Dear [REDACTED]

The recent flooding incident at Taffs Well Quarry and its impact on the local community has understandably generated significant public concern. While investigations remain ongoing, it is important that public confidence is maintained and that public safety and environmental considerations continue to be afforded the highest priority.

I understand that Council officers, including those within Shared Regulatory Services, have been actively involved in supporting affected residents, coordinating recovery efforts, and assessing any potential public health risks arising from the incident. I would be grateful if you could provide an update on the Council's current position, particularly in its capacity as the Mineral Planning Authority for the site, including whether it is considering any planning or regulatory requirements or enforcement action in relation to Breedon Group.

It would also be helpful to understand the Council's position regarding the resumption of quarrying operations at the quarry. I would welcome any views on whether there are planning, environmental, or other regulatory matters that the Council considers should be addressed by Breedon Group before operations recommence.

I appreciate that there may be limitations on the information that can be shared while investigations remain ongoing. Nevertheless, given the understandable concerns of local residents and the wider public interest in this matter, any information you can provide would assist officials in keeping Welsh Ministers appropriately informed as the investigation progresses.

Thank you for your assistance and I look forward to your response.

Yours sincerely,

[REDACTED]
