Dear [REDACTED]

The recent flooding incident at Taffs Well Quarry and its impact on the local community has understandably generated significant public concern. While investigations remain ongoing, it is important that public confidence is maintained and that the protection of public safety and the environment continues to be afforded the highest priority.

I understand that the Health and Safety Executive has been leading the investigation into the flooding incident associated with planned quarrying activities at the site. In this context, I would be grateful if you could provide an update on the HSE's current position, including whether it is considering any regulatory requirements, or enforcement action in relation to Breedon Group.

It would also be helpful to understand the HSE's position regarding the resumption of quarry operations at the quarry, including whether there are any requirements or other matters that Breedon Group should address before operations recommence.

I appreciate that there may be limitations on the information that can be shared while investigations remain ongoing. Nevertheless, given the understandable concerns of local residents and wider public interest in the matter, any information you could provide would assist officials in keeping Welsh Ministers appropriately informed as the investigation progresses.

Thank you for your assistance, and I look forward to hearing from you.

Yours sincerely,

[REDACTED]
