

## Nutrients focused group

NRW led

Local Authority led

Welsh Government led

### Local

#### Nutrient Management Boards

Developing and implementing Nutrient Management Plans for river catchments and marine areas where poor water quality is negatively impacting the condition of protected sites. Looking more widely at water quality improvement within catchments

#### SAC rivers planning subgroup

Local Authority planning officers, NRW and Welsh Government forum

### Strategic

#### Marine Nitrates Taskforce

Cross-sector, time-limited senior group to oversee progress on action to enable development and address underlying water quality issues

#### Welsh Government / NRW Officials Marine Nitrates Working Group

Tracking progress on actions and identifying next steps

#### Nutrient Trading Working Group

Developing and implementing pilot nutrient trading scheme.

#### Technical Group

Addressing technical detail required to underpin decisions on compensation and mitigation

## Broader water quality groups

NRW led

Welsh Government led

### Strategic

### Sector specific (and relevant to this issue)

#### Water Summit

Cross-sector, thematic focus on improving water quality with emphasis on identifying and progressing action

#### Wales Water Management Forum

Cross sector group providing focus for delivery of River Basin Management Plans

#### Wales Land Management Forum

Cross sector group providing focus for land management issues

#### Control of Agricultural Pollution Regulations Task and Finish Group

Advising on practical implementation of recommendations of Professor Bolton's report

#### Better River Quality Taskforce

Cross-sector, developing and implementing action plans to progress areas for action from the Summits
