Hi Both

I can't see where the "breach of scheduling criteria" occurs, the SM is outside the corridor buffer as stated in [Redacted – Regulation 13 Personal Data]'s e-mail The Buffer is just the area where the cable may go but it is very unlikely to be at the extreme edge. If the cable and any associated works needed to enter the SM then SMC would be required and would probably be refused. [Redacted – Regulation 13 Personal Data] claims this is a historic landscape it is not Registered an this and other issues he raised were considered at the hearing and no decision has yet been made on the application, so most of this stuff is premature.

[Redacted – Regulation 13 Personal Data] how do we deal with this other than saying your information is noted?

Best wishes

[Redacted – Regulation 13 Personal Data]
