### Large Scale Combined Capital and Revenue Grant – Completed One Year Projects

Lead Partner	Project Name	Project Summary	Total Funding awarded by Welsh Government
Neath Port Talbot County Borough Council	Connecting Green Infrastructure – South West	Initial setting out of a new and collaborative partnership approach to designing and delivering green infrastructure across Neath Port Talbot, Swansea and Carmarthenshire, for the benefit of local communities and their natural environment.	£456,220.98
National Trust	Tir Afon - The Upper Conwy Natural Resources and Wellbeing Project	A large landscape scale partnership project which is working towards a cleaner, healthier catchment which benefits people and nature. This project seeks to undertake initial set up activity to improve exercise referral provision to enable a GP to prescribe outdoor exercise as an intervention for tackling and preventing physical and mental health problems as well as childhood obesity.	£138,408.51
Keep Wales Tidy	Caru Cymru Development Phase	The project delivers the first year development activity towards a holistic, collaborative approach to tackling Local Environmental Quality issues across Wales through a partnership between Keep Wales Tidy, all 22 Local Authorities and Cardiff University. It will engage the people of Wales in developing innovative solutions and taking action on priority issues that really matter to communities, enhancing the environment for people and wildlife alike.	£1,827,875.53
Monmouthshire County Council	Gwent Green Grid Partnership	The Gwent Green Grid Partnership will contribute towards developing an overarching policy framework and partnership of key organisations, informed by the: Gwent Strategic Green Corridors study, Gwent i-Tree Eco Study, Pollinator Friendly Gwent project and delivered through the Gwent GI projects proposal with practical projects on the ground.	£218,147.83

North Wales Wildlife Trust	River Dyfi Natural Restoration Project	This project aims to develop an approach prior to larger scale roll-out which helps improve water quality, reduces flood risk, restores biodiversity, increases carbon sequestration, boosts visitor derived income and improves the health & wellbeing of local people within the Dyfi Catchment area via the managed reintroduction of Eurasian beaver in the future.	£155,953.00
Open Newtown	Where the Severn Smiles	The project delivers the first stages of a unique opportunity to evidence how well-choreographed partnerships can provide a substantial net gain in biodiversity whilst simultaneously delivering wide ranging well-being benefits.	£284,430.80
<b>Total (6)</b>			<b>£3,081,036.65</b>
