Cc: REDACTED  
Subject: FW: East Area - RRS - Operational Risk Assessments  
Importance: High

Morning [REDACTED]

Further to the below and attached, I support the recommendation to include speed limits initially at the sites. Enforcement needs to be considered in due course.

Could you arrange with the supply chain for notices to be issued and the necessary works to take place, while the Temporary Traffic Orders are prepared.

Could you draft a briefing note for the DMCC too please in relation to the speed limits and mitigation. Example attached for info.

[REDACTED] – to note four new sites where there will be speed limits introduced due to barrier condition and the issues with funding levels to address the back log. There are a few more that could be coming too.

Kind regards,

[REDACTED]

Subject: East Area - RRS - Operational Risk Assessments

[REDACTED]

You will be aware from discussions with [REDACTED] of the submission of the following RRS Operational Risk Assessments.

[REDACTED]  
[REDACTED]

A40 Hardwick Interchange to Raglan - Roundabout Safety Barrier (ORA) (2021/22)-  
Operational Risk Assessment – March 2022  
[REDACTED]

Attached are the mitigation summaries for each assessment together with an ORA summary of the Conclusions and Recommendations.

Also as discussed with (name REDACTED Section 40), these are being submitted for your consideration.

You will be aware from recent emails that a number of other RRS sites have recently been identified; a meeting was held last week with SWTRA to discuss some of these sites. There appears to have been further developments this week. I will cover these and also some other matters in a separate email.

If you require further information please advise.

Cofion gorau / Best regards
