TECHNICAL NOTE ON SURVEY METHODOLOGY

Sampling and Fieldwork

The Omnibus sample is designed to be representative of the adult population resident in Wales aged 16 and over. Interviews were undertaken online using the Cint online panel exchange platform.

The Cint platform and its products comply with ESOMAR, MRS, ARF, MRIA, AMA, AMSRO and Insights Association standards. Cint also complies with ISO 20252. Multiple data quality checks are built into the Cint system including GEO IP check and CAPTCHA at registration, unique respondent identification and fraudulent behaviour checks. On top of this Beaufort builds in its own quality control questions and measures within the survey and excludes respondents who fail these checks.

The survey was subject to interlocking demographic quota controls of age within gender. A further separate quota control was set on social grade and questionnaires were completed by residents of every local authority in Wales.

Online surveys were configured for PC/tablet and smartphone completion and English and Welsh versions of each were offered to every respondent.

Fieldwork for the September 2022 survey took place between 19 September – 9 October 2022. A total of 1,000 interviews were completed and analysed.

Tabulations

Data has been weighted by age group, gender, Local Authority grouping and social grade to match 2011 Census figures and ensure it is fully representative of the adult population (16+) in Wales.

Tables are presented in the form of numbers and integer percentages with the un-weighted and weighted sample base shown at the top of each column. Where the base is anything other than the total sample this is indicated underneath the table heading and follows logically from the question sequence and routing.

Arithmetic rounding to whole numbers means that columns of percentages do not necessarily sum to exactly 100%. Where more than one answer can be given to a question the sum of percentages may exceed 100%. 0 denotes a weighted sample of less than 0.5 and 0% denotes a percentage of less than 0.5%. Where column bases are less than about 50, percentages need to be interpreted with care.

A standard analysis of questions asked is provided as an integral part of the service involving demographic information collected as a matter of course towards the end of the interview.

GUIDE TO THE TABULATIONS

1. Tables are presented in question order with the question number analysed shown at the top of the table.
2. The sample bases are shown at the top of each column.
3. Where the base for a table is not the total sample it is described underneath the table heading.
4. Tables are in the form of integer column percentages and actual sample numbers.
5. Arithmetic rounding to whole numbers means that columns of percentage do not necessarily sum to exactly 100%.
6. Where more than one answer can be given to a question the sum of percentages may exceed 100%.
7. 0 denotes a weighted sample of less than 0.5 and 0% denotes a percentage of less than 0.5%.
8. Care should be taken in interpretation of data where the base sizes are particularly small. The following is a guide showing confidence intervals attached to various sample sizes (showing confidence intervals where the results would be at 50% and at 10 or 90%).

95% Confidence Intervals (excluding design factors) for different results with different sample sizes:

	Un-weighted Sample Size				
	1,000	500	300	200	100
50%	+/-3.1%	+/-4.4%	+/-5.7%	+/-6.9%	+/-9.8%
10 / 90%	+/-1.9 %	+/-2.6 %	+/-3.4%	+/-4.2%	+/-5.9%

For example, if 50% of a **sample of 1,000** answers “Yes” to a question, we can be 95% sure that between 46.9% and 53.1% of the population holds the same opinion (i.e. +/-3.1%). However, if 50% of a **sample of 100** answers “Yes” to a question, we can be 95% sure that between 40.2% and 59.8% of the population holds this opinion (i.e. +/-9.8%), etc.

9. A column breakdown has been used to analyse against all questions (see next page)

CLASSIFICATION 1:

Region (groups of unitary authorities, 5 cols):

North Wales : Wrexham, Flintshire, Denbighshire, Conwy, Anglesey, Gwynedd

Mid/West Wales : Powys, Ceredigion, Carmarthenshire, Pembrokeshire

West South Wales : Swansea, Neath & Port Talbot, Bridgend

Valleys : Rhondda Cynon Taf, Merthyr Tydfil, Caerphilly, Blaenau Gwent

Cardiff & S.E. Wales : Cardiff, Vale of Glamorgan, Torfaen, Monmouthshire, Newport

Gender (2 cols)

Age of respondent (6 cols)

Combined age group (3 cols)

Support 20mph speed limit in their area (2 cols – yes / no)

CLASSIFICATION 2:

Social grade (based on occupation / work status of chief income earner) (4 cols)

Combined social class (2 cols)

Age within sex of respondent (4 cols)

Welsh speaker (2 cols)

QUESTIONS ASKED

These appeared on the questionnaire as shown overleaf

B02210-4 September Wales Omnibus

Welsh Government 20 mph FINAL

Q1. How safe do you feel when doing the following where you live? (Very safe / fairly safe / not very safe / not at all safe/ don't know / not applicable)
Randomise order

- i) Walking
- ii) Cycling on local roads
- iii) Crossing the road

Q2. Would you support a speed limit of 20mph in the area in which you live?

- Yes
- No

Q3. The Welsh Government is planning to reduce the speed limit from 30 mph to 20 mph in residential communities across Wales. What's your view on this idea?

- Strongly in favour
- Slightly in favour
- Slightly against
- Strongly against

Don't know

Q4. Here are some reasons people might support 20mph speed limits. Which of these do you agree with? *Tick all that apply*

- Encourages more walking and cycling
- Improves the quality of life
- Improves traffic flow
- Makes it safer for cyclists
- Makes it safer for pedestrians
- Makes streets more pleasant to live in
- Means children can play more safely
- Means fewer serious accidents on the roads
- Reduces noise
- Reduces pollution

- None of these
- Don't know

Q5. Here are some reasons people might oppose 20mph speed limits. Which of these do you agree with? Code all mentioned

Increases accidents
Increases congestion
Increases pollution
Makes journey times longer
Makes the quality of life worse
Might be ignored by many drivers
Might not be policed and enforced effectively
Would annoy drivers
Would make no difference to cyclists' safety
Would make no difference to pedestrians' safety

None of these
Don't know

Q6. Have you seen or heard any marketing, communications or advertising recently about legislation to reduce the speed limit to 20mph in Wales?

Yes
No

Q7. Can you tell me to what extent you'd agree or disagree with the following statements? Please tell me if you strongly agree, agree, neither agree nor disagree, disagree or strongly disagree that... Order to be randomised

- i) I wish everyone would slow down a bit on the roads
- ii) Streets would be a lot nicer for pedestrians with a 20mph speed limit
