

# The All Wales COVID-19 Workforce Risk Assessment Tool

## Key points for managers

We are all working to protect communities from harm caused by Coronavirus. The All Wales COVID-19 Workforce Risk Assessment Tool supports you to fulfil the duty of care to protect the health of your staff.

### The self-assessment tool:

- will quickly identify staff who are at higher risk and suggest mitigating actions
- will signpost staff to wellbeing resources
- is accessible, effective and always up to date reflecting the latest scientific evidence.

### The manager can:

- encourage staff to use the tool, and support them to make time to self-assess
- have a conversation with each person about their individual results and take the right actions to reduce risk
- record this information and set a date to review.

## Together we'll keep our workforce safe

For further information and to use the tool please visit: [www.gov.wales/checkyourrisk](http://www.gov.wales/checkyourrisk)
