Dear Minister

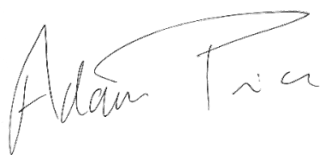

I have been contacted by several constituents regarding the proposed routes for the Llandeilo Bypass.

There are, as I'm sure you will be aware, a range of opinions on the proposed route and how it will affect traffic in the town, as well as other factors that must be brought into consideration.

You will know from our discussions on this issue that I myself am a strong supporter of the bypass, as I believe it to be the best solution that is available to solve the historic air pollution issues in the town of Llandeilo, and the increasing risk to pedestrians navigating the town centre.

However, I am mindful of the range of opinion that exists within the community, and would be most grateful if the relevant officers from your department could signpost my constituency team to the next phase of the WelTAG consultation process where residents will be able to make their views known

Diolch
