

The Welsh Government

Declaration of an All-Wales Avian Influenza Prevention Zone

1. The Welsh Ministers have carried out a risk assessment under article 6(1) of the Avian Influenza and Influenza of Avian Origin in Mammals (Wales) (No 2) Order 2006 (S.I. 2006/2927 (W. 262))¹ as amended (“the Order”).
2. To reduce the risk of the transmission of avian influenza to poultry and other captive birds from wild birds or from any other source, following the increased risk levels of avian influenza transmission affecting Wales, the Welsh Ministers in accordance with article 6(1) of the Order, consider it necessary to declare the whole of Wales, as described in Schedule 5 to this declaration, an Avian Influenza Prevention Zone.
3. Pursuant to articles 6(2) and 6(4) of the Order and having taken account of the criteria set out in article 6(3), the Welsh Ministers consider it necessary to impose the following measures within the Avian Influenza Prevention Zone (AIPZ) in order to reduce the risk of transmission of avian influenza to poultry or other captive birds from wild birds or from any other source.
4. All keepers of poultry and other captive birds, including pet birds, in the Avian Influenza Prevention Zone must comply with the minimum biosecurity measures set out in Schedule 1 to this declaration (subject to paragraphs 7 and 8 below).
5. All keepers who keep 500 or more poultry or other captive birds in premises in any part of the Avian Influenza Prevention Zone must comply with the measures in Schedule 1 and in addition comply with the measures in Schedule 2 to this declaration (subject to the following paragraph).
6. Keepers of poultry or other captive birds at a premises licensed under the Zoo Licensing Act 1981 are exempted from the requirements of Schedule 2.
7. The provisions in Schedule 3 to this declaration apply in the Avian Influenza Prevention Zone to all keepers of racing pigeons, doves or other Columbiformes.
8. The provisions of Schedule 4 to this declaration apply in the Avian Influenza Prevention Zone to all keepers of birds of prey or other birds trained to fly from hand or under close control in the Avian Influenza Prevention Zone
9. These measures apply from 00:01 on 30 January 2025 until this declaration is amended or revoked by further declaration.
10. This declaration is made under article 6(1)(a) of the Order.

¹ S.I. 2006/2927 (W.262) as last amended by the Avian Influenza (Wales) (Miscellaneous Amendments) (Wales) Order 2023 (S.I. 2023/1179 (W.206)).

Signed

Richard Irvine, Chief Veterinary Officer for Wales

Under authority of the Deputy First Minister and Cabinet Secretary for Climate Change and Rural Affairs, one of the Welsh Ministers

Dated: 00:01 on 30 January 2025

Copies of this Declaration and of the Order are available via <https://gov.wales/avian-influenza>

Failure to comply with this Declaration may be an offence under section 72 or 73 of the Animal Health Act 1981.

Notes:

- (1) Where avian influenza is confirmed in poultry or other captive birds at an individual premises, Protection and Surveillance Zones are declared to prevent the spread of disease beyond the area around the infected farm. Keepers of poultry or other captive birds kept within a Protection, or Surveillance Zone (or temporary control zones or other low pathogenic restricted zones) must comply with the biosecurity requirements declared specifically for such zones. This does not remove the obligation to comply with the additional biosecurity measures required by this Declaration, including enhanced biosecurity measures if the premises contains 500 or more poultry or other captive birds.
- (2) “poultry” means a bird reared or kept in captivity for purposes of—
 - (i) the production of meat or eggs for consumption or other poultry products;
 - (ii) restocking supplies of game; or
 - (iii) any breeding programme for the production of such categories of birds or products specified in sub-paragraphs (i) and (ii);but does not include any bird that is kept for the purposes of a single household, where the bird and its keeper have no direct or indirect contact with other poultry or poultry facilities, and the bird and products of the bird are used exclusively within, or for the purposes of the same household.
- (3) “other captive bird” means a bird kept in captivity which is not poultry and includes a pet bird and a bird kept for shows, races, exhibitions, competitions, breeding or for sale;
- (4) “keeper” for the purpose of this Declaration means any person who is responsible for poultry or other captive birds, whether on a permanent or temporary basis, but does not include a person responsible for them solely because he is transporting them.
- (5) “premises” for the purpose of this Declaration means any land, building, house, shed, aviary, range, coop, netted area, yard or open area, which is used to keep poultry or other captive birds and includes contiguous ancillary areas such as bird feed bins, and storage of bird manure.
- (6) “range” for the purposes of this Declaration means any outdoor areas where poultry and captive birds are allowed access at any time.
- (7) “zoo” means a zoo, aquarium or premises within the meaning of section 1(2) of the Zoo Licensing Act 1981 which is operated under the authority of a licence under that Act or is subject to a dispensation, in a direction under section 14(1) of the Act, that the Act shall not apply to that zoo.
- (8) “anseriformes” refers to an order of birds including ducks, geese and swans.
- (9) “ratites” refers to a group of birds including ostriches, emus and rheas.
- (10) “galliformes” refers to an order of birds including turkeys, chickens, quail, partridges and pheasants
- (11) “game bird” means any pheasant, partridge, grouse (or moor game), black (or heath) game or ptarmigan or ducks bred for shooting

- (12) Nothing in this Declaration removes obligations on keepers of poultry or other captive birds from existing animal welfare requirements, and private veterinary advice should be sought by a keeper who is concerned about the suitability of housing conditions.
- (13) Guidance on biosecurity measures for poultry and kept birds may be found in Animal Health Act biosecurity guidance via [Biosecurity and preventing disease in captive birds | GOV.WALES](#)
- (14) Anyone who keeps poultry or other captive birds must keep a close watch on them for any signs of disease, and must seek prompt advice from their vet if they have any concerns. For details of how to report suspicion of disease see [Avian influenza \(bird flu\): latest update | GOV.WALES](#)

Schedule 1 - Minimum biosecurity measures applying to all keepers

1. All keepers of poultry (including game birds and pet birds) or other captive birds, irrespective of how they are kept must take appropriate and practicable steps, that can be demonstrated to an inspector on request, to ensure that—

- (a) precautions are taken to avoid the direct or indirect transfer of virus contamination into and between premises, from anything liable to spread infection such as clothing, and by cleansing and disinfection of equipment, vehicles, and footwear. Foot dip must be placed containing an approved poultry disinfectant at the correct dilution rate at strategic points including at the entry and exit of all houses or outdoor areas where birds are kept, and footwear must always be cleaned using the dips on entry and exit or alternatively disposable over-shoes or footwear should be changed when moving between bird and non-bird areas;
- (b) feed, water and bedding are stored undercover, and steps are taken to prevent access by wild birds and to minimise the risk of virus contamination. Any straw used for bedding must be covered and access to it by wild birds and rodents prevented;
- (c) there is no direct contact with poultry or other captive birds on neighbouring premises;
- (d) effective vermin control is carried out in any part of the premises where poultry or other captive birds are kept;
- (e) birds of prey are not fed with any item likely to have been exposed to virus contamination, including wild waterfowl;
- (f) the movement of people (other than in a zoo), vehicles or equipment to and from the part of the premises where poultry are kept is reduced to only essential movements for looking after their welfare, collecting eggs and feeding or movements for official or inspection visits;
- (g) all personnel are familiar and comply with the applicable requirements in this Declaration;
- (h) records are kept (other than in a zoo) of all vehicles that enter any part of the premises where poultry are kept and of all people who come into any direct contact with the poultry;

2. Any keeper of poultry (including game birds and pet birds) or other captive birds, irrespective of how they are kept, must keep records of poultry, captive birds and egg movements and make them available to an inspector or veterinary inspector on demand. Records should include:

- (a) the quantity and description (including species of bird or type of egg) transported or marketed;
- (b) the date of the movement off the premises;
- (c) the premises of destination (if known);
- (d) the name and address of the person to whom ownership or possession is being or has been transferred;
- (e) the name and address of the person to whom eggs or other poultry products have been sold or gifted.

3. Records of all poultry and other captive bird deaths and disposal must be kept and made available to an inspector on demand. Records must include:

- date of death and any clinical signs;
- date of disposal and location of relevant animal by-product disposal facility

4. Any keeper of poultry (including game birds and pet birds) or other captive birds, irrespective of how they are kept, must take appropriate and practicable steps, that can be demonstrated to an inspector on request, to ensure that—

(a) buildings that house the birds are maintained and any defects that allow water ingress or other contamination to enter the building are rectified without undue delay.

(b) anseriformes including ducks and geese are not kept in the same pen or building as other bird species (other than in a zoo);

5. Where birds are not housed, all poultry or other captive birds must be kept in fenced / enclosed outdoor areas subject to the following conditions –

(a) other than in zoos, access to open or permanent standing water must be prevented by fencing off and where possible netting ponds, standing water, or waterlogged land to prevent access by poultry or other captive birds;

(b) feed and water must be provided under cover where wild birds cannot gain access;

(c) any carcasses of wild birds must be removed as soon as possible from buildings and from the outdoor fenced range area where poultry and other captive birds have access;

(d) there must be regular cleaning and disinfecting of all concrete walkways, paths and similar surfaces to which poultry or other captive birds or wild birds have access.

(e) the range area must be regularly inspected to ensure it is not contaminated with feathers or faecal material from wild birds and reasonable steps must be taken to remove such contamination as may be present as soon as is practicable;

(f) before placing any new structures or enclosures on land for the purpose of keeping poultry or other captive birds outdoors, the keeper must arrange for the inspection of the relevant site for feathers and faecal matter from wild birds and, if such material is discovered, remove such material;

(g) measures must be taken to discourage wild birds (in particular gulls and wild waterfowl) from entering the outdoor range area and ensure that wild birds are not attracted to the vicinity of the outdoor range area,

(h) measures must be in place to ensure that wild birds are not attracted to areas under the control of the keeper, in the vicinity of the outdoor area, and in particular to watercourses, reservoirs, ponds or other standing water;

(i) proactive measures (for example, bird scarers, foils, streamers) must be taken to discourage wild birds, (in particular gulls and wild waterfowl), from entering the fenced outdoor areas or congregating in the vicinity of the outdoor range area, in particular to open or standing water;

(j) there must be regular inspection of the site and confirmation that these conditions continue to be met, minimising the risk of contact with wild birds.

6. Wild game birds “caught up” during the open season (under the Game Act 1831) must not be moved until a minimum of 21 days from the date of catching-up has elapsed, unless the movement is—

(a) direct and licensed by a veterinary inspector or by an inspector under the direction of a veterinary inspector and which may be subject to conditions; or

(b) within the same premises.

The keeper must keep a record of the date of catching up and the number of birds caught up each day. The 21-day standstill applies from the date the last bird was caught up or the date the last bird arrives at the premises where they are to be kept.

A licence under 6(a) may not be granted unless a veterinary inspector has considered:

- (i) the risk of the possible spread of avian influenza if the licence were granted;
- (ii) (ii) the effectiveness of biosecurity at the destination to prevent contact between the birds moved and other birds; and
- (iii) any precautionary measures which should be taken before commencing, during or after the movement.

“caught up” in the context of this paragraph refers to the practice of gathering together wild game birds to be held in captivity for the purpose of restocking supplies of game or any breeding programme for the production of such birds

7. All keepers must complete the [Mandatory biosecurity self-assessment checklist](#) within 7 days of this Declaration coming into force.

Schedule 2 – Enhanced biosecurity measures for premises with 500 or more poultry or other captive birds

1. Any keeper of 500 or more poultry or other captive birds must, in addition to the minimum measures set out in Schedule 1, apply the measures in paragraphs 2 to 4 of this Schedule in the following parts of the kept bird premises—

(a) a poultry/captive bird (live-bird) part (for example, in the Lion code this area is referred to as the 'Specific' area; and in Red Tractor as 'bird biosecure areas');

(b) a private (ancillary use) part (for example, in the Lion code this area is referred to as the 'General' area; and in Red Tractor as 'general biosecure areas'); and

(c) a restricted access (bio-secure barrier) part.

2. The following measures apply to a poultry/captive bird (live-bird) part of the premises—

(a) access must be restricted to essential authorised personnel only;

(b) keepers must operate effective barrier hygiene, including changing clothing and footwear, before entering and on exit from the live-bird part;

(c) only essential equipment and vehicles are permitted to enter the live-bird part;

(d) the exterior of any vehicles, including fork-lifts and pallet trolleys (particularly wheels and wheel arches) and equipment which enter or leave the live-bird part of the premises must be cleansed and disinfected on both entry and exit;

(e) thorough cleansing and disinfecting (based on industry best practice) of housing and equipment must be undertaken at the end of a production cycle and before new birds are introduced; and

(f) records must be kept of vehicles and personnel entering and leaving the live-bird part.

3. The following measures apply to a private (ancillary use) part of the premises—

(a) access must be limited to essential personnel only, and full biosecurity practices should be adopted on entry and exit to the part of the premises;

(b) this part of the premises should be fully separated from the live-bird part with a clear demarcation;

(c) waste and fallen stock must be held in appropriately biosecure facilities in this part of the premises with clear separation between both the live-bird part and the restricted access bio-secure barrier part; and

(d) the exterior of any vehicles (focusing on wheels and wheel arches) which enters or leaves the part must be cleansed and disinfected on both entry and exit.

(e) Egg producers should ensure the packing, handling and storage of second quality eggs / farm seconds is managed in a biosecure manner. Plastic egg trays must be cleansed and disinfected before use and records maintained as detailed in Schedule 1.

4. The following measures apply to the restricted access (bio-secure barrier) part of the premises—

(a) access by the public must be controlled and only essential workers or contractors should enter this bio-secure barrier part; and

(b) non-essential vehicles must not enter this bio-secure barrier part.

(c) Keepers must regularly inspect the fabric and structural integrity of any building used to house poultry for holes and leaks, with particular emphasis on roofs, gutters and downpipes. Any holes and leaks must be repaired without undue delay as many recent cases of avian influenza have been linked to water ingress and flooding.

(d) Wild game birds must not be fed within 500m of the restricted access part of the premises where this area is under the control of the keeper

Schedule 3 – Release of Racing Pigeons, Doves and other Columbiformes

(1) Schedule 1 to this declaration is subject to the following provisions, which apply to all keepers of racing pigeons, doves or other Columbiformes in the Avian Influenza Prevention Zone:

(a) Pigeons from the same loft/pigeon house may be transported to a point some distance from the home loft/pigeon house and released/liberated and allowed to return to the loft/pigeon house as part of a training and conditioning programme. The vehicle used and baskets/boxes must be cleansed and disinfected using a government-approved disinfectant.

(b) Provided the gathering is registered with APHA and the conditions of the “General licence to arrange a fair, market, show, exhibition or other gathering involving the collecting together of captive birds in Wales” are complied with, pigeon racing and multi-loft training are permitted whilst the Avian Influenza Prevention Zone is in force. Birds may be basketed, marked and transported to a liberation site and released to fly back to their home loft/pigeon house. The vehicle/transporter and baskets/boxes must be cleansed and disinfected using a government approved disinfectant.

(c) Pigeons, doves and other Columbiformes may be transported to another location and released to fly free at functions and events provided the birds are either gathered again and returned to their home premises as soon as practical or they fly to return to their home premises. Care should be taken to avoid locations where there are large numbers of wild birds or domestic poultry. An event where birds from more than one premises are present is a bird gathering and must be registered with APHA and meet the conditions of “General licence to arrange a fair, market, show, exhibition or other gathering involving the collecting together of captive birds in Wales”.

Schedule 4 – Flying from hand or under close control of birds of prey and other species (excluding anseriformes and galliformes)

(1) Schedule 1 to this declaration is subject to the following provisions, which apply to all keepers of birds of prey or other species of bird trained to fly from hand or under close control in the Avian Influenza Prevention Zone:

(a) A bird of prey used for pest control may be transported to another place some distance from the home premises, provided that place is not within a disease control zone declared under The Avian Influenza and Influenza of Avian Origin in Mammals (Wales) (No.2) Order 2006 (as amended), and flown from hand for the purposes of pest control. The vehicle used and baskets/boxes/transport must be cleansed and disinfected using a government approved disinfectant.

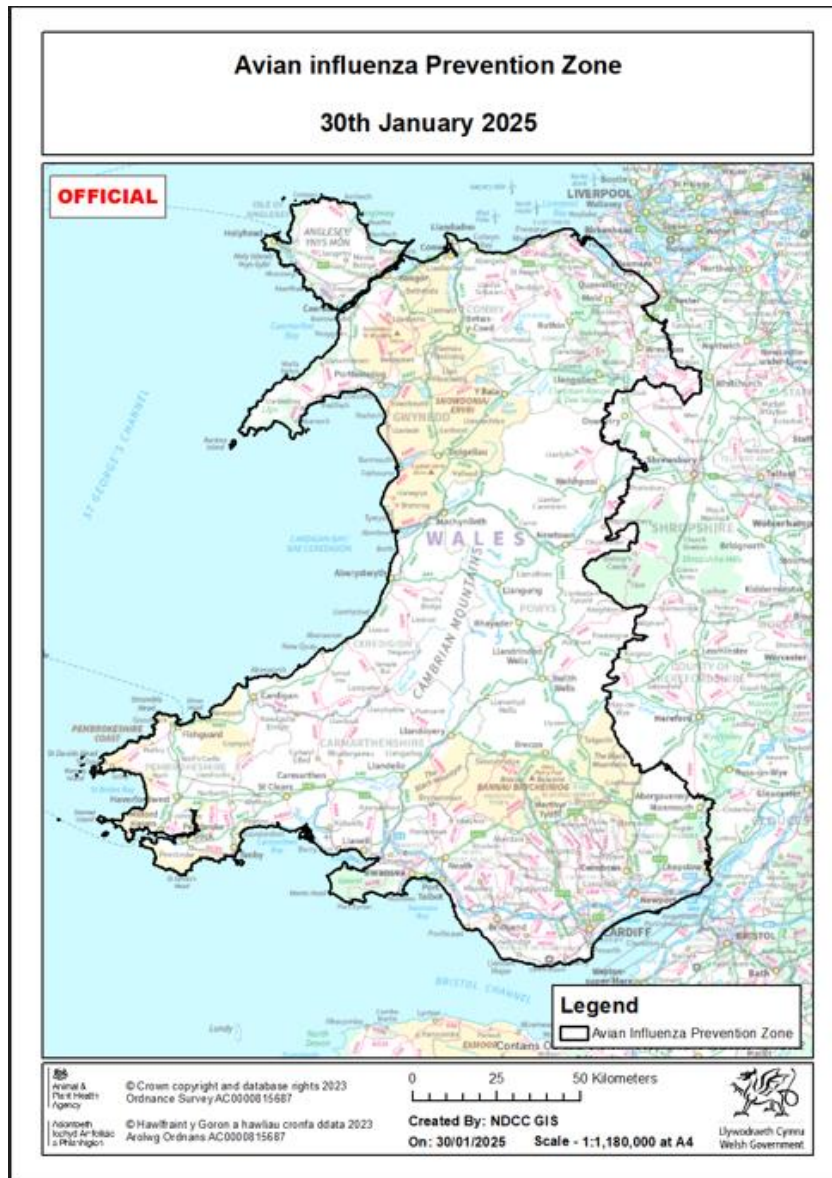

(b) Provided the gathering is registered with APHA and the conditions of the “General licence to arrange a fair, market, show, exhibition or other gathering involving the collecting together of captive birds in Wales” are complied with, gatherings of birds of prey or other species of bird trained to fly from hand or under close control, other than anseriformes and galliformes, are permitted whilst the Avian Influenza Prevention Zone is in force. The vehicle/transporter and baskets/boxes must be cleansed and disinfected using a government approved disinfectant.

(c) Birds of prey and other species (excluding anseriformes and galliformes) may be transported to another location and released to fly from hand or under close control at events provided the birds are gathered again and returned to their home premises as soon as practical. Care should be taken to avoid locations where there are large numbers of wild birds or domestic poultry. An event where birds from more than one premises are present is a bird gathering and must be registered with APHA and meet the conditions of the “General licence to arrange a fair, market, show, exhibition or other gathering involving the collecting together of captive birds in Wales”.

(d) If during any free-flying from hand or under close control, visual contact with the bird is lost for more than a minute, or the bird catches another wild bird, the bird must be isolated and closely monitored for a period of 14 days before being allowed to free-fly from hand or under close control again

Schedule 5 - Avian Influenza Prevention Zone

The Avian Influenza Prevention Zone applies to the whole of Wales.
