Subject: Basic Income

As a more formal expression of interest in UBI, following on from your brief comments at the end of today's income maximisation session.

I'm really excited to see the UBI announcement and I'd like to get involved.

It's an area I know something about. I've been a trustee of the Citizens Basic Income Trust for some years. That's got an enormous amount of expertise, experience and research within its membership.

I've also done quite a bit of detailed modelling bringing together UBI, benefits and tax. There's an example of this in my contribution to the Palgrave International Handbook of Basic Income, published 18 months ago. I have got a current model which can be easily adapted to different schemes and which is up to date with the tax and benefits elements.

It's also, switching to my WRAC hat, something that we'd really like to help with, if we can.

Best wishes
