Subject: RE: Maritime Systems; IVMS Installation - REDACTED

Good afternoon REDACTED,

Thank you for the additional photos for REDACTED.

I have just been looking at the location reports for the beacon on our VMS hub, and there haven't been any reports since the quoted installation date of REDACTED. The most recent location report was on REDACTED, a couple of days after the beacon arrived in the location near REDACTED. I also note that a number of the location reports between REDACTED and REDACTED record significant delays between the location date/time and the received date/time – just over half an hour in one case (REDACTED).

Obviously I am reluctant to proceed with linking the beacon with the vessel until we can see regular and timely location reports. Can you shed any light on the cause of the delays in receipt of location reports?

Many thanks,

REDACTED
