators which need to be assessed via evaluation

will be reported upon annually from 2009 onwards. These are identified in Annex K – Indicators.

**Table 28: Priority 1 Indicators and Targets**

Indicator	Target (2015)
<b>Outputs</b>	
Total participants (Economically inactive and unemployed)	14,000
<i>Key intervention groups:</i>	
<i>Economically inactive</i>	85% of total participants
<i>Unemployed</i>	15% of total participants
<i>NEET participants</i>	-
<i>BME participants</i>	12% of total participants
<i>Older participants</i>	35% of total participants
<i>Female participants</i>	59% of total participants
<i>Participants with work-limiting health condition or disability</i>	45% of total participants
<i>Lone Parents</i>	8% of total participants
Employers assisted	700
Participants who receive support with caring responsibilities	-
Projects using soft outcome measurement systems	50% of all projects
Projects integrating sustainable development into awareness raising, education and training programmes	75% of all projects

Indicator	Target (2015)
<b>Results</b>	
Participants gaining qualifications – Economically inactive and unemployed	4,200
<i>Key intervention groups:</i>	
<i>Economically inactive</i>	-
<i>Unemployed</i>	-
<i>NEET participants</i>	-
<i>Female participants</i>	-
<i>BME participants</i>	-
<i>Older participants</i>	-
<i>Participants with work-limiting health condition or disability</i>	-
<i>Lone Parents</i>	-
Of total receiving qualifications	
<i>Qualification levels to be gained:</i>	
<i>Basic skills</i>	55%
<i>Level 2</i>	30%
<i>Level 3</i>	10%
<i>Level 4 and above</i>	5%
Participants entering employment – Economically inactive and unemployed	3,500
<i>Key intervention groups:</i>	
<i>Economically inactive</i>	-
<i>Unemployed</i>	-
<i>NEET participants</i>	-
<i>Female participants</i>	-
<i>BME participants</i>	-
<i>Older participants</i>	-
<i>Participants with work-limiting health condition or disability</i>	-

4.28 In addition, projects will be expected to measure a range of soft outcomes for those individuals who are significantly distanced from or disadvantaged in the

<sup>141</sup> Positive outcomes are intermediary outcomes including: completing courses; entering voluntary work; and attending a job interview.

labour market. Such outcomes will represent specific milestones on a clearly defined routeway or pathway into employment.

## **Operational Strategy**

4.29 This Priority aims to increase employment by bringing more unemployed and economically inactive people into employment. This will be achieved by targeting support to the identified disadvantaged groups (i.e. economically inactive individuals with work limiting health conditions and / or disabilities, NEETs, older people particularly the low skilled, Lone Parents, people from BME communities and with some scope for a range of other groups at a disadvantage in the labour market).

It will achieve this by:

- helping people acquire the skills needed for sustainable employment; and
- addressing specific barriers faced by individuals within each group.

### Indicative activities:

- active labour market measures, including individual adviser based Job-search support, information on learning/training opportunities; financial incentives;
- work experience and work trial placements, including voluntary experience and placements;
- innovative ways of engaging with and integrating the most disadvantaged groups into sustainable employment;
- sector or job specific training linked to the local labour market where there is unsatisfied demand;
- provision of specialist outreach engagement and support for disadvantaged people, including BME people and disabled people;
- enhancing access to affordable and appropriate support for people with caring responsibilities, especially childcare;
- development and delivery of employer engagement strategies, including interventions to encourage them to make work experience places available;
- activities to support more collaborative work between employment and health sectors, including work with GPs and other primary care providers;
- innovative ways of supporting employers and new employees in dealing with health related issues;
- support to previously long term inactive entrants to employment, and their employers, with induction and retention initiatives, to prevent “revolving door” employment; and
- adaptation of work related skills training and programmes to integrate sustainable development, addressing current and future environmental challenges, particularly climate change.

## **Social Partners**

4.30 EU Regulation 1081/2006 Article 5 (3), provides for an appropriate amount of the ESF to be allocated to supporting activities jointly undertaken by the social partners. Under this Priority, around 0.5% of the priority allocation will be set aside to support action with social partners. Activities to be funded will include those that support engagement between employers and voluntary and community groups to ensure the unemployed and economically inactive are able to make progression to sustainable employment. Example activities will include:

- initiatives which help disadvantaged groups overcome barriers to employment, including mentoring programmes ;
- initiatives to improve disability awareness and management, including partnership arrangements addressing health related employment barriers;
- and
- initiatives to aimed at promoting equality and diversity in employment .

## **Added Value**

4.31 This Priority will focus on adding value to UK Government employment programmes by extending the range of provision available through the New Deals and Pathways to Work to those furthest away from the labour market and least able to access the activities and work-related interventions delivered under such programmes.

4.32 Interventions and support available through this programme will aim to bring the long-term inactive closer to the labour market and provide a mechanism for overcoming a more entrenched range of individual barriers to employment. It will do this by increasing the range of qualifications, interventions, and outcomes, and increasing beneficiary engagement with the mainstream programmes, and their sustainability whilst participating on programmes.

4.33 The programme will build on, rather than replicate action already undertaken through the UK Government programmes. It will extend outreach activity into local communities, eg - working through a range of local community and voluntary groups, to engage with more disadvantaged groups; extend the scale, depth and length of interventions for participants, eg including more enhanced interventions on managing work limiting health conditions; develop new innovative approaches to gaining and enhancing employability skills and, as part of a more planned routeway into employment, deliver more extensive opportunities for volunteering and participation on work placement trials and work experience. Given the limited financial resources available, this Operational Programme will continue to learn from the experiences of other organisations, projects, other UK regions and EU Member States, and actively encourage projects to adopt innovative approaches under the delivery of this priority's proposed indicative activities.

4.34 Increased focus will also be given to addressing barriers around equal opportunities and addressing post recruitment issues faced by the long-term

unemployed/ economically inactive entering employment. Some of these participants will be entering work for the first time and the cost benefit of getting them into work will be lost without the right support and aftercare, in the form of advice, guidance and mentoring, for both the employee and employer.

### **Beneficiaries**

4.35 These may include Welsh Assembly Government Departments, Local Authorities, public employment services, voluntary sector and community organisations, training organisations, Higher and Further Education Institutions, private sector organisations, social enterprises and social partners, and primary healthcare sector organisations.

### **Flexibility Facility**

4.36 EU Regulation 1083/2006, Article 34 (2), provides for the ESF to fund interventions which fall within the scope of the ERDF (and vice versa), provided such interventions are necessary for the successful implementation of an operation and have a direct link to that operation. In order to promote coherent implementation of actions under this Priority, a maximum of 10% of the EU contribution to the Priority can be used to fund such complementary investments. Justification for using this flexibility will be provided at operation/project level and the resources used in this manner will be separately identified in project applications and expenditure declared.

4.37 Examples of where cross-financing under this Priority might promote coherent implementation include:

- Small scale capital costs for upgrading facilities directly related to ESF interventions to assist people into work; and
- Small scale capital costs for pilot or flagship interventions directly related to schemes to help people into work.

### **Global Grants**

4.38 We do not envisage the use of Global Grants as defined by Article 42 of Regulation (EC) 1083/2006 of 11 July 2006.

## **PRIORITY 2: IMPROVING SKILL LEVELS AND THE ADAPTABILITY OF THE WORKFORCE**

### **Objective**

4.39 To support productivity, adaptability and progression in employment by tackling low skills, raising skill levels amongst managers and workers in small enterprises, and improving systems for anticipating and responding to skill needs.

### **Target Groups**

4.40 This priority will focus on raising the basic skill levels of employees. The main target group will be employees with skills below Level 2, especially those without basic numeracy, literacy and ICT skills. Particular attention will be given to interventions which help part-time working women, older workers, disabled people, and people from BME communities. This priority will also support management and leadership training up to intermediate and higher skill levels for managers and workers in small enterprises (up to 50 employees). Finally it will support interventions which improve systems for identifying and addressing future workforce skill needs.

### **Rationale**

4.41 Better skills increase the flexibility of the workforce, increase an economy's competitiveness and help to reduce social inequalities. Investment in learning is more relevant than ever in the context of the changing modern knowledge-based economy. Structural change, new technologies and productivity growth require an on-going investment in skills. At the individual level, the acquisition of qualifications and skills over a lifetime is one of the key factors in securing a route into sustainable employment and higher earnings.

4.42 There is a broad consensus that over the last couple of decades the relative labour market position of low skilled workers has worsened across the developed world, with the effects taking the form of lower relative pay and/or lower employment rates. Although generally East Wales has somewhat higher levels of skills and qualifications than the rest of Wales, there are still significant numbers of low-skilled workers throughout the region. Action under the programme will look to build on existing work being undertaken through the Assembly Government's Basic Skills Strategy, Words Talk, Numbers Count, to raise the basic skill levels of the workforce, and improve the systems for basic skills provision.

4.43 Success will depend in large part on developing the skills of the existing workforce, 80% of whom will still be in employment in 10 years time. Skills are crucial to business success, but in some sectors, or for some firms, there is a lack of suitably qualified applicants. Research indicates the sectors experiencing the greatest problems in terms of skills supply are production, construction, wholesale/retail and hotels/catering. The skills most lacking are problem solving, customer handling and other technical and practical skills such as ICT. Employers which do not tackle their skills shortages limit their growth and ability to adapt. Emphasising the positive impact training certain groups of employees, particularly

the low skilled, can have on productivity brings benefits both to individuals and the firms.

4.44 Despite progress over recent years there remains significant gender inequality in employment in East Wales, with a lower female employment rate than that for men. In terms of economic performance this means firstly that the economic contribution of women is not fully utilised.

4.45 Change has become a constant feature of economic life. Globalisation, new technologies and demographic ageing will have increasing consequences for labour markets across Europe, and workers and enterprises need help in adapting to these changes. In addition, higher employment and productivity, competitiveness, better wages and working conditions directly depend on the ability of enterprises and workers to innovate and adapt to change. Restructuring is no longer just change in traditional industries; it covers all sectors. In the context of accelerating technological innovations and globalisation, enterprises and workers need to adapt to new ways of working and be able to respond to shifts in demand for goods and services. Demographic changes will require changes to workforce planning, with an ageing workforce and fewer young recruits.

4.46 Higher employment and productivity, competitiveness, better wages and working conditions directly depend on the ability of enterprises and workers to innovate and adapt to change, particularly small enterprises. To adapt to changing sectoral or economic conditions, enterprises need skilled managers, able to recognise the need for change and capable of leading a business through such a process.

4.47 Wales as a whole is already at the forefront in identifying skills needs through Future Skills Wales research but more needs to be done to strengthen the capacity to identify and understand the nature of the future challenges, and match and improve learning provision to meet the needs of the economy. The programme will look to build on the existing work of Future Skills Wales and the Sector Skills Councils in order to evidence more accurately future demand and steer the delivery of future training and learning provision.

4.48 Strengthening the systems to understand what skills are needed for future productivity and economic growth must continue. Change has become a constant feature of economic life and individuals, employers, learning providers and other stakeholders need support to cope with the pace of change. Skills are crucial to business success. Employers which do not tackle their skills shortages limit their economic growth and ability to adapt. Emphasising the positive impact training certain groups of employees, particularly the low skilled, can have on productivity, brings benefits both to individuals and the businesses.

4.49 Another area where the region will need to develop further in the new programming period is environmental skills. Better general environmental awareness and environmental skills will become increasingly important in the face of increasing climate change and the opportunity to exploit the opportunities presented by the natural environment. This can be achieved by the integration of sustainable development principles into education and training programmes. Skills

that improve resource efficiency will help to reduce carbon emissions, costs and thereby improve overall regional competitiveness.

## Policy Context

### *European*

4.50 This priority will address the employment recommendation to the UK in 2004 under the European Employment Strategy by supporting action to:

- implement national and regional skills strategies to provide better incentives for lifelong learning and thereby increase productivity and quality in work; place particular emphasis on improving literacy and numeracy of the workforce, the participation and achievement of 16-19 year olds and low skilled workers, especially those in poorly paid jobs; and
- 'improve access to and affordability of childcare and care for other dependants, increase access to training for low paid women in part-time work and take urgent action to tackle the causes of the gender pay gap'<sup>142</sup>,

4.51 This priority also reflects the following strategies and principles that influence policy design and delivery in Wales:

- improving skills levels is central to the Lisbon agenda, the European Employment Strategy (notably Guidelines 23 and 24), the Integrated Guidelines for Jobs and Growth, Education and Training 2010<sup>143</sup>;
- the Lifelong Learning Programme 2007–2013, which aims to support the acquisition and development of knowledge, qualifications and skills to promote employability and participation in the European labour market<sup>144</sup>;
- in line with European Employment Strategy Guidelines 18,19 and 21<sup>145</sup>, action under this theme will encourage the retention of more people in employment, including by improving the adaptability of workers and enterprises;

---

<sup>142</sup> Council Recommendation of 14 October 2004 on the implementation of Member States' employment policies: [http://europa.eu/eur-lex/pri/en/oj/dat/2004/l\\_326/l\\_32620041029en00470063.pdf](http://europa.eu/eur-lex/pri/en/oj/dat/2004/l_326/l_32620041029en00470063.pdf)

<sup>143</sup> The latest Joint Implementation Report 2006 of the Council and EU Commission on progress under the Education and Training 2010 programme, emphasises that individuals acquiring and updating their skills throughout their working life, is central to ensuring that Europe becomes a more competitive and dynamic society.

<sup>144</sup> Actions that provide training to improve the skill levels of Welsh adults will help the EU meet its goal of 12% of adults participating in lifelong learning every year. According to the latest EU Commission Staff Working Document – progress towards the Lisbon objectives in education and training, 16/05/2006, to meet the target a further four million adults across the EU need to participate in lifelong learning.

<sup>145</sup> COUNCIL DECISION of 12 July 2005 on Guidelines for the employment policies of the Member States (2005/600/EC): [http://eur-lex.europa.eu/LexUriServ/site/en/oj/2005/l\\_205/l\\_20520050806en00210027.pdf](http://eur-lex.europa.eu/LexUriServ/site/en/oj/2005/l_205/l_20520050806en00210027.pdf)

- the theme of adaptability is also central to that of flexicurity, currently a key European policy priority as set out in the 2006 Annual Progress Report, 'Moving Up a Gear'<sup>146</sup>.
- the European Gender Pact, adopted by Heads of State and Government at the 2006 Spring Council<sup>147</sup>; and
- the European Commission Roadmap for Equality between Women and Men 2006–2010<sup>148</sup>, which builds on the experience of the Framework Strategy for Equality between Women and men for the period 2001–2005. It combines the launch of new actions and the reinforcement of successful existing activities. It reaffirms the dual approach of gender equality based on gender mainstreaming (the promotion of gender equality through mainstreaming and specific measures).
- the strong emphasis on promoting sustainable development in the Lisbon and Gothenburg agenda, and the need to improve awareness and skills that will be necessary to respond to environmental challenges now, and in the future.

## UK

4.52 Learning supply must better match the needs of employers and labour market opportunities, with an emphasis on economically valuable skills and qualifications. A major review of the UK's skills levels and future needs was published in December 2006. Lord Sandy Leitch published his final report on UK skills, "*Prosperity for all in the global economy – World class skills*", which contains a number of recommendations on how the vision of developing the UK as a world leader on skills by 2020, can be progressed. UK central government has welcomed the review and accepts the proposal for a new Commission for Employment and Skills. The formal UK Government response will be published in Summer 2007, following the Comprehensive Spending Review.

4.53 The Welsh Assembly Government has welcomed the report and several initiatives are cited within the report e.g. the Employer Skills Pledge to raise workers' literacy and numeracy, and all age careers advice services that link advice to actual employment opportunities. Much of the activity recommended by Lord Leitch is being progressed using the *Skills and Employment Action Plan 2005*. The UK wide network of Sector Skills Councils will play a valuable role here in Wales, in delivering on this agenda, and utilising the National Qualifications Framework system, which delivers competence based qualifications are based on occupational standards designed by employers.

## National

4.54 *Wales: A Better Country* has as its primary aims: the promotion of a diverse, competitive, high value-added economy with high quality skills and

<sup>146</sup> 'Time to Move Up A Gear' The European Commission's 2006 Annual Progress Report on Growth and Jobs, 25 January 2006: [http://ec.europa.eu/growthandjobs/annual-report\\_en.htm](http://ec.europa.eu/growthandjobs/annual-report_en.htm)

<sup>147</sup> Spring Council Conclusions 2006 (Paragraph 40 and Annex II): [http://ue.eu.int/ueDocs/cms\\_Data/docs/pressData/en/ec/89013.pdf](http://ue.eu.int/ueDocs/cms_Data/docs/pressData/en/ec/89013.pdf)

<sup>148</sup> A Roadmap for equality between men and women COM (2006) 92: [http://ec.europa.eu/employment\\_social/publications/2006/ke7205596\\_en.pdf](http://ec.europa.eu/employment_social/publications/2006/ke7205596_en.pdf)

education; and action to promote social justice by providing people and their communities with the means to help themselves, and compete on cheaper labour costs; skills and innovation are critical if Wales is to compete break out of the poverty trap.

4.55 *Wales: A Vibrant Economy's* vision of a vibrant Welsh economy is focused on delivering strong and sustainable economic growth by helping more people into work and helping to raise earnings for those in work.

4.56 This priority's policy objectives are further developed in *The Learning Country 2: Vision into Action* which sets out an ambitious agenda for education and training in Wales. The *Skills and Employment Action Plan for Wales 2005* sets out a detailed agenda to increase the levels of skilled employment in Wales, with a section on working with employers and employees to improve skills. Alongside this plan sits *Words Talk, Numbers Count*, which aims to improve basic literacy and numeracy skills in Wales.

4.57 The Wales Management Development Strategy aims to inspire, motivate and drive change in the perception, delivery, take-up and funding of management and leadership development in Wales. The strategy will seek to convince all managers of the benefits of developing their skills and abilities; identify through research the real development needs of managers in Wales; ensure that managers can obtain high quality and flexible training and development; share best UK and international management practice among all businesses in Wales; and measure progress against credible benchmarks<sup>149</sup>.

4.58 Promoting a sustainable, innovative and high value economy for Wales also forms a key part of the implementation of the Wales Spatial Plan. It provides a framework for addressing a wide range of development issues, including skills, in the various regions of Wales and will guide the Welsh Assembly Government's work with partners.

### **Priority Level Indicators**

4.59 The following indicators, relevant to the Priority, will be used to track the progress of projects and the Programme. The output and result indicators are monitoring indicators, which projects will be required to report against during the life of the project. The impact indicators are evaluation indicators and should be considered during project- and Programme-level evaluation.

4.60 In addition to reporting against these indicators, projects will be required to provide further monitoring information that underpins the indicators in order to meet Commission requirements as set out in Annex XXIII of the Implementing Regulations and to allow WEFO to assess the effectiveness of the Programme. In line with article 66(2) of the General regulation, monitoring information collected will allow for the breakdown of statistics by gender and size of the recipient undertakings, where appropriate.

---

<sup>149</sup> Wales Management Council at <http://www.crc-wmc.org.uk/>

4.61 Under the flexibility facility allowed for by Art 34(2) of Regulation (EC) 1083/2006, the ERDF indicator “Premises created or refurbished” will be available to capture ERDF activity funded through this Priority.

4.62 Targets are also presented in the table below. All targets are to be achieved by 2015. Impacts indicators which need to be assessed via evaluation will be reported upon annually from 2009 onwards. These are identified in Annex K – Indicators.

**Table 29: Priority 2 Indicators and Targets**

Indicator		Target (2015)
<b>Outputs</b>		
Total participants (Employed)		12,600
Female participants		55% of total participants
<i>Key intervention groups:</i>		
<i>Older participants</i>		30% of total participants
<i>BME participants</i>		-
<i>Participants with work-limiting health condition or disability</i>		15% of total participants
<i>Participants accessing basic skills qualifications</i>		55% of total participants
<i>Participants accessing Level 2 training</i>		25% of total participants
<i>Participants accessing Level 3 training</i>		10% of total participants
<i>Participants accessing Level 4 and above training</i>		10% of total participants
<i>Female participants who work part-time</i>		25% of total participants
Employers assisted		2,100
Research studies		-
Learning and development strategies		-
Projects delivering specialist training in sustainable development		10% of all projects

Indicator	Target (2015)
<b>Results</b>	
Participants gaining qualifications - Employed	5,450
<i>Qualification levels gained:</i>	Of total receiving qualifications
<i>Basic skills</i>	63% <sup>150</sup>
-Female	-

## Operational Strategy

<sup>150</sup> This equates to an attainment level of 50 per cent for those accessing basic skills qualifications

<sup>151</sup> This equates to an attainment level of 41 per cent for those accessing level 2 training

<sup>152</sup> This equates to an attainment level of 30 per cent for those accessing level 3 training

<sup>153</sup> This equates to an attainment level of 25 per cent for those accessing level 4 and above training

4.63 This priority aims to improve the basic skill levels within the workforce, increase the leadership and management skills of managers and workers in small enterprises, and support systems for anticipating and responding to skill needs:

- improving basic skills provision in numeracy and literacy, problem solving and customer handling through targeted interventions working with employees and employers;
- support for leadership and management skills acquisition (at all levels) for managers and employees in small enterprises;
- improving research into skills needs and systems for matching learning to employer demand.

#### Indicative activities

- interventions to improve access to basic and functional skills provision (numeracy and literacy) for employees;
- providing low-skilled workers and workers without any form of qualifications, especially individuals from BME communities with qualifications and vocational skills up to Level 2, e.g. ICT skills, and generic work skills such as team working, problem-solving and customer-handling skills;
- innovative learning delivery approaches and methodologies for identifying and addressing skills needs;
- targeted interventions to address equal opportunities barriers to meet the needs of groups facing particular disadvantages (including BME people, disabled people, older workers and part-time working women);
- training, mentoring and supporting men and women in occupations or sectors where their gender is underrepresented, in order to tackle gender segregation;
- collaborative work to enable migrant workers to validate the qualifications obtained in their home country to increase their access to higher level employment and make better use of their skills;
- new ways of supporting the engagement of older workers in learning;
- learning and training for managers and workers in small enterprises (up to 50 employees), in leadership and management (at any level including level 4 and above) to give them the skills needed for sustainable business development, business growth, innovation and productivity;
- improving the research and evidence base for present and future skills needs, working with employers and Sector Skills Councils to develop strategies to meet such challenges; and
- information, advice and guidance for employees, employers and learning providers on available learning opportunities and demand levels, where a gap has been demonstrated.

## **Social Partners**

4.64 EU Regulation [1081/2006] Article 5 (3), provides for an appropriate amount of the ESF to be allocated to supporting activities jointly undertaken by the social partners. Under this Priority, around 0.5% of the priority allocation will be set aside to support action with social partners. Activities to be funded will include those that support employers to make identify and address future demands on their workforce. Example activities will include:

- initiatives aimed at fostering employer and employee engagement in learning, including through initiatives which promote, recognise and reward good practice ;
- initiatives aimed at supporting the retention of older workers in employment ; and
- activities aimed at improving environmental awareness and management.

## **Added Value**

4.65 ESF resources will add value to the domestic strategies and budgets to raise skill levels within the East Wales region, capable of responding to the changing needs of a knowledge driven economy. It will be used to enhance provision of and enable greater participation in basic skills training and more targeted provision of intermediate and higher level skills for managers and employees in small enterprises. ESF funding will allow accelerated improvements to be made to the systems for identifying and addressing the future skills needs within the sub-region. It will also support additional and more targeted interventions to address equal opportunities barriers to meet the needs of those groups facing particular disadvantages in the workforce, (including BME people, disabled people, older workers and part-time working women). Given the limited financial resources available, this Operational Programme will continue to learn from the experiences of other organisations, projects, other UK regions and EU Member States, and actively encourage projects to adopt innovative approaches under the delivery of this priority's proposed indicative activities.

## **Beneficiaries**

4.66 These may include public employment services, Welsh Assembly Government Departments, training organisations, Institutes of Higher and Further Education, Sector Skills Councils, Local Government and Non-governmental organisations (NGOS), voluntary and community organisations, social enterprises and social partners.

## **Flexibility Facility**

4.67 EU Regulation [1083/2006], Article 34 (2), provides for the ESF to fund interventions which fall within the scope of the ERDF (and vice versa), provided such interventions are necessary for the successful implementation of an operation and have a direct link to that operation. In order to promote coherent implementation of actions under this Priority, a maximum of 10% of the EU

contribution to the Priority can be used to fund such complementary investments. Justification for using this flexibility will be provided at operation/project level, and the resources used in this manner will be separately identified in project applications and expenditure declared.

4.68 Examples of where cross-financing under this Priority might promote coherent implementation include:

- Small scale capital costs relating to equipment to improve delivery of ESF supported learning provision and equality of access to learning;
- The upgrading of existing learning facilities necessary to support the successful implementation of ESF funded actions; and
- Small scale capital costs to integrate learning technologies in the design and delivery of programmes.

### **Global Grants**

4.69 We do not envisage the use of Global Grants as defined by Article 42 of Regulation (EC) 1083/2006 of 11 July 2006.

## **PRIORITY 3: TECHNICAL ASSISTANCE**

### **Objective**

4.70 To ensure the efficient and effective management of the Programme.

### **Rationale**

4.71 Technical Assistance (TA) is an essential resource for supporting the effective delivery of the Programme. Well-supported and robust administration systems which build on those utilised for previous Programmes will be needed to ensure that the new Programmes operate smoothly and effectively. TA will be used alongside the resources of the Welsh Assembly Government and its partners and will focus on supporting key parts of the implementation process.

4.72 Technical assistance will be utilised to support the development of capacity at the Spatial Plan Area level to engage with a range of local partners and stakeholders to develop and support the implementation of relevant Strategic Frameworks.

4.73 EU Regulation 1083/2006, Article 46, allows the use of technical assistance to finance the preparatory, management, monitoring, evaluation, information and control activities of operational programmes together with activities to reinforce the administrative capacity for implementing the funds.

4.74 Building on experience in 2000 - 2006 the Managing Authority proposes to use TA both to improve the implementation of the programme (strengthening governance and compliance) and enhance its effectiveness in creating jobs and growth (developing our delivery capacity to increase impact). To take this forward, the Managing Authority aims to use TA to support a range of eligible activities undertaken by partner organisations and the Managing Authority itself, as set out in Article 46.

### **Management**

4.75 The following indicative activities will help improve strategic implementation and strengthen programme support and development:

#### *Indicative Activities*

- encourage and facilitate collaborative projects and approaches and enhance capacity, including support for the development and implementation of Strategic Frameworks;
- strengthen co-ordination and liaison mechanisms with partnerships and promote partnership working;
- advise and support for projects incorporating activity relating to innovation, trans-national co-operation, sharing of good practice and mainstreaming;
- improve external expertise and technical advice;
- develop and enhance bespoke IT systems;

- advise and support projects on cross-cutting themes integration; and
- training for project managers and support for networks.

## **Monitoring**

4.76 A single Programme Monitoring Committee (PMC) will be established to oversee the effectiveness and quality of the programmes. Its work will be enhanced by the improvement in monitoring and management information flowing from the investment in IT identified above. Technical assistance will be used to support the duties of the PMC, as defined in EU Regulation 1083/2006, Articles 65 and 66, and its sub-committees and, in most cases, the costs will be divided between the two Convergence and the two Regional Competitiveness and Employment programmes on a proportionate basis (i.e. a pro-rata basis).

4.77 Experts appointed to the PMC based on merit will be remunerated in line with the Welsh Assembly Government's normal practice, with payment from domestic sources of funding and not from Technical Assistance or the Structural Funds.

### *Indicative Activities*

- expenditure on monitoring and sub-committee meetings, including expenses; and
- strengthening significantly aspects of WEFO's Programme Management function. This will include a number of technical and expert functions as well as providing better internal programme management, enhanced management support to the PMC and improved reporting to the European Commission.

## **Research and Evaluation**

4.78 During the 2000-2006 programming period, research and evaluation has played a central role in helping WEFO to manage programmes effectively. WEFO set up a specialist Research, Monitoring and Evaluation (RME) team to design, carry out or manage programme-level evaluations.

4.79 Technical Assistance will be used to meet the requirements for evaluation as set out in EU Regulation [1083/2006], Articles 47 and 48.

### *Indicative Activities*

- programme level research and evaluation, including research into the Cross Cutting Themes;
- research and evaluation related to Strategic Frameworks;
- provision of evaluation advice and guidance to sponsor organisations;

- research and evaluation dissemination and workshop events; and
- management of research and evaluation exercises, for example through the Evaluation Advisory Group; and

4.80 Further detail on these planned activities is available in Chapter 6 – Implementing Provisions.

## **Information and Publicity**

4.81 The success of the programme depends to a large degree on a wide understanding among the sponsors and partners of its contents, governing regulations, and aims and objectives. Actions must be taken to ensure that potential sponsors and administrators of the programme are aware of how the programme works and of the funding opportunities available. It is also essential that the benefits and achievements of the programmes are widely publicised to highlight the value added by the EU working in partnership with the Welsh Assembly Government and its partners.

### *Indicative Activities*

- dissemination of information, publicity and communication including guidance for partners and sponsors; seminars/workshops;
- WEFO website development and maintenance;
- diversity and accessibility initiatives; and
- the operation of a Helpline.

## **Control Activities and Reinforcing Administrative Capacity**

4.82 The Managing Authority has developed and improved its control systems throughout the period of the 2000-06 programmes. It wishes to build on this to become a structural funds exemplar across the range of its functions.

### *Indicative activities*

- enhanced audit arrangements to ensure that these arrangements, including those described under Article 17 of the Implementing Regulations<sup>154</sup>, work effectively, improving quality and timelines;
- improve irregularity monitoring and reporting; and
- establishment of a guidance unit within the MA developing and providing continuing and consistent advice to sponsors and partners.

---

<sup>154</sup> Commission Regulation (EC) no. 1828/2006 of 8 December 2006 setting out rules for the implementation of the Structural Funds.

**Beneficiaries**

4.83 These will include the public sector, private sector and the voluntary sector.

## **CHAPTER 5: CROSS CUTTING THEMES**

5.1 In accordance with Articles 16 and 17 of regulation (EC) No 1083/2006 and Article 6 of regulation (EC) No1081/2006, the cross-cutting themes of equal opportunities and environmental sustainability will be built into the ESF Regional Competitiveness & Employment programme. The aim is to build on the substantial progress made in integrating these cross cutting themes into the delivery of the European Structural Funds programmes 2000 -2006.

5.2 This chapter sets out the rationale, outlines the current policy context and defines the operational strategy for both themes. The ways in which the themes will be implemented, monitored and evaluated are covered in Chapter 6, along with the lessons learnt from the current programme 2000-2006 in Annex L.

### **EQUAL OPPORTUNITIES AND GENDER EQUALITY FOR WOMEN AND MEN**

#### **Rationale**

5.3 The principles of equal opportunity for all citizens and ensuring that no groups are excluded from society are central to Welsh Assembly Government and UK Government Policy, not least in relation to the labour market. The integration of equal opportunities in the Structural Funds is important not only for legal reasons, but also because overcoming inequalities between men and women contributes to the overall effectiveness of the Structural Fund programmes. A commitment to treating equal opportunities as one of the two cross-cutting themes within Structural Fund programmes in the UK is made in the *National Strategic Reference Framework* (NSRF) 2006.

5.4 The aim is to promote equal opportunities for all within the context of the opportunities offered by the Regional Competitiveness & Employment programme and to prevent any discrimination on the grounds of gender, disability, ethnic origin, religion or belief, age, sexual orientation and with regard to the bilingual nature of many of the region's communities.

5.5 Promoting equal opportunities for all will contribute to the objectives of the programme by:

- reducing injustice and thus promoting social cohesion with a wide range of benefits including an improved environment for economic development;
- seeking to ensure that all people living in East Wales have the opportunity to use their skills and abilities to best effect; and
- raising the levels of GDP per head and addressing the imbalance in earnings of women and men.

5.6 These are key challenges, and the analyses contained in Chapter 2 and Annex B provide supporting evidence of the relatively disadvantaged positions of women, disabled people, older people and Black and Minority Ethnic people, clearly evidenced in measures of economic inactivity.

## Policy Context

5.7 The European Community has a long-standing commitment towards equal opportunities, and equal treatment between men and women, aiming to eliminate all forms of discrimination through a variety of instruments; joint declarations, resolutions, directives and action programmes. The integration of equal opportunities in the Structural Funds is helping to overcome inequalities between men and women in the labour market.

5.8 The *Integrated Guidelines for Growth and Jobs* emphasise the importance of equal opportunities and combating discrimination. The European Commission's Communication on "*Working Together for Growth and Jobs*"<sup>155</sup> indicates that it will be difficult to achieve the ambitious Lisbon strategic objectives if large groups of the EU's population are excluded from jobs, training and other opportunities.

5.9 In line with the equality principles enshrined within the Amsterdam Treaty, the National Assembly for Wales has a duty to promote equality of opportunity, as stipulated under Section 120 of the Government of Wales Act 1998: '*The Assembly shall make appropriate arrangements with a view to securing that its functions are exercised with due regard to the principle that there should be equality of opportunity for all people.*'

5.10 The commitment to equality of opportunity has also been re-enforced in several Welsh Assembly Government key strategy documents, including *Wales: A Vibrant Economy*. One of its four key priorities is to increase employment supporting job creation and helping individuals to tackle barriers to labour market participation and the world of work.

5.11 *The Wales Spatial Plan* takes forward the Welsh Assembly Government's commitment to tailor its policies to the differing needs of the different parts of Wales, in which equality will be an integral part to delivering a sustainable future.

5.12 The Welsh Assembly Government's Sustainable Development Action Plan 2004–2007, Skills and Employment Action Plan 2005, Making the Connections and strategies such as Extending Entitlement and 14–19 Learning Pathways, all highlight the importance of equality in its approach to policy delivery.

5.13 The Welsh Assembly Government is committed to mainstreaming the Welsh language. The second Annual Report on Iaith Pawb (National Action Plan for a Bilingual Wales) and the Welsh Language Scheme<sup>156</sup> highlighted the good progress made during 2004–2005, but recognised that more needs to be done to ensure that mainstreaming the Welsh language occurs among all new projects and initiatives.

---

<sup>155</sup> COM (2005)24 Working Together for Growth and Jobs

<sup>156</sup> The Welsh Language Scheme: [http://new.wales.gov.uk/topics/welsh\\_language/WLS-CIG/1249162/?lang=en](http://new.wales.gov.uk/topics/welsh_language/WLS-CIG/1249162/?lang=en)

## Current and Future Legislative Framework

5.14 There is a range of legislation<sup>157</sup> that underpins the equality agenda. There are also several new pieces of legislation in development. The Equality Bill and related legislation will help to place all aspects of equality on a more common footing, and make it easier to mainstream equality as a whole in the business of Government. The Bill sets out plans to establish a new body, in October 2007, called the Commission for Equality and Human Rights (CEHR). The body will have wide-ranging powers to tackle discrimination and prejudice, and to promote equality.

5.15 The CEHR will bring together, in a single body, the work of the Commission for Racial Equality (CRE), the Disability Rights Commission (DRC) and the Equal Opportunities Commission (EOC). It is planned that the CEHR will be established in October 2007. The CEHR will also have responsibility for the new equality areas of age, religion and belief, and sexual orientation, and will work to promote Human Rights.

5.16 The Equality Bill also includes new powers to outlaw discrimination on the grounds of religion and belief in relation to goods and services and creates a duty on public authorities to promote equality of opportunity between men and women and prohibit sex discrimination in the exercise of public functions. The Bill will also facilitate the introduction of rules to prohibit discrimination in relation to goods and services for lesbian, gay and bisexual people.

5.17 An Equalities Review and the Discrimination Law Review are taking place, with a view to bringing forward a Single Equality Bill at the earliest possible opportunity.

## Objectives

5.18 The four cross-cutting equal opportunities objectives for the Regional Competitiveness & Employment programme are set out below. These have been developed using evidence from the Analysis in Chapter 2 and Annex B. A summary of the lessons learned from implementing the cross-cutting themes in the 2000-2006 Programmes is at Annex L. An analysis has also been carried out of the potential impact of supported activities on the Programme's equal opportunities

The Human Rights Act: <http://www.opsi.gov.uk/acts/acts1998/19980042.htm>

objectives. This is represented in the form of an Analysis and Matrix and is available at Annex B.

5.19 The following four equal opportunities objectives will guide the implementation of each of the Priorities in Chapter 4 within the context of the activities to be funded.

*Objective 1: Increase the number of individuals who have multiple disadvantages accessing employment and self employment.*

5.20 The creation of the right opportunities and support for individuals is crucial if they are to play an active role in the labour market. Positive action measures, in many cases a mixture of measures, need to be taken to ensure particular groups are able to take advantage of employment and training opportunities involving a multi agency approach. Where ever possible, those targeted for positive action measures should have the opportunity to influence the design of proposed activities. Access to the labour market, vocational training and education should also be made available for the re-integration of victims following the EU Action Plan on Trafficking in Human Beings<sup>158</sup>.

*Objective 2: Increase the numbers of women, BME people and disabled people, securing training and employment in higher paid and higher skilled sectors and self-employment*

5.21 Sustained economic advances can only be achieved if previously excluded groups secure access to higher level training and ultimately higher level jobs. This can partly be achieved by ensuring equal access to business support measures, access to funds and advice, home reconciliation strategies by employers, equality training for providers and a supportive physical environment that offers ease of access, safety and childcare. For members of excluded groups to take full opportunity of the increased access offered by the programme it will be important for both business and training organisations to take account of their needs, and in turn allow them to make the fullest possible contribution to the region's economy.

*Objective 3: Challenging occupational segregation by increasing the numbers of women and men training or re-training in non-traditional areas, focusing on those areas where there are skills shortages.*

5.22 Women still face both horizontal and vertical segregation. The focus will be on combating gender stereotypes from an early age, providing awareness training to teachers and students, and encouraging young women and men to explore non-traditional educational paths. It is as important to facilitate women's entry into non-traditional sectors, as it is to promote men's presence in sectors traditionally occupied by women. Particular attention should be given to facilitating women's entry into science, engineering, construction, ICT and Management.

---

<sup>158</sup> EU Action Plan on Trafficking in Human Beings:  
[http://www.eu2006.fi/news\\_and\\_documents/other\\_documents/vko47/en\\_GB/1164354364442/](http://www.eu2006.fi/news_and_documents/other_documents/vko47/en_GB/1164354364442/)

*Objective 4: Increase the numbers of employers and training organisations to develop equality and diversity strategies, including monitoring systems and methods for feeding in improvements.*

5.23 Evidence from across Europe shows that groups of people who are most frequently the victims of discrimination are likely to experience the greatest difficulties in accessing the labour market<sup>159</sup>. The development of good equality structures and practices will increase the ability to harness and develop the skills and talents of all those able to enhance the economic wealth of the region. For example, employers, training and education providers, and business advisors should develop their own diversity strategies and training that recognise the need to develop flexible work and training delivery methods, child and elder care support, and accessible environments. It will also be important to drive forward the recognition that work-home reconciliation applies equally to men as it does to women. Monitoring of equal opportunities and diversity strategies are crucial, as is a formal mechanism to build in improvements. Combating prejudice and discrimination will promote wider social participation, particularly employability.

### **Operational Strategy**

5.24 The Managing Authority is committed to ensuring that gender equality and equal opportunities are promoted in the preparation, implementation, monitoring and evaluation of the Operational Programme. Equally, the Managing Authority will strive for a balanced participation of women and men in the management and implementation of the operational programme at local, regional and national level. Gender and equality mainstreaming i.e. ensuring the integration of the gender perspective at all stages will be promoted alongside specific actions for women and other groups. Accessibility for disabled persons shall be considered in defining the operations to be supported by the Funds and in the various stages of implementation.

5.25 Each project supported under the programme will be expected to contribute to the relevant equal opportunities objectives and to adopt the relevant indicators of equality of opportunity set out in the indicator tables for Chapter 4 in respect of each Priority. Specific activities to support the implementation of the Equal Opportunities theme will include:

- specialist advice, including equal opportunities assessments, will be available at an early stage to ensure the integration of equal opportunities objectives into project plans;
- specialist advice to projects on equal opportunities mainstreaming issues, provided at early and ongoing stages in the process;
- activity level guidance together with best practice case study examples that will provide specific information on how sponsors can address equal opportunities within their project plans;
- equal opportunities targets integrated into priorities acting as a lever to encourage projects to contribute. See Chapter 4 for specific priority targets;

---

<sup>159</sup> Commission of the European Communities 1999/564

- regular monitoring of progress, allowing for early intervention if necessary (see Chapter 6);
- update reports to PMC and other stakeholders;
- continued involvement of the external Cross Cutting Themes Group; and
- WEFO encouraging key equality organisations to be involved in supporting an effective network of specialist support.

## ENVIRONMENTAL SUSTAINABILITY

### Rationale

5.26 Inclusion of environmental sustainability as a cross-cutting theme will help to ensure that economic development will not adversely impact on the environment. It will also promote the potential of the environment as an economic driver. This is identified in the *Integrated Guidelines for Growth and Jobs*, particularly in relation to the sustainable use of resources.

5.27 A healthy environment is essential for the quality of life of the people of Wales and for a healthy economy. A high quality, attractive environment will play a key role in attracting and retaining people to live and work in Wales. It underpins Wales' tourist industry with its turnover of £2.3 billion, and the 117,000 full time equivalent jobs in Wales associated with the use, management and appreciation of the natural environment<sup>160</sup>. The direct and indirect effect of this employment and other spin-off jobs generates goods and services worth £8.8 billion to Wales each year and 9% of Welsh GDP<sup>161</sup>. The environment is inextricably linked to the economic health of Wales.

5.28 The key environmental issues affecting the region are:

- climate change caused largely by the burning of fossil fuels which will increase sea levels and cause an increase in extreme weather events;
- a relatively poor transport infrastructure with a corresponding reliance on private vehicles;
- a high dependency on fossil fuels as an energy source and low level of renewable energy;
- low rates of reuse and recycling of waste and an inadequate waste management infrastructure;
- potential deficits in some water supply zones;
- diffuse pollution from agriculture, acid precipitation and other sources;
- threats to fisheries from pollution and unsustainable fishing practices;
- a high quality landscape although some areas are blighted by historic industry;
- extensive areas designated for nature conservation although biodiversity and habitats are under threat from a variety of causes; and
- a rich historic environment.

<sup>160</sup> Valuing our environment: [http://www.rspb.org.uk/Images/Wales%20valuing%20full\\_tcm5-31051.pdf](http://www.rspb.org.uk/Images/Wales%20valuing%20full_tcm5-31051.pdf)

<sup>161</sup> Ibid.

## Policy Context

5.29 The *National Assembly for Wales' Sustainable Development Scheme* sets out its proposals for promotion of sustainable development through all its functions.

5.30 *The Environment Strategy for Wales* forms a key element of delivery of the Assembly's sustainable development duty. It sets out how the specific challenges in relation to the environmental 'leg' of sustainable development (the other 'legs' being social and economic) will be met.

5.31 A key part of *Wales: A Vibrant Economy* is to ensure that programmes and policies support sustainable development. The more efficient use of resources is emphasised, together with encouragement of innovation and technological development that is crucial in shaping a sustainable future.

5.32 The importance of improving awareness and skills relating to sustainable development are identified in the *Welsh Assembly Government's Education for Sustainable Development and Global Citizenship Strategy*. It aims to integrate sustainable development into education of children, young people, and adults. Environmental Sustainability is one of the three pillars of sustainable development. It is therefore appropriate for the environmental sustainability cross cutting theme to be promoted within the wider concept of sustainable development in the education, training and skills projects supported by the ESF Regional Competitiveness & Employment programme. Developing awareness and skills are essential if people are to properly understand what has to be done to reduce environmental impacts and sustain the environment for future generations.

5.33 The 6th EU Environment Action Programme 2002–2012 sets out the environmental objectives and priorities that are an integral part of the European Community's strategy for sustainable development. Objectives are defined in the programme for tackling climate change, protecting biodiversity, promoting environment and health, the sustainable use of natural resources, and the management of waste. The EU action programme is under-pinned by Community legislation and directives aimed at improving the environment.

### **Environmental Sustainability Objectives for the Regional Competitiveness & Employment Programmes**

5.34 There is a clear opportunity for the Regional Competitiveness & Employment Operational Programmes to make a significant contribution to the outcomes identified in Wales and Europe's environmental strategies. This can be achieved within the overall framework of the Lisbon and Gothenburg agenda because of the clear link between a healthy environment, social welfare and a thriving economy.

5.35 The overall environmental sustainability aim and objectives of the Regional Competitiveness & Employment Programmes are set out below. These are in line with the environmental themes and outcomes identified in the *Environment Strategy for Wales*. They are also consistent with the:

- lessons learned from current Structural Funds programmes 2000–2006;
- interventions which will be supported by the programme;
- objectives defined in the European Community's 6th Environmental Action programme.

5.36 The overall aim is to enhance the environmental assets within East Wales, while promoting the sustainable use of the environment for social and economic benefit. The objectives defined below will be promoted in two ways by ESF supported projects. Firstly, by the project focussing on, or integrating, the environmental sustainability objectives into education and training packages, and secondly, by taking direct action in the way the project is implemented to reduce direct effects on the environment such as by improving resource efficiency and encouraging sustainable transport.

(1) *Reducing emissions of greenhouse gases to help limit the extent of climate change and help to adapt to its effects*

5.37 Training and education programmes should raise awareness of the causes and effects of climate change, how greenhouse gas emissions can be reduced and how to adapt to the consequences of climate change. Specialist skills training could be directed at specific climate change issues.

(2) *Promoting sustainable transport*

5.38 Direct action should be taken to promote sustainable transport through project delivery mechanisms which reduce the need for travel or promote sustainable forms of transport. The effects of transport on the environment and human health and the principles of sustainable transport should be promoted through education and training programmes. Specialist training could be designed to address specific transport issues that aim to reduce its impact such as emissions to air and transport congestion.

(3) *Promoting the efficient use of natural resources*

5.39 The sustainable management of the natural resources in the region for social and economic benefit will be promoted. Education and training programmes should promote sustainable waste management within the principles of waste minimisation, reuse, recycling and safe disposal. Specialist skills should be developed to address specific resource efficiency issues.

(4) *Promoting the sustainable management of the land, sea and inland waters*

5.40 A high level of protection will be provided for designated conservation areas and a formal undertaking is given that no sites protected under Natura 2000 will be harmed by projects funded under the Regional Competitiveness & Employment Programmes. Specialist training should be supported to improve skills of sustainable management of the natural environment. Integration of this objective into broader training and education programmes to help people understand the natural environment and the how it should be managed sustainably.

- (5) *Improving the quality of the local built environment and opportunities to access green space*

5.41 High standards of environmental performance of sites and premises will be supported through specialist skills training related to the design and management of buildings. Education and training can also help individuals understand how their actions can contribute to energy efficiency and reducing the use of material resources. The health and recreational benefits of access to green space should be promoted.

- (6) *Minimising the risk of pollution and other environmental hazards thereby safeguarding the health of communities and the environment.*

5.42 Minimising the risk of pollution and other environmental hazards should be supported through specialist training and by making individuals aware of the action that they can take to reduce risks and safeguard the health of the community.

### **Operational Strategy**

5.43 Each project that will be supported by the programme will have to contribute to the relevant environmental sustainability objectives. The environmental sustainability targets that have been integrated into the Priorities (Chapter 4) will be a strong lever to encourage projects to contribute to the environmental sustainability objectives. Specific activities to support the implementation of the environmental sustainability theme will include:

- specialist advice available at an early stage to ensure that opportunities to contribute to the environmental sustainability objectives are integrated into project plans;
- guidance available to show project sponsors how they can integrate the appropriate activities into project plans. These activities would include the integration of environmental sustainability into mainstream skills programmes and the delivery of specialist skills training aimed at promoting economic growth in the environmental sector;
- support will be provided to project sponsors by the environmental sustainability advisers within WEFO and the competent environmental authorities (Environment Agency and Countryside Council for Wales) will participate within partnerships; and
- monitoring of environmental sustainability indicators and targets and the provision of annual reports to the PMC on progress in achieving the environmental sustainability objectives.

5.44 An analysis has been carried on the intended impact of supported activities on the Programme's environmental sustainability objectives. This is represented in the form of a matrix available at Annex C.

5.45 The indicators for the Environmental Sustainability cross cutting theme are included within the main Indicators and Targets tables, in each of the Priorities in Chapter 4.

## **CHAPTER 6: IMPLEMENTING PROVISIONS**

### **Introduction**

6.1 This chapter sets out the implementation provisions for the East Wales Regional Competitiveness & Employment ESF Operational Programme. Information is provided in accordance with Council Regulation (EC) No 1083/2006 of 11 July 2006, which lays out the general provisions on the European Regional Development Fund (ERDF), the European Social Fund (ESF) and the Cohesion Fund. Further information is provided in accordance with Regulation (EC) No 1081/2006 on the ESF, Regulation (EC) No 1080/2006 on the ERDF, and Regulation (EC) No 1828/2006 setting out the implementation rules.

6.2 The following text does not substitute for the Council Regulations 1083/2006, 1080/2006, 1081/2006 or Commission Regulation 1828/2006 and in instances of uncertainty or conflict, these Council Regulations prevail over the Implementing provisions. The provisions will be supplemented by any decisions, rule and guidance adopted pursuant to Council Regulation (EC) No 1083/2006<sup>162</sup>.

### **Designation of Authorities**

6.3 The programme will be managed in accordance with the principle of sound financial management. Responsibilities for management of the programme by the Welsh Assembly Government give full recognition to this principle and the need for appropriate separation of functions. In particular:

- appropriate separation between the functions of the Managing Authority, Certifying Authority and Audit Authority in accordance with Article 58 of Council Regulation 1083/2006; and
- appropriate separation between the verification functions identified in Article 13 of Commission Regulation 1828/2006 and the Welsh Assembly Government as a beneficiary under the Programme.

6.4 The formal delegations of responsibility to the Managing Authority, Certifying Authority and Audit Authority are discussed in the following sections. The organogram at Annex F provides an overall picture of the key responsibilities and reporting lines within the Welsh Assembly Government, with the Managing and Certifying Authority functions delegated to the Welsh European Funding Office and the Audit Authority function to the Internal Audit Service of the Welsh Assembly Government which is, in accordance with best practice, functionally independent of all operational areas of the Welsh Assembly Government.

---

<sup>162</sup> All Articles referred to relate to Council Regulation (EC) No. 1083/2006 of 11 July 2006 – General Provisions on the European Regional Development Fund, the European Social Fund and the Cohesion Fund, except where otherwise stated. In terms of legal basis, this text does not substitute the above regulation.

## Managing Authority

6.5 The Managing Authority for the East Wales ESF Regional Competitiveness & Employment programme will be the Welsh Ministers. It is anticipated that the management functions of the Managing Authority will be exercised by staff of the Welsh European Funding Office (WEFO) under the authority of the relevant Welsh Minister.

6.6 There is a clear separation of functions within WEFO and organisational charts can be found on the WEFO website<sup>163</sup>. Within twelve months of the approval of the Operational Programme a description of the systems, organisation and procedures of the Managing Authority will be produced in accordance with Article 71.

6.7 In accordance with Article 60, and the principles of sound financial management, the Managing Authority will be responsible for:

- ensuring that operations are selected for funding in accordance with the criteria applicable to the operational programme and that they comply with applicable Community and national rules for the whole of their implementation period;
- ensuring that, for the purposes of the selection and approval of operations under Article 60 (a), beneficiaries are informed of the specific conditions concerning the products or services to be delivered under the operation, the financing plan, the time-limit for execution, and the financial and other information to be kept and communicated. It shall satisfy itself that the beneficiary has the capacity to fulfil these conditions before the approval decision is taken;
- carrying out verifications under Article 60(b), to cover administrative, financial, technical and physical aspects of operations, as appropriate. Verifications shall ensure that the expenditure declared is real, that the products or services have been delivered in accordance with the approval decision, that the applications for reimbursement by the beneficiary are correct and that the operations and expenditure comply with Community and national rules. They shall include procedures to avoid double-financing of expenditure with other Community or national schemes and with other programming periods. Verifications shall include the following procedures:
  - administrative verifications in respect of each application for reimbursement by beneficiaries;
  - on-the-spot verifications of individual operations.
- ensuring that on-the-spot verifications are carried out on a sample basis for an Operational Programme. The Managing Authority shall keep records describing and justifying the sampling method and identifying

---

<sup>163</sup> Link to organisational charts: <http://www.wefo.wales.gov.uk/default.asp?action=page&ID=84>

the operations or transactions selected for verification. The Managing Authority shall determine the size of the sample in order to achieve reasonable assurance as to the legality and regularity of the underlying transactions, having regard to the level of risk identified by the Managing Authority for the type of beneficiaries and operations concerned. It shall review the sampling method each year;

- establishing written standards and procedures for the verifications carried out and keeping records for each verification, stating the work performed, the date and the results of the verification, and the measures taken in respect of irregularities detected;
- ensuring adequate separation of functions in accordance with Article 58 (b) for arrangements for the verifications, where the body designated as the Managing Authority is also a beneficiary under the Operational Programme;
- ensuring that there is a system for recording and storing in computerised form accounting records for each operation under the Operational Programme and that the data on implementation necessary for financial management, monitoring, verifications, audits and evaluation are collected;
- ensuring that beneficiaries and other bodies involved in the implementation of operations maintain either a separate accounting system or an adequate accounting code for all transactions relating to the operation without prejudice to national accounting rules;
- ensuring that evaluations of the Operational Programme are carried out according to Article 47;
- setting up procedures to ensure that all documents regarding expenditure and audits required to ensure an adequate audit trail are held in accordance with the requirements of Article 90;
- ensuring audit trails are adequate in line with the Implementing Regulation. For the purposes of Article 60 (f), an audit trail shall be considered adequate where, for the Operational Programme concerned, it complies with the following criteria:
  - it permits the aggregate amounts certified to the Commission to be reconciled with the detailed accounting records and supporting documents held by the Certifying Authority, Managing Authority and beneficiaries as regards operations co-financed under the Operational Programme;
  - it permits verification of payment of the public contribution to the beneficiary;
  - it permits verification of application of the selection criteria established by the Programme Monitoring Committee for the Operational Programme;
  - it contains in respect of each operation, as appropriate, the technical specifications and financing plan, documents concerning the grant approval, documents relating to public

procurement procedures, progress reports and reports on verifications and audits carried out.

- ensuring that the Certifying Authority receives all necessary information on the procedures and verifications carried out in relation to expenditure for the purpose of certification;
- the reporting and monitoring procedure for irregularities and for the recovery of amounts unduly paid in accordance with Article 58 of Regulation (EC) 1083/2006. This will ensure the protection of the European Communities financial interests (Regulations (EC) No.'s 2988/95 and 2185/96).
- guiding the work of the Programme Monitoring Committee and providing it with the documents required to permit the quality of the implementation of the operational programme to be monitored in the light of its specific goals;
- drawing up and, after approval by the Monitoring Committee, submitting to the Commission the annual and final implementation reports;
- ensuring compliance with information and publicity requirements laid down in Article 69; and
- providing the Commission with information to allow it to appraise major projects.

### **Certifying Authority**

6.8 The Certifying Authority for the East Wales ESF Regional Competitiveness & Employment programme will be the Welsh Ministers. It is anticipated that the management functions of the Certifying Authority will be exercised by staff of the Welsh European Funding Office (WEFO) under the authority of the relevant Welsh Minister.

6.9 There is a clear separation of functions within WEFO. Within WEFO, the functions of the Managing Authority and Certifying Authority will be functionally separate, with a clear division of responsibilities and management arrangements. An organisational chart is available on the WEFO website<sup>164</sup>. Within twelve months of the approval of the Operational Programme a description of the systems, organisation and procedures of the Certifying Authority will be produced in accordance with Article 71.

6.10 In accordance with Article 61 the Certifying Authority will be responsible for:

- drawing up and submitting to the Commission certified statements of expenditure and applications for payment;
- certifying that:
  - the statement of expenditure is accurate, results from reliable accounting systems and is based on verifiable supporting documents;

---

<sup>164</sup> Link to organisational charts: <http://www.wefo.wales.gov.uk/default.asp?action=page&ID=84>

- the expenditure declared complies with applicable Community and national rules and has been incurred in respect of operations selected for funding in accordance with the criteria applicable to the programme and complying with Community and national rules;
- ensuring for the purposes of certification that it has received adequate information from the Managing Authority on the procedures and verifications carried out in relation to expenditure included in statements of expenditure;
- taking account for the purposes of certification of the results of all audits carried out by or under the responsibility of the Audit Authority;
- maintaining accounting records in computerised form of expenditure declared to the Commission;
- keeping an account of amounts recoverable and of amounts withdrawn following cancellation of all or part of the contribution for an operation. Amounts recovered shall be repaid to the general budget of the European Union, prior to the closure of the Operational Programme by deducting them from the next statement of expenditure; and
- sending to the Commission a statement by 31 March each year as from 2008, in the format in Annex XI of the Implementing Regulation, identifying for each priority axis of the Operational Programme:
  - the amounts withdrawn from statements of expenditure submitted during the preceding year following cancellation of all or part of the public contribution for an operation;
  - the amounts recovered which have been deducted from these statements of expenditure; and
  - a statement of amounts to be recovered as at 31 December of the preceding year, classified by the year in which recovery orders were issued.

## **Audit Authority**

6.11 The Audit Authority for the East Wales ESF Regional Competitiveness & Employment programme will be the Welsh Ministers. It is anticipated that the management functions of the Audit Authority will be exercised by staff of the Internal Audit Service (IAS) under the authority of the relevant Welsh Minister.

6.12 IAS is functionally independent of WEFO, and will be responsible for verifying the effective functioning of the management and control system. The IAS will offer an opinion on the systems of management and control. IAS staff work to internationally accepted audit standards and consist mainly of qualified or part qualified auditors or accountants. Within twelve months of the approval of the Operational Programme a description of the systems, organisation and procedures of the Audit Authority will be produced in accordance with Article 71.

6.13 In accordance with Article 62, the Audit Authority will be responsible for:

- ensuring that audits are carried out to verify the effective functioning of the management and control systems of the Operational Programme;
- ensuring audits are carried out on operations on the basis of an appropriate sample to verify expenditure declared;
- presenting to the Commission within nine months of the approval of the Programme an audit strategy covering: the bodies which will perform the audits referred to in the two bullets above; the methods to be used; the sampling method for audits on operations; and the indicative planning of audits to ensure that the main bodies are audited and that audits are spread evenly throughout the programming period;
- by 31 December each year from 2008 to 2015:
  - submitting to the Commission an annual control report setting out the findings of the audits carried out during the previous 12 month period ending on 30 June of the year concerned in accordance with the audit strategy of the operational programme and reporting any shortcomings found in the systems for the management and control of the programme. The first report to be submitted by 31 December 2008 shall cover the period from 1 January 2007 to 30 June 2008. The information concerning the audits carried out after 1 July 2015 shall be included in the final control report supporting the closure declaration;
  - issuing an opinion, on the basis of the controls and audits that have been carried out under the responsibility of the Audit Authority, as to whether the management and control system functions effectively, so as to provide a reasonable assurance that statements of expenditure presented to the Commission are correct and as a consequence reasonable assurance that the underlying transactions are legal and regular;
  - submitting, where applicable, a declaration for partial closure assessing the legality and regularity of the expenditure concerned;
- submitting to the Commission at the latest by 31 March 2017 a closure declaration assessing the validity of the application for payment of the final balance and the legality and regularity of the underlying transactions covered by the final statement of expenditure, which shall be supported by a final control report; and
- ensuring that audit work takes account of internationally accepted standards.

### **Intermediary Bodies**

6.14 The Managing and Certifying Authorities will carry out all tasks as outlined in the above sections and no Intermediary Bodies will be employed as described in Article 59(2).

## Partnership

6.15 Sustainable and effective solutions to the challenges facing Wales are increasingly reliant on the direct and active participation of all stakeholders at national, regional and local levels. The Managing Authority is committed to working through good-quality partnerships and networks to rally key stakeholders behind the Lisbon reform agenda so that resources are genuinely focused on growth and jobs.

6.16 In accordance with Article 11, the Managing Authority will work in close co-operation with both the Commission and representative partners at national, regional and local level, including representatives in the economic, social and environmental spheres. This partnership engagement will cover the preparation, implementation, monitoring and evaluation of the Operational Programme.

### *(a) Preparation of Operational Programme*

6.17 The Wales chapter of the National Strategic Reference Framework (NSRF) and this Operational Programme have been developed in partnership with key stakeholders across all relevant sectors including social partners, equality bodies, higher and further education sector, environment agencies, local authorities, the voluntary and community sector, public and private sectors. The main representative partnership input has been provided through the Post-2006 External Stakeholders Group. This is a broad-based partnership forum which brings together representatives of all the key stakeholders.

6.18 Expert input has also been provided through five workstream groups comprising partners from a wide range of organisations in the public, private and voluntary sectors. In particular the Operational Programme Group advised on the preparation of the programme and contributed to the drafting; the Monitoring and Evaluation workstream advised on the development of the monitoring and evaluation systems, including programme and priority level indicators, and provided oversight of the ex-ante evaluation process; and the Programme Management Workstream supported the development of the implementation strategy, including the arrangements for Strategic Frameworks. In line with the principle of transparency, notes of the meetings of the Post 2006 External Stakeholders Group and the various workstream groups have been published on the WEFO web site<sup>165</sup>.

6.19 A public consultation on the Regional Competitiveness & Employment programme took place over the period 01 December 2006 – 26 January 2007, supported by regional events. A full list of consultees is given at Annex A. A short summary of the consultation responses is provided as part of the Strategy Chapter (Chapter 3) and a more detailed analysis prepared by CRG Research Ltd has been published, alongside individual consultation responses, on the WEFO web site.

---

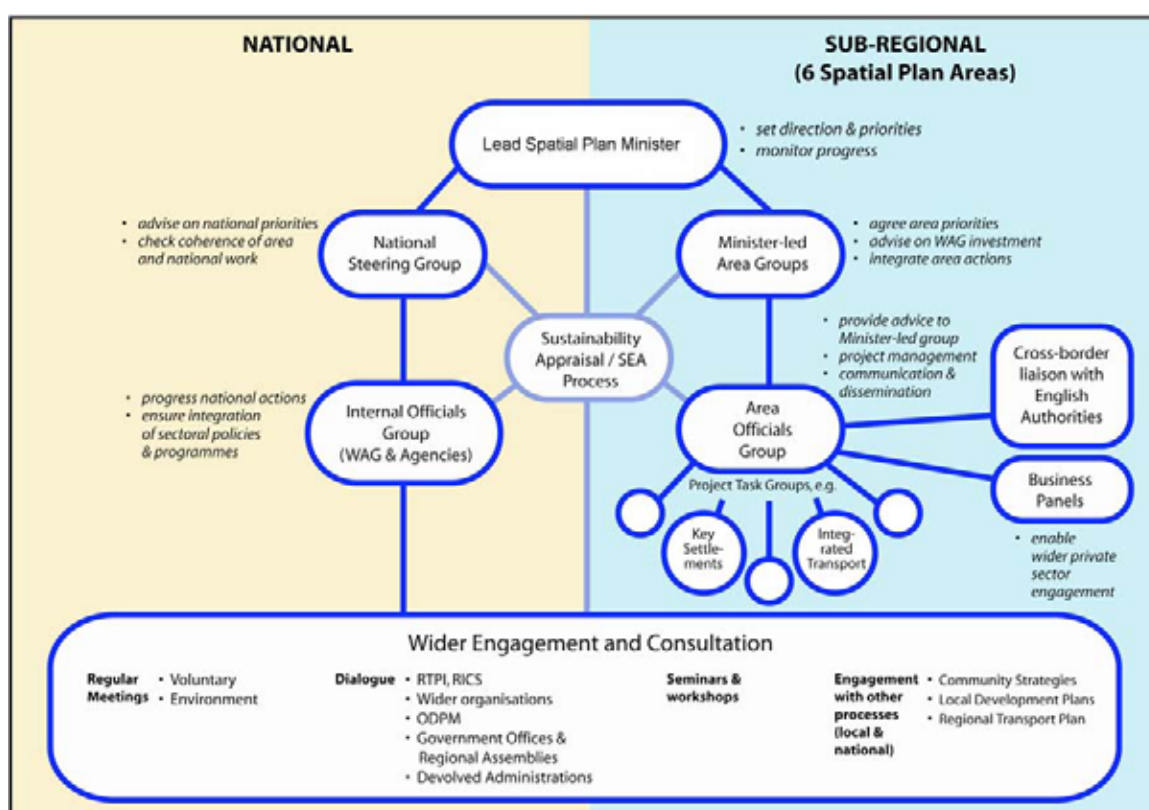

<sup>165</sup> At [www.wefo.wales.gov.uk](http://www.wefo.wales.gov.uk)

## (b) Implementation of Operational Programme

6.20 The active involvement of partners in the implementation of the Operational Programme is a cornerstone of the overall implementation strategy. The Programme Monitoring Committee (see paragraphs 6.26 – 6.31 and 6.34 – 6.38) will work with the Managing Authority to ensure the effectiveness and quality of the implementation of the Operational Programme. In accordance with Article 11, the Programme Monitoring Committee will be appointed by the Managing Authority and will include representative and expert partners at national, regional and local level in the economic, social, environmental and other spheres.

6.21 The detailed planning of operations for this Programme will be focused by means of a number of “Strategic Frameworks” (see paragraphs 6.39 – 6.48). These frameworks are operational strategies for delivering on the various themes within the Operational Programme. They will be used, along with any other selection and prioritisation criteria established by the Programme Monitoring Committee in line with Article 65(a), to guide the Managing Authority in the selection of projects. All of the frameworks will cover the spatial aspects of delivery.

**Figure 26: Wales Spatial Plan Collaboration and Implementation Structures**

6.22 The thematically driven Strategic Frameworks will be developed and implemented through active engagement with partnerships relevant to the themes that they cover. Many of these will be existing, well-established partnerships (e.g. the Wales Employment Advisory Panel, Future Skills Wales Steering Group, Skills for Business Network etc). For some frameworks there will be a need to establish

new bespoke arrangements. The arrangements for partnership engagement will provide an open, efficient and effective means of gathering stakeholder views on and input into the development and future refinement of Strategic Frameworks. These arrangements will also facilitate genuine constructive challenge.

6.23 Strategic Frameworks will be posted in draft form on the WEFO website for comment prior to their agreement, allowing for the widest possible engagement of individuals and organisations at all levels. The website will also provide a space for prospective project sponsors to publicise brief details of their project ideas with a view to encouraging partnership and collaboration at a project level.

6.24 The Managing Authority will ensure that each Strategic Framework is developed and kept under review in partnership with relevant stakeholders. The partnership arrangements for each framework will require the agreement of the Managing Authority and will be described clearly within the framework documents for the information of all stakeholders.

6.25 In accordance with Article 5 of the ESF Regulation [1081/2006], the Managing Authority will promote good governance and partnership, including by encouraging the participation of social partners in programme activities. This includes allocating an appropriate amount of ESF resources to capacity building actions as defined in Article 5(3). The Managing Authority will also encourage participation and access by voluntary and community organisations, particularly in projects that promote social inclusion, gender equality and equal opportunities.

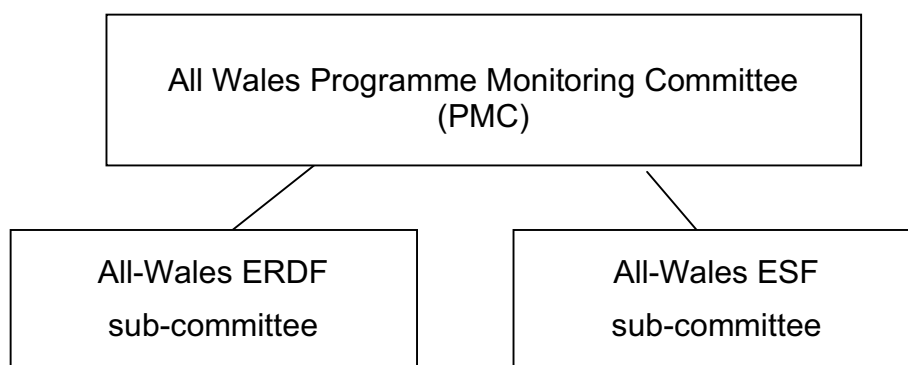

#### *(c) Monitoring of the Operational Programme*

6.26 In accordance with the provisions of Article 63, a single Programme Monitoring Committee (PMC) will be established for the two Regional Competitiveness & Employment (ERDF and ESF) and the two Convergence (ERDF and ESF) programmes in Wales. This will help to maximise the synergies between the respective programmes and promote complementary action across programme boundaries. The single PMC will support the effective transfer of best practice and lessons learned and facilitate a coherent all-Wales approach to issues such as information and publicity, research and evaluation, cross-cutting themes, territorial co-operation and the promotion of innovation. In looking for such integration the Managing Authority recognises that there will be a need for robust arrangements to be in place to ensure that each of the four Programmes is effectively monitored. It is planned to establish two standing sub-committees responsible for monitoring and advising the main PMC on the performance of each of the ERDF and the ESF programmes respectively. The detailed tasks these sub-committees will perform, along with the membership, will be for the full PMC itself to determine and elaborate within the rules of procedure.

6.27 The PMC, at its first meeting, will be invited to discuss and agree the membership and functions of the two standing committees and decide the level at which its responsibilities will be discharged by them in accordance with the European Regulations. During the programming period 2007–2013, the PMC may decide to establish other sub-groups, either of a task and finish variety or on a more permanent basis. Where necessary the Committee may propose to the

Managing Authority that other experts or stakeholder groups may be appointed to advise such sub-committees. The proposed model is given at Figure 27:

**Figure 27. Proposed Committee Structure**

6.28 The PMC shall comprise 24 Members plus a Chair. The Chairs of the PMC and its standing committees will be representatives of the Managing Authority. The European Commission, staff of WEFO and, where appropriate, the EIB and EIF shall participate in an advisory capacity in the PMC and its committees.

6.29 In line with the provisions of Article 11, the majority of members will be drawn from principal regional partners and statutory bodies as follows:

**Table 30: Representative Membership of PMC by Sector Organisation**

<b>Sector Organisation</b>	<b>Members</b>
Local Government (1 East Wales; 1 West Wales & the Valleys)	2
Welsh Assembly Government: Economy & Transport	1
Welsh Assembly Government: Education, Culture and Welsh Language	1
Welsh Assembly Government: Sustainability and Rural Development	1
Higher Education	1
Further Education	1
Jobcentre Plus	1
Trade Unions	1
Private Sector – Business	1
Voluntary Sector	1
Social Economy	1
Environment Agency/Countryside Council for Wales	1
Commission for Human Rights and Equality	1
<b>Total</b>	<b>14</b>

6.30 The balance of the PMC will be made up of 10 experts selected by the Assembly Government following an open competition subject to independent scrutiny. These experts will bring a range of abilities, experiences and qualifications to the functions of the PMC which will complement the qualities of

the partnership representatives. These experts will be remunerated in line with the Welsh Assembly Government's normal practice, with payment from domestic sources of funding and not from the Structural Funds.

6.31 We are proposing a minimum target of 40% representation of men and 40% women on the All-Wales PMC, with flexibility over the remaining 20%. We are looking to partner organisations to support this target. Appropriate procedures will also be put in place to ensure complementarity between the ESF and ERDF programmes and the RDP and EFF.

*(d) Evaluation of the Operational Programme*

6.32 The Managing Authority will build upon the good practice of the 2000-06 Programme by setting up an Evaluation Advisory Group (EAG). The EAG will be chaired by a senior Managing Authority official. Membership will consist of experts drawn from partner organisations including the European Commission and other stakeholders. The group will also include technical specialists from the Office of the Chief Social Researcher, Economic Advice Division and the Statistical Directorate within the Welsh Assembly Government.

6.33 EAG will advise and assist in designing the Monitoring and Evaluation Plan; agreeing research designs; quality controlling final reports; and ensuring that findings are disseminated widely. EAG will have responsibility for engaging technical specialists when required to assist with their work.

**Duties of the Programme Monitoring Committee**

6.34 The Managing Authority will provide the secretariat function for the PMC and its meetings. The PMC will draw up its own rules of procedure and agree them with the Managing Authority. The PMC's duties are defined in Articles 65 and 66 of Regulation (EC) 1083/2006.

6.35 In accordance with EU Regulation [1083/2006] Article 63 (2), at its first meeting, the PMC shall draw up and approve detailed provisions for the proper and efficient discharge of the duties assigned to it, including the frequency of its meetings (with a minimum requirement of two meetings per year) and the membership and functions of the proposed two standing sub-committees.

6.36 In accordance with EU Regulation [1083/2006] article 65, the PMC and its sub-committees as appropriate shall satisfy itself as to the effectiveness and quality of the implementation of the Operational Programme. The tasks it will undertake shall include:

- the criteria for selecting the operations to be financed and any revision of those criteria in accordance with programming needs; and
- arrangements for reviewing progress towards achieving the specific objectives and targets of the Operational Programme on the basis of documents submitted by the Managing Authority.

6.37 To this end, and in addition to the above functions it shall:

- monitor progress towards achieving the physical and financial indicators and targets set for the Operational Programme and each Priority axis and examine the evaluations referred to in Article 48(3).
- consider and approve the annual and final implementation reports on implementation referred to in Article 67 before these reports are submitted to the European Commission;
- be informed of the annual control reports and of any comments the Commission may make after examining these reports or relating to these reports;
- propose to the Managing Authority any revision or examination of the Operational Programmes aimed at improving their management, including financial management;
- consider and approve any proposals to amend the contents of the approved Operational Programmes.

6.38 To assist the PMC and subcommittees where appropriate in discharging its statutory responsibilities as identified above the Managing Authority will also ensure that the Committee:

- receives information on commitments, expenditure and outputs (planned and realised) for each theme and individual Priorities, at least on an annual basis;
- agrees the use of Strategic Frameworks by the Managing Authority as part of the criteria for the selection of operations. Advises on the alignment of Strategic Frameworks with the objectives and targets in the Operational Programme, including any subsequent modifications, prior to their approval by the Managing Authority;
- considers the Monitoring and Evaluation Plan of the Managing Authority, and any amendments to the Monitoring and Evaluation Plan, as referred to in Article 48(1);
- is consulted on the Innovative Actions Strategy; and
- receives annual reports on the progress of the Cross Cutting Themes.

## **Implementation and Delivery Arrangements**

### *Planning*

6.39 Programme evaluations have identified that overall impact can be improved by ensuring more ‘joined up’ approaches to project activity and stronger alignment with headline programme objectives. They have also suggested the need for a stronger emphasis on sub-regional collaboration and a simplification of programme structures and implementation arrangements. Furthermore, in the consultation on the Post 2006 programme, there was widespread agreement on the need to adopt a more strategic approach in future to the use of Structural funds.

6.40 The Managing Authority will promote more strategic approaches to implementation, including through the introduction of Strategic Frameworks. These frameworks will be Operational Strategies that take as their starting point the Priorities and themes within the Operational Programme. They will help to ensure the focus and concentration of effort needed to optimise use of the structural funds; they will encourage partnership and collaboration and will help establish operational links and co-ordination between projects.

6.41 A Strategic Framework is defined as:

*A plan to achieve a particular strategic purpose by means of project interventions that are strategically linked.*

6.42 The Frameworks will be planning documents and not financial instruments. Projects will be the “currency” within the Operational Programme and responsibility for project selection, prioritisation and approval will rest with the Managing Authority. Frameworks will be drawn up in accordance with guidance issued by the Managing Authority and will be used by them in the process of selecting and prioritising projects.

6.43 The Frameworks will provide a clear strategic overview and guidance on the fields of Intervention and the kinds of projects and delivery arrangements that will best deliver on the relevant Theme and Priority. They will identify important strategic connections with other Frameworks and, where there is potential for perceived “overlap”, they will explain clearly, for the benefit of prospective sponsors, which kinds of project should be covered by which Framework. They will also identify the scope within their field for Innovative Actions and for Transnational Co-operation (see paragraph 6.53). An indicative list of Strategic Frameworks for the Regional Competitiveness & Employment Programmes is provided at Annex G.

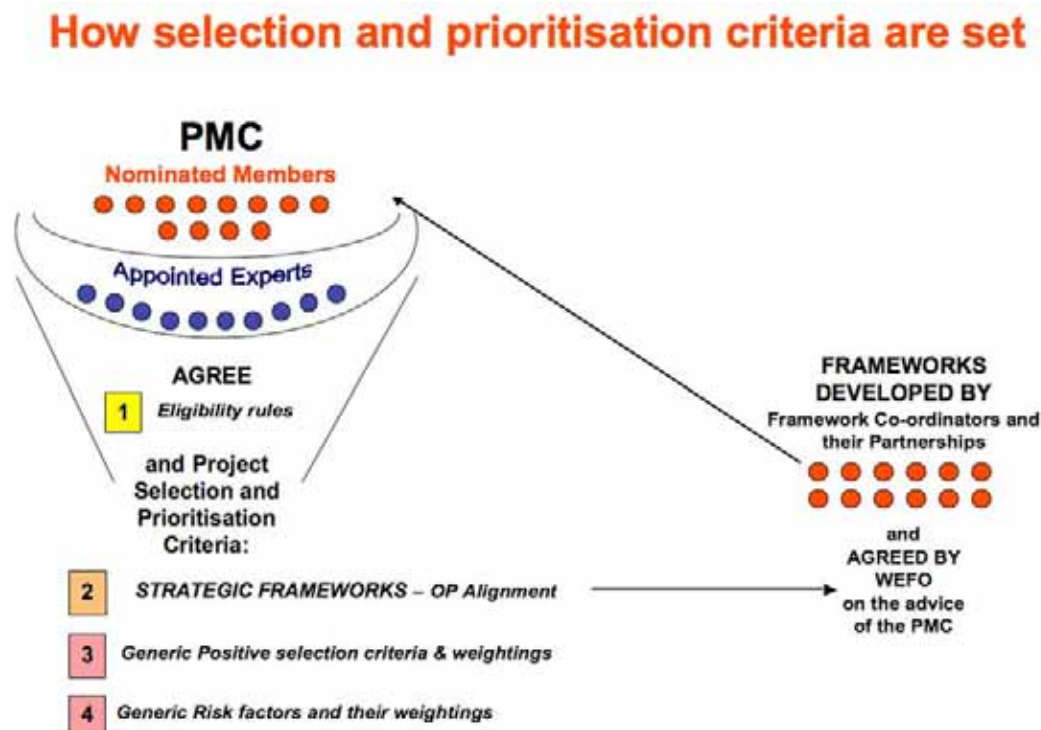

6.44 The development of Strategic Frameworks will be co-ordinated by Welsh Assembly Government Departments and the Wales Spatial Plan (WSP) Area Groups. They will ensure a good alignment between the EU policies for Growth and Jobs and relevant National policies and strategies including the Wales Spatial Plan.

6.45 Dedicated Spatial European Teams (SETs) will be established to support the work of the Spatial Plan Area Groups in co-ordinating the spatially driven Strategic Frameworks. They will also assist thematic Strategic Framework co-ordinators with partnership engagement at a local and sub-regional level. Strategic Framework co-ordinators will also have a role to play, alongside Spatial European Teams and others involved in supporting prospective sponsors, in discussing early ideas with potential project applicants and giving them “without prejudice” views on their likely fit within a framework. The views of Framework Co-ordinators, along with other experts, will be sought by the Managing Authority whenever needed during the course of considering project submissions; but the Managing Authority will make decisions on projects independently on the basis of published Framework content and other PMC-approved selection and prioritisation criteria.

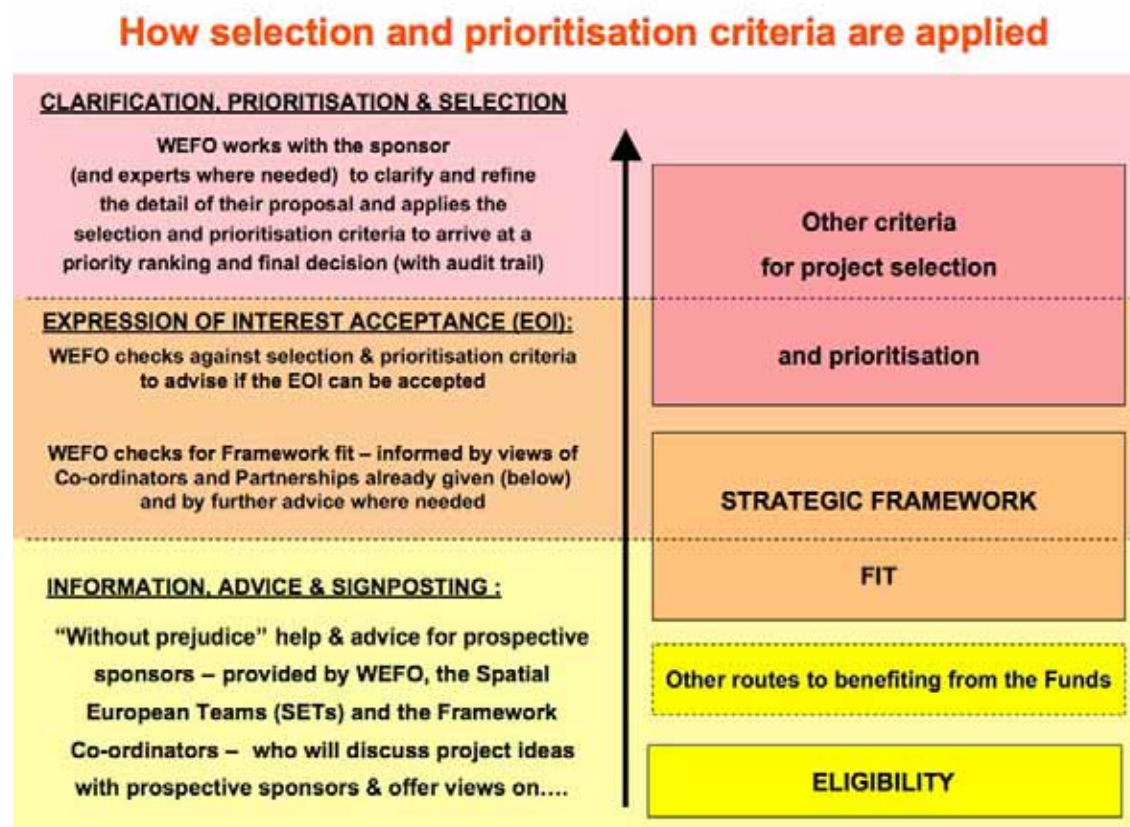

6.46 In agreeing the Strategic Frameworks, the Managing Authority will ensure that the partnership arrangements set out within them provide for a substantial level of “challenge” from the partners and stakeholders engaging in the framework development. As the programme progresses, the results of monitoring and evaluation may highlight the need for adjustment to the framework strategies; therefore it will be necessary to periodically review, adjust and refine their content in consultation with the relevant partnerships. Framework Co-ordinators will remain responsible for co-ordinating this ongoing maintenance of the Frameworks throughout the life of the programme period, which they will continue to do with the active engagement of their partnerships. The responsibilities of Framework Co-ordinators are set out at Annex H.

6.47 Once a Framework is deemed by the Co-ordinator and by the Managing Authority as fit for use, it will be presented to the PMC. Subject to the PMC’s advice on its alignment with the Operational Programme and their agreement that it is fit for use as one of the project selection and prioritisation criteria, the Framework will then be agreed by the Managing Authority. Project fit with the Framework will be one of the project selection and prioritisation criteria; other criteria will be approved by the PMC along with the general eligibility criteria to apply to all projects. Figures 28 & 29 illustrate the role of the PMC in this respect and the way in which all criteria will be applied in the selection and prioritisation of projects for approval of grant.

**Figure 28. Setting selection and prioritisation criteria**

**Figure 29. Applying selection and prioritisation criteria**

6.48 Once agreed by the Managing Authority, a Framework will be posted on the website, as “AGREED”, for the information and guidance of prospective sponsors and other stakeholders. It will also be used by the Managing Authority Project Development Officers and Priority Controllers in their consideration of Expression of Interest (EOI) requests and in the subsequent selection and prioritisation of projects.

### **Project handling, selection and prioritisation arrangements**

6.49 The Managing Authority will ensure that organisations interested in benefiting from funding through the Operational Programme understand the nature of the programme and the route they need to follow in order to secure a grant. The Managing Authority will provide interactive website facilities to enhance the engagement with stakeholders and prospective sponsors and to enable sponsors to submit their project proposals and their claims electronically.

6.50 The Managing Authority will maintain a Helpline to handle enquiries from prospective sponsors and other stakeholders and to provide initial information, advice and signposting. This will be an important enhancement to previous arrangements and will ensure a good quality of customer service for prospective sponsors and other stakeholders.

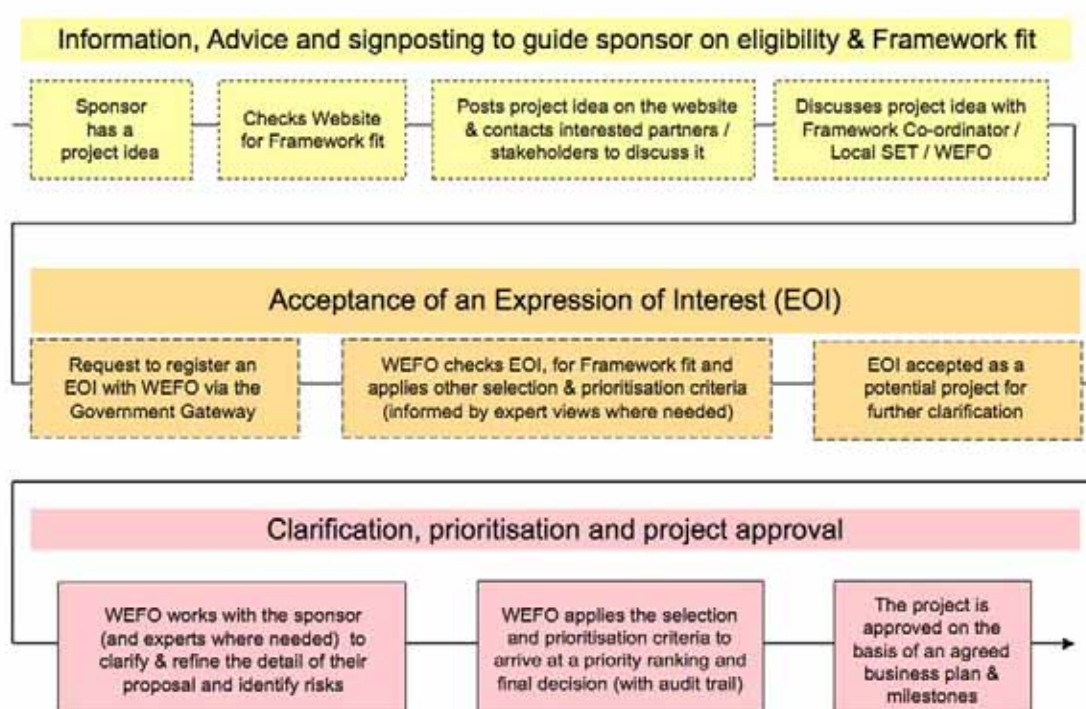

6.51 The arrangements for the delivery of the Operational Programme will be straightforward. Strategic Frameworks will provide Operational Strategies to guide

the nature of interventions, which will be delivered through projects. The Managing Authority will approve those projects directly and does not envisage the use of Global Grants as defined by Article 42 of Regulation (EC) [1083/2006].

6.52 In addition to the fundamental criteria of eligibility under the rules and the criterion of Framework fit, criteria for the selection and prioritisation of projects, covering important aspects of both benefit and risk, will be approved by the PMC. Figure 30 illustrates the route that a prospective project sponsor will take to secure a Structural Fund grant.

**Figure 30. Signposting on eligibility and Framework fit**

6.53 Innovative action projects and projects proposing transnational or inter-regional action will be specifically identified by the Managing Authority at the stage of submission of an Expression of Interest and sponsors will be given specific advice and guidance in relation to their implementation, evaluation and dissemination. The Managing Authority will separately monitor these projects and will report on them to the Programme Monitoring Committee. National eligibility rules will apply to all such projects. In the case of all approved projects, the sponsor will be responsible for delivering and spending against profile to achieve the projected outputs and results.

6.54 If a project of any kind is found at any time to be in breach of any of the following conditions, listed below, then that project sponsor will be liable to claw back of funds by the Managing Authority, and projects which sub-contract all or part of their delivery activity will be liable should any of their sub-contractors be

found to be in breach of contract, or responsible for irregularities. Welsh Assembly Government procurement requirements in respect of sub-contracted activity will apply to all projects:

- EU Regulations;
- the National rules set to govern the delivery of the Operational Programme;
- State Aid rules; or
- the specific terms and conditions applied to the project by the Managing Authority in their offer of grant letter.

6.55 The Welsh Assembly Government *Value Wales* Department has established two important websites - *Buy4Wales* <http://www.buy4wales.co.uk> and *Sell2Wales* <http://www.sell2wales.co.uk> - to ensure a wide, open and transparent approach to procurement for public sector contracts. In addition to advertising tendering opportunities, the *Sell2Wales* site offers information, advice and support for organisations seeking to tender for contracts. In discussion with *Value Wales* the Managing Authority have arranged for all EU-funded projects (regardless of the sector to which the sponsor organisation belongs) to advertise their procurement activities through these sites. This will ensure wide, open, and assisted access to opportunities for delivering projects approved under the ESF Regional Competitiveness & Employment and all other 2007-13 programmes. The Managing Authority will ensure that public contracts or concessions awarded, concerning projects benefiting from the assistance of the European Social Fund programmes comply with the provisions of Directives 2004/17/EC<sup>166</sup>, 2004/18/EC<sup>167</sup>, Regulation (EC) No 1564/2005<sup>168</sup> or the Treaty principles where applicable.

## IMPLEMENTATION OF THE CROSS-CUTTING THEMES

6.56 The Cross-Cutting Themes form an integral part of management of the Programme and projects. Each Priority within the programme will use the CCT objectives within the context of the activities to be funded. Activity level guidance will be prepared together with best practice case study examples that will provide specific information on how project sponsors can address environmental sustainability and equal opportunities within their project plans. Specialist advisers in Environmental Sustainability and Equal Opportunities work within WEFO and will provide support to framework coordinators, project sponsors and partnerships. Specialist advice will also be available through the involvement of key organisations in the region including the Environment Agency, the Countryside

---

<sup>166</sup> Directive 2004/17/EC of the European Parliament and of the Council of 31 March 2004 on coordinating the procurement procedures of entities operating in the water, energy, transport and postal services sectors, OJ L 134, 30.4.2004

<sup>167</sup> Directive 2004/18/EC of the European Parliament and of the Council of 31 March 2004 on the coordination of procedures for the award of public works contracts, public supply contracts and public service contracts, OJ L 134, 30.4.2004

<sup>168</sup> Commission Regulation (EC) No 1564/2005 of 7 September 2005 establishing standard forms for the publication of notices in the framework of public procurement procedures pursuant to Directives 2004/17/EC and 2004/18/EC of the European Parliament and of the Council (Text with EEA relevance), OJ L 257, 1.10.2005

Council for Wales and the Commission for Equality and Human Rights. A key objective will be to provide the specialist input at an early stage in the process to maximise take up of opportunities to promote the themes.

6.57 Cross cutting theme targets set at the level of the activities to be supported by the Regional Competitiveness & Employment Programme provide an important driver for encouraging projects to address the Programme's environmental sustainability and equal opportunities objectives. The horizontal integration of both themes will be viewed as an eligible activity for funding support so that it can offset any potential negative impacts (for example negative environmental externalities) or to maximise the opportunities for integration (for example in a more diverse workforce). Matrices have been prepared that show the detailed activities that will be supported under the Priorities and Themes, to achieve horizontal integration – see Annexes B and C.

### **Gender Equality and Equal Opportunities**

6.58 In accordance with EU Regulation [1083/2006] Article 16, and EU Regulation [1081/2006], Article 6, gender equality and equal opportunities and the protection of all persons against discrimination will be promoted in the preparation, implementation, monitoring and evaluation of the ESF Regional Competitiveness & Employment Operational Programme.

6.59 The programme has been developed in partnership with a wide variety of stakeholders and interested parties, including the statutory and representative equality bodies, through an External Stakeholders Group and five expert, partnership – based workstream groups. The WEFO Equality Adviser has been a standing representative at all five workstream groups, [Operational Programme Workstream, Programme Management and Implementation Workstream, Evaluation and Monitoring Workstream, Territorial Co-operation and Governance and Compliance Workstream]. This has helped to ensure that equality issues have been firmly on the agenda from the start rather than bolted on at a later stage. The Equality Adviser has also provided expert input to discussions on the equality indicators proposed for the new programme.

6.60 In addition to events organised by partners, WEFO has also held consultation events across East Wales, and each of these has included a workshop on the integration of gender equality and equal opportunities. The feedback from these events and the responses to the formal public consultation indicate broad support for the retention and integration of equal opportunities into all aspects of the programme through its application as a cross-cutting theme.

6.61 All operations co-financed by the Structural Funds must comply with and where appropriate contribute to Community policy and legislation on gender equality and equal opportunities. The Managing Authority is committed to ensuring that gender equality and equal opportunities are promoted in the preparation, implementation, monitoring and evaluation of the Operational Programme. Equally, the Managing Authority will strive for a balanced participation of women and men in the management and implementation of the operational programme at local, regional and national level. Gender and equality mainstreaming i.e. ensuring the

integration of the gender perspective at all stages will be promoted alongside specific actions for women and other groups. Accessibility for disabled persons shall be considered in defining the operations to be supported by the Funds and in the various stages of implementation.

6.62 Each project supported under the programme will be expected to contribute to the relevant equal opportunities objectives, and to adopt the relevant indicators of equality of opportunity set out in Chapter 4 in respect of each priority. Specific activities to support the implementation of the Equal Opportunities theme will include:

- Specialist advice including equal opportunities assessments, will be available at an early stage to ensure the integration of equal opportunities into project plans;
- Specialist advice to projects on equal opportunities mainstreaming issues, provided at early and ongoing stages in the process;
- Activity level guidance together with best practice case study examples that will provide specific information on how sponsors can address gender equality and equal opportunities within their project plans;
- Equal opportunities targets integrated into priorities acting as a lever to encourage projects to contribute. See Chapter 4 for specific priority targets;
- Regular monitoring of progress, allowing for early intervention if necessary;
- update reports to the PMC and other stakeholders;
- Continued involvement of the external Cross Cutting Themes Group; and
- WEFO encouraging key equality organisations to be involved in supporting an effective network of specialist support.

## **Payment Bodies**

### *Payments from the Commission*

6.63 The National Assembly for Wales will receive Structural Funds payments from the European Commission. Payments will be made to the nominated bank account which will be controlled by Finance Division, Welsh Assembly Government. WEFO will liaise with Finance Division to ensure Structural Funds payments from the European Commission are correctly accounted for and are separately identifiable.

6.64 Shortly after the elections for the National Assembly for Wales in May 2007 the functions of the National Assembly for Wales will be transferred to the Welsh Ministers of the National Assembly for Wales (collectively known as the Welsh Assembly Government). At this point the Finance Division of the Welsh Assembly

Government, acting on behalf of the Welsh Ministers will receive payments from the Commission.

*Payments to Beneficiaries*

6.65 The Managing Authority will pay the beneficiaries (projects) on receipt of valid claims in accordance with Article 80. WEFO will be responsible for making payments to beneficiaries. The WEFO Payments Branch will work in partnership with Project Development Officers in the Programme Management Division on project monitoring issues but will be wholly responsible for authorising payments, thereby ensuring a separation of duties between those that approve and those that pay. The branch will also be separate from the Certifying Authority which will be responsible for making expenditure declarations to the EC. A structure chart for WEFO is available on the WEFO website<sup>169</sup>.

6.66 Beneficiaries will be expected to submit claims at regular intervals to report actual expenditure and project activity. Claim intervals will be either monthly or quarterly, to enable close monitoring of projects against approved activity. The claims process will allow sponsors to report progress on the project and to provide revised spending plans which will be essential for monitoring at both project and programme level for N+2 purposes.

6.67 Applicants will generally claim on-line through WEFO's Programme and Project Information Management System (PPIMS) database which it is planned will be introduced through 2007 to 2008. This will provide automatic claim invitation and validation prior to submission. This will ensure all fields in the claim form are fully completed and undertake arithmetic calculations. It will also identify and seek explanations behind any breaches of tolerance where the project is not delivering as approved. This will not only improve the quality of claims submitted, resulting in less having to be returned, but will ensure close project monitoring alerting both WEFO and beneficiaries to issues as soon as they arise. Pre-printed paper claim forms will be available for those sponsors who do not have access to on-line functionality. These will undergo the same validation checks at the point of input into PPIMS by WEFO staff.

6.68 Most beneficiaries will be paid in arrears (they will claim expenditure actually paid out in the previous month/quarter), against a standard grant intervention rate approved for the project. However, to overcome cash flow problems often encountered by voluntary or private, non-profit organisations, WEFO will provide the option of paying these organisations in advance. Beneficiaries will also have the option (where WEFO considers this appropriate) to claim on the basis of need (i.e. the difference between expenditure and income over any given period).

6.69 All projects will be subject to grant retention (normally 10%) subject to satisfactory submission of a final claim and external audit certificate.

---

<sup>169</sup> [www.wefo.wales.gov.uk](http://www.wefo.wales.gov.uk)

## **Eligibility of Expenditure**

6.70 The Managing Authority for the Operational Programme will draw up rules on the eligibility of expenditure in accordance with Article 56(4). These rules will take account of the provisions and exceptions as set out in the ESF Regulation (EC) 1081/2006, the General Regulation (EC) 1083/2006, the Implementing Regulation (EC) 1828/2006, the ERDF Regulation (EC) 1083/2006, existing (and updated) guidance and operational manuals issued by the Managing Authority.

6.71 The Managing Authority will provide the Commission with information on the national rules for eligibility established and applicable to the Operational Programme at the latest by the date of the submission of the description of the management and control systems and the report on the compliance of the systems in accordance with Article 71 of Regulation (EC) [1083/2006].

## **Interest Generated**

6.72 Any interest generated by payments from this Operational Programme to funds as defined in Article 44 shall be used in accordance with the provisions of Article 78(7). For example, interest generated from payments to financial engineering instruments will be reinvested for the benefit of small and medium sized enterprises.

6.73 In accordance with Article 83, any interest generated by the pre-financing shall be posted to the Operational Programme concerned, being regarded as a resource for the Member State in the form of a national public contribution, and shall be declared to the Commission at the time of the final closure of the Operational Programme.

## **Audit Arrangements**

6.74 Project sponsors are required to provide independently verified audit certificates as part of their own project management and in support of payment requests to WEFO. These certificates will need to be provided every 12 months during the life of a project and also at the end of the project. These audits will be undertaken by a suitably qualified auditor external to the organisation claiming the grant.

6.75 Each audit certificate will cover the period from the last audit (or from the start of the project), to the date of the last claim.

6.76 All audit issues will be followed up and decisions fully documented. The presumption will be that any amounts subjected to audit qualification will not be paid until the issue is resolved. If audit issues are raised WEFO will seek assurances from sponsors and auditors for future claims that any amounts disallowed have also been excluded from future claims. All audit issues will be recorded on PPIMS to allow common issues to be identified and followed up.

6.77 WEFO is looking to directly commission an external firm(s) of auditors to undertake project audits for the 2007–2013 Programme. This will ensure greater

control and assurance and will provide for a consistent approach across all projects and funds.

## **Use of the Euro**

6.78 In accordance with Article 81, certified statements of expenditure, applications for payment and expenditure in the annual and final reports will be denominated in euro. The sterling amounts will be converted to euro using the monthly accounting exchange rate of the Commission in the month during which the expenditure was registered in the accounts of the Certifying Authority.

## **State Aids**

6.79 Any public support under this programme must comply with the procedural and material EC State Aid rules applicable at the point of time when the public support is granted. It is the Member State, and in particular the Managing and Certifying Authority who are responsible for the compliance with State Aid rules of all Structural Funds operations within the programme.

6.80 In planning for the new programmes, early consideration will be given to ensuring that any aid awarded has the necessary Commission approval, either by ensuring that it complies fully with an existing approved scheme or a block exemption or by notifying the aid separately. In developing Strategic Frameworks, lead organisations will be required to identify the relevant State Aid cover for activities planned, ensuring that there is a thorough assessment of State Aid issues at an early stage of development, reducing the risk of problems during implementation.

6.81 WEFO, as the Managing and Certifying Authority, will work closely with the Welsh Assembly Government's State Aid Unit and with lead organisations to address State Aid issues identified in relation to the Strategic Frameworks, ensuring that the appropriate level of cover is in place for the various activities proposed under the Strategic Framework. This, in turn, will provide WEFO with robust assurance of State Aid compliance. Building on the experience gained during the existing programme, WEFO will ensure that appropriate systems and procedures are established for dealing with State Aid matters. These will include:

- provision of clear guidance to partners, applicants and staff;
- specific support and guidance during the development stages of projects under a Strategic Framework;
- robust methodology for assessing State Aid in relation to single projects and commissioned proposals; and
- procedures for ensuring State Aid compliance at reporting and monitoring stages.

6.82 In recognition of the ongoing reform of the State Aid rules, WEFO will liaise closely with the Welsh Assembly Government's State Aid Unit to ensure that any changes are built into the practical delivery of the Structural Funds Operational Programme, while ensuring that the full scope of the rules are applied in support of the key priorities identified.

## **Procedure for Financial Flows**

6.83 The Certifying Authority will make all payment claims to the European Commission. Interim and final claims will be derived from declarations of expenditure submitted by beneficiaries. A diagram illustrating these financial flows and the associated financial controls is at Annex I.

6.84 The Managing Authority will maintain systems to identify all receipts from the Commission and individual payments to beneficiaries. Procedures will be in place to ensure that EU regulations on prompt payments are complied with. The Managing Authority will be responsible for ensuring that the payments systems used have robust financial controls. Standards of probity and propriety consistent with those used for UK Government expenditure will be applied to the management of Community funds. As required in Article 37(1)(g)(iv), transparency in the mobilisation and circulation of financial flows will be maintained though defining the procedures used. An outline of how Community funds will flow is as follows:

- The Managing Authority input to WEFO's grants administration system, Programme and Projects Information System (PPIMS), the interim claim expenditure declared by the beneficiaries;
- The Certifying Authority submits requests for payments to the Commission at programme level;
- The Commission makes payments to the Managing Authority's account;
- The Managing Authority certifies and authorises payments to beneficiaries and carries out any recovery action necessary;
- The Managing Authority makes payments to beneficiaries through its BACS account; and
- Where the European Commission requests a refund, the Managing Authority will make the necessary payments.

6.85 The Managing Authority will bear the responsibility for investigating irregularities and making financial corrections as required. Within two months following the end of each quarter, the Managing Authority will inform the Commission of any irregularities which have been subject of a primary administrative or judicial finding and with references to irregularities previously reported any significant changes.

## **Programme and Project Information Management System (PPIMS)**

6.86 The WEFO Grants project is developing new ways of working via a web-enabled integrated system to fully comply with Commission compliance requirements, and to better enable beneficiaries to conduct their business with WEFO.

6.87 The web-enabled system being delivered is called PPIMS (Programme and Project Information Management System). The online functionality is being delivered via the Government Gateway, used across government to provide online services.

6.88 The system offers simple secure access to key documents and enables information to be shared across all WEFO offices in an efficient cost-effective way. Within PPIMS all data will be held in one place so access to information on each project will be more readily available than via current systems.

6.89 Sponsors themselves will be able to interact with WEFO online at a number of stages during the project lifecycle. Each sponsor will need to register with the Government Gateway and be given a unique user ID and password which will be used when they need online access. Sponsors will then be able to interact with WEFO online to carry out a number of actions, for example:

- completing Expression of Interest forms;
- completing pre-populated claim forms;
- accessing the latest Business Plan for their project;
- submitting supporting documents; and
- viewing any Article<sup>170</sup> 13 or 17 reports.

6.90 Benefits to project sponsors include:

- the use of standard forms/documents for all Programmes;
- an online claim form which will be pre-populated with data;
- being alerted via email when there is information on the website for their attention and action;
- having all information on the project being held in one place; and
- use of the Government Gateway, which provides a high level of security; all sponsors will be verified against 'known facts' held by WEFO.

6.91 Monitoring data will be collected at the point of submission of the pre-populated claim forms. This data constitutes a mandatory field in the claim. Therefore, monitoring data will need to be provided as part of the claim in order for it to be accepted by PPIMS as a valid claim. The Managing Authority also has the ability to withhold payment for those beneficiaries not providing monitoring data.

6.92 Additionally, WEFO will be able to access management information for reporting to the PMC and Commission more readily, with a clear audit trail being

---

<sup>170</sup> In reference to the Implementing Regulation (EC) 1828/2006

held in one place. The processes that are being designed will be compliant with EU requirements and will be supported by an IT system that will also conform to these same requirements.

### **Computerised Exchange of Data**

6.93 The Commission will establish a computer system to permit the secure exchange of data between the Commission and WEFO. WEFO will be involved in the development, and any major redevelopment, of that computer system. The computer system will be used to exchange information about the Operational Programme as set out in the Commission's Implementing Regulation and noted in Article 37(1)(g)(vi).

6.94 The Commission and WEFO will ensure that the Community and national provisions on the protection of personal data are complied with. Information exchanged shall be covered by professional confidentiality and be protected in the same way as similar information is protected by the national legislation of the United Kingdom.

6.95 In addition, information may not be used for any purpose other than that agreed between the WEFO and the Commission, unless WEFO has given their express consent, and provided that the provisions in force in Wales do not prohibit such use.

6.96 The computer system shall contain information of common interest to the Commission and WEFO. The content of the computer system for data exchange is detailed in Article 40 of the Implementing Regulation (EC) 1828/2006 and will be transmitted in the format given in the annexes of the Implementing Regulation. This will facilitate financial transactions and enable monitoring to be carried out.

6.97 Exchange of data and transactions shall be signed electronically in accordance with Article 37(1)(g)(vi) and the Implementation Regulation. The Commission shall specify the arrangements for use of electronic signatures.

6.98 A document shall be regarded as having been sent to the Commission once it has been signed by WEFO in the computer system. The Commission acknowledges that the date of receipt by the Commission shall be the date on which WEFO sends the documents.

6.99 In cases of *force majeure*, particularly the malfunction of the computer system or the failure of a lasting connection, WEFO may forward information and documents to the Commission in hard copy.

6.100 The Commission will provide the technical specifications for the exchange of data and WEFO will develop its computer systems to meet those specifications.

6.101 WEFO will develop its computer systems to retain the data required for an audit of its accounts. WEFO will set up reliable accounting, monitoring and financial reporting computerised systems in accordance with the general principles of the management and control systems in Article 58.

6.102 WEFO has developed a new computer system PPIMS (Programme and Project Information Management System) and this will contain all the data relating to the financial transactions and monitoring information.

6.103 Extracting data from the PPIMS system will enable WEFO to exchange data with the Commission satisfying Article 66(3) and Article 37(1)(g)vi. WEFO will utilise the standard Web-Application provided by the Commission's newly developed SFC2007 system. Accessing the Commission's web site will be via the Internet (https) using Internet Explorer and entering the data via the menu driven options and screens.

## **Monitoring and Evaluation**

### *Monitoring and Evaluation Plan*

6.104 Detailed plans for monitoring and evaluation will be set out in a Monitoring and Evaluation Plan, as detailed in Article 48(1). The plan will be published on the WEFO website and will be updated regularly. A summary of the Monitoring and Evaluation Plan is set out in paragraphs 6.105 – 6.129, and Annex J – Summary of monitoring and evaluation plan.

## **Monitoring**

6.105 Article 66 states the Managing Authority and the Monitoring Committee will carry out the monitoring by reference to the financial indicators and the indicators referred to in Article 37(1)(c), and specified in the OP under the Priorities (Chapter 4).

6.106 The Operational Programme contains both high-level tracking indicators (also referred to as context indicators) and programme indicators (at Priority level and aggregated to programme level).

6.107 The high-level tracking indicators are derived from the short-listed Lisbon Structural Indicators and the Welsh Assembly Government's economic development strategy, Wales: A Vibrant Economy (see Strategy – Chapter 3). They are used to monitor changes in the socio-economic context of the programme and will be updated where appropriate in the Annual Implementation Report.

6.108 Programme indicators relate to the effects of the intervention. They fall into three categories: output (activity); result; and impact, and are linked together in a logical chain. These indicators are set at Priority level and they have been selected carefully to reflect the breadth of individual priorities, while focusing on the key priority objectives and the cross cutting themes. Monitoring against these indicators will allow Programme progress to be assessed, thereby assisting the management of the Programme. Targets have been set against the Priority level indicators where meaningful targets can be set. Should any UK wide ESF indicators be developed prior to, or during the implementation of the Operational Programme, WEFO undertakes to incorporate these indicators into the ESF Regional Competitiveness & Employment Operational Programme.

6.109 Projects will be required to report against all of the relevant indicators and, where relevant, provide participant level information required under Article 66(2) of the General Regulation [1083/2006] and Annex XXIII of the Implementing Regulation [1082/2006]. Projects will agree with the Managing Authority the timescales for reporting the monitoring data when the project is being developed.

### *Reporting*

6.110 Output and result data will be regularly collected from project managers by the Managing Authority using its grants administration system, PPIMS, to give an up-to-date picture of forecast and actual achievements. These data will be analysed regularly by the Managing Authority and will be reported, as appropriate, to the PMC. These analyses will underpin the need, should it occur, to undertake evaluation under Article 48(3) – see paragraph 6.120. Progress for the impact indicators will be assessed through evaluation and be informed by the output and result data.

6.111 Article 9(3) sets targets for expenditure for specified priorities. Annex IV, of the General Regulation (EC) [1083/2006], contains categories of expenditure to help ensure spend towards those targets. These categories will be used to report on how the programme is targeting assistance at the EU priorities of creating jobs, including meeting the objectives of the *Integrated Guidelines for Growth and Jobs (2005 to 2008)*.

6.112 The Managing Authority will make reports available to the PMC for it to be able to satisfy itself as to the effectiveness and quality of the implementation of all the Operational Programme.

### *Annual Implementation Reports*

6.113 In accordance with Article 67, the Managing Authority will submit electronically an Annual Implementation Report to the Commission within six months of the end of each full calendar year of implementation. The Report will be considered and approved by the PMC and its sub-committees where appropriate; in accordance with Article 65(d). The first report will be due by 30 June 2008.

6.114 The Annual Implementation Report is essential for reviewing Programme progress. In accordance with Article 67 it will contain details of:

- progress in implementing the Operational Programme and its Priorities together with a quantification of the indicators referred to in Article 37(1)(c) at Priority level;
- the financial implementation of the Operational Programme, detailing for each Priority:
  - the expenditure paid out by the beneficiaries included in applications for payment sent to the Managing Authority and the corresponding public contribution;

- the total payments received from the Commission and quantification of the financial indicators referred to in Article 66(2); and
  - the expenditure paid out by the body responsible for making payments to the beneficiaries;
- for information purposes only, the indicative breakdown of the allocation of Funds by categories, in accordance with the implementation rules adopted by the Commission referred to in Article 103(3);
  - the steps taken by the Managing Authority and the PMC to ensure the quality and effectiveness of implementation. This includes monitoring and evaluation, and arrangements to collect data, details of any major problems encountered in implementing the Operational Programme and the action taken in response and the use made of Technical Assistance;
  - the measures taken to provide information on and publicise the Operational Programme;
  - details of any problems relating to compliance with Community law which have been encountered in the implementation of the Operational Programme and the measures taken to deal with them;
  - information on the contribution to the Regions of Economic Change Initiative
  - the use made of Technical Assistance;
  - the use made of assistance released following financial corrections required in connection with individual or systemic irregularities in the implementation of the Programme, in accordance with Article 98(2); and
  - cases where a substantial modification has been detected under Article 57.

#### *Annual Review*

6.115 On receiving an Annual Implementation Report as noted above, the Commission and the Managing Authority will examine the progress made in implementing the Operational Programme including the main results achieved over the previous year, financial implementation, and any other issues.

6.116 The Commission may wish to comment on the implementation of the Programme to the Managing Authority, which will report the comments to the PMC and its sub-committees where appropriate, and provide a response to include action taken in response.

#### *Final Implementation Report*

6.117 A Final Implementation Report, as required under Article 67(1), will be submitted to the Commission by 31 March 2017. The same content and procedure (submission to the Commission by the Managing Authority after examination and

approval by the Programme Monitoring Committee) as for Annual Implementation Reports apply to this final report. However, for the Final Implementation Report on an Operational Programme, the time limit shall be a maximum of five months from the date of receipt of an admissible report. If the Commission does not respond within the time limit, the report shall be deemed to be accepted.

## **Evaluation**

6.118 There are three main areas for evaluation of the Operational Programme. These are Programme level; strategic framework; and project level.

### *Programme level Evaluation*

6.119 The Managing Authority will ensure (Article 47 and 48) that evaluations of the Operational Programme are carried out through a series of 'on-going evaluations', responding to policy and programming needs. These evaluations will be linked to programme monitoring, in particular where programme monitoring reveals a significant departure from the initial goals. Evaluation will also be undertaken where it is intended to substantially alter the design of the programme or where there are any notable changes in the external environment.

6.120 Programme level evaluations will consider the following issues: Relevance; Effectiveness; Efficiency; Utility; Sustainability; and Synergy. In accordance with Article 48(3) the results of these evaluations will be sent to the PMC and the Commission. Annex J contains a summary of the indicative Programme level evaluations.

6.121 The Ex-Ante Evaluations (Article 48) for the Regional Competitiveness & Employment Programmes (ERDF and ESF) were undertaken to ensure that resources are allocated optimally and to maximise the quality of plans for programme implementation. It was an interactive process, with the consultants (appointed in accordance with the public sector procurement requirements) commenting on early drafts of programme documents and revisions being made in light of these comments.

6.122 The Ex-Post Evaluation, Article 49(3), will be undertaken by the European Commission in close co-operation with the Managing Authority.

### *Strategic Framework and Project Level Evaluation*

6.123 The programme level evaluation activity will be complemented by Strategic Framework and project level evaluation. Reporting against the monitoring indicators provides part of the assessment of project progress and impact. For this reason, all project sponsors will be required to undertake or commission evaluations of their projects. The intensity of the evaluation activity will be proportionate to the size or risk of the project and will be agreed with the project at the development stage. Costs associated with undertaking evaluation will be deemed an eligible cost. All project sponsors that are awarded £2 million grant or more (ESF or ERDF) for a single project and all projects involved in implementing

innovative actions, as defined in Article 6 of Regulation (EC) 1081/2006, will be required to have the project externally evaluated by independent contractors.

6.124 Evaluation of the effectiveness of Strategic Framework strategies will be essential to inform any framework reviews undertaken during the life of the programme.

6.125 As a result of these enhanced requirements guidance will be developed to assist with the development of evaluation plans and the selection of appropriate evaluation methods at the project development stage. Throughout the programming period the Managing Authority will ensure that the quality of a sample of project level evaluations are assessed to ensure that evaluations are of a suitably robust quality.

#### *Managing Monitoring and Evaluation*

6.126 External evaluations will be carried out by experts or bodies, internal (for example the Office of the Chief Social Research Officer, Economic Advice Division or Statistical Directorate) or external, functionally independent of the Managing, Certifying and Audit Authorities.

6.127 The Managing Authority will have overall responsibility for programme-level monitoring and evaluation and for ensuring that advice and guidance on monitoring and evaluation of Strategic Frameworks and projects is provided.

6.128 Evaluation will be undertaken in the spirit of partnership so the work will be overseen by an Evaluation Advisory Group (see 6.32 – 6.33) - Evaluation of the Operational Programme).

6.129 The Monitoring and Evaluation Plan will be presented to the Programme Monitoring Committee for their consideration. Final reports of all research undertaken and commissioned to fulfil the requirements of the plan will be presented to the PMC and its sub-committees where appropriate, and to the Commission.

#### **Publicity and Information**

6.130 Information and publicity measures to be carried out by the Member States and Managing Authorities concerning assistance from the Structural Funds shall conform to the provisions of Article 69 and any rules adopted under it, and Chapter II of the Implementing Regulations.

6.131 The Implementation Regulations put forward a common methodology and approach for persons responsible for carrying out information and publicity measures, which takes account of the specific situation of each Member State. The Managing Authority responsible for implementing the programme will be responsible for publicity on the spot. Publicity will be undertaken in co-operation with the European Commission, which will be informed of measures taken for this purpose.

6.132 The information and publicity measures put in place will be presented in a structured form ('Communication Plan'), clearly setting out the overall aims and target groups; a programme of information and publicity activity; indicative budget and methods of delivery; the responsibility for delivering the activity and ways in which the activity will be monitored and evaluated. The Communication Plan will be published on the Managing Authority (WEFO) website following the European Commission's assessment of the Plan. The Communication Plan will be submitted to the Commission for examination with four months of the Operational Programme being adopted.

6.133 Communication activity will explain the funding opportunities offered by the Operational Programme, together with raising awareness of how they will benefit and provide added value for East Wales, and the role of the EU in regional development in Wales. The Managing Authority will ensure transparency in the assistance provided by the funds in its communication activity.

6.134 The Managing Authority will ensure that adequate publicity guidelines are available for project sponsors and that project sponsors meet the requirements to publicise the funding received from the Structural Funds programmes placed on them by the Commission Rules (Article 69(1) and the Implementation Regulations).

6.135 The amounts set aside to support the Managing Authority's work on the dissemination of information, publicity and communications for information and publicity are specified in the Technical Assistance Priority.

6.136 The Managing Authority will designate one or more persons to be responsible for the implementation of information and publicity measures, and will inform the Commission of those so designated.

## **CHAPTER 7: FINANCIAL ALLOCATIONS**

### **Introduction**

7.1 This section explains how resources will be allocated to implement the strategy and the Priorities identified in Chapter 4. In addition to providing rationale for priority-level financial allocations and proposed intervention rates, it also includes the detailed financial tables required under Article 37(e) of EU General Regulation [1083/2006]. The tables provide a breakdown of the total financial appropriation by year and a breakdown of the Community and national contribution by Priority.

### **Programme Funding**

7.2 The Community Strategic Guidelines emphasise the importance of concentrating resources both thematically and geographically on the investments that are fundamental for increasing long-term Regional Competitiveness & Employment, job creation and sustainable development. In deciding how best to allocate resources to support the Regional Competitiveness & Employment programmes, a range of issues have been considered. Amongst these are:

- the priorities of the programmes and how the Structural Funds can best contribute to addressing these in ways which interface with domestic programmes, and how the relatively small-scale Structural Funds programmes can add value to domestic interventions, and policy priorities add value to current strategies and actions;
- the requirement to 'earmark' resources against priorities which support the Lisbon strategy. The Welsh Assembly Government's policies for economic development as set out in Wales: A Vibrant Economy, are very much in line with the Lisbon agenda. This calls for an increase in resources in areas such as skills and employment. 98% of ESF resources under this Programme will contribute to the Lisbon earmarking targets;
- lessons learnt from the experience of the effectiveness of the current Objective 3 Programme 2000 – 2006, including the need for simpler programme structures and implementation arrangements to facilitate more "joined up" delivery;
- the responses to the public consultation on the draft programme;
- the ability to absorb available resources within the N+2 timeframe required under the regulations;
- the availability of match funding;
- state aid requirements, and
- the interface with other European programmes such as the European Agricultural Fund for Development and the European Fisheries Fund;

7.3 The Financial Tables show how programme spend will be allocated across the two priorities of the Programme. In preparing these tables, the Welsh Assembly Government has taken account of the Integrated Guidelines for Jobs and Growth, as well as the Community Strategic Guidelines, both of which emphasise the importance of focussing spend on areas that will drive forward a competitive, knowledge driven economy with emphasis placed through this programme on driving up levels of employment and raising skills levels amongst the workforce.

7.4 The Assembly Government has also taken account of the European Commission's assessment of the UK's National Reform Programmes as set out in the 2006 Annual Progress Report on Growth and Jobs: "Time to Move Up a Gear", and the subsequent European Council's recommendation to the UK in March 2007 that it should *"increase basic and intermediate skills, in order to raise productivity, and further improve employment prospects for the most disadvantaged."*

## **Priority Funding**

### *Priority 1*

7.5 This Priority aims to raise level of employment across the East Wales region by reducing levels of economic inactivity. Whilst the labour market has improved rapidly in recent years with rising employment and falling economic inactivity there is still much to be done to address the economic disparities within the sub-region. Over one fifth of the sub-regions working age population remain economically inactive with certain groups suffering greater disadvantage in accessing the labour market. Rates of economic inactivity for people with work limiting health conditions, and /or disabilities, young people classed as NEET, lone parents, people from BME communities and older people, particularly the low skilled, remain high. The Programme will allocate around 46% of available resources into helping people into sustainable employment, with approximately 85% of the funding for the Priority supporting interventions for those identified as economically inactive.

### *Priority 2*

7.6 Supporting economic growth rests not only on ensuring higher levels of employment and economic activity but also on ensuring a highly skilled workforce and raising productivity. As outlined in the Analysis and the Strategy, this sub-region already has a favourable skills profile with a higher proportion of its skill spectrum at the upper end of the skills spectrum, but despite this, there are still significant numbers of low-skilled workers throughout the region. The key challenge for the sub-region in raising productivity will be to ensure skill levels of the workforce are developed to address any skill gaps and shortages needed to support higher value adding sectors. It will focus on tackling low basic skills throughout the region by funding the provision of basic skills training, and support the development of higher level management and leadership skills for managers and workers in small enterprises (up to 50 employees) in small businesses. It will

also support interventions which improve systems for identifying and addressing future skills needs of the workforce.

### **Intervention Rates**

7.7 The average intervention rate proposed for the Programme is 40%. This rate is based primarily on our historical experience of the current Objective 3 Programme and take into account factors such as state aid limits and the availability of match funding. Any modulations to these rates would only be made as per the conditions stated within EU regulation [1083/2006] Article 52.

### **Reimbursement Rate**

7.8 In accordance with Article 53(1) of EU Regulation [1083/2006] the contribution from the ESF shall be calculated with reference to the total eligible expenditure including public and private expenditure.
