- (a) These projections are based on the 2001 mid-year estimates of usually resident population. The figures are not forecasts of what the population will be but are an indication of what it would be based on certain assumptions regarding births, deaths and migration. See www.gad.gov.uk for latest projections.
- (b) Working age and retirement age populations based on state retirement age for given year. Between 2010 and 2020, state retirement age will change from 65 years for men and 60 years for women, to 65 years for both sexes.

(a) The number of maternities differs from the number of births as a single maternity may result in more than one birth.

(a) Mae nifer y mamolaethau'n wahanol i nifer y genedigaethau gan y gall un famolaeth arwain at fwy nag un enedigaeth.

- (a) The table is constructed from the estimated population and total deaths in each year and is based on the three year average centred on the year stated. The "expected years of life" is the average future lifetime which would be lived by persons of a particular age, if they were subject throughout their lives to the average recorded death rate of the three year period. Such a calculation excludes improvements to the mortality rates over time. Until 1992, based on year the death was registered; year of occurrence from 1993.
- (b) Provisional

- (a) Lluniwyd y tabl o'r amcangyfrif o'r boblogaeth a chyfanswm y marwolaethau ymhob blwyddyn ac ar sail cyfartaledd o dair blynedd wedi eu canoli ar y flywddyn benodol. "Blynyddoedd oes disgwylidig" yw'r cyfartaledd oes yn y dyfodol y byddai pobl o oedran penodol yn byw, pe baent yn destun y gyfradd gyfartalog o farwolaethau cofnodedig yn y cyfnod o dair blynedd drwy gydol eu hoes. Nid yw'r cyfrifiad yn cynnwys gwelliannau i'r cyfraddau marwoldeb dros amser. Hyd at 1992 ar sail blwyddyn cofrestru marwolaeth; blwyddyn digwyddiad o 1993 ymlaen.
