SUSTAINABLE FARMING SCHEME

Preparing for the end of 2026 for farm businesses in the Sustainable Farming Scheme Universal Layer

In preparation for the end of the first year of the Sustainable Farming Scheme (SFS), there are some key dates you should be aware of:

You must complete all your applicable Universal Actions (UAs) by **31 December 2026**.

You must update your SFS Universal Dashboard via RPW Online by **15 January 2027**. We will start issuing SFS balance payments from mid-December; however, balance payments are dependent on you updating your Dashboard to confirm if your UAs are complete.

We encourage you to log in, review your Dashboard regularly, and confirm the Universal Actions as they are completed.

The following pages contain information on completing your UAs, ensuring you are properly registered for RPW Online and Farming Connect, as well as the advice and support which is available.

Advice at the RWAS Winter Fair

Welsh Government staff will be available at the RWAS Winter Fair to help with scheme queries and advice. Our main stand is in the Glamorgan Hall, plus we will be opening the Welsh Government Pavilion (opposite NFU Cymru) for you to visit us with any scheme queries you may have.

Please note we will not be able to access your account to help you complete your Universal Actions or update your online records at the RWAS Winter Fair. However, we can offer general advice on completing your Universal Actions by the end of the year before your SFS balance payment can be released.

If you do require support in accessing or using RPW Online or to update your Dashboard, you can arrange a digital assistance appointment at one of our Regional Offices by contacting the RPW Customer Contact Centre on 0300 062 5004.

You can also contact the RPW Customer Contact Centre or the Farm Liaison Service (FLS) for help and support, including guidance on scheme requirements and record keeping.

RPW Online – GOV.UK One Login

The delivery and administration of the Sustainable Farming Scheme (SFS) relies on GOV.UK One Login, which also enables access to related services such as Farming Connect, FARMDATA+ for UA3 Benchmarking, and the Skills Hub for UA4 Continuous Professional Development (CPD). If you have not yet migrated your RPW Online account to GOV.UK One Login, please contact the RPW Customer Contact Centre on 0300 062 5004 for assistance.

Farming Connect re-registration

Registering by 7 December gives you time to access the learning and practical support available through Farming Connect to help you complete your SFS requirements by 31 December, in particular the mandatory Health & Safety eLearning module applicable to UA4.

SFS Universal Layer Dashboard

The SFS Universal Layer Dashboard 2026 is available on RPW Online.

The Dashboard will confirm the Universal Actions applicable for your farm business and explains the information required to confirm the completion of each Universal Action.

The Dashboard has been updated to automatically receive confirmation of any Benchmarking or learning completed with Farming Connect.

A "How to Complete" guide for the Dashboard is available by scanning the QR code.

www.gov.wales/sustainable-farming-scheme-how-complete-my-sfs-universal-layer-dashboard

Universal Action Summary

This is a high-level reminder of what you need to do to meet each Universal Action (UA). Your Universal Dashboard will confirm which UAs are applicable to you.

UA1: Soil Health

Soil test a minimum of 20% of your improved fields that have or will receive inputs during the year. Tests must be conducted by an accredited lab and include P, K, Mg, pH and Soil Organic Matter. Soil tests completed since 1January 2022 will count.

Laboratories may have a lag before being able to process new samples, so we encourage you to undertake and send off your soil samples as soon as possible.

UA2: Integrated Pest Management (IPM)

This is only applicable if you or contractors use Plant Protection Products (PPPs) on your land. You are required to keep a record of any usage of PPPs and complete an annual IPM Plan to identify ways to reduce your usage.

UA3: Benchmarking

Undertake benchmarking using an industry approved tool. This can include the Farming Connect FARMDATA+ tool or for example those provided through a Farm Assurance Scheme.

UA4: Continuous Professional Development (CPD)

You are required to complete a minimum of 6 hours of CPD which can be completed with Farming Connect and/or external CPD providers **plus** a mandatory Health and Safety eLearning training module which must be completed through Farming Connect.

You must first register with Farming Connect through RPW Online, if you have not already done so.

UA5: Habitat maintenance

There are a set of requirements for each habitat type that you are required to follow throughout the year. You should familiarise yourself with those that are relevant to your farm.

There are certain activities that need to be recorded in an activity diary and/or stocking diary.

UA6: Temporary habitat creation

This is only applicable if you needed to create temporary habitat to comply with the 10% habitat scheme requirement. There are a set of requirements for each habitat type that you were/are required to follow. There are certain activities that need to be recorded in an activity diary.

UA7: Designated Site Management Plans (DSMP)

If you have any designated sites on your farm e.g. a SSSI, you will be required to agree a management plan(s) for those sites with NRW **by the end of 2030**.

NRW will contact you to start this process. These plans will provide access to further funding and support opportunities under the Optional Layer of the scheme.

UA8: Hedgerow management

This sets out specific management requirements for hedgerows that are managed by cutting/trimming. This requires you to not trim or cut the same hedgerow in successive years i.e. you can cut them every other year, and allow incremental growth between trimming. You must also maintain or establish one hedgerow tree every 50m on average on a field parcel basis.

UA9: Woodland maintenance

This is a set of requirements (do's and dont's) that apply to your woodland areas of more than 0.1 hectares. There are certain activities that need to be recorded in an activity diary.

UA10: Tree and hedgerow planting opportunity plan

You are required to complete a tree and hedgerow planting opportunity plan on RPW Online. This will help identify areas of your farm where you could plant trees or create hedgerows in future. This is not a declaration or agreement to plant. There is more information on this UA on page 8.

UA11: Historic environment

This is a set of requirements (do's and dont's) for any scheduled monuments, historic environment features, registered historic parks and gardens or traditional farm buildings that you have on your farm. There are certain activities that need to be recorded in an activity diary.

UA12: Animal health and welfare

You are required to complete an annual Animal Health Improvement Cycle with your vet. If you are with an approved Farm Assured provider, you are exempt for 2026; these providers are identified on the SFS Universal Dashboard.

You are also required to complete an Incoming Animal Biosecurity Risk Assessment with your vet.

You will also need to complete training for Body Condition Scoring (BCS) and mobility scoring by the end of the year. Once the 'proficiency training' is completed, you must complete and record herd and/or flock scoring for body condition and mobility on a representative number of livestock.

You should contact your vet as early as possible to ensure they have sufficient time to work with you by the end of the year.

There is more information on this UA on page 8.

Tree and Hedgerow Opportunity Plan (UA10)

The aim of this Universal Action is to encourage you to consider where tree, woodland or hedgerow planting would benefit your farm business.

There are two distinct requirements of this Universal Action:

- **complete a Tree and Hedgerow Planting Opportunity Plan on RPW online by 31 December 2026**
- **demonstrate progress towards implementing your plan by 31 December 2028.**

You will need to complete a Tree and Hedgerow Planting Opportunity Plan on RPW Online, regardless of the current area of tree canopy cover or hedgerows on your holding, or the tenure of the land.

A separate "How to Complete" guide specifically for UA10 has been published on the Welsh Government website and can be found by scanning the QR code:

www.gov.wales/sustainable-farming-scheme-universal-layer-2026

New arrangements reduce duplication for farm-assured Sustainable Farming Scheme claimants (UA12)

If you are a member of Farm Assured Welsh Livestock (FAWL), Red Tractor or Pasture for Life you can use your membership to demonstrate you have met the Animal Health Improvement Cycle (AHIC) 'Measure' and 'Plan' requirements for 2026, under Universal Action 12 (UA12).

When updating your SFS Universal Dashboard, eligible farmers can declare their membership of the relevant participating scheme by selecting the scheme name. To meet the AHIC requirements through a recognised scheme, you must have successfully completed the animal health and welfare planning requirements of that scheme.

You must still complete other UA12 requirements by 31 December 2026, which includes the relevant animal welfare proficiency and scoring requirements and the Biosecurity Assessment for Incoming Stock (BAIS).

We encourage you to discuss these requirements with your veterinary practice as early as possible to allow sufficient time for completion before the deadline.

These agreements are a first step towards reducing duplication between farm assurance schemes and SFS requirements, where the relevant information is already being collected through assurance processes.

Further details of the integration arrangements for 2027 onwards will be provided as they are developed.

If you are not a member of a participating farm assurance scheme you should continue to follow the published UA12 guidance and complete all applicable requirements by 31 December 2026.

More information is available by scanning the QR code:

www.gov.wales/universal-action-12-animal-health-and-welfare

SFS Optional Layer

A number of SFS Optional Categories are now available for those farmers who wish to go beyond the Universal Layer to further benefit the farm business and local environment. Other categories will be available over the coming months. Support includes a mixture of capital and revenue support for actions such as farm infrastructure and equipment, tree planting or enhanced habitat management. Many of these categories are available to all, while some are restricted only for those in the Universal Layer due to a dependency on specific Universal Actions.

Scan the QR code for the individual application dates:

www.gov.wales/rural-schemes-application-dates

Scan the QR code Scheme guidance listed under Optional Layer:

www.gov.wales/sustainable-farming-scheme-optional-layer

Digital Assistance

Digital assistance continues to be available at our Regional Offices. If you need support accessing or using RPW Online or to update the SFS Dashboard, you can arrange an appointment at any time by contacting the RPW Customer Contact Centre.

Help and support is also available to you throughout the scheme year. In addition to digital assistance, you can contact the RPW Customer Contact Centre or the Farm Liaison Service (FLS) for guidance on scheme requirements and record keeping. Farming Connect also offers training and advisory support to help you meet the Universal Actions and make the most of the scheme.

Visit **gov.wales/contact-rural-payments-wales-rpw-online** or scan the QR code.

FARMING CONNECT ADVISORY SERVICE

SPECIALIST SUPPORT FOR WELSH FARMERS

What we aim to help you achieve

- Tailored **business and technical advice** suited to your needs
- Smooth transition into the **Sustainable Farming Scheme**
- **Reduced costs** through improved efficiency
- Adopt sustainable practices that protect the environment and enhance biodiversity
- Opportunity to **benchmark performance** and drive growth
- Identify challenges and **find practical solutions**

WHO CAN APPLY?

✓ Businessess who have registered with Farming Connect

Advice categories include:

Business and succession planning - Grassland and crop management - Diversification and added value - Specialist veterinary advice - Woodland and agro-forestry establishment and management - Health and safety - Animal health - Horticulture and organic advice - Renewable energy and energy & water efficiency - Agri-Tech - Carbon advice - Historic environment

DELIVERED BY - approved advisors, vets and solicitors

PROGRAMME BENEFITS

- Up to 80% funding *(max £3,000 per business)*
- **1-1 advice:** up to £1,600
- **Group support:** up to £600 per member
- **Joint ventures:** 100% funded up to £2,000 per member

GET IN TOUCH

To discuss your needs and next steps:

GWASANAETH CYNGHORI ADVISORY SERVICE

TRAINING HIGHLIGHTS FOR THE WINTER with Farming Connect

Animal health & welfare training workshops:

- → Lameness in Beef Cattle – new for autumn 2026
- → Sheep Lameness

E-learning:

- ✓ Complete your training online with modules covering business performance, health & safety, soils & grassland management, animal health and much more.

Accredited training courses:

- → Control of substances hazardous to health (COSHH)
- → Hegde laying with chainsaw
- → Outdoor first aid
- → Soil science (IBERS)
- → Sustainable agrifood systems: Land, livestock & climate solutions (IBERS)

All events and training listed above will count towards Universal Action 4 as part of the new Sustainable Farming Scheme requirements. All available skills & training topics can be found on the Farming Connect website.

INDEPENDENT RED TAPE REVIEW

Review of the bureaucratic burden on farms being led by John Davies. Expected to report at the end of March.

We want to hear from farmers, agents, industry and others with experience of how requirements work in practice.

You can share your views or evidence with the review by emailing: **RedTapeReview@gov.wales**

RURAL PROOFING

Our New Ambition for Wales, Programme for Government 2026-2030 outlines our vision for a prosperous, fair and more equal Wales. Supporting our rural communities forms a crucial part of this vison with a series of commitments designed to create a thriving rural economy and resilient communities where Cymraeg can flourish as a living language.

Introducing a statutory duty for rural proofing is one of these commitments. A rural proofing statutory duty would seek to ensure that spending plans and policy programmes are fully responsive to the needs of rural communities. Taking better account of the circumstances of rural areas in decision making should help address reduce inequalities linked to poorer access to services, higher living costs, lower incomes and limited transport links, as well as help identify and support economic, cultural and social opportunities in rural areas.

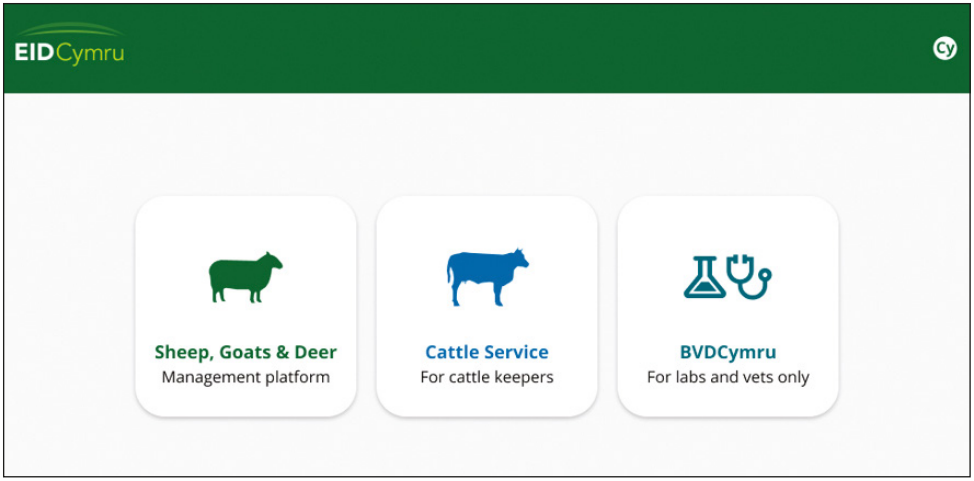

Consultation on the rural proofing proposal closed on 14 October. Responses to this consultation exercise are being analysed and will help shape the development of the legislation. We will continue our engagement throughout the Bill development stages to ensure the duty accurately reflects stakeholder views and achieves our long-term goals. If you any questions or comments, please contact the rural proofing team at **RuralProofing@gov.wales**.

EIDCYMRU

EIDCymru Cattle: Transition has Started!

From 1 July 2026 all cattle keepers in Wales have been able to create a cattle account on EIDCymru to view their BVD status as well as the BVD status of other cattle or herds.

To create an account, please scan the QR code or use **www.eidcymru.org** and access the Cattle Service tile.

To Register

- Click on the Register button.
- Enter your details. Click Register.
- Check your email inbox for a verification email, this will be active for 72 hours only.
- Create a new password.
- Click Submit. Select New keeper account. Click Continue.
- Here you must enter your: Primary CPH, RPW CRN, and choose your preferred language. Click on Submit to complete the process.

Progress to date

The transition to EIDCymru is progressing well. All Welsh BVD herd and animal status information is now available on EIDCymru. Most Welsh abattoirs are already reporting sheep, goat and cattle movements and deaths directly to EIDCymru, and Welsh livestock markets are expected to complete their transition by early 2027.

Following discussions with farmers, industry representatives and other stakeholders, we have adjusted the timetable to avoid the busy spring calving period and give keepers more time to get ready.

We will continue to work closely with farmers, markets and abattoirs throughout the changeover and will keep you updated as the plans progress. Until then, please continue to report cattle births, movements and deaths through BCMS as normal.

Bringing cattle reporting services into EIDCymru will create a single, modern system for managing cattle information and lay the foundations for future changes, including Bovine Electronic Identification (Bovine EID). We will provide more information on Bovine EID once the cattle services have moved to EIDCymru. Bovine EID is not expected to be introduced before 2028.

For the latest information and updates, visit

www.gov.wales/animal-movements-registration

In the meantime – check your cattle on holding

Taking a few minutes to check the cattle numbers and recorded events on your holding via the Cattle Tracing System (CTS) online can help spot any record issues early.

CTS uses a simple traffic light system:

- **Red** – problems you can help with
- **Amber** – problems you have responded to
- **Green** – no problems identified.

A quick check now could save problems later. Next time you are on CTS, follow up anything showing red.

Sheep and Goat Annual Inventory 2026

The 2026 Sheep and Goat Annual Inventory opens on **1 December 2026**.

All sheep and goat owners must record the number of sheep and/or goats on their holding(s) on 1 December, including animals on common land and temporary CPHs. This is a legal requirement and it should also be recorded in the on-farm Flock Record.

Returns must be submitted by 31 December 2026. Sheep and goat owners are encouraged to complete your inventory as soon as possible to ensure compliance and access available support.

How to complete the inventory

- Registered EIDCymru users via **www.eidcymru.org** from 1 December.
- Non-registered owners via the EIDCymru online portal, either themselves or via someone acting on their behalf.

Support is available from the EIDCymru team, the office will be open during the Christmas period (excluding bank holidays). Staff will also be available at the Winter Fair to answer questions and help set up online accounts.

Sheep and Goat Movement Reporting

You can also use **www.eidcymru.org** to report sheep movements, accept moves electronically and check farm movement records, helping reduce paperwork and improve record accuracy all year-round.

Did you know? If you report and accept your sheep movements online, there's no need to post the paper movement licence to EIDCymru, saving you time and postage costs.

The EIDCymru Service is here to help. You can contact the team during business hours, Monday to Friday, from 9:00am to 5:00pm.

Tel: 01970 636959

Email: **contact@eidcymru.org**

Website: **www.EIDCymru.org**

BLUETONGUE VACCINATION: PROTECT YOUR ANIMALS AGAINST BLUETONGUE

Bluetongue cases are declining in line with lower seasonal temperatures. With close to 500 farms in Wales affected during the 2026 season, the disease will overwinter and is expected to cause further outbreaks next year. Preparation is important to ensure the impact of Bluetongue is minimised at both the farm and national levels in 2027.

Vaccination remains the only viable long-term measure to protect livestock against Bluetongue. This summer showed how quickly demand can outstrip supply once disease pressure builds, so keepers who wait until the last-minute risk being unable to get hold of vaccine when they need it most. If you have not already done so, speak to your vet about ordering vaccine and vaccinating your herd or flock prior to the 2027 season.

What livestock keepers should do now

- **Speak to your vet** about Bluetongue vaccination and the most appropriate timing for vaccinating your herd or flock.
- **Plan ahead for 2027.** Bluetongue will persist over winter and may cause even more cases next year.
- **Order vaccines in good time.** This will help demonstrate demand for Bluetongue vaccines and support the availability of commercial supplies.
- **Know the signs of Bluetongue** and remain vigilant for disease.
- **Source stock responsibly.** Before bringing replacement animals onto your holding, check their Bluetongue status and ask whether they have been vaccinated.

Preparing for Bluetongue now can help ensure your animals have the best possible protection for the remainder of 2026 and 2027.

For further information on BTV-3 vaccination, including guidance for keepers and vets, scan the QR Code:

www.gov.wales/bluetongue-virus-serotype-3-btv-3-vaccine-information-keepers-and-vets

USING TEMPORARY LAND FOR LIVESTOCK PURPOSES

As the seasonal grazing period approaches, keepers are reminded of the options available for registering temporary land used for winter tack or other short-term livestock arrangements.

There are two options for registering temporary land:

Option A: Temporary Land Association (TLA)

For land within 10 miles of your Permanent CPH (PPL), a TLA allows it to be linked to your existing CPH, so movements between parcels do not need to be reported.

Key points

- TLAs can be registered for up to 364 days.
- You may request an annually recurring TLA (rTLA) for the same dates each year.
- You must provide tenure start and end dates and declare any TB restrictions.
- Livestock must not mix with animals from other keepers.
- RPW must validate the land before use.

Once validated, movements between parcels under the same CPH do **not** need to be reported, and standstill rules do not apply.

Option B: Temporary CPH (tCPH)

If the land is outside the 10-mile radius, or if you prefer not to associate it with your permanent CPH, you can apply for a tCPH.

Key points

- tCPHs are valid for up to 364 days.
- You must provide tenure dates and meet sole occupancy criteria.
- All livestock movements to/from a tCPH must be reported and recorded.
- Standstill rules and TB testing requirements apply.
- RPW will notify you 30 days before expiry.
- Animals on a tCPH must be tagged using the herd/flock mark of your permanent CPH.

To register land, use Manage My CPH on RPW Online or contact the RPW Customer Contact Centre - 0300 062 5004.

If you're unsure which option is best for your situation, please refer to the guidance on **RPW Online** on **www.gov.wales/rpw-online-using-manage-my-cph** or contact RPW for support.

TOP FOOD AND FARMING EXPERTS ASSEMBLED TO HELP FEED WALES' FUTURE

The future of Wales' food system is taking shape. We have announced the membership of the new Expert Working Group that will help develop the National Food Strategy for Wales, alongside publishing its Terms of Reference. Built around four key pillars for a resilient and sustainable food system, the group's work will also support early action in priority areas including school food, edible horticulture and the meat supply chain, helping to deliver practical benefits while the wider strategy is developed.

gov.wales/top-food-and-farming-experts-assembled-help-feed-wales-future

DELIVERING THE VISION FOR WELSH RED MEAT

Six months on from the launch of its new strategic action plan, Hybu Cig Cymru (HCC) is driving forward activity across all three priorities for Wales' red meat industry.

'Red Meat Industry: Delivering Value for Wales' set out HCC's direction for 2026-30, focusing activity on increasing the volume and value of branded Welsh red meat sold; improving economic and environmental sustainability; and providing proactive, robust and evidence-based advocacy for the industry. The plan was developed following extensive engagement with levy-payers and wider stakeholders.

On trade and market development, activity is already well under way. HCC launched the £300,000 *'Naturally Local. Look for the Logo'* campaign at the Royal Welsh Show in July. The campaign promotes PGI Welsh Lamb and PGI Welsh Beef through television, print and digital advertising. It aims to build brand recognition and reinforce the reasons to choose Welsh red meat. The campaign has since been extended across the supply chain. Promotional activity is now targeting and supporting retailers, wholesalers, processors and food service operators.

To strengthen the presence of Welsh red meat at home and internationally, HCC has continued engagement with major UK retailers alongside export development activity in markets including Germany, Italy, Singapore and the United States. Most recently, this has included HCC's attendance at SIAL Paris, one of the world's leading international food exhibitions.

Progress on economic and environmental sustainability includes the Environment Baselining Project, delivered jointly by HCC, AHDB and QMS. Baseline data collection and LiDAR surveys across participating Welsh red meat farms are complete. HCC is also delivering Welsh Sheep Genetics on behalf of Welsh Government, with a new cohort joining the three-year project and further opportunities to participate to follow.

New HCC Scholars have recently been announced, each receiving up to £5000 to travel and study topics relevant to the Welsh red meat industry. Meanwhile, a new Butchers' Club network is being established to support independent butchers serving local communities across Wales.

This gives a flavour of the activity under way to deliver HCC's vision for the Welsh red meat industry. As momentum continues, stay up to date through the HCC website, social media and their weekly e-bulletin.

Farm Liaison Service celebrates 25 years

The Welsh Government's Farm Liaison Service (FLS) is celebrating 25 years since its launch. The service was established in 2001 during the Foot and Mouth outbreak. Restrictions prevented officials from visiting farms, with the outbreak having a devastating impact on farmers and their businesses. A pilot introduced to support farmers was well received and became the foundation for the service that exists today.

How the FLS supports farmers

The eight-member team, many with farming backgrounds, attend:

- livestock markets
- agricultural shows, and
- industry events

to advise on Welsh Government rural affairs policies, grants and schemes.

The FLS offers free, confidential guidance on Welsh Government farming:

- policies
- payments, and
- regulatory requirements

This includes:

- Sustainable Farming Scheme
- agricultural pollution regulations
- animal health
- record-keeping
- RPW Online, and
- Farming Connect

Additional support

The team also supports farming families, who are:

- facing bereavement
- financial hardship, or
- poor mental health and wellbeing

They work with rural charities to signpost further help where needed.

Can FLS staff help you?

Find out how to contact your local Farm Liaison Officer on the next page or email us at **farmliaisonservice@gov.wales**
