

23/5/22

File note:

Following a phone conversation with [REDACTED] agronomist [REDACTED] of [REDACTED] he confirmed the following:

He confirmed that the % of rye grass within parcels SM9914 4373 & SM9914 5670 at the time of his visit to the land on 15/2/22 was more than 25% & he considered the parcels to be improved land.

He also confirmed he would e-mail this conformation to me for our records.

**Subject:** [REDACTED] - Brynhyfryd

Following our conversation I can confirm

Fields SM99145670 and SM 99144373 had a ryegrass population greater than 25%

If there is anything else I can do to help let me know
