

Regional economic & labour market profile – South East Wales, July 2018

12 Jul 2018
SB 45/2018

The latest headline labour market statistics for South East Wales show a mixed picture compared with Wales as a whole.

Compared to Wales; South East Wales has a lower employment rate and higher unemployment and economic inactivity rates. GVA per head and average earnings are both higher in South East Wales whilst GDHI per head is lower.

About this bulletin

This quarterly statistical bulletin summarises information on the economy and labour market for the South East Wales economic region along with comparisons to Wales and the UK.

It is one of four which cover the four economic regions of Wales: North Wales, Mid Wales, South West Wales and South East Wales.

South East Wales is made up of the following 10 local authorities: Bridgend, Rhondda Cynon Taf, Merthyr Tydfil, Caerphilly, Blaenau Gwent, Torfaen, Vale of Glamorgan, Monmouthshire, Newport and Cardiff.

Summary table: Latest data for South East Wales

Overall summary

South East Wales had total Gross Value Added of £30.3 billion in 2016 which translates as £20,021 per head. This compares to £59.6 billion (£19,140 per head) for Wales. The higher GVA per head figure for South East Wales largely reflects higher GVA per job than elsewhere in Wales.

Annual Gross Disposable Household Income per head in South East Wales was £15,696 in 2016, lower than both the UK average (£19,432) and the Wales average (£15,835). Average full-time weekly earnings in South East Wales were £507.80 in 2017, higher than the Wales average (£498.40) but lower than the UK average (£550.40).

Over the latest year the employment rate and the unemployment rate increased in South East Wales whilst the economic inactivity (excluding students) rate fell. The labour market in South East Wales has generally seen similar changes to those for Wales since 2001.

The [key quality information](#) section includes a link to a data sources guide which gives information on the methodology, quality and metadata for the sources used in this output.

Please note the 'next update' dates given throughout this bulletin relate to when new data for the dataset are next being released. The StatsWales datasets will be updated at that time and can be accessed via the links given at the end of this bulletin.

Comparisons to Wales, UK & other Welsh economic regions

	North Wales	Mid Wales	South West Wales	South East Wales	Wales	UK
Employment rate ⁽¹⁾	75.4%	75.6%	70.1%	72.3%	72.7%	74.8%

(1) Rates are for those aged 16-64. Data relate to the year to March 2018 with comparisons over the latest year and 2001.

(2) Rates are for those aged 16 and over using the International Labour Organisation's (ILO) definition of unemployment and are proportions of the economically active. Data relate to the year to March 2018 with comparisons over the latest year and 2001.

(3) Rates exclude students and are for those aged 16-64. Data relate to the year to March 2018 with comparisons over the latest year and 2001.

(4) Data relate to 2016 and are provisional. Comparisons are over the latest year and 1999.

(5) Data relate to 2016 and are provisional. Comparisons are over the latest year and 1999.

(6) Average (median) gross weekly earnings. Data relate to 2017 and are provisional. Comparisons are over the latest year. Comparisons to 1999 are not available.

(7) Percentage point change for employment, ILO unemployment and economic inactivity rates. Percentage change for GVA per head, GDHI per head and average earnings.

South East Wales had the second lowest employment rate, the highest unemployment rate and the second highest economic inactivity rate amongst the 4 Welsh Economic Regions. GVA per head was the highest amongst the 4 regions, GDHI per head was the second lowest and average weekly earnings were the highest.

(a) Employment levels for those aged 16 and over.

The employment level is the total number of people that are in employment and the employment rate is the percentage of the population that is in employment.

Table 1 shows the latest employment level figures and how these have changed over time. For the year ending March 2018, the number of people in employment in South East Wales was 706,300, this is an increase of 14,400 people (2.1 per cent) compared to the same period the year before.

Chart 1 shows the latest employment rates for the economic regions and each authority within South East Wales.

Within South East Wales, 9 of the 10 authorities had increases in the employment rate over the year. Since 2001, all 10 authorities had increases, with Merthyr Tydfil having the largest (up 16.0 percentage points).

Chart 1: Employment rates, year to March 2018 (a)

Source: Welsh Government analysis of Labour Force Survey (LFS)/Annual Population Survey (APS), ONS
(a) Unemployment levels for those aged 16 and over (ILO definition of unemployment).

The unemployment level is the total number of people who are unemployed and the unemployment rate is the percentage of the economically active population who are unemployed (using the International Labour Organisation's (ILO) definition of unemployment).

Table 2 shows the latest unemployment level figures and how these have changed over time. For the year ending March 2018, the number of people who were unemployed in South East Wales was 42,400, this is an increase of 7,300 people (20.6 per cent) compared to the same period the year before.

Chart 2 shows the latest unemployment rates for the economic regions and each authority within South East Wales.

Within South East Wales, 3 of the 10 authorities had falls in the unemployment rate over the year. Since 2001, 7 of the 10 authorities had falls, with Caerphilly having the largest (down 2.1 percentage points).

Chart 2: Unemployment rates, year to March 2018 (a)

(a) Unemployment rates for those aged 16 and over (ILO definition of unemployment).

Economic inactivity – New data (next update Sep 2018)

The economic inactivity rate is the percentage of the population who are neither in employment or unemployed. Economically inactive people include people looking after the family and / or home, retirees and people with a sickness or disability.

Chart 3 shows the latest economic inactivity rates (excluding students) for the economic regions and each authority within South East Wales.

Within South East Wales, 9 of the 10 authorities had falls over the year (excluding students). Since 2001, all 10 authorities had falls with Merthyr Tydfil having the largest (down 16.7 percentage points).

Including students, the economic inactivity rate in South East Wales was 23.3 per cent, down 2.4 percentage points over the year. This was lower than the rate for Wales (23.5 per cent) and higher than the rate for the UK (21.7 per cent).

Chart 3: Economic inactivity rates (excl. students), year to March 2018 (a)

(a) Economically inactivity rates (excluding students) for those aged 16-64.

Please note the out of work benefit claimants dataset is no longer updated by the Department for Work and Pensions. See [key quality information](#) for more information.

Latest annual data

Gross value added (GVA) (next update Dec 2018)

Chart 4: GVA per head, 2016

GVA is the value generated by any unit engaged in the production of goods and services.

Total GVA in South East Wales in 2016 was £30.3 billion, up 4.6 per cent over the year and up 81.8 per cent since 1999. This compares to an increase of 4.0 per cent over the year and an increase of 80.9 per cent since 1999 for Wales.

Within South East Wales, 9 of the 10 authorities had increases in GVA per head over the year, with Caerphilly having the largest (up by 5.2 per cent). Since 1999, all 10 authorities had increases, with Rhondda Cynon Taf having the largest (up by 83.4 per cent).

Gross disposable household income (GDHI) – New data
(next update May 2019)

Chart 5: Annual GDHI per head by NUTS3 level, 2016

GDHI is an estimate of the amount of money that households have available for spending or saving. In South East Wales, GDHI per head has increased by 1.1 per cent over the year, while Wales and the UK have both increased by 0.7 per cent.

Please note, these data are not available at the geographical level required to replicate the Wales economic regions, therefore the figures for some of the regions are regarded as approximations. In the chart above, Mid Wales includes Powys but excludes Ceredigion, South West Wales includes Ceredigion and Bridgend and South East Wales excludes Bridgend.

Average (median) full-time weekly earnings
(next update Oct 2018)

Chart 6: Average full-time weekly earnings, 2017 (a)

(a) Average (median) gross weekly earnings (including overtime) for full time adults whose pay was unaffected by absence.

Average weekly earnings in South East Wales were up 0.9 per cent over the year compared to an increase of 1.0 per cent for Wales and an increase of 2.2 per cent for the UK.

Within South East Wales, 6 of the 10 authorities had increases over the year, with Blaenau Gwent having the largest increase of 20.5 per cent.

Workplace employment (next update Oct 2018)

Table 3: Total workplace employment, 2016 (a)

Source: Business Demography, ONS

(a) Stock of VAT/PAYE registered enterprises in each year. Level and percentage changes are calculated using the published rounded figures.

In South East Wales, there were 6,525 VAT/PAYE registered enterprise births during 2016. This was an increase from 6,125 enterprise births in 2015.

There were 5,175 VAT/PAYE registered enterprise deaths in South East Wales in 2016, which was an increase from 4,730 enterprise births in 2015.

The difference in births and deaths may not equal the difference in stock, because businesses may be born and die in the same period and the stock is taken at a single point in time.

Chart 8: VAT/PAYE registered enterprises per 10,000 resident population, 2016

Business structure (next update Nov 2018)

There were 104,770 enterprises active in South East Wales in 2017, of which 93.7 per cent were in the micro size-band (0-9 employees), this was similar to that for Wales (94.9 per cent).

Chart 9: Percentage of employment by enterprise size-band, 2017 (a)

(a) The size band is based upon the size of the UK enterprises and includes all enterprises that are active in Wales.

Table 5: Foreign owned companies, 2017 (a)

(levels rounded to nearest 5)

Key quality information

Relevance

This bulletin is a compendium publication used to bring together the latest key statistics relating to the economy and labour market for each of the four economic regions in Wales, in the context of the Welsh/UK economy and labour market.

This bulletin, produced by the Welsh Government, provides a summary of the sub-Wales data contained within a range of statistical bulletins and presents those estimates alongside other headline estimates for the economy and labour market for Wales and the UK. These statistics are used by the Welsh Government to monitor the headline statistics for the sub-Wales regions as well as providing comparisons to the UK and Welsh economy. The bulletin includes statistics relevant to the [Programme for Government](#) and [Prosperity for All: economic action plan](#). This bulletin was produced in response to growing user demand for more local area data which was identified in our user consultation. Our [user consultation](#) provides more information on how our outputs are used.

The bulletin is the main vehicle for the publication of results at economic region level for the Welsh labour market from the Annual Population Survey (APS), as produced by the Office for National Statistics (ONS). It also provides Welsh data from Jobcentre plus on the numbers of Jobseeker Allowance claimants and numbers of benefit claimants from the Department of Work and Pensions (DWP).

In addition to these datasets, the bulletin brings together the further datasets, for which the Welsh Government produces separate publications, including average weekly earnings, business demography, workplace employment, business structure and regional accounts data. Further information about these additional datasets can be found in the [separate publications themselves](#).

The [Department for Work and Pensions \(DWP\)](#) are no longer publishing working age benefits claimants by client group. We will no longer publish the Benefits data on StatsWales. We are in the process of identifying a new appropriate source for this data.

Accuracy

Guidance on the use of the bulletins

For further guidance on the use of this bulletin, including quality information and descriptions and comparisons of measures and sources, please refer to the [Regional Profile User Guide](#).

Data sources and quality

We have also published a [comprehensive data sources guide list](#) which provides a summary of all the main official data sources used by the Economic and Labour Market Statistics branch as well as useful links.

Definitions of regions

The four regions used in this set of bulletins are defined as:

North Wales: Isle of Anglesey, Gwynedd, Conwy, Denbighshire, Flintshire and Wrexham.

Mid Wales: Powys and Ceredigion.

South West Wales: Pembrokeshire, Carmarthenshire, Swansea and Neath Port Talbot.

South East Wales: Bridgend, Rhondda Cynon Taf, Merthyr Tydfil, Caerphilly, Blaenau Gwent, Torfaen, Vale of Glamorgan, Monmouthshire, Newport and Cardiff.

These definitions are based on the Department for Economy, Skills and Natural Resources economic regions, however, these regions split Gwynedd between Mid Wales and North Wales, with Meirionnydd being in Mid Wales and the rest in North. Due to data availability we have used whole Local Authorities rather than splitting Gwynedd.

Revisions

Where the data is not from the Welsh Government, we follow the revisions policy of the individual Government department. For data from our own outputs, we follow our [revisions policy](#).

Timeliness and punctuality

This is a quarterly bulletin, usually published in January, April, July and October. It is based on the latest version of each of the datasets it includes (see dates given in each of the headings for the next update dates).

Accessibility and clarity

Much of the data in this bulletin can be found on [StatsWales](#) which is a free-to-use service that allows visitors to view, manipulate, create and download tables from the most detailed official data on Wales. Links to specific data can be found under the relevant tables, above.

Comparability and coherence

Comparable measures for other UK countries for the data published in this bulletin are published on [StatsWales](#) where available. Links to specific data can be found under the relevant tables, above.

National Statistics status

The [United Kingdom Statistics Authority](#) has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the [Code of Practice for Statistics](#).

National Statistics status means that official statistics meet the highest standards of trustworthiness, quality and public value.

All official statistics should comply with all aspects of the Code of Practice for Statistics. They are awarded National Statistics status following an assessment by the UK Statistics Authority's regulatory arm. The Authority considers whether the statistics meet the highest standards of Code compliance, including the value they add to public decisions and debate.

It is Welsh Government's responsibility to maintain compliance with the standards expected of National Statistics. If we become concerned about whether these statistics are still meeting the appropriate standards, we will discuss any concerns with the Authority promptly. National Statistics status can be removed at any point when the highest standards are not maintained, and reinstated when standards are restored.

Well-being of Future Generations Act (WFG)

The Well-being of Future Generations Act 2015 is about improving the social, economic, environmental and cultural well-being of Wales. The Act puts in place seven well-being goals for Wales. These are for a more equal, prosperous, resilient, healthier and globally responsible Wales, with cohesive communities and a vibrant culture and thriving Welsh language. Under section (10)(1) of the Act, the Welsh Ministers must (a) publish indicators ("national indicators") that must be applied for the purpose of measuring progress towards the achievement of the Well-being goals, and (b) lay a copy of the national indicators before the National Assembly. The 46 national indicators were laid in March 2016.

Information on the indicators, along with narratives for each of the well-being goals and associated technical information is available in the [Well-being of Wales report](#).

Further information on the [Well-being of Future Generations \(Wales\) Act 2015](#).

The statistics included in this release could also provide supporting narrative to the national indicators and be used by public services boards in relation to their local well-being assessments and local well-being plans.

Further details

The document is available at:
