Subject: Deletion of file.

Information redacted

I received this from Information redacted over the weekend informing us that his final report has been published though he doesn't attach a copy. He's asking that we do not use and delete an earlier version of the report which is I assume what he sent you on 1 September. That e-mail refers to parts of the unfinished report which were sent to us earlier. I can't see that on file unless it's the bits of information he sent me. A copy of the final report would be useful.
